Owing to the whole of Springfield having been early taken up and held by the Penn family, it has been difficult to secure the names of the earliest settlers within its limits. Mention is made that one hundred and sixty acres of land were surveyed in the "Manor of Springfield," in 1690, to Thomas Fitzwater, but whether he resided on said tract is not known. The road from Philadelphia through this township to the lime-kilns at Sandy Run was ordered to be opened in 1703, and the following year extended up to Gwynedd. The earliest settlement under the circumstances could not have been made much before that date. In 1734 there were sixteen land-holders residing in the township: Harman Greathouse, 260 acres; John Greathouse, 100; Samuel Adams, 50; John Harmer, 100; William Nice, 75; Thomas Silance; Job Howel, 75; Thomas Hicks, 100; Christopher Ottinger, 85; George Gantz, 40; Allen Forster, 100; Henry Snyder, 50; Adam Read, 50; Hugh Boyd, 30; Michael Cline, 12; and George Donat, 80 acres. Nearly one-half of those names indicate a German origin, which at this day is decidedly the strongest element in its native population. Thomas Penn, son of the founder, in 1738, owned sixteen hundred acres here, being the balance still unsold of the original tract. Herman Greathouse's tract in 1705 comprised five hundred acres.

It is ascertained from the assessor's list for 1776 that Springfield contained at that time 72 taxables and 37 land-holders. Of the latter, John Nice owned 200 acres; Wm. Hicks, 100; Christopher Rex, 100; Christian Donat, 110; Andrew Redheffer, 160; John Ottinger, 100; Christopher Ottinger, 286; Michael Slatter, minister, 133; Henry Bisbing, 200; and Henry Dewees, 120 acres. Henry Friend had a grist-mill, paper-mill and ninety-three acres. The following occupations are mentioned: Ulrich Wagoner and Felix Detwiler, shoemakers; Jacob Haricher and Jacob Leslie, tailors; David Mack, smith; Jacob

Miller and John Lynn, coopers; John Server and Wm. Boler, weavers; Jacob Neff, tanner; Abraham Hiderich, carpenter; and Christopher Lance, mason. Allen Foster was collector of taxes in 1720, and Herman Greathouse in 1723. In 1767, Henry Scheetz was constable and Jacob Miller supervisor; Henry Dewees assessor, and Jacob Neff collector in 1776, and Bernard Bisbing supervisor in 1785. The supervisor's book of this township commences in 1775, and has been used continuously for this purpose down to the present time.

From the "Genealogical Record of the Schwenkfelders" we learn that Abraham Heydrick, son of Balthasar, married Susanna, daughter of Christopher Yeakle, in 1767. Their children were Sarah, Christopher, Susanna, Abraham and Maria. He died in 1826, aged nearly eighty-four, and his wife in 1834 aged ninety years. Shortly after his marriage he kept a store at the present Wheel-Pump Hotel. Abraham Heydrick, the son mentioned, married Susan, daughter of Jacob Neff, in 1803, and had children,—Mary Ann, Caleb, George N., Edward, Levi, Charles and Susanna. He died in 1866 and was the owner of a farm, hotel and other property at the foot of Chestnut Hill, so long known as Heydrick's Hollow, since changed to Heydricksdale, but better known as the Wheel-Pump. Balthasar Heydrick, born in 1750, had children,—George, Mary, Catharine, Abraham, Isaac, Samuel, Elizabeth, Ann and Susan. He was a captain in the army of the Revolution. He died in 1831, aged eighty-one years. His one-story house is still standing on the east side of the turnpike, in the central part of Flourtown, and the only log building remaining anywhere in this section of country. Dr. Christopher Heydrick was born in Springfield in 1770, and in his youth studied medicine in Philadelphia with the celebrated Benjamin Say, and graduated at the University of Pennsylvania in 1792, and for some time after was a physician at the hospital and also a member of the Academy of Natural Sciences. He removed in 1819 to Mercer County, Pa., where he died in 1856, aged nearly eighty-six years. Several members of this family still hold real estate in the township. Balthasar Heydrick, and his wife, Rosina, the ancestors, arrived from Silesia in 1734. George Heydrick is the present proprietor of the steam saw-mill and extensive machine-works near the Wheel-Pump.

The Yeakle family, now numerous here and the holders of considerable real estate, are the descendants of Christopher Yeakle, who arrived here in September, 1734, with his widowed mother, and settled in Cresheim, below Chestnut Hill, where he successfully followed the occupation of cedar cooper. The log house he built in 1743 and resided in, is still standing, and now owned by Charles Streeper. He married Maria Schultz in 1743, and died after the Revolution at Chestnut Hill, at an advanced age. Abraham Yeakle, his son, was born in 1752, and married Sarah, daughter of Christopher Wagner, in

1776. Their children were Isaac, Samuel, Jacob, Susanna, Maria, Christopher and Sarah. He died in 1841 on his farm in Springfield, now owned by Daniel Yeakle, his grandson, at Heydricksdale. What is known as the Yeakle burying-ground is located about a quarter of a mile from the Philadelphia line, immediately on the north side of Chestnut Hill. It was purchased in 1802 by Christopher Yeakle and his two sons, Abraham and Christopher, and his son-in-law, Abraham Heydrick, for one hundred dollars. It contains about one-eighth of an acre and has been recently inclosed with a new stone

RESIDENCE OF CHRISTOPHER YEAKLE, BUILT 1743.

wall. It originally belonged to the Mack family, of Germantown, and was used as a place of interment some time before 1753. Here are buried members of the Mack, Yeakle, Heydrick, Schultz, Dowers, Oberholtzer, Krieble and Shuman families of the surrounding section. Tradition states that several soldiers who had died from wounds received at Germantown and from the attack made on the Americans under General Irvine, near by, were also consigned to burial here.

Christopher Ottinger, mentioned in the list of 1734 as holding in this township eighty-five acres of land, can be named among its early settlers, originally purchased by him from Herman Greathouse, in 1706. He resided in the lower end of Flourtown, in a substantial two story stone house still standing on the east side of the turnpike, and now owned by Samuel Raney. A stone on the centre of its front bears the inscription "C. O. M. O., 1743," meaning Christopher and Mary Ottinger. On the list of 1776 we find the names of Christopher, John and William Ottinger, evidently of the same family. The name still exists here, borne by persons who hold real estate in the vicinity of the Wheel-Pump.

Flourtown is the largest village in Springfield, situated on the Spring House turnpike, or better known as the Bethlehem road, twelve miles from Philadelphia. The Plymouth Railroad has a station

here, and a turnpike leads to the Ridge road. It contains about sixty houses, four hotels, three stores, a large Odd-Fellows' Hall, built in 1878, two stories high, containing a room for lectures and concerts, and also a Presbyterian Church. This village is an old settlement, and tradition states that the early settlers of Salford and Franconia came hither with their grain to mill, from whence originated the name. A post-office was established here before 1810, when Nicholas Kline was postmaster, and previous to 1827 was moved further up, to Whitemarsh, where it remained until about 1875, when it was restored to its former place. We know by the Pennsylvania Archives that it was called Flourtown in 1781, and Scott, in his "Gazetteer" of 1795, mentions it as "a village containing sixteen or seventeen dwellings." Gordon in his "Gazetteer" of 1832, states it to contain twenty houses, five taverns and two stores. The elections of the township previous to 1847 were held in Whitemarsh, and since in this village.

Owing to its distance from the city, before the introduction of railroads the inns of Flourtown became noted stopping-places for travelers, and deserve some mention here. Michael Spiegel kept a licensed house here in 1766; John Kenner, 1767; John Streep and Philip Miller in 1773; Joseph Campbell, John Kenner, Jacob Neff, Frederick Kehlhofer and Christopher Mason in 1779. Jacob Neff, who was a collector of taxes, in 1776, kept the Wheel-Pump inn, at least at that date; consequently this is an old-established stand. Tradition states that the name was derived from a wheel-pump in use here during the Revolution and for some time thereafter. John Kenner was still in business here in 1785. Ottinger's tavern is mentioned here in 1772, and was on the present Bisbing property, near the railroad. Mason's stand was on the property of the late George Sechler. Nicholas Kline, who was postmaster here in 1810, kept the sign of the "Wagon and Horses" until his death, about 1826. This was a noted stopping place for farmers. He was an extensive owner of real estate in Springfield and Whitemarsh, and rebuilt the mill on the Wissahickon, now owned by Silas Cleaver. He was buried in the ancient Lukens graveyard, of which he was made one of the five trustees in 1786.

The Presbyterian Church is situated on the east side of the turnpike and near the railroad, in Flourtown. It is a two-story stone edifice, fifty by thirty-six feet in dimensions, built in 1857, and the only house of worship in the township. The church and graveyard comprise about three acres of ground. On the tombstones are found the names of Sliver, Lower, Thatcher Gilbert, Lukens, Dungan, Yeakle, Sorber, Bitting, Bunting, Cressman, Katz, Garner, Murphy, Kline, Soladay, Robeson, Freed, Thornton, Graeff, Gordon, Leidig, Layer, Van Winkle, Dewees, Miller, Willis, Watson, Shaffer, White and McNeill. There has recently been no regular pastor of this congregation.

To show the amount of travel which formerly passed through Flourtown, a list is given of the various stages that stopped here in 1820. A line left the Cross Keys tavern, 18 North Fourth Street, Philadelphia, daily at eight A.M. and three P.M.; one started from the Old Rotterdam daily at three P.M.; another from the White Swan, 106 Race Street, daily at the hours of nine, ten and eleven A.M., and at three, five and six P.M. These several lines had their termination here. The Bethlehem stage left for the White Swan, Sundays, Tuesdays and Thursdays, at four A.M. The mail-stage for Bethlehem left Yohe's Hotel, North Fourth Street, on the same days and at the same hours. It will thus be observed that to this place there were at that time nine daily arrivals from the city, besides the two tri-weekly lines for Bethlehem. Allowing the capacity of each coach to be twelve, this shows an accommodation by these several lines in going and returning daily of two hundred and forty passengers. We may well judge what a revenue was derived from this source by inn-keepers, toll-collectors and the village smith.

The Edge Hill Furnace is located in the extreme east corner of Springfield, adjoining the Cheltenham and Abington line. It was commenced in 1868, but not fully completed until 1872. It went into operation in January of that year, conducted by the Edge Hill Iron Company, who also erected here for the use of the workmen seventeen three-story stone dwelling-houses. The land attached is one hundred and twenty-three acres, abounding in extensive deposits of iron-ore, and having farm buildings upon it. It is now conducted by Joseph E. Thropp and Charles Richardson, and when visited, in September, 1883, had in employ fifty-five hands at the furnace, and about one hundred and fifty engaged in procuring and preparing the several materials requisite to carry it on, as ore, coal, limestone and marble. About one-third of the ore used is procured on the adjoining lands, the rest from elsewhere, which is so combined as to produce the best quality of iron. The average product had formerly been about two hundred and twenty-five tons per week, but the present energetic proprietors have attained to as high as three hundred and forty tons. Iron has been produced here that showed, on analysis ninety-seven per cent. of pure metal. The engine used has a capacity of five hundred horsepower, and two fly-wheels, each of which weigh fifty tons. These works are situated beside the North Pennsylvania Railroad, and at the northern end of Edge Hill village. From its elevated situation the two lofty stacks serve as conspicuous landmarks to the surrounding country.

In the vicinity of Sandy Run Station a considerable quantity of lime is annually produced and sent off by railroad to other sections, especially to Philadelphia, for building purposes. The limestone and iron-ore surface of Springfield takes up about two-thirds of its entire area. As to the latter, immense

quantities have been dug during the last forty years, particularly in the vicinity of Flourtown, Edge Hill village and Five Points. Near the latter place also a considerable quantity of fire-clay has been procured for the interior linings of furnaces, which is well adapted to resist heat.

ASSESSMENT OF SPRINGFIELD, 1776.

Henry Dewees, assessor, and Jacob Neff, collector.

William Nice, 200 acres, 3 horses, 2 cattle, 1 servant; William Ottinger, 2 h., 5 c.; Jacob Nice, 5 a.; Conrad Redheffer, 75 a., 2 h., 3 c.; William Hicks, 100 a., 2 h., 4 c.; Leonard Redlion, 1 h., 1 c.; Christopher Rex, 100 a., 4 h., 2 c.; Christian Donet, 110 a., 6 h., 2 c.; Christian Friend, 93 a., paper-mill, grist-mill, 3 h., 3 c.; Andrew Redheffer, Jr., 160 a., 4 h., 3 c.; Andrew Redheffer, 2 h., 4 c.; Philip Miller, inn-keeper, 30 a., 2 h., 3 c.; Henry Marcer, 1 h., 1 c.; John Ottinger, 100 a., 3 h., 5 c., 75 acres in Upp. Dublin; Jacob Haricher, 5 a., Just Art, 2 a., 1 c.; Conrad Mason, 1 a., 1 c.; John Fry, 1 c.; John Hammel, 1 c.; John Kenner, inn-keeper, 16 a., 1 h., 2 c.; Ulrich Wagoner, shoemaker, 4 a., 1 c.; Andrew Hiberger, 2 c.; David Mack, smith, 3 a., 1 servant, 1 c.; Abraham Waggener, 2 a., 1 c.; Jacob Miller, cooper, 10 a., 1 h., 1 c.; Adam Deem, 1 h., 1 c.; Susanna Koons, widow, 12 a., 2 c.; Balser Hiderich, 10 a., 1 h., 1 c.; John Server, weaver, 4 a., 1 c.; Jacob Leslie, tailor; Barnabas Francis, 4 a.; Christopher Ottinger, 280 a., 1 servant, 4 h., 4 c.; Jacob Neff, inn-keeper, 35 a. and tan-yard, 1 servant, 1 h., 1 c.; George Nice, 1 h., 1 c.; Frederick Kelhooper, 1 c.; George Fulkemer, 1 c.; Jacob Kerbach, 19 a., 1 c.; Adam Snyder, 70 a., 2 h., 2 c.; William Leverings, 30 a., 1 h., 2 c.; Henry Koons, 5 a., 1 c.; Felix Detwiler, shoemaker, 10 a., 2 c.; Adam Shisler, 4 a., 2 c.; Jacob Norcker, laborer, 2 h., 3 c.; William Burk, 1 c.; Henry Bisbing, 200 a., 4 h., 5 c.; Andrew Fie, 11 a., 1 h., 2 c.; Rudolph Ebright, 2 h., 3 c.; Philip Peterman, 1 a., 1 c.; Abraham Hiderich, carpenter, 1 h., 2 c.; Michael Slatte, minister, 130 a., 2 h., 5 c.; Christopher Lance, mason; Jacob Fisher, 50 a., 2 c.; William Boler, weaver; Henry Overlander, 20 a., 1 h., 2 c.; Christopher Hsler, laborer, 24 a., 1 h., 2 c.; George Sneering, 15 a., 1 c.; Peter Niswander, 1 h., 2 c.; Jacob Staley, 1 h., 2 c.; John Streeper, inn-keeper, 60 a., 2 h., 1 c.; John Linn, cooper, 1 c.; Henry Dewees, 120 a., 1 servant, 4 h., 5 c.; John Thomas Morris, Jacob Hempfer, John Shisler, Baltus Wolf, Jacob Rister, John Hayberger, Adam Snyder, William Dewees, Jr.

The Bethesda Home is situated in Springfield township, on the public road dividing Montgomery County from the northwestern limits of the city of Philadelphia. The premises contain about eight acres of land and are valued in the assessment books of the township at twenty-two thousand dollars, but are not taxed. The locality is healthful, and the region abounds in highly-improved farms and elegant suburban residences. It is near Wyndmoor Station, on the Philadelphia and Chestnut Hill Railroad, and is convenient of access by well-kept public highways in all directions.

The Bethesda Home is one among the comparatively few Christian charities sustained by voluntary offerings, without personal solicitation from those who have undertaken its management, and who have, in a spirit of broad humanity and an unquestioning faith in God, devoted themselves to the relief of the poor and helpless unfortunates found in all crowded communities. The citizens of the commonwealth point with a sense of pride to the splendid public charities sustained by appropriations made annually by legislative authority, but perhaps at no point from the Delaware to the Ohio will be found an institution so universal in its efforts to benefit those most in need, or so tender in its offices of mercy and philanthropy, and at no

place have a Christian people been more appreciative and responsive than those living in humble homes and abodes of affluence within the circle of influence of this home.

In the year 1851 a lady of Quaker parentage, but who had somewhat departed from the simplicity and plainness of her ancestors, united herself with the Methodist Episcopal Church, and through the earnest endeavors of this woman the work carried on by the Bethesda Home has been accomplished. A few years after her connection with the church, Annie Clements was appointed to take charge of a class connected with a missionary church, on Eleventh Street, in the southern part of Philadelphia.

The subject of founding an institution or home by which these objects could be accomplished was constantly borne in mind by Miss Clements and prayerfully considered by her. The business in which she was engaged was of such a nature that she was unable to give her personal attention to the direction of an institution such as she had in her mind, and she therefore wrote to a friend in Trenton, a devoted Christian lady, who, being free from domestic cares, was consecrating all her time and talents to doing good as she found opportunity. After much prayer and deliberation, this friend consented to Miss Clement's proposition to become a co-laborer in this good work. About this time an acquaintance wished to open a store at the corner of Eleventh and Ellsworth Streets, and let out the upper part of the building. In some respects this house was well adapted for Miss Clement's purposes, and though not able to carry out both objects in view, she felt that here was an opening by which she might accomplish one. The place had some inconveniences. Being a corner house, there was a great deal of front; the yard was small; there was no bath and only one small room on the first floor to be used by the occupants of the house. It was a four-storied building, with three rooms on a floor, well arranged and ventilated, with high ceilings and many windows. Thus, in 1859, the house was taken, trusting in God to send both inmates and support.

At first all the rooms were not appropriated to the institution; some were let out for a time to poor, respectable women; but as the family increased and rooms were vacated they were gradually occupied. Just at this time another Christian friend called on Miss Clement who seemed to be fitted for carrying out a work of faith; and being disengaged, Miss Clement told her of the proposed work, and asked if she was willing to assist the lady previously mentioned, in conducting the house, as her own business would not yet permit her to engage in the work personally. This sister also consented, and on the 3d of November they took up their abode at the home.

During the first year donations were very few. Publicity had not entered into any of their calculations, and the Bethesda Home was not known beyond the

circle of the personal acquaintances of its originators. Much of the expense of the establishment was borne by Miss Clement herself; but there was enough received from other sources to assure those who were laboring that the work was acceptable to God, and that He was pleased to have them go to Him with all their wants, instead of soliciting donations through human agency.

In the early part of May, while on a visit of a few days to a friend at Chestnut Hill, a large and commodious house was offered to Miss Clement for rent. The rent, six hundred dollars a year, seemed very high; but the location was desirable. In a situation celebrated for its salubrity, a garden already planted with vegetables for the ensuing summer, an orchard and several acres of ground attached, rendered it a very suitable place for such a family. In a few days arrangements were completed, and the inmates of Bethesda Home prepared to move on the 1st of June. At that time, Miss Clement, having freed herself from all business engagements, took up her residence at the house.

During the next ten years the good work went on, still supported by voluntary subscriptions. Within this time the home, a peaceful retreat for the aged and a shelter for the destitute and friendless orphans, cared for twenty old women, blessing God for a quiet Christian home in which to end their days. Also three hundred and fifty found here a refuge from poverty and neglect, and were brought under careful Christian training.

In 1872, Mr. Henry J. Williams, of Chestnut Hill, besides much previous kindness, built a large and commodious house for this home, at the location previously described. It is a large, comfortable-looking stone house, with a fine portico in front and a carriage drive to the door. The parlor is a beautiful room, neatly and appropriately furnished. The school-room, on the other side of the hall, is also pleasant, light and cheerful in all its appointments. The whole second floor is so nicely heated by the furnace that the children are not confined to one room, but have the range of bedrooms, hall and play-room, which conduces to their health. The floors are laid in hard wood, and the chambers are all furnished with single iron bedsteads. The third floor is furnished much like the second. Two communicating rooms are here set apart for sick nurseries, so that in contagious diseases the patient can immediately be separated from the rest of the family. The beautiful views of the surrounding landscape, which are visible from the large and airy windows of this lovely home, make the neat lodging-rooms doubly attractive.

At the close of the year 1872 it was found that the donations, including all moneys received for children's board, amounted to \$1789.35 for current expenses, besides which the sum of one thousand dollars was given for furnishing the new house.

In 1873 the children were moved into their new

home, and many and liberal were the offerings of friends, which greatly added to the comfort of the little ones. During this year the donations for current expenses and money paid for children's board amounted to \$1888.40, which covered all expenses of clothing, provisions, wages, etc. All bills had been paid monthly during this year, as was the original intention of the founder of the home. But in times of great need she allowed herself to be drawn into debt, and this is not a matter of surprise when it is remembered that she had a family of thirty or forty to supply daily with food and clothes, and many additional expenses.

Through the kindness of friends they were enabled to commence the year 1874 free from all debt.

The year 1875 opened with a balance on hand of \$13.96, and closed with forty-five children in the institution and a balance on hand of \$4.96. The expenditures for that year were \$3241.26, and the receipts resulting from the two fairs held at Mrs. F.'s and Mr. A. C.'s children's board and other cash receipts amounted to \$3246.22.

The number of children had increased to ninety-one when the year 1879 began. Sixty-eight were received during the year, seven were adopted, one was placed in Girard College, thirteen placed in good homes, two died, thirty-one were taken by their parents, three left with their mothers who were here at service. Fifty-seven being thus disposed of, it left the number one hundred and two at the close of 1879. The receipts this year were \$5189.41, and expenditures \$5169.74, leaving a balance of \$19.67.

From the report of Bethesda Home for the year 1883 it is found that the number of children had increased to one hundred and forty-one.

The receipts of the Home for 1883 were \$9695.22, and expenditures \$9114.75, leaving a balance in hand of \$580.47.

The work is distinctively a "faith" work. The feature which distinguishes it from others of like object is *direct dependence upon God*. It is that practical and entire reliance upon the promises and providence of God in Jesus Christ which casts off and aims to continue free from all earthly dependence, and which while fully recognizing and heartily responding to the human agencies in Divine beneficence, makes its requests known directly and only to God, the great giver of every good and perfect gift, with full assurance that "the Lord will provide."

The property belonging to this Home consists of eight acres of ground and the buildings thereon erected, which, together with the interest of an invested sum of thirty thousand dollars, was bequeathed to trustees for the use of the home by the late Henry J. Williams. His will directs the incorporation of the Home, indites the charter and names the corporators; but directs that

"The Trustees, to whom the lot of ground and appurtenances above mentioned and devised in trust to procure an act of incorporation, shall

Henry I. Williams

hold the same without applying for any such act so long as the present manager of the 'Home,' Miss A. W. Clement, is able and willing to continue the manager thereof, and they shall permit her to have the full, free and absolute control of the internal affairs of the same so long as she is willing to remain; but upon her death, resignation or departure, then to apply for an act of incorporation, according to the provisions of the foregoing codicil to my will."

Mr. Williams, in his endowment, only perpetuates his customary annual contribution to the Home. Owing to the decrease in the rate of interest and the growth of the work (continually increasing the cost of its maintenance), the endowment is now less than twenty per cent. of the actual cost of carrying on the institution.

HENRY J. WILLIAMS, to whose memory the Bethesda Home of Chestnut Hill is only one of many monuments in this immediate region, and whose character is held in reverent love, not only by the people of this locality, but by those of a far wider circle, because of his many benefactions and the constant exercise of his kindly qualities throughout a long lifetime, was a native of Philadelphia, and was born upon Christmas day, 1791. His descent was through a line of distinguished ancestors, nearly all of whom were possessed of those elements of Christian piety which attained so rich and perfect a fruition in the subject of the present biography. His paternal grandfather was a Puritan, a native of Boston, Mass., a man of wealth, of integrity, of extensive influence, a member of the honored band of patriots who struggled successfully against the tyranny of Great Britain, and the chairman of that memorable assemblage at Faneuil Hall which resolved to prohibit the landing of the cargo of tea sent from the mother-country, which was afterwards thrown into the waters of the harbor. He suffered a penalty for his patriotism, for when the British invested Boston all of his property was either confiscated or destroyed. The wife of this Boston patriot was also of Puritan stock and a relative of Benjamin Franklin. Their son, and the father of our subject, was General J. Williams, a man of most excellent character and the first superintendent of West Point Military Academy. Mr. Williams' mother was the daughter of William Alexander, Esq., of Edinburgh, Scotland, a near relative of Lord Stirling. Thus in his youth Mr. Williams enjoyed the advantages of high social rank. He had naturally fine qualities of mind, and they were developed by a careful military and collegiate education. In due time he chose the profession of law, studied under that eminent jurist, Horace Binney, Esq., began practice under favorable conditions, secured a lucrative practice and attained great distinction in his profession.

Mr. Williams, early in his professional life, was united in marriage with Julia, daughter of the celebrated Dr. Benjamin Rush, of Philadelphia, who, abandoning, in a great measure, the gayeties and pleasures of fashionable society, for which her high position and great personal attractions fitted her, be-

came the efficient helpmeet of her husband in all of his earnest work for the improvement of those around him and the advancement of the Christian religion.

The greatest works of Mr. Williams for the betterment of his fellow-man, and those which most endeared him to the people of this community, were performed during the latter part of his life. Indeed, his riper years were almost entirely devoted to charity and the church. The writer of an appreciative sketch says, "Though in the judgment of others Mr. Williams had been for years an exemplary Christian, yet he did not unite himself to the church until the year 1850, when he was received into full membership in the First Presbyterian Church of Philadelphia. . . .

"When the Calvary Presbyterian Church was organized Mr. Williams was one of its early members, and continued one of its liberal supporters for several years."

It was in 1857 that Mr. Williams, having accumulated considerable wealth and retired from active professional life, purchased a beautiful country-seat at Chestnut Hill, where he spent the last years of his life. Soon after his removal here he identified himself with the local church of the Presbyterian denomination, to which he transferred his membership from Calvary Church in 1866, being elected ruling elder on August 15. At this time, when in his seventy-sixth year, he seemed to receive a new impetus of spiritual energy, and his activity from then until very shortly before his death suffered little abatement.

The first of his organized and extensive liberalities was the building of an attractive and commodious edifice for a public library, which he fitted and furnished and supplied with several thousand volumes. These were made free to all classes in the community, especially the workingmen. This institution was named the Christian Hall Library. All of the current expenses of this establishment were defrayed by Mr. Williams during his life, and he left a large endowment for its use. Another monument of his liberality is the building occupied by the Orphan Home, known as the Bethesda Home of Chestnut Hill, of which a sketch has been given. This institution was also left a liberal bequest. A second building was erected by Mr. Williams a short time prior to his death.

Private benefactions, after all, engrossed the greater part of Mr. Williams' attention. They were most carefully and yet most generously bestowed, and there is no means of knowing their extent, for he distributed his alms most quietly and unostentatiously. He was actuated by the highest Christian principles, and gave not merely for the pleasure which it afforded him.

Labor for the advancement of the religion which he held sacred was the only form of activity which equalled or exceeded his practical charity. In this he was most zealous and untiring. He organized Bible-classes for youths and adults, and even at fourscore years of age was active in conducting them, giving in-

structions in the form of expository lectures. Of these lectures he left notes, some of which, after his death, were deemed of such value that, edited by Dr. R. Owen, they were published,—“Studies on the Epistle to the Hebrews,” Philadelphia, Grant, Faires & Rodgers. The little work gives a fair insight into Mr. Williams’ mind and heart. “The author was not a mere copyist, . . . The whole is pervaded with an humble, devout and reverent spirit.

Mr. Williams’ long life, crowded with good, unselfish, faithful, pious and pure deeds, had a happy close,

the progenitor of the family, prior to the war of the Revolution, and bequeathed to his son Abraham, above mentioned. Here the youth of the subject of this biographical sketch was spent in attendance at the neighboring school and later at schools in Cheltenham and at Chestnut Hill. He returned to the farm and assisted his father in its cultivation until his marriage, which occurred in June, 1845, to Amanda, daughter of Adam Heilig. Her death occurred in August, 1849, and he was a second time married, in 1868, to B. Amanda, daughter of John

Daniel Yeakel

the last scenes being in harmony with his whole career. “He died full of riches, full of honors, full of years.”

BIOGRAPHICAL SKETCHES.

DANIEL YEAKEL.

Daniel Yeakel, the grandson of Abraham Yeakel and his wife, Sarah Wagner, and the son of Isaac and Regina Schultz Yeakel, was born March 27, 1816, on the ancestral land purchased by Christopher Yeakel,

Bush, of Lansdale, Montgomery Co., Pa. The children of the latter union are Emma B. and Daniel Dawson. On the occasion of his first marriage Mr. Yeakel rented the homestead farm for a period of two years. On the death of his father he became possessor by inheritance of a portion of the property and purchased the remaining interest. His pursuits from that time until the present have not varied greatly from the accustomed routine of the agriculturalist. Mr. Yeakel has manifested, during his active life, a deep interest in public matters connected with the township, and by his sympathy and personal

efforts aided greatly in its growth and development. These efforts have not been confined to the township, but have extended to the county. His political affiliations are with the Republican party, though he has never aspired to official position, and filled minor offices in the township only when urgently solicited and from a public-spirited motive. Mr. Yeakel is an active member of the Masonic fraternity and the oldest representative of Hiram Lodge, No. 81, of Chestnut Hill. He is also a member of St. John's Chapter, No. 232, and of St. John's Commandery, No.

standing at Cresheim, Germantown township, Philadelphia Co., which was his dwelling until prior to the Revolution, when he purchased the property on the summit of Chestnut Hill, and died there in 1810, in his ninety-second year, leaving a considerable estate. Christopher Yeakle married, August 9, 1743, Maria, daughter of Balthaser and Susanna Schultz, whose children were Susanna, born 1744; Maria, in 1747; Regina, in 1749; Abraham, in 1752; Anna, in 1755; and Christopher, in 1757. Abraham of this number, married Sarah, daughter of Christo-

Jacob Yeakle

4, both of Philadelphia. His religious associations are with St. Peter's Evangelical Lutheran Church, at Lafayette Hill, of which he is a member and with which he has held official relations.

JACOB YEAKLE.

The great progenitor of the Yeakle (Jaekel) family was Christopher, who died in Silesia, Germany. His son, Christopher, when eighteen years of age, came with his widowed mother, Regina, to America, in 1734, and settled in Pennsylvania. He was apprenticed to a cooper, and continued during his lifetime to follow his trade. He built, in 1743, the log house still

standing at Cresheim, Germantown township, Philadelphia Co., which was his dwelling until prior to the Revolution, when he purchased the property on the summit of Chestnut Hill, and died there in 1810, in his ninety-second year, leaving a considerable estate. Christopher Yeakle married, August 9, 1743, Maria, daughter of Balthaser and Susanna Schultz, whose children were Susanna, born 1744; Maria, in 1747; Regina, in 1749; Abraham, in 1752; Anna, in 1755; and Christopher, in 1757. Abraham of this number, married Sarah, daughter of Christo-

the farm owned by his father until 1806, when he purchased the property, in Springfield township, now owned by his son, William, where he resided until his death, May 29, 1863. He married Gertrude, daughter of George Urffer, on the 1st of November, 1808, and had children,—Susan, born in 1809; Joseph, 1811; Leah, 1814; Charles, in 1817; George, 1820; and William, in 1821. George married Amanda, daughter of Peter Streep, and has three children. Leah married Thomas L. Bates, and has had seven children. Jacob Yeakle was a successful farmer, devoting his attention principally to dairying and marketing in Philadelphia. He was a Whig in politics,

JOSEPH YEAKLE,

The oldest son of Jacob and Gertrude Yeakle, was born on the 11th of April, 1811, in Springfield township on the homestead, where his life has been spent. The winter months were devoted to school, and the remainder of the year, during boyhood, to labor on the farm of his father, where was found an abundance of work for willing hands to execute. He ultimately rented the farm lying adjacent to the homestead, which belonged to his father, and in 1848 purchased the property. He was, in 1836, married to Miss Elizabeth, daughter of John Huston, whose birth occurred April 1, 1813. Their children were Huston, born in

Joseph Yeakle

and although interested in all that pertained to the good of the township of his residence, did not accept office, having always business matters of importance to occupy his attention. He was a man of marked integrity, of whom it might be said with truth that "his word was as good as his bond." His opinion was much respected in questions of weight, his services often being desired in the settlement of estates and in the capacity of executor. In religion he adhered to the Schwenkfelder faith, which was that of his ancestors, and worshiped with the meeting in Towamencin township.

1835; James, in 1837; Emily (Mrs. James Nash) 1839; Elenora (deceased), 1842; Daniel W. (deceased), 1844; Jacob, 1847; Elvie (Mrs. Cleaver Supplee), 1850. Mrs. Yeakle died in 1852, and Mr. Yeakle was a second time married, in 1854, to Miss Mary Huston, whose death occurred in 1877. Their children are John H., born in 1853 (deceased), and Thomas C., whose birth occurred in 1855. Mr. Yeakle continued farming until 1870, when, desiring to be relieved from the hard labor which had been his portion from youth, he retired and made Flourtown, Montgomery Co., his home. He has been a firm adherent of the

Republican party since its organization, and although not an office-seeker, holds the appointment of postmaster in the village. He has been since 1881, associated with his daughter-in-law, Mrs. Daniel W. Yeakle, in the management of a store at Flourtown. In religion he is a supporter of the Presbyterian Church, of the latter place, though not identified as one of its members.

CHARLES YEAKLE,

The second son of Jacob and Gertrude Yeakle, was born July 7, 1817, on the homestead, now owned by his brother, William. Here his youth, passed with

gomery Co., whose only child, Levi, died in February, 1861. Charles Yeakle has devoted his life to the employments of a farmer and the extensive mining of iron-ore. While successful in these branches of industry, he has found neither time nor inclination for other pursuits. He is a Republican in politics, having been formally allied to the Old Line Whig party. Though formerly the incumbent of one or more minor offices, he is not ambitious for political honors. His services have been sought on frequent occasions in the capacity of guardian and trustee, which appointments have been, with rare exceptions, declined. Mr. Yeakle now worships with the Presbyterian Church, though reared in the faith of the Schwenkfelders.

Charles Yeakle

his parents, was varied by the enjoyment of advantages of education, in some slight degree superior to those ordinarily obtained, at Flourtown, Whitmarsh, and at the Hicks school, at Springfield. After a period devoted to labor on the home-farm he, in connection with his brother, William, cultivated the land on shares, from 1843 until 1849, when he removed to his present home, then owned by his father. This he occupied as a tenant until 1863, when it became his by inheritance. Mr. Yeakle was married, on the 16th of March, 1843, to Sarah, daughter of Michael and Barbara Urffer Neuss, of Upper Hanover township, Mont-

WILLIAM YEAKLE,

The youngest son of Jacob and Gertrude Yeakle, was born on the 7th of November, 1821, in Springfield township, where he has since remained, and is now one of its most influential citizens. His educational opportunities were not superior to those of his brothers, being confined to a few months of instruction, chiefly during the winter. He was reared from youth to habits of industry, and at an early age became useful to his father in his farm employments. He later rented the homestead until the death of the latter, when a portion came to him as his patrimony,

the remainder being secured by purchase. On this place he still resides, and is, as formerly, actively engaged in the various avocations pertaining to a farmer's life. Mr. Yeakle was married, on the 27th of December, 1849, to Mary, daughter of Jacob Wentz, whose birth occurred September 24, 1826. Their children are Atwood, born 1850; Gertrude, 1852; Ambrose, 1854; and John, 1857. Mr. Yeakle is a member of the board of directors of the Montgomery National Bank, of Norristown. A Republican in his political views, he is not active in the field of politics, and finds little leisure for pursuits aside from his life as an agriculturalist. Mr. Yeakle is an attendant upon the ser-

the riots, and in four hours were marching with forty-seven men and their big six-pound cannon. They marched direct to the Girard Bank, and from thence to the Arsenal, where now stands John Wanamaker's store. In 1846 the Mexican war broke out, and George Lower, with his brother Henry, went to Philadelphia and joined Captain R. K. Scott's company of Cadwalader Grays, which, when the First Regiment was formed, became H Company, went to Mexico and participated in the taking of the city of Vera Cruz and the Castle of San Juan Del Ulloa, which capitulated on the 29th of March, 1847. The First Regiment of Pennsylvania Volunteers, Company H

William Yeakle

vices of the Lutheran Church, of which Mrs. Yeakle is a member.

GEORGE LOWER.

George Lower was born January 30, 1823, on a twenty-acre farm in Springfield township, Montgomery Co., Pa. His father, Joseph, died at the age of ninety, and his mother, Ann, at seventy-six years of age. At the age of nineteen, with other young men of the neighborhood, George Lower raised a military company, of which he was made one of the lieutenants; they became so perfect in drill that they would go through the manual by the tap of the drum. In 1844 they received orders to go to the city to help suppress

being one of the companies, was commanded by Colonel Francis M. Wynkoop. Mr. Lower participated in all the important engagements of the war, including Cerro Gordo. After peace had been concluded he returned to Philadelphia, where he arrived in July, 1848, and was mustered out and discharged. He then returned to Springfield township, and in the fall of that year was elected county auditor, and in 1854 was elected recorder of deeds, and whilst in office removed from the old buildings to the new offices in the new court-house, and recorded the first deed. After going out of office he went to Flourtown, in Springfield township. In the spring of 1858 he was elected a justice of the peace and has served almost continually since.

ENOCH SHOEMAKER.

Enoch Shoemaker, who for more than a half-century has been a resident of Springfield township, is a descendant of George Shoemaker, who (with one or two others) came from Wales to Pennsylvania on special invitation from William Penn, landing in 1685 at Chester, where he afterwards married Sarah, a daughter of Richard Waylen, who was a preacher of the Society of Friends. Nothing of the subsequent life of George Shoemaker has been ascertained. A son, or grandson, of his was Jacob Shoemaker, who, with his wife, Margaret, were residents of Whitmarsh township, and parents of the following-named

ary 17, 1816. His wife was Hannah Kenderdine, of Horsham. Their children were Agnes, born September 23, 1765; Margaret, born September 8, 1767; Dorothy, born July 25, 1769; Thomas, born August 6, 1771; Rachel, born December 18, 1773; Mary, born July 19, 1775. The daughters all lived unmarried, three of them reaching an age exceeding eighty years. The only son, Thomas, became owner of his father's farm in Whitpain. His wife was Jane, daughter of David Supplee, who lived in Norriton township, on the farm now owned by Andrew F. Hiltner, of Norristown.

The children of Thomas and Jane (Supplee) Shoe-

Enoch Shoemaker

children: Matthias and Jonathan (twins), born 14th of Twelfth Month, 1736; Barbary, born 30th of Sixth Month, 1738; Jonathan (second of the name), born 16th of Twelfth Month, 1739; Isaac, born 16th of Eleventh Month, 1741; Hannah, born 10th of Ninth Month, 1743; Elisabeth, born 30th of Eleventh Month, 1745; Sarah, born 3d of Second Month, 1748; David, born 30th of First Month, 1753.

The first-named of these children, Matthias Shoemaker, was grandfather of Enoch, the immediate subject of this biographical notice. He lived in Whitpain township on a farm which he purchased in 1777, and which is now owned by his grandson, Charles K. Shoemaker. On that farm he died Janu-

maker, were Enoch (the subject of this memoir), born September 25, 1804; Job, born in 1805, and died in his twenty-second year; David, born in 1806 (father of John K. Shoemaker, of Philadelphia); Allen, born in 1808, and now living in Lewisburg, Pa.; Matthias, born February 17, 1810 (now of Philadelphia); Hannah (died in infancy); Jesse (died in Canada); and Charles K., now living on the Shoemaker homestead in Whitpain township.

Enoch, eldest son of Thomas and Jane Shoemaker, was married, March 8, 1832, to Rachel Mitchel, daughter of Jacob and Sarah (Hallowell) Mitchel, whose home was in Springfield township, on the homestead farm, now owned and occupied by Enoch Shoemaker.

Sarah, the wife of Jacob Mitchel, was a descendant of Edward Farmer, the first settler in Whitmarsh. Jacob Mitchell was born in Whitmarsh, of parents who came there from Germany. His father was a leading man in that township and a prominent member of St. Peter's Lutheran Church, at Barren Hill. The children of Jacob and Sarah Mitchel were Elizabeth, born in 1791, married James Pierce, of Plymouth township, and died in 1873; Mary, born in 1793, married Andrew Fisher, of Chestnut Hill, and died in 1873; Sarah, born in 1795, married Frederick Klair, of Gwynedd, and died in 1866; Abigail, born in 1798, married William Cowden, of Plymouth, and died in August, 1861; John, born in 1801, lived in Springfield, and died in 1853; Ann, born in 1804, now widow of Valentine Keely, of Roxborough; Rachel, born September 19, 1806, now wife of Enoch Shoemaker; Hannah, born in 1809, married Phineas Michener, of Plymouth township, and died in 1867.

Enoch and Rachel (Mitchel) Shoemaker have been the parents of the following-named children: Samuel, born August 8, 1833, died in infancy; Charles, born July 8, 1836, now living in Whitpain township; Hannah, born May 3, 1839, now Mrs. John H. Mann, of Horsham; Sallie J., born July 25, 1843, attended a select school taught by Enoch H. Supplee, of Philadelphia; Mary Amanda, born March 26, 1846, died in the fifth year of her age.

Charles, second son of Enoch Shoemaker, attended the common schools, also the school of G. D. Wolfe, at Norristown, in the fall and winter of 1856. He was married to Mary S., daughter of Joseph P. Conard, of Whitpain township, December 24, 1863. They have been the parents of children as follows: Joseph Conard, Enoch (died in infancy), Ella, Rebecca J., Rachel, Annie C., Mary K., Charles and Frank.

Hannah Shoemaker, daughter of Enoch and Rachel, attended the Adelphia Institute, at Norristown, during the winter and spring of 1857. She was married, March 13, 1862, to John H. Mann, of Horsham. Mr. Mann is a descendent of an ancestor who came to America in 1733, and settled in Bucks County. In 1748 he moved to a farm of one hundred and sixty-four acres, which he had taken up in Horsham township. Samuel Mann, grandfather of John H., was married, in 1777, to Margaret Keith, daughter of William Keith, of Makefield, Bucks Co., at whose house General Washington had his headquarters when he marched against the Hessians at Trenton, on the night of December 25, 1776.

The children of John H. and Hannah (Shoemaker) Mann have been Charles S., now a student in the State Normal School, at West Chester; W. Henry; Albert H.; Rachel, deceased; Enoch, died in infancy; Sallie L.; Walter; and Ann Cornelia. Mrs. Mann is a member of Puff's Lutheran Church, in Upper Dublin.

Mr. Shoemaker, the subject of this memoir, received in his youth only such education as was afforded by

the common country schools of that time. He was apprenticed to Morgan Morgan, in Gwynedd township, to learn the blacksmith's trade, at which he afterwards worked about one year with Andrew Fisher, at Chestnut Hill, soon after which he left the business and returned to his father's farm in Whitpain, where he remained until his marriage. He then settled in Springfield township on his father-in-law's farm, which he rented from year to year for sixteen years, and then purchased. He has now lived on the place for fifty-three years. For the first thirty-two years after his marriage he lived in the old farm-house, then removed to the new house, which has now been his residence for twenty-one years. Mr. Shoemaker was by birthright a Friend. Mrs. Shoemaker is a member of St. Peter's Lutheran Church at Barren Hill. Their daughter, Sallie J., is a member of the Manatawny Baptist Church.

On the 8th of March, 1882, the "golden wedding" festival of Enoch and Rachel Shoemaker was celebrated at their house by eighty-four persons, nearly all of whom were members of the family. The Rev. William Smith, of the Cold Point Baptist Church, and the Rev. Charles T. Pritchard, of St. Peter's Lutheran Church, were present and conducted the religious exercises, which were preceded and followed by vocal and instrumental music. The presents were numerous and valuable. The family history was read by Charles S. Mann, grandson of the venerable couple. The ceremonies and festivities were continued during the entire day, and the occasion was one which will be long remembered by those who participated in it.

CHAPTER LXXIV.

TOWAMENCIN TOWNSHIP.¹

TOWAMENCIN² township is one of the central townships of the county, bounded on the northeast by Hatfield, south by Worcester, southeast by Gwynedd, southwest by Perkiomen and west by Lower Salford. Its greatest length is four and a half miles, breadth nearly three, with an area of about six thousand acres. The surface is slightly rolling, and the soil a red shale. It is watered by the Skippack and Towamencin Creeks. The former has a course of nearly three miles, but furnishes no valuable water-power. The latter is a branch of the Skippack, and lies almost wholly within the township, and in a course of six miles propels two grist-mills. These streams also receive several tributaries within this territory, all of

¹ By Wm. J. Buck.

² The name of this township is spelled both Towamencin and Towamensing. Though there is good reason for thinking that Towamensing was the original spelling, we have adopted Towamencin because it is so spelled in official proceedings at Norristown, and has been for many years.

which go to help the volume of the Skippack, a confluent of the Perkiomen.

The only material public improvement is the Spring House and Sumneytown turnpike, finished in 1848, which crosses the township for a distance of three miles near its centre. According to the census of 1800, it contained 473 inhabitants; in 1840, 763; and in 1880, 1282. Although its progress has not been rapid, yet every decade has shown an increase. The real estate in 1882 for taxable purposes was valued at \$847,735, and including the personal, \$929,235. The taxables were 313, and the aggregate per head is \$2968, making it in point of wealth the tenth township in the county, and almost the equal of Gwynedd. In 1883 we find here two hotels, one hardware, one boot and shoe, one general store and three dealers in flour and feed. It contains six public schools, open six months, with an average attendance of 233 scholars; in 1856 five schools were open four months, with an average of 142 pupils. The census of 1830 gives 144 houses, 175 families and 132 farms. It contains five churches, belonging, respectively, to the Mennonites, Dunkards, Lutheran, Reformed, Schwenkfelders and Methodists.

Towamencin is a name of Indian origin, and no doubt was taken from the stream bearing it. In March, 1728, the territory was formed into a township, and at the request of the petitioners called Towamencin. A draft thereof in the records states its area to be "about five thousand five hundred acres." Although its boundaries have not since been changed, yet, like all other early surveys, its area is now made somewhat more, no doubt in part brought about by a closer or more exact measurement through the increased value of lands. A list of the land-holders and tenants of this township was prepared in 1734, which we now propose to give here in full, being thirty-two in number, which necessarily must contain some of its earliest settlers, of whom, to a limited extent, a further account will be given: Joseph Morgan, 200 acres; James Wall, 100; John Morgan, 200; Daniel Morgan, 200; Daniel Williams, 200; John Edwards, 250; Joseph Lukens, 200; Jacob Hill, 100; Hugh Evans, 180; Cadwallader Evans, 100; Christian Weber, 50; Nicholas Leshner, 150; Paul Hendricks, 100; Jacob Fry, 200; Peter Weber, 150; Peter Tyson, 100; Christian Brinaman, 150; Lawrence Hendricks, 150; Garret Schrager, 100; Leonard Hendricks, 150; Henry Hendricks, 123; Herman Gotschalk, 100; John Gotschalk, 120; Gotschalk Gotschalk, 120; Abraham Lukens, 200; Francis Griffith, 100; William Nash, 50; Henry Fry, 50; Felty Consenhsier, 23; Peter Wentz; William Tennis, 25; Jellis Jellis, 22 acres.

It is apparent, in examining the above list, that many of the early settlers came hither after a brief residence in or around Germantown. As their children grew up and the country became more improved they moved to where cheaper lands abounded, though at the expense of greater toil.

The first land probably taken up in Towamencin was a grant of one thousand acres from Penn's commissioners of property to Benjamin Furley, June 8, 1703. This was purchased nine days later from Furley's attorneys by Abraham Tennis and Jan Lucken, who, in 1709, divided it, each taking five hundred acres. This tract embraced the northern part of the township and extended to the present Skippack road, and perhaps as far down as Kulpsville. Here they settled and made the first improvements, and even to this day the descendants of John Lucken or Lukens retain a portion of the ancestral tract. Henry Fry purchased twelve hundred and fifty acres on the Towamencin Creek from Benjamin Fairman, December 10, 1724, on which he also was the first settler. The Tennis family, it appears, for awhile flourished here. On the list of 1734 we find only the name of William Tennis with 25 acres, but in 1776, Samuel Tennis with 192 acres, and William and Israel Tennis. They possessed an old burial-place in the northeast part of the township, though the name has now become extinct in this section. Christian Weber made his purchase in 1728, and very likely then made his residence here. Wilhelm, Heinrich, Lorentz and Gerhart Hendricks resided at Germantown before 1700. William Hendricks and his sons, Henry and Lawrence, were naturalized in 1709, to hold and enjoy lands. Among the descendants of those in the list of 1734, the Hendricks and the Gotschalks are still numerous, and the names of Lukens, Wentz, Fry and Edwards are still here. The last is the only surviving one of those of English or Welsh origin, who then constituted over one-third of the total number. William Nash, in May, 1747, was a collector of taxes in Towamencin.

Jan Lucken came from Holland in the fall of 1688 and shortly afterwards settled at Germantown. According to his Bible record, he had seven sons and four daughters. Elias was born in 1686; William, 1687; John, 1691; Peter, 1696; Mathias, 1700; Abraham, 1703; and Joseph, in 1705. Jan Lucken made his will October 9, 1741, leaving to his son Abraham three hundred acres, to be taken off the southeast side of his tract, and the balance he directed to be sold. Abraham made his will March 31, 1776, by which it appears he had nine children,—John, Mathias, William, Abraham, Joseph, Job, Margaret, Jonathan and Enos. His executors were Elizabeth, his second wife, and sons' John and Mathias. The homestead, of two hundred acres, situated near the present Union or Brick Church, was sold out of the family. In the assessment of Towamencin for 1776 we find Abraham Lukens taxed for 215 acres; Joseph Lukens, 98; John Lukens, son of Abraham, 115 acres; Peter Lukens, 87 acres; and John Lukens, 109 acres. John Lukens, son of Abraham, continued to reside on his homestead until his death, and his son George became its owner in 1805, and retained possession for about forty-four

years. The Lukens family here, like their kindred in Horsham, appear to have been noted for longevity, as well as for being substantial land-holders.

Heinrich Frey or Fry, a native of Altheim, in Alsace, it is stated, came to Pennsylvania before the arrival of William Penn and settled near Roxborough. In 1692 he was married, at Germantown, to Catharine, daughter of Wigart Levering. They had nine children, of whom six were sons. He purchased, as has been mentioned, twelve hundred and fifty acres on Towamencin Creek in 1724. It is a family tradition that two of his sons walked up from the Wissahickon, a distance of eighteen or twenty miles, on Monday mornings, bringing their provisions along with them for the week, for the purpose of making a clearing and erecting a house, which they completed by the following spring. A few Indians, who appeared friendly, were still lingering here, having a couple of wigwams on the banks of the stream. The chief, who visited the scene of their labors, observed them eating bread, when they gave him a piece, which he ate and pronounced good. On the following week they brought him an extra loaf, at which he was greatly delighted, and in return the following day brought them a saddle of venison. The eldest of these brothers was Jacob, who had two sons and two daughters, whereof Daniel Fry is still living on the homestead at the good old age of ninety-four years, and yet very active. The family possess an ancient burial-ground in the township, which is now in a dilapidated condition. In the assessment of 1776 we find, as in 1734, the name of Jacob Fry with two hundred acres. The late Jacob Fry, of the Trappe, member of Congress and auditor-general of Pennsylvania, is represented as a descendant of this family.

Christian Weber and wife, Appolonia, arrived in Philadelphia in 1727, and the following year purchased a farm on the west side of the present turnpike, adjoining Gwynedd line. He built a stone house here in 1737, which is still standing. His death occurred in 1778, at the age of eighty-two years. He had sons,—Jacob, Benjamin, Nicholas and Christian. Jacob Weber had three sons,—Abraham, Benjamin and Isaac. Christian Weber, Jr., was born in 1743 and married Elizabeth Wiedner in 1765, and kept an inn half a mile below Kulpsville, on the west side of the turnpike, now the residence of William H. Anders. His wife died in 1805, after which he married the widow of the Rev. Jacob Van Buskirk. He was a captain in the Revolution, and, it is said, recruited one hundred men for the service. Governor Mifflin appointed him a justice of the peace, and he also served in the beginning of this century as one of the county commissioners. He had two sons,—John and Jesse,—who both became prominent men. The former was born in 1768, became a miller, and in 1807 was elected to the Assembly, of which he served twice as Speaker. He married Elizabeth, daughter of Jacob and Catharine Reiff, and had five

children. His death and also his father's occurred in 1815. Jesse Weber was captain of the Montgomery Union Troop of Horse, to which post he was elected September 28, 1807, and afterwards, with his company, went into the service at Camp Dupont during the late war with England. He was also elected from this county to the Assembly in 1844 and the following year. We find rated in Towamencin for 1776, Christian Weber, Sr., for fifty-two acres; Christian Weber, Jr., one hundred; and Benjamin Weber, sixty-four acres.

Caspar Kriebel and his wife, Susanna, arrived in Pennsylvania in 1734, and settled in the southern corner of the township, on the place now owned by his descendant, Abraham H. Kriebel. His children were George, Abraham and Susanna. He died February 16, 1771. His son, Abraham Kriebel, was born in 1736, and married, in 1762, a daughter of George Shultz. He died in 1801 and his widow in 1820. The farm on which he lived and died, at the Schwenkfelder Meeting-house, he inherited. Melchior Kriebel and his wife, Anna, the daughter of George Drescher, also came in 1734. He died February 14, 1790, aged eighty years. His children were David, Susanna, Melchior and Rosina. In 1776 we find Abraham Kriebel rated one hundred and eighty-nine acres.

Susanna Weigner, widow, whose maiden-name was Seipt, arrived at the same time with her children,—Abraham, George and Rosina. Abraham Weigner married Susan, daughter of Abraham Yeakel, May 31, 1750. Their children were Maria, Sarah, Rosina, Susanna, Abraham and John. He died March 13, 1781, aged sixty-two years.

Abraham Yeakle and wife, Maria, arrived in 1734 and died January 12, 1762. His children were Balthasar (born in 1736), Hans, Susanna, Rosina and Elizabeth. Balthasar Yeakle married Rosina, widow of Christopher Reinwalt and daughter of David Heebner, October 7, 1760. His children were Esther, Maria, Catharine and Abraham. He had in 1776 one hundred and fifty acres of land. He died April 18, 1789. Hans or John Yeakle, who resided in Towamencin, was also the son of Abraham; married Anna, daughter of Christopher Weigner, in 1762. Their children were Maria, Regina, Christopher, Joseph, Magdalena, Jacob, Christian, Anna, Abraham and John. He died in 1801, aged sixty-two years, and his widow in 1822, nearly eighty. He was rated in 1776 with one hundred and fifteen acres. Balthasar Anders and his wife, Anna Hoffrichter, came in 1734 with the others. He had three children,—George, Anna and Abraham. He was a shoemaker by occupation and died in 1754, aged fifty-six years. His widow survived until 1784, having attained nearly eighty-four years. George Anders was rated in 1776 for one hundred and fifty acres and as having a family of seven children.

Yellis Cassel, who, in the list of 1776, is rated for eighty-two acres, was the great-grandfather of Abra-

ham H. Cassel, the noted antiquarian of Lower Salford, who was born in this township September 21, 1820, as was also his father, Yellis, and grandfather, Hupert Cassel. Yellis and Hupert Cassel were landholders in Perkiomen township in 1734. The former arrived about 1715, and the latter in 1727. Johannes Cassel, who settled in Germantown in 1686, it is supposed was uncle of the first Hupert. Frederick Wampole came from Germany in 1744, and purchased from Abraham Lukens one hundred and fifty acres, on which he resided, and was witness thereon to interesting scenes connected with the Revolution. Among the township officers of the past, we find Joseph Smith constable, in 1767; Frederick Wampole, supervisor, 1773; John Luken, constable, 1774; and Garret Gotshalk, assessor, and Owen Hughes, collector, in 1776.

The road from the present Spring House to Marlborough township was laid out and confirmed in June, 1735, and, in consequence, was for a long time afterwards called the North Wales road, and as it became extended further northwards, became known also as the Maxatawny road. In 1829 a charter was granted to turnpike this road up to Sumneytown, and though great efforts were used to secure sufficient stock along its route to complete it, they failed until 1848. This was a great improvement over the old route, not only in being much straighter, but in the reduction of grade. The Forty-Foot road, which extends through the whole length of the township was laid out several years before the Revolution. It was over this highway that the army marched from Skippack to their encampment.

Through the success of continued researches, the writer has ascertained that the occurrences that transpired in this small township during the Revolution are unusually interesting, and for which here but a very brief space can be given. The battle of Germantown was fought on the morning of October 4, 1777, and resulted disastrously to the American cause, when Washington immediately returned with the main body of the army up the Skippack road, beyond the Perkiomen, in the vicinity of the present Schwenksville, where they remained until the afternoon of the 8th, when he arrived and established his camp nearly a mile northwest of Kulpsville, near the Lower Salford line. The officers wounded in the battle were brought to a farm-house on the Forty-Foot road, about a mile and a quarter southwest of the Mennonite Meeting-house. General Nash, who had been wounded in the thigh by a cannon-ball which had killed his horse, we know from an eye-witness, was carried up hither on a litter made of poles. Washington may have come here on purpose to attend the funeral on the following day, for which he issued his orders that he should be interred at ten o'clock, and that "all officers whose circumstances will admit of it will attend and pay this respect to a brave man, who died in defense of his country."

Washington made his headquarters at the house of

Frederick Wampole, whom we have mentioned as being supervisor, and who in 1773 was rated for two hundred and twenty acres of land, one servant and four horses. The house was about half a mile north of the meeting-house. It belonged to J. W. Wampole, Esq., as late as 1856 or the following year. The present owner is Jacob Detweiler, who took down the old house in 1881 and built a new one in its place. In his letter to Congress, dated at Peter Wentz's, in Worcester township, four miles distant on the Skippack road, Washington says: "We moved this morning from the encampment at which we had been for six or seven days past, and are just arrived at the grounds we occupied before the action of the 4th. Our motive in coming here is to direct the enemy's attention from the fort." The Rev. Jacob Duché, of Philadelphia, through the defeat at Germantown, was induced to write a letter, on the 8th, to Washington, desiring him now to abandon the cause and stop the further effusion of blood, and at the head of the army demand from Congress that they make peace. This letter was delivered to him here on the 15th by a female whom he had induced to deliver it, an undertaking which certainly no sane man of his own free will would have risked.

While the camp was here a court of inquiry was ordered and held respecting the conduct of General Wayne at Paoli, of which Lord Stirling was president. John Farndon, a private of Colonel Hartley's regiment, was sentenced, September 25th, to suffer death for desertion to the enemy, and was executed here at noon of the 9th, immediately after the funeral, thus adding additional solemnity to the day, traditions respecting which are still extant in the old families of the neighborhood. The place of execution, it is said, was on the Lower Salford line, about a quarter of a mile northeast of where the turnpike crosses the Skippack Creek, the premises being now owned by J. Wampole. Major John White, a resident of Philadelphia and an aid of General Sullivan, was shot dead by a British soldier from a cellar-window in the attempt to fire Chew's house. Lieutenant Mathew Smith, a native of Middlesex County, Va., in the hazardous effort to carry a flag to demand a formal and immediate surrender was killed by a ball within musket-shot of the building. Concerning Colonel Boyd, we have so far failed to secure any other information than that he and the officers were buried beside each other in the Mennonite graveyard, opposite the camp, and their names even John F. Watson, the annalist, could not give, though on the monument committee. The chief authority that Washington made his headquarters at the house of Frederick Wampole rests in the letter of Colonel Henry Laurens to his father, president of Congress, dated at "Headquarters, Wampole's, October 15, 1777," who was aide-camp and private secretary to the commander-in-chief during the whole of this period.

Kulpsville is the only village of this agricultural

township, and outside of it there is little produced in the way of manufactures. It is situated on the Sumneytown and Spring House turnpike, near the centre of the district, ten miles from the former and seven from the latter place. Its situation is high, and it can be seen for several miles in coming from either direction on the turnpike. It contains at present about fifty houses, two hotels, one store, several carriage manufactories, besides various mechanic shops. A three-story brick hall, built in 1856, and surmounted with a steeple and clock, is a conspicuous mark to the surrounding country. The first story is occupied by a manufacturing establishment, and several of its upper rooms are used as lodges by the Odd-Fellows and the Order of American Mechanics, and the hall is used for worship, lectures, exhibitions and literary exercises. The Methodist Episcopal Church, a one-story brick building, was erected in 1862. In the fall of 1883 the public school-house here was enlarged, and the books of the Literary and Library Association removed to the second story. The village also possesses a brass band, which has been organized for several years. A house of worship was also erected here in 1879 by the German Evangelical denomination.

The name of the place is derived from the Kulp family, of which Jacob Kulp, in 1776, was rated for one hundred and six acres, which lay in the eastern part of the village and extended on the turnpike to the corner of the present Kulpville Hotel. Opposite, at this date, to the northward, but also on the same side of the pike, lay Henry Smith's (the weaver's) tract, containing eighty-seven acres, which will go to show how insignificant this place was in the Revolution. Jacob Kulp was the son of Peter, who had come from Germany and who also had two other sons, Henry and Dilman. Jacob died here in 1818, at the age of seventy-seven, leaving a son, David C. Kulp, who started the first store here in 1812, was a justice of the peace for forty years and died about 1843. His son, Charles C. Kulp, received the first appointment of postmaster here in 1829, and thus its name became established. The place at this date contained seven houses, a tavern (kept by Mordecai Davis) and a blacksmith-shop. In 1858 it contained two hotels, two stores and twenty-three houses, chiefly brick, and several mechanic shops. A licensed inn was kept here by Hugh Hughs in 1773, by Israel Tennis in 1779 and by Jacob Wampole and Elizabeth Weber in 1790. At this time these were the only public-houses in the township. By an act of Assembly, passed in 1797 the townships of the Fourth District comprising Gwynedd, Montgomery, Towamencin, Hatfield, Franconia, Lower Salford, Upper Salford and Perkiomen, were required to hold their elections at the inn of Christian Weber. This act remained in force until 1802, when Upper Salford and the western part of Perkiomen were attached to other districts. In 1824 the entire county was divided into fourteen

districts, whereof several townships still continued to vote here.

Early Churches in Towamencin—MENNONITE.

--Not half a mile above Kulpville, on the west side of the Sumneytown turnpike, stands the Mennonite meeting-house, a plain, one-story stone building, about twenty-four by twenty-eight feet in size, erected in 1805. It is situated on a knoll, at the foot of which flows a small stream, which in a short distance loses itself in the Skippack Creek; near by stand several gnarled and venerable oaks, the whole presenting an olden-time appearance. There is reason to believe, from the early dates on the tombstones, that the first house of worship here may have been erected before 1750, and not likely much later. This building stood until near the building of the present meeting-house, having been destroyed by fire. The society having been remiss in keeping or preserving records, a difficulty exists to supply authentic data. An aged man of the vicinity related to a friend, in 1858, that he remembered well the old stone meeting-house, to which he had gone to worship with his father about the year 1788; that it had the appearance of being very old then and stood near the site of the present building. A log school-house was adjacent, which has been for some time substituted by a more substantial one, of stone.

To the antiquarian the graveyard attached to this meeting-house in several respects, is an interesting one to visit. In extent it may cover two acres, and it has undoubtedly been used for burial purposes for at least a century and a half. A stone was discovered here bearing the date 1733, and another of 1741. One without a date bears the inscription, "Yellis Cassel, a. 85 y." Many of the inscriptions are in German and several of the earliest have become illegible. In our recent visit the following surnames were taken down from its numerous tablets: Overholtzer, Eisenhart, Boorse, Delp, Stauffer, Drake, Ebert, Cassel, Ruth, Frey, Kulp, Vanfussen, Hughs, Keaton, Stover, Detweiler, Mitchell, Rinewalt, Hendricks, Blackburn, Hechler, Metz, Neisz, Rosenberger, Godshalk, Allebach, Frederick, Gehman, Keeler, Moyer, Bernt, Schlosson, Bookhamer, Boyer, Hallman, Kratz, Swartz, Kepler, Zeigler, Keyser, Clemmer, Nice, Klein, Snare, Hunsicker, Eaton, Freed, Nuss, Funk and Roop. Families bearing about one-third of those names are still pretty numerous in the surrounding section. Mitchel, Hughs, Blackburn and Eaton appear in curious contrast, not being German. Here there repose the remains of General Nash, Colonel Boyd, Major White and Lieutenant Smith, of the Continental army, either slain or mortally wounded in the attack at Germantown. Over the body of General Nash has been placed a white marble monument about ten feet high, erected in 1844 by the citizens of Germantown and Norristown. The other officers lie adjoining the monument, with simple head and foot-stones of marble a foot in height.

SCHWENKFELDER.—The meeting-house of this denomination is located about two miles from Kulpsville, near the south corner of the township. About the date of its origin here there is a difference of opinion. One authority states that a school-house and dwelling combined was erected here in 1765, and another that the date was 1790. A death on one of the tombstones is dated 1745, and inclines us to the former view. As the members of this denomination arrived first in this country in September, 1734, and that some of them had settled around here at least in 1735, is confirmed by an early marriage record. Before the erection of their first log school and dwelling-house they were in the practice of worshipping at each other's houses. If they did not constitute themselves a regular congregation earlier than 1782, then the date of 1790 might be correct.

Their first elder or minister in Pennsylvania was George Weiss, who was ordained an elder in 1735 and served until his death, in 1740. He was succeeded in the ministry by Balthasar Hoffman, of Lower Salford, who died in 1775. In 1783, Christopher Kriebel was chosen for the district, followed, in 1802, by Melchior Kriebel, Melchior Schultz and Balthasar Heebner. The present ministers are George Meschter and Reuben Kriebel, who have officiated since May 26, 1849. The first marriage celebrated was that of Balthasar Krause to Susanna Hoffman, January 16, 1736, and probably the first death was that of Maria, wife of Christopher Kriebel, April 11, 1738. Early in April, Bishop Spangenberg, of the Moravian Church, came among them, making a brief stay at the house of Christopher Weigner, now the residence and farm of George Anders, near by. The present plain, one-story stone meeting-house was built in 1854, and is situated on the edge of a forest that extends towards the south. The lot on which it stands does not quite contain an acre, the cost of which and the house was about thirteen hundred dollars. Everything here bears the appearance of neatness and seclusion, which, it seems are carried out in their other places of worship.

The oldest stone in the graveyard that bears an inscription has that of "A. R. W., 1745." Another informs us of the death of Balzer Anders, who died in 1754, aged fifty-six years, and one of a death in 1770. The most frequent name is that of Kriebel, next that of Anders; than may follow: Schultz, Schneider, Heebner, Weigner, Seipt, Drescher, Gerhart, Reinwalt, Clemens, Adams and Sauter. Nearly all the inscriptions are in German, except a few of recent date. In this language the services are still exclusively conducted. Like the Society of Friends, they have no sacrament nor baptism. The ministers receive no remuneration, but about that the society does not appear to be unduly scrupulous. Like most other religious bodies, they are relaxing from their former exclusiveness, and liberal or more enlarged ideas are securing place. Marriages are now allowed with the outside world, in which they have followed the Dun-

kards, and thus the cause of human fraternization is spread. This denomination has five houses of worship in the county, one of which is in the adjoining township of Worcester and the other in Lower Salford. In 1845 they were estimated to comprise in Pennsylvania about three hundred families, or eight hundred members.

DUNKARD.—Next in the order of time is the Dunkard, or German Baptist, meeting-house, situated near the western corner of the township, on the east bank of the Skippack Creek, and fronting on the Forty-Foot road, and within a distance of one hundred yards of the Lower Salford line. It originated in the first schism of the old Skippack or Perkiomen Mennonite meeting. About the close of the Revolution, Christian Funk, one of its members, came out in advocacy of the doctrine of resistance to England, and the justice of supporting the same. A few joined with him in these sentiments, among whom was Jacob Reiff, Jr., who built for them a meeting-house on his own grounds in 1814. On his death, about two years after, the property came in possession of his son, John, who had joined the Dunkards, and to that denomination he willed it with a lot of half an acre. Thesect has ever since maintained here regular worship. The first building having become considerably out of repair, it was torn down, and a new one, of frame erected in 1883, twenty-six by thirty-five feet with a slate roof. It has no settled minister, but is supplied as a branch by the Indian Creek and Skippack congregations. From the latter meeting-house it is about four miles distant.

LUTHERAN AND REFORMED.—This is designated by those congregations as Christ Church, and is situated about a full half-mile above Kulpsville, on the east side of the turnpike, close to the Lower Salford line. It is built thirty-five by forty-five feet in dimensions, two stories high, and cost originally two thousand two hundred dollars. The corner-stone was laid May 27, 1833, and dedicated for worship October 15th. On the first occasion addresses were delivered by the Rev. George Roeller, of the Lutheran Church, and Rev. Samuel Helfenstein, of the German Reformed. Owing to the material of structure, it is popularly denominated through this section as the "Brick Church."

Its first Lutheran pastor was the Rev. John W. Richards, a grandson of the Rev. Henry M. Muhlenberg. He took charge June 1, 1834, and continued in the same until April 3, 1836, when he resigned and went to Germantown. Next was the Rev. Jacob Wampole, until his death, January 3, 1838, aged thirty-five years, greatly beloved and respected. Rev. Henry S. Miller succeeded from April, 1838, till May 9, 1852, —over fourteen years. He is now residing at Phoenixville, aged upwards of eighty-two years. Rev. George A. Wentz was next elected, June 28th, and continued three years. Rev. A. S. Link remained in charge till March, 1859, when the Rev. George Sill was

elected. All the aforesaid were also pastors of the Trappe congregation. The Rev. Mr. Baker, of Sellersville, is the present pastor.

For the German Reformed the Rev. H. S. Bassler was the first pastor, who served until May, 1839. After a vacancy the charge was filled by the Rev. I. W. Hanger, who remained about two years, when the congregation was supplied by Rev. Henry Gerhart. In March, 1843, the Rev. A. Bentz was elected, who served nearly three years. He was succeeded, in the spring of 1846, by the Rev. T. W. Naille, who remained until 1857. The Rev. W. G. Hackman assumed the duties near the beginning of 1858, and remained for some time. The present pastor is the Rev. S. M. K. Huber. The late venerable Benjamin Reiff, of this denomination, it is said, was one of the most active and successful in obtaining funds for the erection of the church, to which he was also a liberal contributor.

The church is well shaded, among the trees being some handsome evergreens, which should be more common at such places. The graveyard contains about three-fourths of an acre, and in the half-century of its existence a goodly number have been interred. In the southwest portion of the ground we find a stone with an inscription, "Sacred to the memory of Jacob Sower, who departed this life November 24, 1843, aged ninety years and five months. He was one of that patriotic band which achieved the independence of his country." The following surnames were copied from the tombstones: Smith, Krupp, Godsbalk, Wile, Johnson, Snyder, Reiff, Baker, Kreamer, Wampole, Boorse, Yocum, Titus, Schneider, Oberholtzer, Schell, Brown, Delp, Garges, Macknet, Fry, Brey, Huth, Wagener, Wilson, Rush, Hechler, Cassel, Weber, Emery, Zepp, Kinsey, Gaul, Hoot, Clemmer, Mace, Hendricks, Bower, Hagey, Master, Henning, Drake, Feable, Will, Schmidt, Berger, Geiger, Reifinger, Metzger, Rudy, Steyer, Barnes, Shoemaker, Sult, Kulp, Detra, Delp, Fox, Reese, Belzer, Rosenberger, Underkoffler, Stillwagon, Koch, Groth, Alderfer, Hoefer, Lutz, Shupp, Hartzel, Miller, Moyer, Funk, Richard, Becker and Sorver.

ASSESSMENT OF TOWAMENCIN, 1776.

Garret Godshalk, assessor, and Owen Hughes, collector.

John Yellis, 108 acres, 2 horses, 3 cattle; Henry Yellis, 130 a., 2 h., 2 c.; Samuel Tennis, 192 a., 2 h., 3 c.; William Hendricks, 60 a., 2 h., 3 c.; Humphrey Hughes, 1 h., 1 c.; Baltzer Yeakle, 150 a., 2 h., 5 c.; Michael Moyer, 2 h., 3 c.; Abraham Lukens, 215 a., 2 h., 3 c.; Frederick Wampole, 220 a., 1 servant, 4 h., 4 c.; John Lukens, son of Abraham 115 a., 2 servants, 3 h., 4 c.; Henry Smith, weaver, 87 a., 2 h., 3 c.; Evan Edwards, 91 a., 2 h., 2 c.; Nicholas Godshalk, 1 h., 1 c.; John Yeakle, 115 a., 1 servant, 4 h., 5 c.; Owen Hughes, 143 a., 3 h., 5 c.; Christian Weber, Sr., 52 a.; Christian Weber, Jr., 160 a., 2 h., 4 c.; Joseph Lukens, 98 a., 4 h., 4 c.; Peter Lukens, 87 a., 4 h., 6 c.; George Anders, 150 a., 250 a., in Gwynedd, 7 children, 3 h., 7 c.; Abraham Kreate, 189 a., 4 h., 10 c.; Abraham Weigner, 2 c.; George Meister, 74 a., 1 h., 2 c.; Rosanna Seifert, 135 a., 3 h., 5 c.; Paul Hendricks, 99 a., 2 h., 2 c.; Samuel Hendricks, 100 a., 2 h., 2 c.; John Springer, 60 a., 2 h., 3 c.; saw-mill; Leonard Hendricks, 125 a., 1 h., 2 c., aged; Adam Gotwaltz, 270 a., 3 h., 7 c.; Jacob Fry, 260 a., 1 h., 3 c.; Henry Lesh, 2 h., 3 c.; William Godshalk, 160 a., 3 h., 4 c.; Peter Hendricks, 88 a., 2 h., 3 c.;

Benjamin Hendricks, 88 a., 2 h., 3 c.; Garret Godshalk, 60 a., 2 h., 2 c.; Christopher Reinwalt, 58 a., 2 h., 3 c., grist-mill; Jacob Kolb, 106 a., 2 h., 4 c.; Harman Boorse, 20 a., 2 c., 1 servant; John Lukens, 109 a., 90 a. in Gwynedd, 4 h., 4 c.; Baltus Reinwalt, 89 a., 2 h., 2 c.; Elizabeth Evans, 190 a., 3 h., 5 c.; John Boorse, 44 a., 1 h., 1 c.; Daniel Springer 1 h., 3 c.; Catharine Godshalk, 13 a., 1 c.; Peter Godshalk, 113 a., 1 servant, 2 h., 3 c.; Baltus Miller, 1 c.; William Evans; Arnold Boorse, 46 a., 1 h., 3 c.; Leonard Hendricks, Jr., 89 a., 1 h., 2 c.; John Shott, 1 h., 2 c.; Christopher Meister, 100 a., 2 h., 4 c.; Jacob Updegrave, 200 a., 2 h., 5 c.; Jacob Pennelaker, 82 a., 2 h., 3 c.; William Tennis, 2 h., 2 c., 56 a. in Lower Salford; Joseph Eaton, 1 h.; Israel Tennis, 1 h., 3 c.; John Edwards, 48 a.; Abraham Dresler, 129 a., 3 h., 5 c.; William Hendricks, 1 c.; Rowland Evans, 1 h., 1 c.; Andrew Label, 2 c.; Jacob Grub, 113 a., 2 h., 5 c.; Yellis Cassel, 82 a., 2 h., 4 c.; Daniel Miller, 2 c.; Benjamin Weber, 64 a., 2 h., 1 c.; George Lutz, 1 h., 2 c. *Single Men.*—Frederick Wampole, Abraham Wampole, Peter Boorse, Garret Godshalk, Godshalk Godshalk, Evan Evans, Jehu Evans, John Edwards, David Spice, George Pluck, Frederick Fisher.

BIOGRAPHICAL SKETCH.

JOHN C. BOORSE, ESQ.

The progenitor of the Boorse family in Montgomery County was Harman Boors, a native of Holland, who came to this country at an early period, probably about the middle of the last century, and settled in what is now Towamensing township, Montgomery Co., Pa., near what is now the village of Kulpville. He was, no doubt, a man of considerable wealth and enterprise, and possessed also a liberal education. In his business transactions it became necessary for him to cross the ocean several times, and on his last voyage to America he died at sea. He was the father of five sons—viz., John and Henry, died without issue; Peter, married, and died May 1, 1797; Arnold and Harman, Jr.

Harman, Jr., was the father of the following children: viz., John; Margaret, born September 8, 1765, no issue; Peter, born August 28, 1767, was married and left four children; Henry, born December 25, 1769, died November 27, 1777; Anna, born September 22, 1772, married Abraham Hendricks October 22, 1793; Catharine, born March 28, 1775, married Samuel Metz November 10, 1796; Sybilla, born April 2, 1777, married Jacob Hendricks; Susanna, born February 25, 1779, married Jesse Lewis February 19, 1799; and Elizabeth, born February 17, 1782, married Samuel Kriebel.

John Boorse, grandfather of John C. Boorse, was born October 17, 1763, married Elizabeth Cassel June 8, 1797, and died January 26, 1847. His wife died July 26, 1830. They were the parents of Abraham, Henry C., Magdalena, Peter, Daniel, Joseph, Harman, Jacob, Catharine, Mary and Hubert Boorse. Magdalena married Jacob Boyer, Catharine married James Lloyd and Mary married Elias Cassel. Only four of these children are now living—viz., Jacob, Joseph, Mary and Hubert.

Henry C. Boorse, father of John C. Boorse, was born October 14, 1799, in Towamensing township, on

the farm now owned by Hubert Boorse. This farm has been in the Boorse family for over one hundred and thirty years. Henry C. was married, March 5, 1822, to Susanna Cassel, and died April 26, 1869. She died April 6, 1856. They were the parents of children, as follows:

I. Barbara, born December 8, 1822, married Henry K. Zeigler, of Skippack, and died in March, 1866.

II. Ephraim, born January 24, 1825, married Miss Elizabeth Zeigler, of Skippack.

III. John C., born June 27, 1831, married, January 21, 1855, to Miss Mary Rittenhouse, daughter of Samuel

William Bechtel, of Collegeville, Pa. She died May 7, 1877.

V. Susan, born September 9, 1839, died December 18, 1856.

John C. Boorse, Esq., commenced his business career as a farmer, and in 1855 purchased of his father the old homestead, and conducted the business pertaining to a large farm until 1866, when he retired from the dull routine of the farm and engaged in the more active duties of surveyor, conveyancer and justice of the peace, the duties of which he still performs to the entire satisfaction of all parties concerned. He has

John C. Boorse

and Mary Rittenhouse, of Towamensing, and a lineal descendant of the celebrated David Rittenhouse. Their children are Alinda R., born May 29, 1856, died January 31, 1857; Mary Ann, born December 18, 1857, married Humphrey W. Edwards of Kulpville; Melinda, born January 3, 1860, died August 31, 1860; Ella, born March 21, 1862; Lizzie, born March 25, 1864; Henry R., born September 21, 1866, editor and publisher of the *Towamensing Item*, established January, 1885; Alma, born December 9, 1868; Nora, born June 7, 1871; Edith R., born October 21, 1879.

IV. Catharine, born December 6, 1836, married

made five hundred and fifty-four surveys of different tracts of land, and has written seventeen hundred and sixty-four deeds and mortgages and taken acknowledgments of the same. He entered the political field in the early part of 1855, when he was elected township assessor, which position he filled for eight years. He was elected a justice of the peace at the spring election in 1862, and has held that office continuously until the present time. He has been one of the school directors of the township for six years, judge of election for two terms, member of the election board for twenty-seven years, a member of the Republican County Committee

(of which organization he is an enthusiastic member) for at least twelve years, and since the organization of the Republican party has been honored many times with a seat in the councils of its leaders, in the State and county, and has received the most flattering testimonials from the press of the county.

In his official capacity he formulated the charter and made the original survey for the borough of Lansdale. He was one of the original directors of the Lansdale Water-Works Company, and is the present secretary of the same; a director and secretary of the Lansdale Cemetery Association; one of the original members and secretary of the Towamensing Creamery Association; one of the originators of the Kulpsville Literary and Library Association, and one of its active members; a director in the Perkiomen Fire and Storm Insurance Company of Montgomery County. He was the official surveyor of the borough of Lansdale from 1872 to 1881.

He was the originator and prime mover in getting the first telephone line from Norristown to Kulpsville *via* North Wales and Lansdale, with station at his office.

He held the office of justice of the peace for twenty-three years, during which time only nineteen cases were returned to court; he always endeavored to settle cases before going to court. As the Hon. Judge Ross at one time remarked before court: "If all justices of the peace in the county would act like John C. Boorse, of Kulpsville, thousands of dollars would be annually saved to the county in costs."

In 1870 he received the appointment to take the census of Towamensing and Lower Salford townships, which he filed with credit to himself and to the entire satisfaction of the department.

In 1865 he received the unanimous nomination for county commissioner, and ran far ahead of the regular ticket; the Democratic party being then in large majority, he was defeated.

He was also several times strongly urged by the leaders and many others of the party to become a candidate for the Legislature, which honor he positively refused, saying "he was not competent."

He was one of the delegates to the State convention held in 1875, in Lancaster, and voted for John F. Hartranft for Governor and William Rawle for treasurer. He was an active committeeman in the county's centennial, and is also a member of the Montgomery County Historical Society.

He has been a member of Providence Lodge, No. 345, I. O. O. F., since 1867, trustee, treasurer and representative to Grand Lodge of the same for several years, and one of the directors of the Odd-Fellows' Endowment Association of Pennsylvania. He became a member of Charity Lodge, No. 190, F. A. M., Norristown, October 10, 1872; is also a member of Norristown Chapter, No. 190, R. A. M., and was knighted in Hutchinson Commandery, No. 32, K. T., stationed at Norristown, January 25, 1875.

Mr. Boorse has always been active in all progressive movements of the age in which his business life has thus far been spent, especially anything tending to improve the morals and intellect of the young and rising generation by whom he is surrounded.

CHAPTER LXXV.

UPPER DUBLIN TOWNSHIP.¹

THIS township is regular in form, approaching a square, and is bounded northeast by Horsham, south by Springfield, southwest by Whitemarsh, west by Whitpain, east by Moreland and southeast by Abington. It is four and one-half miles long, three and one-fourth wide, and contains an area of eight thousand eight hundred and forty acres. Its surface is rolling and the soil fertile, composed of limestone and loam. Camp Hill is an elevation of Revolutionary memory that commences in Whitemarsh and extends eastwardly across the township on the north side of Sandy Run. The Wissahickon passes through the west corner over a mile, propelling two grist-mills, and receiving as tributaries Rose Valley, Pine and Sandy Runs, which also furnish water-power. The limestone and iron-ore belts extend across the southern angle, following the valley of Sandy Run nearly two miles.

The township is crossed by the Spring House turn-pike two miles, the Lewisville and Prospectville pike two miles, Upper Dublin and Horsham pike one mile, Limekiln pike three and one-half miles and the Plymouth and Upper Dublin pike over one mile. The latter two roads were constructed in 1851 and 1855. The North Pennsylvania Railroad passes nearly a mile and a quarter through its western angle, and has a station at Ambler, fourteen and one-half miles from Philadelphia. The villages are Ambler, Fitzwatsontown, Jarrettown, Three Tons and Dreshertown; with a post-office at each, excepting the last-mentioned place. The population in 1800 was 744; in 1840, 1322; and in 1880, 1856. The taxable real estate in the year 1882 was valued at \$1,652,492, and including the personal, \$1,758,452, the average per taxable being \$3094. Upper Dublin contains fourteen square miles, and, according to the census of 1880, had then 132 inhabitants to the square mile. In May, 1883, licenses were issued to four hotels, nine general stores, one stove-store, six dealers in flour and feed, one coal-yard, one lumber and fertilizers, one tobacco-store and one restaurant. Without Ambler, it contains five public schools, open ten months, with an average attendance of 148 for the school year ending June 1, 1881. The census of 1850 returned 243 houses, 245 families and 129 farms. Every census taken since

¹ By Wm. J. Buck.

1800 shows in this township a remarkably steady increase in its population.

According to Holme's map of original surveys, the first land-holders in Upper Dublin, commencing at the Abington line, between the Susquehanna Street road and Horsham, were Samuel Clarrige, Pierce & Co., Richard Hill and Richards & Aubrey; south of that road to the Gwynedd line, in the same order, William Salaway, Mathew Perrin, Henry Patrick, Mathias Seely, John Southworth, Richard Coates, Andrew Soule, Thomas Marle and William and George Harmer. If the aforesaid is correct, it is very probable, judging by the list of 1734, that not one (unless the Harmers be excepted) of those mentioned was a settler, being merely dealers in land, which they took up with a view to speculation. It was, in consequence, settled slowly, and we cannot find that it was recognized as a township much earlier than 1719. Records exist establishing the fact that in 1705 it was regarded as a portion of Abington; hence we may justly conclude that its territory was set off from that township, but at what exact date cannot now well be ascertained.

To touch on the early settlement of Upper Dublin, it is, perhaps, best to refer first to the list of resident land-holders and tenants in the township in 1734, and from that date base all anterior claims. According to that authority, there were at the time mentioned thirty-five, as follows: Derick Tyson, 100 acres; Richard Witton, 200; Joseph Charlesworth, 200; Joseph Britain, 100; Ephraim Heaton, 100; Ellis Lewis, 200; Trump's estate, 200; Samuel Spencer, 100; Daniel Roberts, 200; William Atkinson, 50; Rees David, 100; Edward Burk, 200; Edward Burk, Jr., 20; Hugh Burk, 100; Thomas Parker, 90; Peter Cleaver, 100; William Melcher, 100; John Harmer, 100; Dennis Cunard, 100; Joseph Tucker, 200; Joseph Nash, 100; William Lukens, 200; John McCathery, 100; Thomas Fitzwater, 200; John Conard, 200; John Hamilton, 50; Thomas Fitzwater, Richard Reagan, Thomas Davis, John Trout, Charles Hubbs, Henry Rinkard, Ellis Lewis, John Loanan and Robert Doughty.

Edward Burk's purchase was made from Nicholas Scull and others November 21, 1698, and extended from the Susquehanna Street road to the Whitemarsh line, and included a part of the present village of Ambler. It must have been soon after this date that he settled upon his tract, and he was probably one of the earliest settlers in the township. Edward Burk, Jr., and Hugh Burk were his sons. John Burk was a supervisor of roads from 1774 to 1777, and from this last date Edward Burk continuously to 1786. He was also a collector of taxes in the Revolution. In 1776 we find assessed in this township Edward Burk, "aged," fifty acres; Edward Burk, Jr., seventy-eight acres; John Burk, sixty acres; John Burk, single. Charles Burk, now in his eightieth year, resides on the old homestead, which has never been out of the family. His father and grandfather bore the name

of Edward Burk. The latter was born on this place in 1761, and died in 1832. He is the last survivor of eight children and the only one bearing the name now in the township. The family have been among the earliest members of the St. Thomas' Episcopal Church, of which he has been warden since 1833. The records of this church go back no further than 1742, when Hugh Burk was warden and John Burk a vestryman.

It is known that Thomas Fitzwater owned real estate and carried on lime-burning at the present village of Fitzwatertown before June, 1705, when he had sent in a petition for a road from his kilns to Pennypack Mills; but it was not attended to until 1725. His father, Thomas Fitzwater,, with sons, Thomas and George, came from Middlesex, England, and arrived in the ship "Welcome," with William Penn, in November, 1682. His wife, Mary, and children, Josiah and Mary, died on the passage. He originally settled in Bucks County, which he represented in the Assembly in 1683. He afterwards removed to Philadelphia, and was again in the Assembly in 1690. He was a preacher among Friends, and died October 6, 1699. In the assessment of Upper Dublin in 1776, John Fitzwater is rated for three hundred acres of land and a grist-mill. Mathew and John Fitzwater, probably sons, are also mentioned thereon. John Fitzwater, a descendant of this family and an extensive lime-burner and real estate owner, died at Fitzwatertown, May 13, 1857, in his eighty-fourth year, and was buried in the family burying-ground near by. He was owner of a portion of the Emlin estate, on which is the large mansion used by Washington as his headquarters, while the army lay in the vicinity of Whitemarsh. Fitzwater as a surname has now become extinct in Upper Dublin.

Dennis (or Tunis) Kunders (or Conard) came from Germany and settled at Germantown before 1700, and with his sons—Conrad, Mathias and John—was naturalized September 29, 1707, to hold and enjoy lands. Peter Cleaver also settled in Germantown, and in 1695 was married, in Abington Meeting, to Catharine Shoemaker, and naturalized in 1707. We find here in 1776, Peter Cleaver owning one hundred and fifty acres; John Cleaver, one hundred; and Isaac Cleaver, one hundred acres. Descendants still possess lands here. The Houpt family is also of German origin, and in Montgomery County has produced several successful business men. Samuel Houpt, in 1776, is rated here as possessing a farm of ninety-five acres. His descendants have become numerous. Respecting the Lukens family, in 1776, Ryner Lukens is rated for 100 acres; Joseph Lukens, 100 acres; Isaac Tyson, 150 acres; Mathew Tyson, 50; and Jonathan Tyson, 123 acres and a grist-mill. Samuel Spencer, who is mentioned in 1734, was still living in 1776 and represented as "aged," and owing 150 acres; James Spencer, 150; and John Spencer, the same number of acres. They resided in the eastern part of the township and were members of Horsham Meeting.

Joseph Nash, in the list of 1734, may possibly be the same on whom a raid was made by the British while they held possession of Philadelphia, for which he was allowed two hundred and twenty pounds damages thus sustained.

The road from North Wales or Gwynedd to Germantown and Philadelphia, but now better known as the Bethlehem road or turnpike, which was laid out in 1704, but not opened until 1714, passes two miles across the west corner of the township. What is now called the Welsh road was opened from Gwynedd in 1712, forming the boundary line of Horsham, and extends to the present Huntingdon Valley, on the Pennypack. Respecting this road, there was a dispute, in 1731, between the two townships about keeping it in repair. Although Thomas Fitzwater had applied to the court for the grant of a road from his limekilns to the Pennypack Mills, by way of Abington Meeting-house, in 1705, it was not laid out and opened until 1725. This is the road now leading from Fitzwatertown through Weldon and Jenkintown. The Limekiln road was in use and bore this name before 1716. John Burk, in June, 1744, sent a petition to the Court of Quarter Sessions, stating that he had lately erected a grist-mill in Upper Dublin, and that he was in want of a road of about half a mile in length from the same to the Gwynedd road, passing on his line, with lands of Andrew Bradford deceased. It was accordingly ordered to be laid out. This is now the present John Heist's mill, above Gilkison's Corner.

Thomas Fitzwater was appointed collector of taxes for Upper Dublin in 1719; the amount was £10 10s. 8d., equivalent to \$28.80 of our present currency. Thomas Siddon was collector in 1722 and John Trump in 1723. Hans Caspar Schlater was supervisor of highways in 1765; James Spencer, to 1767; Michael Trump, to 1770; George Reagan, 1771; Samuel Murray and Christian Herner, 1772; John Spencer and John Burk, 1774; John Burk and Michael McCrory, until 1777; John Cleaver and Joseph Butler, 1786; Isaac Cleaver and George Dresher, 1788; Amos Lewis and George Dresher, 1792; Christopher Dresher and Jonathan Scout, 1810. Samuel Houpt was constable in 1767, James Spencer assessor in 1776, and Edward Burk collector.

At the present Gilkison's Corner, on the Bethlehem turnpike, Andrew Gilkison kept an inn from 1779 to 1786, and most probably later; hence the name of the place. This was on the store property now owned by David Dunnet. About a quarter of a mile above this place was a tavern formerly kept by Benjamin Daves. Paul Bower kept an inn in 1774, and Susanna Wright in 1779, which we are at present unable to locate, but very probably in this vicinity. In 1776, John Fitzwater, Jonathan Tyson, Joseph Detwiler and Lewis Rynear owned grist-mills, and Arthur Broades a fulling-mill, at the present village of Ambler.

Upper Dublin contains at present within its limits five houses of worship, namely: Puff's Lutheran,

Friends', Dunkard, Methodist Episcopal at Jarrettown and Baptist at Ambler. There are, besides, five private graveyards, belonging to the Fitzwater, Dresher, Whitcomb and Bergenstock families, and one on the McCormick property.

The large stone building used by Washington as his headquarters while the army lay in this vicinity is still standing in Upper Dublin, on the south side of Camp Hill, but a few yards from the Springfield line, and about half a mile from Whitemarsh. In the beginning of this century it was owned by Caleb Emlin, to which was then attached two hundred and thirty-six acres; after his decease, in 1810, it was sold in several tracts. The mansion and about one hundred and twenty acres were purchased by Mr. Stuckert, next by Mr. Frey in 1833, by John Fitzwater, and after his decease, in the fall of 1857, was purchased by the present owner, Charles T. Aimen, who has taken due care in its preservation. For its day it was certainly a great affair, and even now not many mansions are built larger. It is of stone, seventy-five by thirty-five feet, two full stories in height, and to it was formerly attached a wing on its western end, containing the kitchen. In making some repairs, over thirty years ago, it was deprived of its hip-roof, but otherwise has been very little changed. The hall is fifteen feet wide. The steps at the main front door are of fine soapstone, neatly wrought, and the general appearance of the building denotes it to have been at the date of its erection a superior structure. Its walls are substantial, and with care could be made to last yet for a long time. While Washington was here the army was encamped on the hill to the north of the mansion, which was certainly a strong position. It is even yet principally covered with woods. The encampment lasted from October 20 to December 11, 1777, when they proceeded on their march to Valley Forge. On the night of December 5th, General Howe came hither from Philadelphia, by way of Chestnut Hill, with a view of surprising the camp; but on seeing the position and unable to draw out the Americans, returned, by way of Abington and Jenkintown, to the city, the result proving the expedition a failure.

The Friends' Meeting-house is situated about half a mile northwest of Jarrettown, and was built in 1814 on a lot of ground presented for the purpose by Phebe Shoemaker. It is a one-story stone building, thirty-six by forty feet in dimensions. From its elevated position a fine prospect is afforded, towards the south of Edge Hill, for some distance, and the intervening country. The ground attached covers about two acres, on which are also erected several sheds for the accommodation of horses. About twenty yards from the front-door is a horse-block, of stone, consisting of five steps to the top, four and a half feet from the ground and three and a half feet wide, now so rare as to become an object of interest to the antiquary. The graveyard covers nearly an acre, and seldom among Friends is one seen having so many white

marble tombstones, though rarely over a foot high and with brief inscriptions. The surnames found are Lukens, Teas, Rutter, Beans, Shoemaker, Lightfoot, Hawlurst, Hughs, Rich, Danenhower, Thomas, Gar-riques, Cadwallader, Spencer, Fitzwater, Shaw, Wilson, Reiff, Willard, Conard, Robinson, Kenderdine, Matlack, Dunnet, Sill, Tyson, Atkinson and Potts. The families originally composing the meeting were those of David Lukens, George Shoemaker, Naylor Webster, Joseph Kenderdine, Samuel Conard, Cornelius Conard, Thomas Hallowell, Jacob Kirk, Levi Jarrett, Charles Thomas, Jesse Lukens, Phebe Shoemaker, Daniel Shoemaker, Thomas Shoemaker, Elizabeth Potts, George Dunnet, Jacob Reiff, Isaac Thomas, Atkinson Hughs, Michael Trump and Jonah Potts, now all deceased. A First-day school was started here in 1875, and has been the means of increasing the general attendance of the meeting.

The German Baptist, or Dunkard, meeting-house is nearly a mile northeast of Ambler, on the Plymouth and Upper Dublin turnpike. It is a one-story stone building, twenty-eight by thirty-six feet in dimensions, and was built in 1840. The ground belonging to it is nearly an acre, of which the graveyard occupies about two-thirds. The tombstones contain the names of Reiff, Moore, Smith, Livezey, Gamble, Slingluff, McCool, Jones, Sperry, Fry, Wentz, Souders, Detra, Lear, Ford, Walton, Bisson, Henry, Kneezel, Buchanan, Lightcap, Haycock, Wolfe, Collum, Fulmer and Faringer. Before the erection of the meeting-house the congregation worshiped in a school-house in the vicinity. For some time it was a branch of the Germantown Meeting, and was served by their ministers. Elder John Price was its first stated pastor. Caleb H. Price was elected and preached here until he went to the West. John Slingluff and others next supplied the pulpit for several years, or until about 1881, when Israel Poulson, from New Jersey, settled within its bounds and the charge was given him. Worship is held here every Sunday, the services being conducted in English.

The flourishing village of Ambler is situated in the western corner of the township, on the east side of the Wissahickon Creek, and near to the Gwynedd and Whitpain line. Its origin and prosperity have been chiefly owing to the North Pennsylvania Railroad, and only dating since its construction in 1856. The census of 1880 gives it a population of two hundred and fifty-one inhabitants, and it promises, from its present prosperity, ere long to add to the present number of boroughs in the county. In 1883 it contained one hotel, one hardware, one drug and two general stores, one lumber and two coal-yards, a grist-mill and about seventy houses. The Baptist Church here is a one-story stone building, of which the Rev. Mr. Humphreys is pastor. Upper Dublin post office was removed here from Gilkison's Corner several years ago, and has only been recently changed to Ambler. In December, 1880, this village, with a small portion of

Whitemarsh, Gwynedd and Whitpain adjoining, was formed into an independent school district, of which about one-half of the territory was included from Upper Dublin. The public school building here is of stone, two stories in height, of which Lizzie Magee is teacher. For the school year ending June 1, 1882, it was open eight and a half months with an average attendance of forty-six pupils. There is here also a beneficial society, incorporated May, 1883,—Camp No. 215, of the Patriotic Sons of America,—and several manufacturing establishments. A newspaper was published for about six months, by Dr. Rose, called the *Ambler Times*, which was succeeded, in December, 1882, by *The Ambler Gazette*, which continues to flourish. In the south part of the village, beside the railroad, is the extensive establishment of Keasbey & Mattison, manufacturing chemists, who employ about sixty hands, chiefly in the preparation of carbonate of magnesia and quinine. The business was commenced here in 1881, and they use several steam-engines, the largest of eighty horse-power. Their office in Philadelphia is at 332 North Front Street. The First National Bank of Ambler was organized in May, 1884, with a capital of fifty-five thousand dollars; Benjamin P. Wertsner, president, and J. J. Houghton, cashier. A bank building was commenced in 1884, and is now nearly completed. To the east of the village is Ambler Park, at which, for several years, an agricultural exhibition has been held. The turnpike through this place was made in 1855, on what has been long known as the Butler road, and extends from the Three Tons to the borough of Conshohocken. The grist-mill owned in 1776 by Joseph Detwiler is now in possession of Edward Plumly, on the west side of the Wissahickon. Arthur Broades had a fulling-mill here, on Rose Valley Run, in 1776, since owned by the Ambler family, but no longer in operation. The track of the North Pennsylvania Railroad here was stated by the engineer to be one hundred and ninety feet above tide-water level. Should this in the future become a large town, it will possess, from its situation, excellent facilities for a water supply, so often found wanting at growing places.

Fitzwatertown is situated in the southern part of the township, on the Limekiln turnpike, in the midst of the fertile valley of Sandy Run, abounding in limestone and iron-ore. This is an old settlement, where Thomas Fitzpatrick followed lime-burning before the summer of 1705 and had a grist-mill erected at an early period. It contains a store, hotel, wheelwright and blacksmith-shop, grist-mill and about twelve houses. The post-office was established here before 1858. The value of lime produced in Upper Dublin for 1840 was stated to be twenty thousand two hundred and seventy-five dollars, which was all produced in this vicinity, but the business has since been greatly increased through railroad facilities. Edge Hill Station, of the North Pennsylvania Railroad, is only a mile distant; yet, with all its surpassing ad-

vantages, as may be observed, has made but very little progress for the last half-century. The grist-mill mentioned was long carried on by John Price and is now owned by Samuel Conard. Sandy Run is a steady stream rising at the Moreland line, about three miles distant.

Jarrettown is the second largest village, and is situated near the centre of the township, on the Limekiln turnpike, which was constructed in 1851. It contains a hotel, store, a three-story Odd-Fellows' Hall, two story public school-house and twenty-one houses. The post-office was established here in 1866. Gordon in his "Gazetteer," mentions this place in 1832, as containing five or six dwellings. The name of the place was derived from Levi Jarrett, the owner of several farms in this vicinity in 1815. In 1776, John Jarrett was assessed for two hundred and thirteen acres. The name of Jarrett, like those of Fitzwater and Dresher, has now become extinct in Upper Dublin. On the east side of the pike, in the lower part of the village, stands the Methodist Episcopal Church, built in 1866. The pastors who have served are J. W. Haskins, Abel Howard, W. L. McDowell, R. Tumer, J. R. Bailey, M. Barnhill, E. C. Yerkes, A. J. Collom, E. Townsend and G. L. Schaffer. The elections of the township are now held at Jarrettown; previous to 1840, strange to say, they had always been held at Whitmarsh, nearly five miles distant, since the origin of the county, over fifty-five years.

Dreshertown is situated at the intersection of the Limekiln turnpike with the Susquehanna Street road, and equidistant from Fitzwatertown and Jarrettown. As these two highways are ancient, they must denote an early settlement. It contains a store, grist-mill and eleven houses. A post-office was established here in 1832, and the township elections held here from 1840 until after 1856; both have since been removed to the more flourishing village of Jarrettown. George Dresher, the ancestor of the family, with his wife, Maria, arrived in Pennsylvania, in 1734, from Silesia, and settled in the vicinity of Towamencin. George Dresher, his grandson, shortly after the Revolution, moved to this vicinity, and was one of the supervisors of Upper Dublin in 1788 and 1792. Christopher Dresher, son of George, was born in 1771, and married Anna, daughter of Abraham Anders, in 1799. Their children were Agnes, Rebecca, George and Eli. Christopher Dresher, after whom the place was called, died January 23, 1839, in this village, aged sixty-eight years. He was the owner of the farm now belonging to Jacob Barnet. Christopher Dresher was also a supervisor in 1810. George, the brother of Eli, died January 6, 1851, aged thirty-five years.

The village of Three Tons is situated in a fine, fertile section of country, at the intersection of the Horsham and Butler roads, the latter being turnpiked to Ambler, two and a half miles distant. It contains a store, hotel, school-house, several mechanic shops and five or six houses. The post-office was established

here in 1858; T. G. Torbert, postmaster. The Union Library of Upper Dublin is kept here, over the store of E. T. Comly, and now contains about two thousand volumes. It was incorporated May 25, 1840; E. T. Comly, treasurer, and Ellie Teas, secretary and librarian. The Upper Dublin Horse Company, organized many years ago, holds its annual meetings here. Recent researches establish the fact that before 1722 a well-traveled path led from Edward Farmar's mill, in Whitmarsh, through this place, to Richard Saunders' ferry, on the Neshaminy (now the village of Bridge Point, three miles south of Doylestown).

Gilkison's Corner is situated at the intersection of the Spring House and Butler road turnpikes. It contains a store, six or seven houses and the extensive steam tannery of Alvin D. Foust, established some thirty years ago. It was at this place where Andrew Gilkison kept a tavern in the Revolution and for some years thereafter. The Upper Dublin post-office was located here before 1827, but has been removed half a mile distant, to its more flourishing rival, Ambler, to which its name has only been recently changed.

Upper Dublin Lutheran Church.—In its vicinity this church is better known as Puff's church, and is located at the east corner of the intersection of the Susquehanna Street and Butler roads, about a mile northeast of Ambler. Concerning its history very little has heretofore been published; but with the assistance of the Rev. B. M. Schmucker, of Pottstown, one of the editors of the "Halle Reports," we are enabled to present an account of this early congregation. The organization of the church was effected in 1753 or 1754 by the Rev. John Frederick Handschuh, the resident pastor of Germantown. It is supposed, from the fact that the burying-ground was then here, that he preached several years previously at this place. The first building was constructed of logs, of which the Rev. H. M. Muhlenberg, of the Trappe congregation, gives us a relation in his report to Halle, dated June 18, 1754. He says,—

"Many German Lutherans reside in this neighborhood, and although new beginners and poor, they have erected a roomy school and meeting-house and have besought aid from us. Mr. Handschuh has visited them and administered the word. I visited them at their request and preached on a week-day, baptized several children in the presence of a large assemblage of German and English people, who had gathered from North Wales and other adjacent parts. As there was as yet no roof on the building, and it was difficult to preach in it, I urged the poor people to follow my example, and add their contributions to mine, so that at least one-half of the building might be roofed in, which was done."

Mr. Handschuh ministered to the congregation for several years, perhaps until 1757, when the charge devolved upon Mr. Muhlenberg, who sent his student, William Kurtz, to preach, and afterwards committed it to the care of his assistant, Rev. John Helfrich Schaum, who was settled at New Hanover, and took charge of Upper Dublin in the spring of 1758. He continued in the same until 1762, when he removed to Berks County. Mr. Muhlenberg, however, had the general oversight, and occasionally visited the con-

gregation. In January, 1763, he administered the communion and stated that he was no longer able to minister to them. In the following June the Rev. Nicholas Kurtz took temporary charge of Germantown and Upper Dublin until June, 1764. This care of the two churches by the same pastor was now continued for many years.

The Rev. Jacob Van Buskirk had charge from 1765 to 1769; John Frederick Schmidt from 1769 to 1785. The time at which his labors ceased is uncertain, but in 1785 the congregation, in union with Tohickon and North Wales Churches, applied for the recognition and ordination of Anton Hecht, who had been a schoolmaster among them, which request was refused. Mr. Hecht, however, was ordained by some independent minister and served Tohickon and some other congregations for several years, and probably preached at Upper Dublin. In 1793, Mr. Van Buskirk settled at North Wales and probably again preached to this congregation. In 1797, Rev. Henry A. Geissenhainer was licensed at the request of Upper Dublin and North Wales, and was pastor until 1801. Soon after this it was again connected with Germantown, and Rev. Frederick David Schaeffer continued in charge at least until 1810, and possibly until his removal to Philadelphia, in 1812.

At some unknown time, not earlier certainly than 1810 and possibly several years later, services ceased to be held, the congregation became scattered or lost, the building disappeared and the burial-place remained the chief reminder of the past. Chiefly through the efforts of the Hon. John B. Sterigere, whose kindred repose here, a charter was procured from the Legislature in 1852 for a Lutheran congregation at the old burial-ground so long known as Puff's. By the will of Conrad Amrich, proved in 1835, a bequest of six hundred and sixty-four dollars was made to keep the graveyard in repair. Services were held in the public school-house opposite, from 1852, with some regularity, until the erection of the present church by Revs. W. N. Baum and David Swope, of Whitmarsh Church. The corner-stone was laid October 15, 1857, and the church consecrated July 18, 1858, when Rev. John C. Baker, D.D., preached. Rev. Lewis Hippee was pastor until August, 1859; Rev. Edward J. Koons from March 3, 1860, to May 1863; Rev. George Sill from the following September to 1869; Rev. Mathias Sheeleigh from said date until the present time. The members now number about eighty.

The church is a one-story stone edifice, forty by fifty-six feet, with an iron railing in front. Worship is held here and at the Union Church of Whitmarsh alternately, the services being conducted in English. The graveyard contains about an acre of ground, and several of the earliest stones containing inscriptions are not legible. We find here the surnames of Baughman, Leonhart, Engard, Rodemick, Stout, Brock, Webster, Shaffer, Rynear, Smith, McAlonan, Fluck,

Dilthey, Rex, Baker, Collom, Hoffman, Behlmier, Swink, Thomas, Bates, Berkheimer, Snyder, Pruner, Houpt, Taylor, Sterigere, Aimen, Shay, Gilbert, Ulrich and Timanus. The Houpts appear to be the most numerous. One stone was observed bearing the date of 1762 and another of 1770. A marble column about ten feet high has been erected here over the remains of the brothers Wm. L. and John B. Sterigere. The latter died at Norristown October 13 1852, aged upwards of fifty-nine years.

In connection with this subject, we may add that the aforesaid was the son of Peter and Elizabeth Sterigere, and was born in Upper Dublin in 1793. He taught school when a young man in the school-house opposite, and at the age of twenty-five received a commission as justice of the peace and also followed surveying and conveyancing. In 1821 he was elected to the Assembly and continued for three years. He was elected to Congress in 1826 and now left his native township to study law and was admitted to practice in the fall of 1829. In 1839 he was elected to the State Senate and served two terms. As a member of the Borough Council of Norristown he contributed much towards its improvement. He died unmarried and left a handsome estate, the result of his own almost unaided exertions, having been born of poor parents, and in his youth receiving but a very limited education. He was a man possessed of mental ability and force of character.

Wm. Homer and his Reminiscences.—Wm. Homer was descended from a family that by an ancient document dates back to 1684 in Byberry and perhaps Bensalem, adjoining. Mention is made of one of this name owning a farm of fifty acres in the former township in 1734, and in 1782 of two hundred acres. It is likely the former was his grandfather, as he bore his name. His father was also William Homer, who moved from Byberry, in the spring of 1767, on the farm he purchased from James Thornton, containing one hundred and forty-four acres, situated in the east corner of Upper Dublin, a little over a mile northwest of the Willow Grove. Here the subject of this notice was born in July, 1767, and resided during his long life, extending nearly to a century. After he grew to manhood he married Hannah, the daughter of Morris Edwards, whom he many years survived. He had an only brother, Chilion, and two sisters. While young, in addition to working on his father's farm, he followed carpentering, and in the winter, in his work-shop, made bureaus, tables and other articles of furniture. As a mechanic he was self-taught, having a turn that way. He received a very ordinary education, having gone but to two places to school, one was near the present Dreshertown. His father, in the assessor's list for 1776, is rated for keeping two horses, four cows and six sheep,—a fair example of the amount of stock then generally kept on farms of similar size.

Several traits in the character of William Homer

deserve mention. He had his farm divided with the requisite buildings to each, which were rented to his two sons, Cyrus and Jesse, on shares, while he retained for his use a part of the old mansion. Being of a rather retiring and unassuming turn, he was given to spending a portion of his leisure with tools. He had a peculiar fondness for rearing bees, and an attachment to straw hives, also for pigeons, having often over a hundred together, which he loved to feed. The latter would often be shot at during autumn by depredating sportsmen hailing from Philadelphia and Germantown. He estimated men by their intellect or for holding landed estates like himself. He never went farther from home than to Philadelphia, Bristol, Newtown, Norristown and Doylestown, which would not exceed twenty miles. The latter place he remembered when it contained but three or four houses. He had also been to "Buckingham" as he called it. It is supposed that he had never ridden in a stage-coach, omnibus, steamboat or railroad car. He thus passed a contented and unambitious life, was of good habits and respected by his neighbors. On the 31st of January, 1860, he died at the advanced age of ninety-two years and six months, retaining good health till near the last. At his funeral, Henry Woodman, of Buckingham, delivered an excellent sermon. In religion he was a Friend, and he was buried in the graveyard attached to Horsham Meeting-house. He left two sons and three daughters; the former are now both deceased. Jesse Homer, the last, died on the estate March 6, 1883, in his eighty-fifth year. Extracts will now be given from his reminiscences, taken down by the writer in casual visits to his house fully one-third of a century ago.

He saw wild turkeys in his father's woods occasionally as late as the year 1785. Turkey buzzards were frequently seen as late as the beginning of this century. Wild pigeons, at times, were seen in immense flocks, particularly in 1793, the year of the yellow fever in Philadelphia. He remembered well one flock particularly, that appeared to be about one and a half miles long and all of half a mile in breadth. Previous to 1810 they bred in great numbers in the woods, and he had counted as many as twenty nests on one tree. He had himself caught, in nets, many thousands in the spring and fall. Horses and wagons were used to convey what were thus taken. One of his nets, now almost a century old, is still preserved in the family. The last bear seen in the vicinity was in the woods, nearly a mile northeast of his house, in 1772. In his woods he also showed traces of three saw-pits, which had been used in his father's day to convert logs into boards with a whip-saw.

Concerning the Willow Grove, he related the following particulars: Here he first went to school, in a log school-house that stood near the forks of the old York and Easton roads. Joseph Butler kept the

tavern there in the Revolution, being the stand so long known as the Red Lion. While the British held possession of Philadelphia a detachment came out and took him prisoner. Divisions of the American army encamped several times in the orchard back of the tavern. The soldiers appeared to be chiefly Virginians, who practiced shooting at a mark one hundred yards distant with rifles, and he stated that they got him to cut out the balls for them with a hatchet. In the skirmish of December 8, 1777, on Edge Hill, near the present Susquehanna Street road, where Morgan's regiment had twenty-seven either killed or wounded, some of the latter were brought in a wagon to Butler's tavern, where the scholars beheld them so bloody that it frightened them so that they hurried back to the school-house. Where is now the Mineral Spring Hotel lived Nathan Bewly, who followed scythe-making, and had a mill for grinding them immediately back of his house, in the meadow, the dam being on the west side of the York road, now Rittenhouse's meadow. He caught sunfish there with a hook and line. Near the present intersection of the railroad and turnpike there then lived a woman called Nanny McSween, whose husband followed hunting at the Blue Mountains.

On the formation of Montgomery County, in 1784, the elections for thirteen townships were held at the village of Whitemarsh, nearly four miles from his farm. On those occasions a great many pugilistic encounters took place, fighting being postponed for those occasions. He remarked the great diminution taking place in streams, through clearing the land and drainage. He remembered in his vicinity the sites of three grist-mills that had long ago disappeared, owing to a want of water. Apple-cuttings, apple-butter boilings, flax-pullings, flax-spinnings, corn-huskings and shooting-matches had become things of the past. About 1790 there resided about two miles west of him a famed "witch doctor," as he was called, of considerable practice. He was chiefly called upon to relieve children, horses and cattle thus afflicted. He was a witness more than once to his operation. He carried with him on these occasions, a large black-letter volume, bound with brass clasps, which he would open and repeat a peculiar lingo, and use certain powders to exorcise and ward off the evil influences under which it was supposed the victim had been laboring. That he possessed supernatural powers, and that witchcraft actually existed, was really believed in at this time by not a few throughout the country. Those that practiced the "doctoring" were really looked up to as following a beneficial calling.

ASSESSMENT OF UPPER DUBLIN, 1776.

BIOGRAPHICAL SKETCHES.

CHARLES PAXSON.

Charles Paxson was the son of Joshua and Mary (Willett) Paxson, of Middletown township, near Langhorne, Bucks Co., Pa., where he was born on the 19th of August, 1803. He was one of the younger of a family of nine children, all of whom lived to pass the middle age, and one of whom (Mrs. Anna P. Burton, widow of Anthony Burton, of Bucks County) is still living, at Germantown. It is related of these nine children that they were all possessors of vigorous health, stout and robust in person, and that at one time their aggregate weight exceeded two thousand pounds.

In 1808, Charles Paxson removed with his parents from Bucks County to Cheltenham township, Montgomery Co., where he resided with them for eighteen years, on the farm which is now of the estate of John W. Thomas, deceased. In 1826, he removed from the paternal homestead in Cheltenham to Upper Dublin township, where he located on a fine farm

which his father, Joshua Paxson, had purchased a few years earlier, it being a section of the old Spencer property, patented from William Penn. In later years it became known as the "Spring Farm," on which Mr. Paxson lived for more than half a century, until his death, and which is now the residence of his widow.

Charles Paxson was married, January 4, 1844, to Agnes, daughter of John and Sarah (Paxson) Tyson, of Abington. The families on both sides, from their early ancestors down to the present time, have been of the Society of Friends. The children of Charles and Agnes Tyson Paxson have been Sarah T. (now living at the Paxson homestead), Joshua W., Anna B., Josephine (died in July, 1883) and Charles S. Paxson. Their father, Charles Paxson, died at his home, in Upper Dublin township, on the 2d of March, 1880, in the seventy-seventh year of his age. His remains were interred in the family lot in the Friends' graveyard at Abington.

At the time of his death Mr. Paxson was the owner of two farms, situated on the Limekiln, Horsham and Welsh roads, and aggregating two hundred and eighty-five acres of excellent and well-watered lands. He was a practical farmer, of advanced ideas, who pursued his chosen vocation with the intelligence, enterprise and industry which seldom, if ever, fail to yield the return which they gave to him,—that of abundant success. He possessed a firm will, a noble spirit and a genial nature. He ever gave his support to the wise reforms of his day, as opposed to traditional wrong and depredation, and he took especial delight in the eloquence of orators who, like Phillips, uttered what he termed sublime truths in advocacy of the righteousness which exalteth a nation. At the time of his death a gifted writer, who had known Mr. Paxson well and intimately through life, paid this truthful tribute to his memory: "The deceased was possessed of traits of character that, wherever found, adorn human nature. He was a good neighbor, a kind friend, an affectionate husband and a kind, considerate father; beyond these he was a just man, a liberal Christian, a patriotic citizen and an earnest reformer; a lover and helper of every good work that was going on in the world, that came within his cognizance. He was one of a half-dozen noble men in his neighborhood who uplifted the banner of anti-slavery in the beginning, in the time that truly tried men's souls, and maintained it to the end, not aggressively, but patiently, steadfastly, and without a thought of consequences or of giving up the contest while the wrong existed."

The ancestry of Charles Paxson and of his wife, Agnes Tyson, is traced back respectively to two brothers,—William and James Paxson, who came from Bucks County, England, to America, in the ship "Samuel," in 1682, and settled at Middletown (now Langhorne), in Bucks County, Pa. The first-mentioned William Paxson married Mary Packingham, and they

became the parents of William Paxson, the second, who was married, in 1711, to Mary Watson. Their son, William Paxson, the third, was married, in 1740, to Anna Marriott, daughter of Thomas Marriott and his wife, Martha Kirkbride, who was a daughter of Joseph and Phebe (Blackshaw) Kirkbride and a granddaughter of Randle Blackshaw. William and Anna (Marriott) Paxson were the parents of Joshua Paxson, who, with his wife, Mary (Willett) Paxson, were the parents of Charles Paxson, the subject of this memoir and the great-great-grandson of the William Paxson who came to America in 1682. On the maternal side his ancestry is traced still further back, to

The lineage of Agnes Tyson, wife of Charles Paxson, is traced back to James, the brother of the first William Paxson, who, as before mentioned, came to America and settled in Bucks County in 1682. William Paxson, son of James and Jane Paxson, was born October 25, 1675, and died in May, 1719. He was married, December 20, 1695, to Abigail, daughter of George Pownell. Their son, Thomas Paxson, was married, in 1731, to Jane Canby, daughter of Thomas and Mary (Oliver) Canby and granddaughter of Benjamin Canby and of Evan Oliver. Thomas Paxson died in October, 1782. His son, Jacob Paxson, was married, November 13, 1777, to Mary Shaw,

William C. Potts

Thomas Cornell, whose daughter, Sarah Cornell, married Thomas Willett; and their son, Col. Thomas Willett (baptized in 1645), married Helena, daughter of Elbert Stoothoff. Their son, John Willett, married Mary, daughter of John Rodman. They were the parents of Jonathan Willett, whose wife, Deborah Lawrence, was a daughter of Obadiah Lawrence, the granddaughter of Major William Lawrence and his wife, Deborah Smith, and the great-granddaughter of William Lawrence, and of Richard Smith. Jonathan and Deborah (Lawrence) Willett were the parents of Mary Willett, wife of Joshua Paxson and mother of Charles Paxson.

daughter of Jonathan and Sarah Shaw. A daughter of Jacob and Mary (Shaw) Paxson was Sarah Paxson, who became the wife of John Tyson and mother of Agnes Tyson, wife of Charles Paxson.

WILLIAM C. POTTS.

William C. Potts, of Upper Dublin township, and one of its most widely-known and prominent men, as he is also one of its most prosperous farmers, is of Welsh extraction, directly descended from the first emigrants of that family name,—David and Alice Potts,—who came from Wales to Pennsylvania, and settled at Germantown nearly, if not quite, two hun-

dred years ago. Among their descendants of two or three generations later was John Potts, who, in 1760, was married to Hannah Davis. Their farm was one of about one hundred and fifty acres, in which was included about fifty acres of the homestead property, now owned and occupied by their great-grandson, William C. Potts, in Upper Dublin. The house in which he now lives was built by John Potts for his son Thomas at the time of his marriage. It was occupied by Thomas Potts, the elder, during his life, and after him by his son, Thomas Potts, the father of William C. John Potts, the great-grandfather, died in 1808. His son Thomas was born July 7, 1761, and died March 2, 1812. His son, Thomas Potts, the second, was born February 23, 1802, and died February 4, 1870. His wife was Caroline Cooper, daughter of William Cooper, of Horsham township. She died in 1851.

William C. Potts, son of Thomas and Caroline (Cooper) Potts, was born November 10, 1827, in the house where he now lives, and which had been the home of his father and grandfather before him. The only other child of Thomas and Caroline C. Potts was Thomas Elwood Potts, who is now living on a good farm near his brother's, in Upper Dublin. The youth of William C. Potts was passed in the manner usual to farmers' boys of his time,—working on the farm in the summer season, and in winter attending the common schools, which furnished his only means of education. In 1855 he commenced farming for himself on the farm of his father, who at that time retired from the active pursuits of agriculture, but continued to live at the homestead with his son until his death, in 1870. The farm of Thomas Potts, which was seventy-seven acres in area, became the property of his son, William C., who has been very successful, not only as a farmer, but in other business enterprises. By subsequent purchase he has increased the farm to one hundred and five acres, well stocked and under excellent cultivation, and he is also the possessor of ample means independent of his real estate. He was an original stockholder in the First National Bank of Ambler, and has been a member of its board of directors from its organization to the present time. He has been a Republican in politics from the time of the formation of that party, but has never held nor in any way sought for public office of any kind.

On the 4th of January, 1855, William C. Potts was married to Phebe K., daughter of Jacob Walton, of Horsham township, and they have been the parents of the following-named children: Thomas Elwood (now living with them), Dubre K. (deceased), Carrie (died in her tenth year), Lydia W. (youngest child and living at home). Mr. and Mrs. Potts are members of the Upper Dublin Friends' Meeting, and the ancestors of both, for many generations back, were of the people called Quakers.

DAVID J. AMBLER.

David J. Ambler, of the village of Ambler, in Upper Dublin township, is descended from an ancestor named Joseph Ambler, of Montgomery township, who (as is shown by the Philadelphia County records) purchased a certain tract of ninety acres of land in that township of William Morgan, May 1, 1723. Among the children of this Joseph Ambler and Ann, his wife, were Edward and John Ambler. The ninety-acre tract in Montgomery township, above mentioned, was sold by Joseph Ambler, in 1768, to his son Edward, who, in 1770, devised it by will to his brother John, who was great-grandfather of the present David J. Ambler. In 1794, John Ambler sold the same tract for two hundred pounds to his son Edward, who was by trade a weaver. The present residence of Mrs. Mary Ambler, in Montgomery township, is the place where Edward Ambler lived, and where he died on the 1st of January, 1838. His wife, Ann Ambler, died October 15, 1827. Their son Andrew, the father of David J. Ambler, was married, May 14, 1829, to Mary Johnson, daughter of Benjamin and Abigail Johnson, of Richland, Bucks Co. The Johnson family was of German descent.

Andrew Ambler settled in Lower Dublin township, on eighty acres of land, which he purchased in 1832 of Mary Davies, and on which he built and occupied a house which is still standing in Ambler village, and owned by Charles O. Yocum. He was a fuller by trade, and soon after his settlement he built a fulling-mill on his land, on the site of a small mill of the same kind which had stood there more than seventy years, having been sold, in 1759, by the executor of Daniel Morris, to Arthur Broades, father of the Mary Davies, from whom Andrew Ambler had made the purchase. The Ambler fulling-mill remained in use many years, and was finally destroyed by fire December 31, 1869.

Andrew Ambler died March 7, 1850, at the age of fifty-six years. His widow, Mary J. Ambler, died August 18, 1868, aged sixty-three years. It was for her that the station (and from it the village) of Ambler received its name. During her widowhood (in 1856) a very serious railroad accident occurred near Fort Washington by the collision of a school excursion train going north with a local passenger train going south. On receiving the intelligence Mrs. Ambler, without a moment's delay, gathered lint, bandages and other necessary materials, and went on foot two miles to the scene of the disaster, where she remained through the day till all the wounded were cared for, rendering such conspicuous service to the suffering victims as elicited the warmest gratitude and high commendation from the officers of the railroad company, who, after her death, honored her memory by changing the name of the station from Wissahickon to Ambler.

David J., son of Andrew and Mary (Johnson) Ambler, was born March 22, 1837, at his father's place, in

what is now Ambler village. His education was obtained at the common schools, supplemented by two winter terms at the Freeland Seminary, then in charge of Henry A. Hunsicker. After leaving school he was employed for two years as a clerk in a store at Fitzwatertown, Montgomery Co. In 1859 he went to Quakertown, Bucks Co., where he established a coal and lumber business, in which he continued for ten years. In 1869 he removed to Upper Dublin township, where he purchased the homestead property on which he was born, and upon which a part of the village of Ambler was laid out and sold in lots in 1870—

rector from the time of its opening. He is now, and has been for four years, one of the directors of the Ambler Independent School District.

Mr Ambler was married, March 6, 1862, to Caroline F., daughter of Aaron Penrose, of Quakertown, Bucks Co. They have one daughter, Ella, who is the wife of Daniel M. Leedom, son of Dr. Edwin C. Leedom, of Plymouth, Montgomery Co. Three brothers of Mr. Ambler—viz.: Isaac E., Joseph M. E. and Evan J.—are also residents of Ambler village. Another brother, Louis J., resides in Philadelphia. The family of Ambler in Montgomery and Bucks Counties for

Daniel J. Ambler

71. In 1874 he returned to Quakertown, and again engaged in the coal and lumber business, which he still retains, though now living in Ambler, to which place he returned in 1878, and built the stone mansion which has from that time been his residence.

In the years 1866–68, inclusive, Mr. Ambler was a member of the Borough Council of Quakertown. In 1868 he was elected a director of the Doylestown National Bank, and resigned after two years' service. In 1884 he, with Benjamin P. Wertsner, William M. Singerly and others, organized the First National Bank of Ambler, of which he has been a di-

rector from the time of its opening. He is now, and has been for four years, one of the directors of the Ambler Independent School District.

JOHN L. JONES.

John L. Jones, one of the substantial land-owners and farmers of Upper Dublin township, of which he has been a resident for more than sixty years, was born on the farm of his father, in Montgomery township, of the same county, on the 25th of June, 1811. He was a son of Henry Jones and his wife, Jane Lewis, daughter of Amos Lewis, who owned and occu-

pied a fine farm at Three Tuns, Upper Dublin township. The children of Henry and Jane (Lewis) Jones were Lewis and Clement, both deceased; John L., born as above stated, and now residing at Jarrettown; and Henry, now living at Ambler, in Upper Dublin. The father of these children, Henry Jones, died in 1815, when his son John L. was between four and five years of age. He received his only education at the common schools, which he attended in winter, working on the farm in the summer season. In 1821 he moved, with his mother and the family, from the Jones

removed from the Lewis farm to a smaller property which he had purchased at Jarrettown, and which is still his place of residence. After his removal from the old homestead farm of his grandfather, Lewis, he still continued to own it about twelve years longer, and finally sold it in 1884.

John L. Jones was married, February 12, 1840, to Margaret Garrigues, daughter of Benjamin and Anna Garrigues, who were the parents of three daughters and one son, all of whom are now living, viz.: Margaret (Mrs. John L. Jones), Lee Garrigues (now of

John L. Jones

place, in Montgomery township, to the Lewis farm, near Three Tuns, which was then owned and occupied by his grandfather, Amos Lewis, who died a few months later in the same year. Mrs. Jones then occupied the farm of her father for nineteen years, until 1840, when she died and the property of herself and her deceased husband (the homestead and two other farms) was divided among their sons, Lewis, the eldest, taking the old Jones place of one hundred and seventy acres, in Montgomery township, and John L. becoming the owner of the Lewis homestead farm, of one hundred and eight acres, in Upper Dublin. On that place, as boy and man, he lived and worked as a farmer for more than a half-century, leading an honest and industrious life, and gaining a property more than ample for all his needs and requirements. In 1872 he

Norristown), Sarah (wife of George Wood, of Moreland township) and Ellen (wife of John Meredith, of Norristown).

The children of John L. and Margaret Jones have been Evan, born February 2, 1841, and died November 5, 1864; Jane, born January 13, 1843, and now the wife of Dr. Franklin T. Haines, of Rancocas, N. J.; Anna G., born February 13, 1845, and died April 1, 1866; Mary Ellen, born April 20, 1847, and died January 30, 1869; Caroline, born July 12, 1849, and died in infancy; Clement, born November 21, 1850, died in infancy; Henry, born November 28, 1852, died in infancy; Caroline H., born July 9, 1854, and died September 19, 1881; Louisa G., born August 6, 1857, died at Enterprise, Fla., March 12, 1882.

Mr. Jones has always been a steadfast adherent of

the Republican party from the beginning of its existence to the present time, but he has never been an office-seeker nor a politician, in the strict meaning of the term. He and his wife are descendants of Quaker ancestors, and both are members of the Friends' Meeting of Upper Dublin.

BENJAMIN KENDERDINE.

Benjamin Kenderdine, one of the wealthy farmers

the Horsham farm immediately after the death of its previous owner, Richard Kenderdine. From that early time to the present the Kenderdine family have been of the Society of Friends and members of the Horsham-Friends' Meeting.

Benjamin Kenderdine, of Upper Dublin, was the youngest of Thomas Kenderdine's family of eight children, who were the following named: Armitage, who died in Illinois; Margaret, unmarried, and now living in Horsham township; Mary, married David Todd, and both she and her husband deceased; Han-

Benj. Kenderdine

and most respected citizens of Upper Dublin, was born in Horsham township, Montgomery Co., on the 16th of August, 1818, he being a son of Thomas Kenderdine, a grandson of Benjamin Kenderdine, and a great-grandson of Thomas Kenderdine (all of Horsham township), and a descendant of a more remote ancestor of the family name, who came from Wales and made his first settlement in Abington. The first of the Kenderdine family who settled in Horsham was Richard, a half-brother of the elder Thomas Kenderdine, which last-named purchased and settled on

nah, widow of Robert Tomlinson; Sarah, unmarried, living in Horsham; Elizabeth, married Chalkley Kimball, of Hilltown, Bucks Co., where she died; Rachel, unmarried, living in Horsham and Benjamin Kenderdine, of Upper Dublin, to whom this sketch especially refers. In January, 1844, he married Sarah Ann Sneden, of New York. Their children are Cornelia, wife of D. Jarrett Kirk, of Upper Dublin, and Thomas, who is unmarried, living at the Kenderdine homestead, in the same township, near the Horsham line.

CHAPTER LXXVI.

UPPER HANOVER TOWNSHIP.

In the extreme northwestern part of the county is situated the township of Upper Hanover, bounded on the north by Lehigh, northwest by Berks, and east by Bucks Counties, south by New Hanover and Frederick, southeast by Marlborough and west by Douglas. Its greatest length is five and a half miles, greatest width four and a half miles, with an area of twenty-three square miles, or fourteen thousand seven hundred and sixty acres, having been reduced nearly two hundred acres by the erection of East Greenville into a borough, in 1875.

The surface is rolling and in some parts quite hilly. The soil is chiefly red shale. The Hosensack Hills, the highest elevation, commence near the Douglas line and extend across the whole northwestern part of the township at the distance of a mile from the Berks County line. They are covered with large boulders of granite, which are being split up, and furnish the best of material for building purposes. From the top of these hills splendid views of the valley on each side, with the hills beyond, are had, the view to the south being especially fine. Below, the valley expands and becomes a broad basin surrounded with hills, extending a distance of over six miles, nearly through the centre of which the Perkiomen Creek flows in a southern direction upwards of seven miles, and propels in this distance five grist-mills and four saw-mills. Hosensack, West Branch and Macoby Creeks are tributaries of this stream, the last-mentioned flowing through the eastern part of the township. They also furnish some water-power.

The Gosenhoppen and Green Lane turnpike extends to Treichlersville, Berks Co., and was completed in 1851. It passes on the ridge between the Perkiomen and Macoby Creeks, its elevation being such that persons driving along the road have a full view of the valley and surrounding hills. For about four miles this road is nearly level, and presents one of the most beautiful and attractive drives, with its succession of villages, farms, churches and fine scenery, that can be desired. The Gerysville and Sumneytown turnpike, finished in 1865, crosses the eastern angle of the township for two and a half miles, and another public road passes along the ridge between the Perkiomen and West Branch, known as the "Devil's Hole road." The Perkiomen Railroad has a course of upwards of five miles, with stations at Welker's, Hanover, Pennsburg, Palm and Hosensack. It was opened to Pennsburg in 1874, and in September of the following year to Emaus and the Lehigh Valley. Though so recently constructed, this improvement has already done much to develop this part of the county, formerly so remote from railroads. The post-offices are Pennsburg, Red Hill, Palm and Hillegass. The largest villages are Pennsburg, Palm, Kleinville and Hillegassville.

The population of Upper Hanover in 1800 was 738; in 1830, 1300; in 1850, 1741; in 1870, 2197; in 1880, 2408. The taxables in 1741 numbered 97; in 1828, 258; in 1858, 504; in 1875, 646; in 1884, 628. This township, which was a part of Hanover township, was formed before 1741, and for its early settlers the reader is referred to the article on New Hanover. Johann Frederick Hillegass, the ancestor of the numerous family of this name in this locality, arrived in the ship "William and Sarah" from Rotterdam in September, 1727. He had seven sons and three daughters; two of the former, Leopold and Adam, came over a few years later. Before 1734 we find that he took up a tract of one hundred and fifty acres of land here, on which he made the first improvement. Isaac and John Kieir came from Germany in 1736, and the Kleins of this locality are probably their descendants. Tobias Hartranft in 1742 took up a patent of one hundred and thirty acres of land from the proprietaries.

The First Grist-Mill on the Upper Perkiomen.—The following data of an ancient and interesting character, furnished by Philip Super, Esq., would seem to fix with reasonable certainty the claim of Upper Hanover to the oldest grist-mill on the Upper Perkiomen. Considering the importance attached to improvements of this character in the days of first settlements, the expensiveness of machinery, the importation from Europe of mill-stones, and their transportation on wagons from Philadelphia, over roads that were little more than cartways or bridle-paths, it becomes a matter of historical interest to fix as near as possible the early location of those establishments which supplied flour to the first bread-winners of the valley.

"To-day, date y^e 6th February, 1738 to '39, an agreement has been made between Geo. Groner and Frederick Hillegass, in Upper Hanover township; above-named George Groner has sold his mill and the land to it from the white-oak tree down to where the stakes are set to Ebenezer Thomas' line, and along with it the crow-bar, two hatchets, and one broad axe, and the half-brushel, and the toll and two hogsheds, and all things nail fast; and George Groner promises that Frederick Hillegass shall have the right from Jacob Wisler's line down to the mill-privilege, with the mill race, one perch on this side and one perch on the other side, but the above-mentioned Hillegass must do him no damage; the above-mentioned Hillegass shall keep said George Groner clear of expenses that might be made on the certain land that he has sold to him and said Groner shall still have the privilege to grind in the mill till the first day of April, 1739, and the above-named Frederick Hillegass promises said George Groner to give for the mill and above-mentioned land 150 pound and one wagon, 80 pound on the 16th of November, and 25 pound on the 16th of November, 1740, and again 25 pound on the 16th of November, 1741, and further Frederick Hillegass promises to pay 20 pound on the 16th of November, in the year 1742, and the purchaser and seller promise to fulfill the above sale, as witness,

"JOHANNES HULS.

"PHILIP LABAR.

"FREDERICK HILLEGASS.

"GEORGE GRONER.

"[Seal.]"

"Articles of agreement made, indented, agreed and fully concluded on the twenty-third day of February, in the year of our Lord one thousand seven hundred and thirty-eight and nine, between George Groner of Upper Hanover township and county of Philadelphia, yeoman, of the one part, and George Shenk, of the same place, husbandman, of the other part, witnesseth that the said George Groner for the consideration

of fifty-five pounds, current lawful money of Pennsylvania, the said George Groner hath bargained and sold, and doth bargain and sell, unto the said George Shenk all the improvements and work done upon a piece or tract of land that was bought of Lodowig Christian Sproegel some years ago, in the township above mentioned, situated on Macove creek, an improvement which Henry Roder hath improved and possessed some years ago, containing in one hundred and fifty acres of land, which has been surveyed to the said Groner and said Roder, doth except for a reserve of the said plantation for his heirs, execs., adms., or assigns one perch or pole of land upon one side of the mill-race, and one perch or pole upon the other side forever, for to mend the race, but the said Groner, his heirs, execs., adms., and assigns shall not mow any grass upon the said reserved land, and the said George Shenk, his heirs, execs., and adms., and assigns shall not make any fence without license within a perch or pole distance of the said race, and it is also agreed that the said Geo. Shenk, his heirs, execs., adms., or assigns shall keep the said George Groner, his heirs, execs., adms., or assigns harmless of any costs or charges or interests which could or should be demanded any time hereafter of the said tract or piece of land. As for the time performance, the both parties have interchangeably set their hands and seal in the 12th year of his Majesty's Reign, George the second, by the Grace of God, King of Great Britain, &c., in the year of our Lord one thousand seven hundred and thirty-eight and nine. N. B. —The said George Groner hath accepted the half crop of winter corn which is now sowed in the ground, which shall be divided next harvest upon the field.

"Sealed and delivered in the presence of us,

"LUDWIG BITTING.

"PETER WALSTEIN.

"GEORGE GRONER.

"GEORGE SHENK.

"[Seal.]"

These documents conclusively prove that there was a mill on the Makove Creek, in Upper Hanover township, before the 6th day of February, 1739.

Pennsburg is situated on the Green Lane and Goshenhoppen turnpike, and the station of the Perkiomen Railroad here is twenty-three miles from the Reading Junction, and forty-eight from Philadelphia. The greater part of the ground on which Pennsburg now stands was formerly owned by several brothers by the name of Heilig, and as each of these had built a house along the public road, which has since become the turnpike road, the place began to assume the appearance of a village, and people, in speaking of it, began to name it, some calling it by one name, and some by another, the greatest number speaking of it as Heiligville. After much talking, a meeting was held at the store of Jacob Hillegass, Sr., on an evening in the beginning of the year 1843, for the purpose of deciding the question in dispute, at which three different names were proposed, viz.: Heiligville, Pennsburg and Buchananville, this last after James Buchanan, who was then a Senator of the United States, and afterwards President. At this meeting it was agreed that the village should commence at the line of Frederick Hillegass' (later Thomas B. Hillegass') land at the south, and extend up the road to the upper line of land then owned by the heirs of James Ashmead, deceased, on the north, a distance of a mile and a half. There was no difficulty in fixing the boundaries, as each one was agreed that the village was destined to become an important place, and that it was therefore desirable to have plenty of ground to spread upon, and thus prevent the necessity of annexing more territory for a long

time to come. But when it came to agreeing upon a name, the unanimity of the meeting was at once broken up, the advocates of the different names becoming very much excited, and each vehemently insisting upon the adoption of his favorite name. It becoming evident, after a long discussion, that neither party could command a majority of the votes of the meeting for the name desired by it, a compromise was effected, by which it was agreed to adjourn the meeting for a week, and to invite all either in or out of the village who felt an interest in the matter to attend.

Notice of the adjourned meeting was accordingly published, and as each party had been busy in advocating its cause, the meeting proved large and enthusiastic. After another heated discussion the vote was finally taken, when the name of Pennsburg was adopted by a considerable majority over its competitors. The proceedings were ordered to be published in the *Bauern Freund*, at that time published in Sumneytown, and from thenceforth Pennsburg was the name under which the village has grown and prospered. At that time the village contained twelve houses scattered along the road, in one of which was a country store. It also had a blacksmith-shop, a carpenter-shop, and some out-buildings. The tavern was wanting. There had formerly been a tavern kept in the large two-story store building at the crossing of the Pottstown and Quakertown roads, but for want of patronage this had for several years been abandoned. It was not till the year 1847 that a tavern was again opened in the place, when Mr. George Graber put up the large two-story frame building, which was licensed the same year, and which has since been kept as a tavern by the name of the Pennsburg Hotel.

For many years before the village was named there was a post-office established and kept at a house in the lower end of the place, at present owned by Mr. Aaron Griesemer, which was called Upper Hanover post-office. At that time there was a weekly mail to and from Philadelphia, by which a person could with reasonable certainty count upon getting an answer to a letter sent to any part of the State in from two to four weeks. About the year 1840 the post-office was moved to the house before mentioned as having been a tavern, where it was kept till 1866, when it was moved to the store of Jacob Hillegass, Sr., where it is kept at present. The name of the post-office was changed to Pennsburg about the year 1850. The first improvement in mail service was a tri-weekly mail from Philadelphia to Hereford and return, established about twenty-five years ago, which passed through the village. Then came a daily mail over the same route, after which another daily mail was established from Pennsburg, by way of Quakertown, to Philadelphia and return. These services were kept up till the opening of the Perkiomen Railroad rendered a change necessary. At the present time the mail service consists of two daily mails from Pennsburg to

Philadelphia and return, one by the Perkiomen Railroad and the other by the way of Quakertown and the North Pennsylvania Railroad. A daily mail is made up from Pennsburg to Hereford, and a tri-weekly mail from Pennsburg, by way of Hillegassville, Pleasant Run, Douglas and Frederick, to New Hanover and return.

In 1851 a lodge of Independent Order of Odd-Fellows was opened in the village which now numbers one hundred and seventy-five members, and meets on Saturday evening of every week. An encampment of the same order has been established, which meets on the first and third Tuesdays of each month. Pennsburg contains upwards of one hundred dwelling-houses, two potteries, two blacksmith-shops, one wheelwright-shop, one butcher-shop, two carpenter-shops, two cooper-shops, one fine school-house, one brick church (occupied jointly by a Lutheran and a Reformed congregation), a printing-office (at which the *Bauern Freund und Pennsburg Democrat* is published, also the *Perkiomen Valley Press*), a steam brick-yard where bricks are manufactured by machinery, a steam felloe manufactory, a large steam planing-mill and sash-factory and numerous out-buildings. There are in the place a hotel, a restaurant, two large country stores, a hardware and drug-store, a shoe manufactory employing a number of hands, and a tinware and stove-store. Several trades in addition to those enumerated are carried on in the place. William M. Stauffer began the manufacture of cigars here about 1870, and later John Dimmig, J. M. Keller and William M. Jacobs entered the business. About sixty persons are employed in this industry, and four millions of cigars are made annually. The Perkiomen Railroad Company have erected here a large and convenient depot, and have also put up a large frame engine-house, cattle-pen and the necessary sidings. Messrs. Hillegass & Mensch have opened a coal, lime and lumber-yard near the depot.

The railroad facilities enjoyed by this village have greatly increased the value of property. Streets are being opened, building-lots laid out, which, when offered for sale, command excellent prices, and the idea of those who named the place, "that it was to become the largest and most important town in the valley," is fast being realized.

Palm Station or village is situated on the Goshen-hoppen and Green Lane turnpike, between two and three miles northwest of East Greenville. The main highway is here intersected by a cross-road leading to the Schwenkfeld meeting-house, and the Perkiomen Railroad passes within a few hundred yards of the turnpike. The village has its hotel, store, post-office and station, with mechanic industries and a number of dwellings, most of which appear to have been recently built. The village is pleasantly located near the base of the Hosensack Hills, and near where the Hosensack Creek empties into the head-waters of the Perkiomen. The surrounding country is well

improved, and the station is one of considerable importance to the community.

Kleinville, so named from two brothers by the name of Klein, who owned several farms in the vicinity, is nicely located on a straight and level piece of the turnpike road. It is a rather scattered village, containing about fifteen houses, most of which are neat and comfortable farm-houses, surrounded by the usual farm buildings. We here find the tavern, the store, blacksmith-shop, shoemaker-shop and several useful trades.

Hillegassville is divided into two parts, each of which is apparently about to set up for itself and to repudiate the old name. The upper part of the village consists of a hotel and several dwellings. The hotel was built about fifty years ago by George Hillegass, who died shortly after its erection. It then, with a large tract of land, passed into the hands of his sons, who, several years back, sold the hotel, with about eighty acres of land, to Henry N. Hevener. This part of the village is but a fourth of a mile from Hanover Station, on the Perkiomen Railroad, and Mr. Thomas B. Hillegass, the owner of the land on the north side of the public road leading from the hotel to the station, has laid out his front in building-lots, several of which have been sold to parties who intend to erect buildings thereon. The upper and lower parts of the village are divided by a tract of farm-land of more than a quarter of a mile in length, making the two parts of the village more than a quarter of a mile apart. Some years ago a post-office was established at a place called Red Hill, a hill on the turnpike road about a mile below Hillegassville. At that time a store was kept there, the proprietor of which selling out, and there being no other place for the post-office, it was removed to the store in the lower part of Hillegassville, which at once adopted the name of Red Hill. This part of the village was commenced in 1836 by Jacob A. Hillegass, now deceased, who in that year built a large store and dwelling-house and a large barn and out-houses, which were occupied in the spring of 1837. Subsequently he put up other buildings in the place. This part of the village contains about a dozen dwellings, a school-house belonging to Upper Hanover District, a blacksmith-shop, a tailor-shop, a cigar manufactory and other buildings. This is the last of the villages in the basin through which the Perkiomen, the Northwest Branch and the Macoby Creeks flow.

There are eleven public schools in Upper Hanover, including the independent school district of Pennsburg. The regular school term is five months, nine teachers (all male) being employed at a salary of thirty-two dollars per month. When Pennsburg was formed into an independent school district a large two-story brick school-house was erected at a cost of four thousand dollars, which is conveniently fitted up and is an ornament to the place. Two schools are organized in this building, for which two teachers, one

male and one female, are employed, the former at a salary of fifty dollars and the latter thirty-two dollars per month. The school term is six months. The entire number of pupils in attendance upon the public schools in the township is four hundred and sixty-six.

The number of taxables is 628; value of improved lands, \$1,305,970; value of unimproved lands, \$74,540; value of 540 horses, \$33,615; value of 1205 cattle, \$35,360; total value of property taxable for county purposes, \$1,511,705.

The following, from the mercantile appraiser's list of 1884, gives an accurate idea of the present business places in this township: Joseph B. Bechtel, live-stock; Frank Bachman, butcher; William Christman, live stock; William Diel, stoves; B. B. Emery, merchandise; M. K. Gilbert, merchandise; D. K. Graber & Brother, stock; S. P. Hillegas & Co., live-stock; M. H. Houch, merchandise; Hillegas & Heyner, flour and feed; J. G. Hillegas, lumber and coal; John G. Hillegas, flour and feed; William Hiestand, coal; William Hiestand, flour and feed; Charles Kentz, coal and feed; D. S. Kern, sewing-machines; Krause, Brother & Leshner, flour and feed; Milton Kern, butcher; John Kepler, flour and feed; Kline & Brother, flour and feed; S. G. Mensch, hardware; John Mack, merchandise; Wilson Ritter, live-stock; Jesse Rodenberger, live-stock; E. Senkle, butcher; F. S. Schelley, merchandise; J. F. Seasholtz, live-stock; M. Snyder, flour and feed; W. H. Trump, coal and lumber; W. H. Trump, flour and feed; Charles Void, boots and shoes; William A. Welker, merchandise; J. Yergey, flour and feed; C. A. Miller, butcher; Peter S. Renninger, live-stock; Henry Schwenk, live-stock; Henry Stahsel, truck and fruit; F. K. Walt, boots and shoes.

Reformed Church of Goshenhoppen.—About one mile west of East Greenville, and close to the east bank of the Perkiomen, stands the Reformed Church of New Goshenhoppen.¹

The reason of its location at this point was owing to the donation of six acres of land for graveyard purposes by John Henry Sproegel at the opening of the eighteenth century. It is impossible to fix the date of this benevolent act more definitely. It is known from the public entries that the Sproegel brothers entered the province of Pennsylvania as Hollanders, and that they were naturalized in 1705. By several purchases they acquired thirteen thousand acres of land, which was known for many years as the "Sproegel Manor." A part of the domain em-

braced Upper and New Hanover townships. Their homestead of six hundred acres lay in Pottsgrove. In the neighborhood of Pottstown, on the bank of the Schuylkill, the Sproegel burying-grounds are still to be seen. The six acres which were donated for burial purposes were given to the Reformed, Lutheran and Mennonite denominations, and were used by the several parties till quite a late period. Tradition establishes the German Reformed Church at New Goshenhoppen as early as 1716, but, adhering to the first church records, of which there is certain knowledge, it is only safe to date its organization from the opening of the book. In 1731 the following preface was written: "A Record of the names of the Fathers of Families who belong to the congregation at New Goshenhoppen."

Catalogue of names: John Steinman, Henry Gallman, John Bingeman, Joh. George Welker, Benedict Strohm, Philip Emmert, John Hut, Abraham Trans, Aredreas Graber, Philip Ried, George Mesz, John George Pfalsgraff, Jacob Fischer, Paul Staab, Wendel Wiandt, Herman Fischer, Conrad Colb, John Michael Roeder, John Michael Moll, Frederick Hillegass, John Bartholemaus Kucker, Michael Lutz, Andreas Loehr, George Mirtz, Michael Fabian, Henry Jung, Philip Jacob Shellhammer, Loenhart Fnozf, Jacob Fnozf, Caspar Lamm, Caspar Holtzhauser, Michael Zimmerman, Baltasar Hut, Michael Lefy, Jacob Maurer, Frederick Maurer, Christian Fnozf, Frederick Pfanenbeker, Benedict Raderly, Valentine Griesemer, Lorentz Hartman, George Philip Dotder, Jacob Meyer, Daniel Lanar, Peter Walzer. Some of the emigrants whose names had been entered in this early church-roll had arrived prior to 1727. Quite a goodly number of this colony are still represented in the congregation by their posterity. Of these are especially to be noted the Hillegasses, Grabers, Molls, Reids, Griesemers, Welkers, Wiandts, Youngs, Maurers, Roeders, Pannebeckers, Kolbs, Fishers, Kuckers, Lefys, Moyers and others. The church at this time had a membership of about one hundred and thirty-five persons. The bulk of these original members had been to the Germanic churches what the Pilgrim Fathers were to the Puritans in America.

With these Pilgrim Fathers of the Reformed Church in the New World, we count the primitive members of the German Reformed congregation at New Goshenhoppen. Johann Heinrich Goetschy, who brought a number of Swiss to this country about the year 1731, is accredited with being the first minister of this congregation.

The pastors—Boehm, who had arrived in 1720, and Weiss, who piloted a colony of Palatinates in 1727 to Pennsylvania—doubtless installed Goetschy in his large field, the various points of which were Skip-pack, Old Goshenhoppen, Egypt, Maxatawny, Masillon, Oley, Bern, Tulpehocken, Great Swamp, Saucon, and here at New Goshenhoppen. Pastor Goetschy was a learned man, being familiar with the Holland,

¹ The region known as "Goshenhoppen" is a part of Perkiomen Valley, and comprises two sections,—Old and New Goshenhoppen. The division of the territory does not imply an earlier and later occupancy, since the whole was settled simultaneously; but that the southern portion (Old) was brought into note somewhat sooner than the northern part (New) in consequence of its proximity to Philadelphia. Since the date of the oldest record extant Goshenhoppen has been variously written, viz.: Quesohopen, Cosshoppa, Coshenhoppen, Coshahopin, Cowimahopen, Coschehoppe, Goshenhoppen.

German, Latin and Greek languages, and was a most diligent worker. His pastorate seems to have closed in 1739. It is not to be unmistakably inferred that Dominie Goetschy had really been the first pastor at New Goshenhoppen. All that can be declared is that he opened the church register in a regular way. Pastor Weiss may have been the pioneer and founder of the congregation, and he may have placed Pastor Goetschy in the field after an organization had been effected under his hand, for he was familiar with the whole Reformed field at that day, and subsequently became closely identified with this charge. Pastor Weiss was born at Stebbeck, in Necherthal, Germany, about 1700. He was educated at Heidelberg well and thoroughly, and licensed in 1725. He emigrated in 1727. Ministering in Philadelphia and visiting outlying points for the purpose of organizing congregations in various localities, such as Skippack especially, he returned to Holland in 1729, in company with Elder Reiff, of the latter point, to collect funds for church-building. In 1731, Dominie Weiss returned to America, Elder Reiff remaining abroad still longer. Instead of returning to Skippack, we find him operating in the State of New York from 1731-35, the reason for which being thus accounted for: The Rev. John Philip Boehm, who had emigrated in 1720, already had, as a schoolmaster, performed ministerial functions at the earnest solicitations of the people and flocks scattered over the province. Dominie Weiss could not endure such an irregular course. A long quarrel ensued between the two men and the several parties siding with them. Opposition organizations were forming. Weiss' trip to Holland was directly occasioned by a desire to gain funds for the church edifice at Skippack. Meanwhile Boehm was ordained, in the wake of which act a reconciliation was effected and the opposition ceased. Consequently Weiss sought another field on his return. In 1746 he returned to Pennsylvania, according to the records extant. He commenced his labors now at Goshenhoppen (New and Old) and Great Swamp, in Montgomery and Lehigh Counties (then Bucks), receiving an annual salary of forty pounds and continued in this charge until the day of his death, in 1763. His tomb is inclosed in the churchyard at New Goshenhoppen.

Comparing the roll of membership which Pastor Goetschy entered with that of Pastor Weiss, an addition of a number of emigrants is noticed, whose names were mingled with those of the primitive colony. Although they were all possessed of a religious mind and identified with the Christian Church in the Old World, it must not be forgotten that the Reformed colonies planting themselves over the province of Pennsylvania during the early period of its history were a chaotic body.

Many and severe were the trials of the zealous and cultured Dominie Weiss in organizing the masses into congregations. They were suspicious of ecclesiastical

enslavement and imposition above all things. When Pastor Weiss presented his ordination certificate in Latin they ignored it, and obliged him to secure a German copy, which they could themselves read, ere they confided in him. It was during Pastor Weiss' term that the six acres which John Henry Sproegel had originally donated as a burying-ground to the Reformed Lutheran and Mennonite denominations were increased by fifty acres and twenty-six perches. The purchase was effected in 1749, although the deed was not secured until February 23, 1796. The instrument was executed by Abraham Sniger and his wife, Anna, and Thomas Tresse and wife, Mary, who succeeded to the Sproegel estate, to Wendel Wieandt and John Schell, of the Reformed congregation, in trust. The Lutherans and Mennonites became joint owners with the Reformed.

The first church was accordingly a *Union Church*. In what year it was erected no record declares. The primitive log building may have been planted shortly after the organization of the congregation, in 1731. Perhaps the year 1744, during which the church in Old Goshenhoppen was built, may be taken as a good and a correct one. The Lutheran congregation sold out its right, in 1796, to the Reformed for ninety pounds. The Mennonites had erected for themselves a meeting-house in Washington township, Berks Co., in 1741. They, however, held a burying right until a very late day. The parsonage grounds, a tract of some fifty acres, were likewise appropriated to the use of the three Reformed congregations during Pastor Weiss' reign, in 1749-50. In 1834 the Old Goshenhoppen congregation seceded from the triune fellowship. In 1865 the remaining two congregations sold the parsonage to Mr. Jonas Welker, in whose possession it still remains.

The death of Pastor Weiss caused a break in the regular line of ministers likewise at New Goshenhoppen. The congregation had not been left wholly without a shepherd, the following persons having temporarily officiated: Jacob Reiss, a pastor almost unknown, who had been minister in charge at Indian Field and Tohickon from 1749-53. It is probable that he had not been a regular pastor after the year 1753. He died December 23, 1774. Another pastor was Philip Jacob Michael. Though a weaver by trade, he is said to have been a man of culture. He was the founder of Ziegel's church, and succeeded in gathering a series of congregations around himself near his home. Pastor Leydich had been the minister at Falconer Swamp and New Providence, in Montgomery County, a man in good repute and loyal to the church. He emigrated in the year 1748, from which time dates, likewise, his long and settled pastorate to the end of his life. Besides ministering faithfully to his own charge, he supplied, in seasons of emergencies, Upper Milford, Salzburg and New Goshenhoppen. Pastor John Theobald Faber was born in the Palatinate in 1739.

His early training and later preparation for the

office of the ministry had been of the highest order. He sailed for this country and landed at Philadelphia September 2, 1766. On the 24th of October of the same year he opened his pastorate as minister in the charge composed of the three congregations at New and Old Goshenhoppen and Great Swamp. He resided near Sumneytown, Montgomery Co., having found a home at Mr. Hiester's house. On the 7th of August, 1770, he was married to Miss Barbara Rose, of Reading, and after his marriage moved to the parsonage. For thirteen years his ministry in this field went on smoothly. In 1771 a new church was erected, and the inner life of the congregation near his home had especially revived. The Reformed Church at Lancaster had, at various times, extended a call to Pastor Weiss to that charge. His old charge unanimously desired to retain him as their pastor, but, notwithstanding, the thrice-repeated call led the Synod to urge him to make the change. He preached his farewell sermon at New Goshenhoppen October 6, 1779. It seems that the city of Lancaster contrasted unfavorably as against the quiet valley of Goshenhoppen in Pastor Faber's mind. In his correspondence with his former rural friends he betrayed a restlessness and frequently expressed his regret over the change he had made. Nor did things move on so smoothly in his new field, and he assured his wife and intimate friends that he would return to the lower counties by the first opportunity. After the lapse of three years the Indian Field charge, in Bucks County, Pa., became vacant. A call having been extended him, he promptly accepted it, and now he was within fifteen miles of his former home. He labored in Bucks County during two years, when he moved back into his first and favorite field. During his absence the Rev. Frederick Dellicker officiated at Goshenhoppen from 1781-84, and Rev. Frederick Wilhelm Vandersloot from 1784-86.

The reunion of Pastor Faber with his flock resulted well to both parties, but it was not of long continuance. At the close of a funeral sermon, preached on the 2d day of November, 1788, he became unconscious and in a short time breathed his last. Two days later his grave was dug within the walls of the church, beneath the pulpit. The elder Weiser had a memorial tablet placed over his remains, with an inscription corresponding to another similar one which he had also placed over the remains of the younger Faber's dust, likewise buried within the church, at the opposite side of the pulpit. For nearly one year after the sudden demise of Pastor Faber the Goshenhoppen flock was without a pastor. The neighboring ministers did all necessary services, but in 1789 the Rev. Nicholas Pomp commenced his ministry here and remained in charge till Johann Theobald Faber, Jr., had prepared himself to be his father's successor. John Theobald was in his eighteenth year (1789) when he entered upon his preparatory course for the holy ministry. In the early part of the year 1791

he was licensed, ordained and installed pastor of the charge. His return to the flock as pastor was a circumstance of much interest to all parties. In his introductory he did not fail to call attention to the peculiarly solemn position in which he found himself placed. The death of his beloved father occurring, as it were, in the very spot on which he then was speaking; his mouldering remains lying under his very feet; his youth and hasty preparations to become his sire's successor; the questionable propriety of becoming a prophet in his own country,—on all these points the young pastor delicately touched with much trembling and many tears. He was married to Mary Arndt, of Easton, Pa., in 1796, and then established himself in the parsonage, becoming fully his father's successor. He filled the pulpits in charge acceptably, the older members regarding him in the light of a dear son and at all times addressing him in words of encouragement and love. He wisely cared, too, for the young of his flocks, and gave himself no little concern for the maintenance of parochial schools. In consequence of some dissatisfaction arising, he resigned his charge, in 1807, for one in New Holland, Lancaster Co., Pa., after having served this people in the room of his father for the period of fifteen years.

The Rev. J. Albert C. Helffeinstein succeeded to the pastorate. His first church record in the church register was made April 21, 1808, and his ministry extended over a period of two years and ten months. The Goshenhoppen charge was his first field of labor, he having been a licentiate fresh from his studies. Being a young man and somewhat inexperienced, as well as wholly unused to the ways of a rural people, he found himself ill at ease in his work here. Besides, the English language was his vernacular, which he was obliged to lay aside entirely among this people. Believing that a more congenial field had opened for him, and fully persuaded, too, that another shepherd could be chosen who might prove more efficient in this charge, he left for Carlisle, Pa.

When Pastor Helffeinstein left Goshenhoppen, in 1811, the choice of a successor fell at once upon Pastor Frederick Wilhelm Von der Sloot, Jr. The remembrance of the father, no doubt, contributed much towards the selection of the son. His father and grandfather having been men of liberal education, Frederick Wilhelm enjoyed many advantages over others in his own country. He had been prepared with a view of entering the legal profession, and it seems he had actually entered upon the active practice of his chosen calling for a few years prior to his emigration, which was in 1801. Coming thence to Philadelphia and Easton in search of his father, who had preceded him to America, he fell in with a farmer from Allen township, Northampton Co., who conducted him to the parsonage which the older Von der Sloot occupied. The meeting of father and son proved, in a measure, the narrative of the parable of the Prodigal Son over again. The elder exclaimed,

"This is my only beloved son from Germany!" The stepmother said, "And a fine-looking son he is." He remained with his father and prepared himself for the ministry. Later he visited the charge at Goshenhoppen, preached trial-sermons in the several pulpits, received and accepted a call and entered upon his duties in this locality in 1812-13. He served in the charge for a period of five years, supplying the Reformed congregation at Trappe, Montgomery Co., in addition to his regular duties.

By an inscrutable Providence, the younger Pastor Faber was led to follow still further in the foot-prints of the elder Faber. Both father and son had commenced their pastoral life among this people, and both had been called to separate charges, the one to Lancaster City, the other to Lancaster County, and so, too, had it been ordained that both should again be recalled to and end their histories among this people. When Pastor Von der Sloodt had vacated the field, the minds of a large majority of the membership in his congregation favored the recalling of their former pastor. It was during this election of pastor that the Reformed congregation of Old Goshenhoppen became dissatisfied and severed its connection of eighty years' standing with the other churches of this charge. Its pulpit was supplied by the pastor over the charge in Falconer Swamp until the death of Pastor Faber, when it became identified as a factor in that pastoral charge. The congregation at Upper Milford was substituted in its room in Pastor Faber's field on the 22d day of October, 1820, and remained a part of his field to the close of his life. He entered upon the discharge of his duties on the 3d day of June, 1819, and continued his second pastorate over thirteen years, both periods swelling it to twenty-nine. His field of labor was still the same, though its complexion had vastly changed. The old house at the parsonage had been removed and a new two-storied stone building erected in its stead under Pastor Helffenstein. The few who remained of his father's time at the close of his first term had ended their days, and the companions of his youth and early ministry had become aged like himself. He was no longer "young" Faber, but "Father" Faber rather, and in his own mind he determined that, as he had been young and old in this field, his bones should lay beside the dust of his father, if it pleased God. Pastor Faber's history, like that of his sainted father, came suddenly and solemnly to a close. While in the middle of a funeral discourse he was taken suddenly ill and sank away. It was just forty-five years later than the time his father had received his final call to the eternal world. He lingered a few days, his death occurring on the 16th day of February, 1833. The congregation decided to lay his remains beside the dust of his father within the chancel. When the repairing of the second church was being carried forward, the pastor had the unpretending mark of Pastor Faber's tomb supplanted by an entablature.

Thus did the tombs of the two Fabers, under the right and left sides of the pulpit, seem as pillars. In the erection of the third church these sacred spots fell without the walls. The temple now standing excels all its predecessors, it is true, but the glory which these tombs conferred on the former the latter has not.

The next pastor over this charge was the Rev. Daniel Weiser, the youngest child of eleven born to Conrad and Barbara Weiser. In his youthful years he was employed as clerk in the service of his brother Conrad at Beavertown, Snyder Co., Pa. In his fourteenth year he enlisted as a volunteer in Nerr Middlesworth's company and served in the war of 1812 for four months, after which he was discharged, the war having ended. For this act of youthful patriotism he was rewarded with one hundred and sixty acres of land in 1861, and a pension of twelve dollars per month in 1871 to the day of his death. His trade was that of a nailsmith during his first manhood. In his twenty-second year he commenced the study of theology under the Rev. James R. Riley, of Hagerstown, Md. He subsequently continued and completed his course under the Rev. Henry Yost Fries, of Mifflinsburg, Pa. He was licensed to preach the gospel in 1822 and ordained by the Synod in 1823. His first charge was composed of three congregations, located around Selinsgrove, Snyder Co., Pa., which subsequently embraced fourteen stations. Here he labored ten years. During this part of his ministry he married Lydia Ruth, of Milton, who died seven months later of yellow fever. Several years later he married Caroline Boyer, of Norristown, Pa. In 1833 he succeeded as pastor over the New Goshenhoppen and Great Swamp charge, over which he ministered as an active pastor for thirty years, serving during the last twelve years as superintendent of the Infant Sunday-school, occasional assistant to his son and temporary supply in vacant fields. Pastor Weiser continued healthy and vigorous to the last. On the 22d day of November, 1875, after complaining of a cold for several days, he was stricken with paralysis. After lingering for ten days, with conscious and unconscious intervals, he died December 2d, at the age of seventy-six years. He was buried on December 9th, at the New Goshenhoppen Reformed Church, amid many of his former members and friends. But two children survive him, a son and a daughter, Pastor Weiser had served but two charges during a ministerial life of fifty-two years. His first field embraced the church in which he had been baptized by the Lutheran pastor, Iasensky, and subsequently confirmed by the Reformed pastor, Isaac Gerhart. He was a self-made man, and for a man in his circumstances, or of his opportunities, we would pronounce him well-made. Franklin and Marshall College conferred the title of Doctor of Divinity upon him during the evening of his life.

Pastor Daniel Weiser had often said the next evil to a pastorate too brief seemed to him to be a pastor-

ate too long. As little as he approved of itinerating, so little did he favor the outliving of one's day. Accordingly, after laboring diligently and successfully through thirty years, his son was called to his side as assistant pastor, April, 1862. The younger Weiser had been serving his novitiate pastorate in and around Selinsgrove, Snyder Co., Pa., his native place, as it had likewise been the birth-place of the father, as well as his maiden field. On the 2d day of November, 1863, the Rev. C. Z. Weiser was elected pastor-in-chief of the Goshenhoppen charge by a literally unanimous vote. Thus for the third time in the history of this charge had father and son worn the same mantle in the same field,—the Von der Sloots, the Fabers and the Weisers. On the 21st day of August the installation services were held in the Great Swamp Church, the brethren Revs. A. J. G. Dubbs, R. A. Van Court and P. S. Fisher having been appointed the committee by Goshenhoppen Classis to attend to this duty. After a term of service, extending over twenty years, the present pastor has reason to be thankful for having had the labor of his heart and hand so largely blessed. The number of the several flocks has constantly increased by fair accessions, the guests at the altar now numbering near one thousand souls. He attributes the steady and healthy growth of the field, under God, to the long line of properly-equipped and very worthy pastors before or back of himself. In comparing the condition of the church to-day with that of more than a century ago striking contrasts are noticed. One hundred and fifty years ago Pastor Goetschy served in a diocese which extended from Skippack to Tulpehocken, from Goshenhoppen as his centre. Many laborers have entered the field, whilst New Goshenhoppen and Great Swamp have sustained their own shepherd exclusively since the advent of Pastor Daniel Weiser, in 1833. We doubt whether the whole territory numbered as many communicants as now surround the altar at New Goshenhoppen.

The church at New Goshenhoppen is a large brick edifice, built in the year 1857. It is one of the largest and most showy churches to be found outside of the cities and is the third church built at this place.

REV. CLEMENT Z. WEISER, D. D.—Dr. Weiser, the only survivor of three sons, was born in Union (now Snyder) County, Pa., which was also the native place of his brother, the late Dr. Daniel Weiser. He is the fourth removed from the renowned and historical Conrad Weiser. He graduated from old Marshall College in 1850, and then acted as German tutor, and subsequently as co-principal over the preparatory department for two years after the removal of the college to Lancaster. Just twenty-five years after graduation Franklin and Marshall College conferred upon him the meritorious title of Doctor of Divinity. He was called to his native place as pastor, and so also was his father, it

being the first field of labor for both. Serving in this field as pastor from the time of his ordination, in 1855, he was called as an assistant to his father in Goshenhoppen, Montgomery Co., where he has now lived seventeen years. A fact worthy of note is that Dr. Weiser began his pastoral duties where his father did, and closely followed in his footsteps, each serving but two charges. The charge he now holds has quite a history, and has on three different occasions been served by father and son,—first, by Pastors Vander-sloot, Sr. and Jr.; second, by Pastors John Theobald Faber, Sr. and Jr.; third, by Dr. Weiser and his son. The congregations at Lancaster, Philadelphia and at several other points placed calls in the hands of Dr. Weiser for his consideration, but he invariably refused to leave his country parish. Here his spare time is zealously devoted to general literature and study. His pen is not idle, and whatever time is allowed him from his pastoral duties is used in the preparation of articles for the *Messenger*, *Guardian*, *Hausfreund*, *Reformed Quarterly Review* and other publications. Among his literary productions is a "Life of Conrad Weiser." He also devotes much time to the aiding of churches and Sunday-schools by the delivery of lectures. Dr. Weiser stands high in the councils of his church, is much esteemed for his good qualities of mind and heart by his brethren in the ministry, and dearly loved by the people of his congregation. As a man fully equipped for the work and the field of work of his choice, the church cannot, perhaps, show many as his equal and none as his superior. Dr. Weiser has been since 1874 a member of the Historical Society of Pennsylvania. On the occasion of the celebration of the Centennial of Montgomery County he was honored by an invitation to deliver the Centennial oration. He is chaplain of the Sixth Regiment National Guards of Pennsylvania. Dr. Weiser was, in 1859, married to Louisa C., daughter of Judge I. Gutelius, of Mifflinburg, Union Co., Pa. Their children are three sons and a grown daughter, all deceased.

OFFICERS OF THE SUNDAY-SCHOOL AT NEW GOSHEN-HOPPEN, 1840-80.

Superintendents.—Rev. Daniel Weiser, 1841-46; Henry Dotts, 1846-49; Charles Hillegass, 1849-55; John F. Gerhard, 1855-59; Jonathan Gery, 1859-60; John F. Gerhard, 1860-63; Jesse D. Pannepacker, 1863-71; George Deisher, 1871-74; Rev. C. Z. Weiser, D.D., 1874-80; Professor C. S. Wieand, A.M., 1880, etc.

Assistant Superintendents.—Philip Super, Esq., 1841-44; Lewis Masteller, 1844-46; Rev. Daniel Weiser, 1846-49; Lewis Masteller, 1849-50; John F. Gerhard, 1850-55; William Trippe Cramer, 1855-56; Rev. Daniel Weiser, 1856-57; Charles Hillegass, 1857-58; William Trippe Cramer, 1858-59; Rev. Daniel Weiser, 1859-60; Henry L. Gerhard, 1860-82; Rev. C. Z. Weiser, D.D., 1862-64; Reuben Masteller, 1864-65; Jonathan Gery, 1865-66; Abraham Welker,

C. L. Wilson

1866-73; William H. Kehl, 1873-75; Professor C. S. Wieand, A.M., 1875-80.

Treasurers.—Lewis Masteller, 1841-49; John F. Gerhard, 1849-75; Adam J. Dimmig, 1875-81.

Secretaries.—Charles Hillegass, 1841-49; Mahlon Hillegass, 1849-55; Charles Hillegass, 1855-57; Mahlon Hillegass, 1857-81.

Assistant Secretaries.—Benjamin Gery, 1866-70; James D. Bobb, 1868-74; Mrs. Mahlon Hillegass, 1870-74; William H. Steltz, 1874-81.

Librarians.—Jonathan Gery, 1863-65; James D. Bobb, 1865-68; Nathaniel R. Reed, 1868-69; Ambrose E. Roeder, 1869-81; George F. Hoot, 1876-81.

Chorister.—Mahlon J. Gerhart, 1869-81.

Collectors.—Nathaniel Deisher, 1869-73; Charles Kehl, 1873-80; Charles L. Fluck, 1880-81.

Sunday-School Paper Agent.—Tobias Fried, 1876-81.

Infant Sunday-School.—1865-70: Superintendent, Rev. D. Weiser, D.D.; Assistant Superintendents, Mrs. Maria Hillegass, Mrs. Elizabeth Deisher, Mr. Samuel Roeder, S. M. Beysher (chorister). 1870-73: Superintendent, H. E. E. Roeder; Assistant Superintendent, Mrs. Maria Hillegass, Mrs. Deisher, T. K. Gerhart, E. H. Steltz (chorister), W. Krause, D. Dimmig. 1873 to date: Superintendent, Mrs. C. Z. Weiser; Assistant Superintendents, Mrs. M. Bobb, Mrs. M. Roeder, D. Dimmig, T. K. Gerhart, M. J. Gerhart (chorister), F. L. Fluck (assistant chorister).¹

The New Goshenhoppen Lutheran Church, commonly called the "Six-Cornered Church," is about a mile east of the village of Pennsburg. It is a large and handsome stone building, surmounted with a tall steeple, and constitutes one of the land-marks of the valley.

The congregation is probably as old, or nearly so, as the Reformed congregation, it having had part with said congregation in the burial-ground and having buried its dead there till it sold its claim to the Reformed Church, in 1796. The exact date at which the congregation was organized is uncertain, but that it was previous to the year 1739 is shown by the church record, which states that in that year Johann Jacob Birkenstock was installed as pastor of the congregation. At the spot where the present church stands formerly stood an old log church. When it was built is uncertain, but it was probably in the beginning of the last century. An old member of the congregation states that he had often heard his forefathers say that at the time this log church was built Indians were still plenty in the valley.

This church stood till 1803, when the congregation resolved to build a new one of stone. The old one was torn down and sold, the purchaser using the best logs in the erection of a house which is still standing. Rev. F. W. Geissenheiner, who was the pastor of the congregation, and who was afterwards widely

known as Dr. Geissenheiner, was requested to furnish a plan for the new church. This he willingly did, but unfortunately for the congregation, it came in his mind to furnish two plans,—one with a four-cornered building and one with six corners,—he, in the goodness of his heart, supposing that the congregation would be able to decide on one or the other of them. In this he was mistaken, as there immediately arose two parties in the congregation,—one for the four-cornered and one for the six-cornered plan. After much heat and contention, the six-cornered plan was finally adopted. The church was built with six corners, and has ever since been known as the "Six-Cornered Church." The six corners are caused by the building of an alcove, in which is placed the large organ of the church. In 1860-61 the large steeple, containing a bell weighing fifteen hundred pounds, was erected on the part forming the six corners.

The first pastor of the congregation, as has been said, was Johann Jacob Birkenstock, who served from 1739 to 1743. The second was Conrad Andrea, from 1743 to 1752. The third was Frederick Shultz, who had charge from 1752 till 1756. He was succeeded by Rev. Frederick Reis, who, in turn, was followed, in 1764, by G. Frederick Neimayer. In 1771, Conrad Sebastian Roeller took charge and was followed, in 1775, by Pastor Schwabach. After him came Pastor Dornapfel, who served the congregation till 1790. In this year Christian Esprich took the charge and remained there three years, when he was succeeded by Rev. Frederick Wilhelm Geissenheiner who took charge and served till 1807. Of the reception of this pastor by the congregation the following is told:

"When, in 1793, Pastor Esprich left the charge the congregation applied to Revs. Smith and Hellmuth, of Philadelphia, to procure them a pastor from Germany. The new pastor arrived safely on the 8th of December, 1793. He was a young man, apparently much younger than he really was, and wore a three-cornered hat. On Sunday morning he found the congregation, many of whom were old German emigrants from Oberwald, gathered in the old school-house to receive him. On his entrance many of them whispered together, 'What can that youth know, and what can he teach us.' They went from there to the old log church to hear his first sermon to them. The stripling was equal to the emergency, and as he proceeded in his sermon with an enthusiasm and pathos that struck deep into the hearts of his hearers, all eyes were turned upon him and he was listened to with deep attention. After the service the old men gathered around him and congratulated him, saying, 'This we did not expect of you.' Another difficulty now arose; the young preacher must have a home. Another meeting took place in the school-house, and the question went round, 'Who will take the pastor in his house?' On all sides came the answer, 'I don't want him; neither do I.' They could not agree what to do with him, till at last one of them made the proposal, 'We will draw straws, and the one who draws the longest must take the pastor in his house.' This was assented to, and one of the fathers of the church, named Reiter, drew the longest straw, and with it not only the pastor, but his future son-in-law, as some time afterwards Mr. Geissenheiner married one of his daughters."

The pastor left the congregation in 1807 and moved to Reading, being succeeded by the Rev. Jacob Miller, who had been his student. He remained till 1829, when he also moved to Reading. After Miller,

¹ C. Z. Weiser, D.D., Hist. of New Goshenhoppen Reformed Church, 1851.

on May 12, 1829, the Rev. Frederick Waage took charge of the congregation, of which he was pastor till 1870, when he was succeeded by his son, the Rev. O. F. Waage, the present pastor. Rev. Frederick Waage served the congregation over forty years, and only retired when his age prevented him from performing the hard work of his large charge.

On the evening of the 23d of August, 1884, closed the life of this venerable and highly-respected man. His long, active and devoted life rendered Pastor Waage's name one of the best known over Eastern Pennsylvania, as well as quite famous throughout the Lutheran Church, more especially so during the earlier history of his time and services. Cay Frederick Sophus Waage was born August 17, 1797, in the dukedom of Holstein, Denmark. At a remarkably early age he commenced his school-days, and from the primary, through the higher and classical institutions, he was promoted until he entered the university at Kiel. For six years he attended here, laying the foundation to a high degree of scholarship in later years attained. His stay at Kiel made him a familiar friend of Pastor Claus Harms, who became to him his ideal pastor and theologian. His picture hung on the walls of his admirer's study, his autograph was put under glass and inclosed in a frame of gilt, and Pastor Waage's whole life was tinged by the spirit of this man. When twenty-two years old, in 1819, in the month of June, the young student went to Hamburg for the purpose of sailing for America. In the ship "Milo" he was tossed about on the ocean for sixty-eight days, and landed in Philadelphia in the month of September. On the shores of this new world he met a Reformed clergyman, Rev. Jacob Wilhelm Dechant, who led the young German to the house of Rev. Frederick William Geissenheiner, a Lutheran minister of note, and under the roof of this pastor young Mr. Waage spent two years preparing for the ministry of the gospel. To this happy event Father Waage referred with great gratitude. In Chester County these two years were spent both in somewhat Americanizing himself and in waiting, since the rules of the church required that a certain time should elapse ere a foreigner could take orders.

In 1822, on the 27th of August, Mr. Waage became a licentiate, by order and permission of the Pennsylvania Lutheran Ministerium, during its sessions at Germantown, Pa. His ordination followed on the 10th of June, 1828, by authority of the Synod at Reading, Pa. He served his first charge as a licentiate, which consisted of the congregations at Trumbauerstown (Charlestown) and Flatland (Richlandtown), Bucks Co., Pa.

After a little more than four years he received a call to his second charge, spreading over parts of Northumberland, Columbia and Lycoming Counties. The points were Milton, Fulmer's, Muncy, Williamsport, Paradise, St. John's, St. James' and Black Hole Valley. Here he remained three years, and during

this period he was naturalized as an American citizen. In 1829, in the month of May, he was called to his third and last charge in this region. The New Goshenhoppen Lutheran, together with the congregation at Charlestown and Sheetz's church, formed a pastoral field. In 1836 he organized and added the church at Huber's, in Montgomery County; and in 1854 he established and joined Ridge Valley Church. In this unwieldy field Pastor Waage labored and toiled during a period of forty years. Adding his student service and his voluntary labors since his retirement, his pastoral history covers a full half-century.

Pastor Waage maintained independent views in religious matters. His personal life was singularly pure and Christian; he erected his own standard, and according to that lived and worked conscientiously. The large and growing family of this busy and thoughtful man led him to study the theory and practice of homœopathy for the benefit of his own house, and his skill and success soon went abroad in the charge and neighborhood. But "the strong man" fails and falls at last. Even the physician cannot heal himself always. Age and its inevitable colleagues came to him too, who had so long been hale and hearty. The evening of his life was spent in meditation and quiet acts of personal devotion in near communion with his sons. Father Waage died at the close of the week,—on Saturday evening,—as if to show that a full life had been well rounded off. In his death a spirit left the world matured for a higher life,—a man scholarly, educated, well-informed, conversant with men, of a poetical temperament and a believer in everlasting life.

The burial of Father Waage was largely attended, on the 27th of August, at his favorite "Six-Cornered" Church, in New Goshenhoppen. There were present clergymen of four denominations. Rev. Dr. A. R. Horne, of Allentown, preached a sermon in the German language, on the words found in Zechariah i. 5. Rev. Dr. E. Huber, of Philadelphia, followed with a discourse, likewise in German, based on the text found in Rev. xxii. 14. A biographical sketch was read by Rev. Dr. C. Z. Weiser, of the Reformed Church.

The hymn was announced by Rev. Dr. Wackernagel, of Allentown. The reading of the Scripture lesson (St. John's Gospel, 14th chapter) was attended to by Rev. Dr. Sadler, president of Muhlenberg College, Allentown, Pa. Rev. Jacob Maeschter, of the Schwenkfeldian Society, read the burial service. Rev. Moses Gottschall, of the Mennonite Church read the hymn, in addition to some remarks at the house. His remains were borne to the grave by six of his brethren,—Rev. A. L. Dechant, Rev. William Rath, Rev. S. K. Gross, Rev. Dr. Wackernagel, Rev. C. Z. Weiser and Rev. William B. Fox.

There were also present Revs. D. H. Reiter and Professor Mathew Richards, of the Lutheran Church, and Rev. Jacob Kehm, of the Reformed Church.

In Pennsburg we find a neat brick church built in 1855. It belongs to a congregation of Reformed and a congregation of Lutherans, and is occupied by them on alternate Sundays. The Reformed congregation was organized some five years before this church was built, and the Lutheran in 1855. The present pastor of the Reformed congregation is the Rev. A. L. Dechant, and of the Lutheran, the Rev. William B. Fox.

(Mrs. Charles Famous), Ann and one who died in infancy.

Philip was born on the 21st of February, 1815, in Philadelphia, where he resided until his seventeenth year. After a rudimentary education, he, at the age of fourteen, entered a hardware-store and remained thus employed for three years, when advantages were offered which induced his removal to Lederachsville, Lower Salford township, as clerk in a country store.

Philip Super

BIOGRAPHICAL SKETCH.

PHILIP SUPER.

Philip Super, the grandfather of Philip, the subject of this biography, came from Germany to America at an early date, and in 1788 purchased four hundred acres of land in Columbia County, Pa. His children were Hannah (Mrs. Ristine), Mary (Mrs. Ludwig Knoll), Sarah (Mrs. Block), Joseph, Philip and Jacob. The last of this number—born in 1774—was probably a native of Philadelphia, where his death occurred. He learned the trade of a cabinet-maker, which he conducted in Philadelphia until his death, when his wife succeeded to the business. He married Jane Brooks, of Delaware County, whose children were William, John, Sarah, Mary Ann (Mrs. Lewis W. Hampton), Hannah, Philip, Jane

In 1835 he removed to Pennsburg, in Upper Hanover township, and acted in the same capacity for Jacob Hillegass. His attention was next directed to the vocation of a teacher, which absorbed the following three years, when he was, in 1840, elected, as a Democrat, justice of the peace, in which office he was continued until 1875. His business was gradually merged into that of a conveyancer, while his familiarity with property in the township, together with his popularity and known integrity, caused him to be frequently selected as guardian and executor. To these responsible trusts his time and abilities have been mainly devoted for many years.

Squire Super was married, on the 3d of December, 1837, to Catherine, daughter of Henry Dotts, of Pennsburg, whose only child, William Henry, died in infancy. In 1884, Squire Super was elected county auditor. He is secretary of the Perkiomen Railroad

and the Goshenhoppen Mutual Fire Insurance Company, of Pennsburg, and secretary of the Green Lane and Goschenhoppen Turnpike Road Company, as also identified with all important movements of a business or social character in his township. His religious preferences are for the Lutheran Church, of which Mrs. Super is a member.

CHAPTER LXXVII.

UPPER MERION TOWNSHIP.¹

THIS township is situated on the south side of the Schuylkill, and is bounded on the northwest, north and northeast by the same, on the northeast by Bridgeport, on the southeast by West Conshohocken and Lower Merion, on the south by the counties of Chester and Delaware, and on the southwest by Chester. Its greatest length is eight and a quarter miles, greatest width three and a half miles, and the area ten thousand two hundred acres, having been reduced, in 1851, four hundred and fifty acres by the erection of Bridgeport into a borough, and again, in 1874, about two hundred and ninety acres, by the erection of West Conshohocken. As will be observed on the map, its form is very irregular. The surface is rolling and the soil generally loam and limestone.

The principal elevations in Upper Merion are called Mount Joy, Red Hill, Flint Hill, North Valley Hill, Rebel Hill, and Conshohocken or Gulf Hill. Mount Joy is of a conical form, and is wooded to its top, and forms a beautiful feature in the landscape. It gave name to a manor that belonged to Letitia, daughter of William Penn. Tradition states that he gave the hill this name while on a visit to the neighborhood. It is supposed to be the highest eminence in Upper Merion in the vicinity of Valley Forge. In the time of the Revolution it was strongly fortified, and the remains of intrenchments are still visible on its top. Red Hill is an eminence somewhat over a mile southwest of Bridgeport. It is a well-known tradition, handed down by several families in the neighborhood, that two panthers were shot on it in the time of the early settlement. The Conshohocken or Gulf Hill is a long, narrow range that runs a great way into Chester County; it is a continuation of Edge Hill, which crosses the Schuylkill at Spring Mill, and extends east and west. Nowhere in Montgomery County, on its south side, are iron-ore, limestone or marble found. Geologically speaking, it forms a narrow belt of the primary rocks, with gneiss and talcen slate. The name of Gulf Hill has only been applied in this vicinity from the deep, narrow passage of Gulf Creek through it in its course to the Schuylkill. This natural curiosity will be subsequently described. The

North Valley Hill is a range following the Schuylkill, and commences a short distance above Bridgeport. It is only of moderate elevation, and is the highest between Port Kennedy and Valley Forge. Rebel Hill is just outside of the borough line of West Conshohocken, and between the Township Line road and Gulf Creek.

Probably one of the most fertile tracts of land in Montgomery County is that portion of the township lying along the Schuylkill, between Bridgeport and Gulf Creek, and extending west for about a mile and a half. Within this space limestone and iron-ore are obtained in abundance, and the stranger views with regret the disfigurements occasioned in obtaining these materials from such beautiful and productive fields. Indeed, in few neighborhoods has nature been so lavish of her choicest gifts. The soil is a loose loam, nearly level on its surface, and so free from stones that no country can produce, probably, any land of easier cultivation. The Swedes, in taking up and settling this tract, showed considerable foresight as to its future importance. In proceeding along the Schuylkill Canal from Bridgeport to Port Kennedy the land is chiefly cultivated to the river, with an occasional margin of trees, making it a shady and agreeable walk.

When we come to consider its size, this is not a well-watered township. The streams do not rise from many springs, and are, therefore, too weak to furnish much valuable water-power. Elliott's Run, by some called Crow Creek, rises from two branches near the Chester County line, is three and a half miles in length and propels only a saw-mill near its mouth. Frog Run, two and a half miles long, and Matsunk, a smaller stream, and both emptying into the Schuylkill below Swedesburg, propel no mills. Mashilmac Creek rises in Chester County, and, after a course of about two miles, empties into the Schuylkill at the Catfish Locks, below Port Kennedy. For its length it is a pretty strong stream, and, on account of rising from several large springs, is not liable to be affected by drought or cold weather. Near its mouth it turns a grist-mill. The largest and most important stream is Gulf Creek, in the southeast part, near the Lower Merion line. It is a rapid stream, which rises in Delaware County, and, after a course of nearly four miles, empties into the Schuylkill at West Conshohocken, about half a mile above the Matson's Ford bridge, furnishing power to several cotton and woolen-mills. The East Valley Creek, for the distance of a mile, forms the western boundary of the township and propels a paper-mill. The aforesaid furnish all the water-power and are much the largest streams. There is a fine spring at Port Kennedy and several near Bridgeport.

The wealth that the inhabitants of Upper Merion derive from its mines and quarries is probably not exceeded by that of any other township in the county. It contains three large furnaces for the manufacture of iron,—one at Port Kennedy and the other two on

¹ By Wm. J. Buck.

the Schuylkill, a mile below Bridgeport. The ore is obtained in considerable quantities in the vicinity of Valley Forge, Gulf Mills and King of Prussia. It can be safely estimated that one-fifth of the area of the township abounds more or less in this mineral, which has been pretty extensively worked in the past thirty-five years.

This township is noted for the manufacture and quality of its lime. The limestone belt crosses the Schuylkill at and below Swedesburg, and has an average breadth of a mile, running in a western direction into Chester County. Its length in Upper Merion is nearly six miles. The marble prevails on its southern edge, and on its northern line the softer limestone. It has been satisfactorily ascertained that the lime made from its northern side is the best. The quarries of William B. Rambo, near Swedesburg, and those at Port Kennedy have this position: While approaching the opposite edge, it increases in hardness till it terminates in white marble, which merges into the still harder blue marble. This limestone is placed in the primitive formation, and, as may be supposed from the aforesaid remarks, is by no means uniform in its quality, some of its beds yielding lime of much greater purity than others. But, taken collectively, no lime in the United States surpasses it, especially for mechanical purposes. Mr. Trego says, in his "Geography,"—

"It is scarcely possible to form an estimate of the incalculable advantages derived by Pennsylvania from the limestones so extensively diffused throughout the State. They impart fertility to the soil wherever found; they are used as a building-stone for houses, barns, bridges, canal-locks, etc., and they constitute an indispensable article of use in our furnaces for smelting iron-ores. When burned into lime they yield a necessary ingredient in the mortar for stone-masons, bricklayers, plasterers, for whitewashing, and for several purposes in the manufactures and the arts. But it is from the benefits derived to our agriculture, from the use of lime as a manure for the soil, that our State is destined to be most enriched by this important article of her productions. At several points on our canals and railroads vast quantities of limestone are quarried and transported to places where it is required for use, and from the rapidly increasing demand, it is becoming a considerable item in the tolls upon our public works."

Oldmixon, in his "British Empire in America," published in 1708, speaks of limestone being procured quite early in America, on Letitia Penn's manor of Mount Joy. This probably may have been near the present Swedesburg. The census of 1840 values the lime then manufactured in Upper Merion at \$74,772, or about one-third of that produced in the entire county. This business, of course, has since greatly increased through the additional facilities afforded for its transportation. It is said that Port Kennedy, for the year ending with June 1, 1857, exported lime to the value of \$140,000. The whole county is represented in 1840 to have produced lime to the amount of \$236,162. This sum, we have no doubt, is now surpassed in value by Upper Merion alone.

Marble is composed of crystalized carbonate of lime, and the two are always found combined, more or less, together. The marble worked in this town-

ship runs in a long, narrow, perpendicular seam, extending down, no doubt, to a considerable depth. It is said the deeper it is obtained the better is its quality. What was formerly and so long known as Henderson's quarry, is now owned and worked by Daniel O. Hitner. It is situated two miles southwest of Bridgeport and was worked before 1782. There is here an extensive steam mill for sawing marble. The greatest depth reached in obtaining it is considerably over one hundred feet. Thirty-five hands were employed in the mill and quarry in 1858. Immense quantities have been taken out here within the last forty-six years. A portion of the material used in the construction of Girard College was from this place. The depth made could not have been reached without the aid of several pumps propelled by steam. The ingress of water is a serious obstacle to the successful working of marble quarries, entailing considerable expense. That there is an abundance of this beautiful material in this township there is no doubt, and it is believed, as the demand for it increases, this difficulty may be the easier prevented. About half a mile from the King of Prussia, and near the Chester Valley Railroad, is the quarry formerly worked by J. Brooke, in 1858 to 1876 or later by Derr & Adams, but now by Schwyer & Leiss. There is also here a steam saw-mill. These two are the only marble-quarries that have been worked in the township. The census of 1840 states that nine men were employed in the business, producing marble to the amount of six thousand seven hundred and sixty dollars.

According to the census of 1800, its population was 993; in 1840, 2804; and in 1880, 3275. The real estate and personal property for taxable purposes was valued in 1882 at \$1,935,840 with 745 taxables, averaging \$2598. In May, 1876, licenses were issued to three inns, eight stores, three coal-yards and three dealers in flour and feed. In 1858 it contained three inns, nine stores, four grist-mills, three saw-mills, three iron furnaces, two marble-mills and seven or eight cotton and woolen manufactories. The census of 1850 returned 624 houses and 108 farms; in 1785, three inns, four grist-mills, three saw-mills, one forge and a fulling-mill, three churches,—one Episcopal, a Presbyterian and a Christian Baptist,—besides a Union Chapel. The public schools for the year ending June 1, 1883, were twelve, open ten months, with four hundred and eighteen enrolled pupils. In 1857 it contained nine schools, with ten teachers, and attended by five hundred and sixty-six scholars. In the latter year seven of the teachers were males; now they are all females. The post-offices are four, located at Port Kennedy, King of Prussia, Gulf Mills and Abrams. From what is stated, it will be observed that, independent of the production of lime, marble, iron and brick, this township is also extensively engaged in other manufactures.

In the way of public improvements, Upper Merion has been pretty well provided, and they have tended

still further to develop its resources. Besides the canal, the railroad runs its entire length on the Schuylkill, a distance of nine miles, with stations at Swedeland, Merion, Port Kennedy and Valley Forge. The Chester Valley Railroad, which was finished in 1853, extends through its entire width from east to west, about four miles, with stations at King of Prussia, Henderson and Shainline. It commences at Bridgeport, and connects with the Pennsylvania Railroad at Downingtown. There are, besides, six or seven short branches erected by private enterprise, leading from mines and quarries towards the Schuylkill, two of which are over a mile in length. A turnpike extends from Bridgeport to the King of Prussia, three miles, finished in 1853.

Swedesburg is pleasantly situated on the banks of the Schuylkill, adjoining the eastern line of Bridgeport. It contains about sixty-five houses, chiefly two-story frame, a church, school-house, several stores and a blacksmith and wheelwright-shops. The census of 1850 gives it three hundred and eighty-eight inhabitants, and that of 1870 three hundred and eighty-six. This place has chiefly grown up since 1840, and owes much of its prosperity to the manufacturing business carried on in its neighborhood. About half a mile below this village William B. Rambo carries on the lime business quite extensively, employing here in his operations eighty hands. He uses his own boats, some of which are calculated for sailing on the rivers and bays as well as along the coast and up the Schuylkill to the coal regions. To facilitate its shipment he has a railroad from his quarries and kilns to the river, half a mile in length. Considerable of his lime is sent to New Jersey, Delaware and Maryland.

Matsunk is the name of a village that has chiefly grown up since 1846, and is situated on a small stream of the same name, near the Schuylkill, about a mile below Swedesburg. It contains about forty houses, several of which are handsome residences, surrounded with fine, shady lawns and gardens and inclosed with iron railing. In 1858 the place had increased to nineteen dwelling-houses. The extensive works of the Swede Iron Company are here, comprising two large furnaces, a railroad leading from the mines to the furnaces, a mile in length, numerous out-buildings and a tract of land, on which there is an abundance of iron-ore and limestone of the best quality. The total cost of the improvements here is stated to have been considerably over two hundred thousand dollars. A woolen-factory has also been in operation here for some time. Swedeland post-office was established here before 1876, but several years ago was merged with the one at Bridgeport. The station bears the aforesaid name. The land in this vicinity is of superior quality and ranks with the best in the county.

King of Prussia is situated near the centre of the township, at the intersection of the Gulf and State roads. This name was derived more than a century ago from an inn here, kept by John Elliott in 1786. It

contains a public-house, store, post-office, library, blacksmith and wheelwright-shops and seven houses. Five roads centre here, one of which was turnpiked in 1852 to Bridgeport. The stone bridge over Elliott's Run was built in 1835. The township elections have been held here for some time. In 1871 two districts were formed, the Upper since voting here. The post-office, established before 1827, and originally called Reesville, was changed previous to 1851 to its present name. The public library was founded in 1852, and contains three thousand volumes. Miss Ella Thomas is librarian. Charles J. Elliott, one of its founders and first librarian, quite a promising young man, died here February 24, 1861, aged thirty-six years.

Gulf Mills is located at the intersection of the Gulf road with Gulf Creek, where an inn was kept in 1786 by John Roberts. It had for its sign the "Bird-in-Hand," and that is still the popular name of the place including Mechanicsville, only half a mile distant, it may be estimated to contain about fifty houses. It is a business place, containing several woolen-mills, saw and planing-mill, besides other establishments, also an inn, store, post-office and a church. The Bird-in-Hand post-office was located here before 1827, and retained this name until 1830, when it was changed to its present one of Gulf Mills. The Christian Baptists, or Plummerites, erected in 1835 a one-story stone meeting-house, about one-quarter of a mile southeast from Gulf Mills. Among the pastors who have served the church are the Revs. Godfrey Hawk, Charles Plummer, — Noble, Jacob Rodenbaugh and John Conard, the present pastor, who has been in charge since 1870. George McFarland has for some time carried on here extensively the manufacture of woolen goods. The venerable stone bridge over Gulf Creek bears no date, but is supposed to have been erected before the Revolution. The elections for the Lower District of the township are held at the school-house at this place.

Merion Station is on the Reading Railroad, about two miles above Bridgeport, where Crow Creek empties into the Schuylkill. It contains a saw-mill, Union Chapel, school-house, five or six dwellings and a post-office, called Abrams. Port Kennedy and Valley Forge will be treated of in separate articles near the close of this chapter.

Gulf Hill rises immediately on the south side of the creek, opposite the village of Gulf Mills, is quite steep, and is wooded to the top. About three-quarters of a mile from this place a grist-mill is standing in a romantic situation, on the west side of the Gulf road, and to the antiquary is an object of interest. It was built in 1747, and is known as the "Old Gulf Mill." In 1858 it was owned by Rebecca Thomas, and now belongs to Henderson Supplee. This is probably the oldest mill now standing in Montgomery County, and, excepting some of its machinery, it is believed to have undergone no alteration since its erection. It is built of stone, and may yet with care

stand for centuries. It was, no doubt, in its day, considered a great affair. On William Scull's map of Pennsylvania published in 1770, the "Gulf Forge" is marked as being in this vicinity.

As we have now spoken of the name of Gulf being applied to a road, a creek, a hill, a mill, a forge, and a post-office, it is perhaps time that we inform the reader what this word implies, or rather how it originated. What is understood to be the Gulf is where the Gulf Creek passes through the Gulf Hill, and to effect a passage has cleft it to its base. The stream and the road by its side wind through it somewhat in the shape of an S, and at the narrowest part there is just room enough for both, the whole width not being more than forty feet. The hills on either side are pretty steep, and are covered with rocks, bushes and trees to their summits. The hill on the east side is about one hundred and fifty feet high, and on the west side of less elevation. Near the old Gulf Mill, on the south side of the entrance, a rock juts out at the road to an elevation of about fifteen feet, which has sheltered people from the rain. As this hill runs a considerable distance west of the Schuylkill, and as the road through it is perfectly level, it will at once appear obvious that, from the earliest period of the settlement above, this passage was of great advantage in passing to and from the city. Hence its name is mentioned from an early date. To be in such a place in the dreary hour of midnight, with the roar of the troubled waters among the rocks, and the gloom of the wood-covered gorge, is enough to arouse in the solitary traveler feelings of an unusual kind.

From Bridgeport to Valley Forge is six miles, and few walks in Pennsylvania are more interesting than that along the tow-path by the river for this distance. The towns, villages, manufactories and scenery on each side, at every turn of the river, present something new and beautiful, which, were we to describe it at length, would occupy too much of our space. A quarter of a mile below the Catfish Dam, and three miles above Bridgeport, is presented one of the most beautiful landscapes we remember seeing almost anywhere. If it is worth, as Thomas Jefferson has said, a voyage across the Atlantic to see the scenery of the Potomac at Harper's Ferry, then we say, it is, at least, worth traveling from Norristown, on any fine day, to this spot to view the scenery of the Schuylkill Valley. In standing at a certain point here and looking up the stream, the falls of the Catfish Dam are seen extending across the river, and about three-fourths of a mile beyond is seen nestled in the hills a portion of Port Kennedy, with its bridge; and still beyond, and for the background, in the centre, and as if springing from the river, the picturesque and fine wooded hill-tops of Valley Forge, four miles off—the whole forming such a combination of objects, so advantageously connected, as are seldom found in any one view. At the dam aforesaid are two locks,

placed side by side, which are called the Catfish Locks. These, as well as the dam, were built by the Navigation Company.

Upper and Lower Merion appear to have been originally one township called Merion, or rather by the early Welsh settlers Merioneth, after a county in North Wales. At what exact time it was divided has not been ascertained, but it must have been before 1714; for in this year we find the earliest mention in records of Upper Merion as a township. From Thomas Holme's map of original surveys, commenced in 1682, we learn that the upper half of the township was included in Letitia Penn's manor of Mount Joy, the middle portion in William Penn, Jr.'s, and the lower part, adjoining Lower Merion, in John Pennington and company's. The remaining portion of the manor lay in the adjoining township of Tredyffrin, in Chester County, and included in all seven thousand eight hundred acres. It was patented to his daughter by William Penn, 24th of Eighth Month, 1701, and he retained possession of it until 1786. The land belonging to John Pennington and company, it is probable, formed a part of the Welsh tract, which we know extended through a portion of the township into Chester County, comprising in the whole forty thousand acres, and of which mention was made in the history of Lower Merion. It was chiefly through this last great purchase that the original settlers were Welsh, and named it after a shire from whence many of them had come.

Although the Swedes had settled near the mouth of the Schuylkill in 1642, and four years later erected a church there, yet no evidence exists of their having located early anywhere within the present limits of the county. It has been recently ascertained that Peter Cox had made a purchase of land within the present limits of Upper Merion before 1702, and that Gunnar Rambo in said year had endeavored to secure a tract beside him. The Swedes came into the township about 1712, and settled on a large tract which they purchased from the Welsh, who had for some time preceded them. The names of these settlers were Mats Holstein, Gunnar Rambo, Peter Rambo, Peter Yocum and John Matson. They took up several hundred acres each, which lay from the present borough of Bridgeport down to the Lower Merion line, and back nearly two miles from the river. This tract, for fertility, is almost unequalled in Pennsylvania, and is still chiefly in the hands of their descendants, and comprises nearly one-fourth of the present area of the township. On this tract the names of Swedes' Ford, Swedes' Church, Swedesburg, Swedeland and Matson's Ford sufficiently indicate the presence of these settlers. Near the close of this subject some additional information will be given respecting those Swedish families.

The following possesses interest, being a list of settlers residing in Upper Merion in 1734, thirty-two in number, and with the amount of land re-

turned as belonging to each: Mats Holstein, 252 acres; Hugh Hughs, 200; Morris Edwards, 150; Owen Thomas, 100; Griffith Phillips, 50; John Moor, 150; Owen Jones, 100; Thomas Jenkins, 100; John David, 100; Alexander Henderson, 100; Mounce Rambo, 100; John Rambo, 100; Gabriel Rambo, 150; Elias Rambo, 150; Peter Yocum, 50; Andrew Supplee, 50; Hugh Williams, 100; Benjamin Davis, 100; John Sturgis, 100; Isaac Rees, 100; Richard Bevan, 200; David James, 100; William Rees, 150; Edward Roberts, 100; Mathew Roberts, 100; William George, 150; Thomas Rees, 100; Harry Griffith, 100; Hannah Jones, 100; Griffith Rees, 50; David Lewis, 100; and Jones Rees, 40 acres. Of this list, it will be observed that nearly two-thirds are Welsh. In the assessment of 1780, out of one hundred and thirty-eight names, but very little over one-fourth are found to be of the aforesaid origin. This denotes a considerable diminution in the Welsh element during a period of forty-six years. Within the past fifty years the Irish population has increased through the encouragement given them as laborers in the lime, marble and iron industries. Descendants and land-holders of the name of Holstein, Hughes, Moore, David, Henderson, Rambo, Supplee, Jones, Roberts, Griffith, Phillips, Thomas and Davis are found scattered over the township, many of whom still occupy their ancestral tracts.

Mathew Roberts was the son of John Roberts, one of the early settlers of Lower Merion, who removed to the Swamp Vraas farm, near the present King of Prussia, which had been bequeathed to him by his father about 1727. His son Jonathan was in the Colonial Assembly, and elected to Congress in 1790, besides holding other positions. The latter was the father of Jonathan Roberts, of the United States Senate. Richard Bevan, mentioned in the list of 1734, advertises in the *Pennsylvania Gazette* of July 24, 1751, that he has for sale, "near the Gulf Mill, a likely negro man thirty years of age, fit for town or country business. Also a negro girl about fifteen years of age." Evan Jones was appointed by the county commissioners collector of taxes in the township for 1719, the amount assessed being £5 12s. 8d. In 1742, Thomas Jones was collector, Peter Holston in 1780 and the following year George George. John Johnson was appointed constable in 1767, and Isaac Hughes assessor for 1780.

A road was laid out from Whiteland, in Chester County, in 1723, to the Swedes' Ford, now the borough of Bridgeport, by way of the present King of Prussia, thus showing that the travel at an early period must have been considerable in this direction. The Gulf road, as it is called, leading from Valley Forge through the King of Prussia and the Gulf Mills towards the city, is denoted on Lewis Evans' map of the Middle Colonies, published in 1749, thus clearly indicating that this, too, was an early highway. Along this road may be seen the Penn mile-stones, as they are called,

having on one side the distance to the city and on the other the Penn coat-of-arms. The uppermost one now standing is three miles below Valley Forge, known from its figures as the eighteenth milestone. Were the proper researches made, we entertain no doubt but that this road would be found to possess an interesting history, which, it is hoped, some diligent antiquary will take in hand.

The first school-house built by the Welsh in the township was in Matthew Roberts' woods, about 1740, on the present State road, not half a mile east of the King of Prussia. It was a log structure and lasted some fifty years, when a stone building was erected to take its place on the land of William Cleaver, about one hundred yards from the former, who deeded half an acre to trustees in 1810, when they were incorporated. Through a bequest, these trustees erected the present edifice, containing a school-room, library and hall. Another school-house stood on the Gulf road, near the Lower Merion line, where Jonathan Roberts went to school in 1785 and part of the following year to Edward Ferris, walking the distance of four miles from his father's house. This was known as the Gulf School, and has been continued down to this day. His son, William B. Roberts, now in advanced years, retains in his possession some of the school-books used by his great-grandfather, Mathew Roberts, about 1708-14.

The Revolutionary history of Upper Merion is not without interest, for nearly all the leading events connected with Valley Forge happened within its limits. On the 11th of December, 1778, Washington, with his army, left Whitemarsh, and on the afternoon of the 13th crossed at Swedes' Ford and proceeded towards the Gulf and the vicinity of the King of Prussia, where they remained until the 19th, when they arrived at Valley Forge, where they were to remain until the following 18th day of June, exactly six months. Owing to the lateness of the season they at once set about building huts to shelter them from the rigors of winter. General Potter, who had been stationed at the Gulf in November, now marched towards Swedes' Ford and joined Washington's army, when a court-martial was held to try such men as threw away their arms and equipments for the purpose of facilitating their escape in the late attack made on them at the Gulf by the British from the city. A number were sentenced to be publicly whipped, which was carried into effect, and produced not a little excitement in the camp. Although at some distance from Philadelphia, the citizens suffered considerably from the marauding expeditions of the British army. The assessor appointed for this purpose rated the damages done by them in Upper Merion at £1517. Among the claimants may be mentioned Isaac Matson, who was allowed £64; Peter Matson, £26; Cephas Bartleson, £127; Benjamin Eastburn, £119; John Johnson, £269; and Isaac Knight, £340.

From the assessment of Upper Merion in 1780 we

are enabled to obtain some additional information. Abraham Griffith carried on the grist-mill belonging to Jacob Walker and Samuel Kelly, to which was attached one hundred and twenty-five acres of land; on Isaac Potts' estate of thirty-five acres, at Valley Forge, was a grist and saw-mill; George George had a saw-mill and four hundred and seventy acres; John Roberts, a mill and twenty-three acres, now known as the old Gulf Mill, carried on in the beginning of this century by Richard Roberts; William Gabb, a mill which we are unable to locate; Amos Willets, a fulling-mill, probably on Gulf Creek. Inns were kept by James Barry, George Savage and Cephas Bartleson. The latter had this year rented the "Swedes' Ford" tavern from Peter Holstein. John Pugh, probably at the present Gulf Mills, is the only store-keeper mentioned.

Hon. Jonathan Roberts was a native and resident of this township, and died in July, 1854, at the advanced age of eighty-three years, and at his request was buried on a part of his place called "Red Hill," where he had appropriated two acres of land for the poor of the neighborhood to bury their dead free of charge. Mr. Roberts was elected a member of Congress in 1811, and in February, 1814, was chosen a member of the United States Senate, which office he filled until 1821.

Port Kennedy.—The village of Port Kennedy is situated on the south bank of the Schuylkill, and is twenty-one miles from Philadelphia and four from Norristown. The country in its vicinity is rolling and the soil fertile. It is noted for the vast quantities of lime burned there and exported to other places. Through this business it owes its chief prosperity. In 1828 it was almost a waste, with nothing on it to attract attention but a fine spring of excellent water. In 1858 it contained one hotel, two stores, a furnace, church, school-house, blacksmith and wheelwright-shop and forty-two dwelling-houses. The census in 1850 returned four hundred and forty-nine inhabitants, and in 1870 five hundred and sixteen. We doubt the correctness of said enumeration; the number of houses is too small to warrant such a conclusion. From the hill on the road to Valley Forge, a short distance from the village, there is a fine prospect of the place and surrounding country, as well as of the Schuylkill for several miles down its course.

The furnace belongs to the Montgomery Iron Company, of which Abraham S. Patterson is president, Joseph J. Patterson secretary and treasurer, and John W. Eckman manager. It was commenced in 1854 and went into operation in 1856. It possesses one stack, fifty by fourteen feet, and two roasters for magnetic ores, added in 1880. The annual capacity is twelve thousand net tons of forge pig-iron, for which magnetic and hematite ores are equally used. A considerable portion of the ore is obtained in the vicinity. The First Presbyterian Church of Port Kennedy was organized in the summer of 1845, mostly

from members of the Great Valley Presbyterian Church, of Chester County. The corner-stone of the present church edifice was laid the same year, and the building was dedicated January 1, 1846, since which time it has been used without material change. The church, from the time of its organization until 1873, was in connection with the Lower Providence Presbyterian Church, and under the charge of the Rev. Henry S. Rodenbough. In 1873 the church called to the pastorate Charles Anderson, a recent graduate of Princeton Theological Seminary and a licentiate of Burlington Presbytery. He was ordained and installed pastor in May, 1874, and served about one year and was succeeded by the Rev. Edward P. Howes, who served two years and resigned on account of ill health, since which time the church has had a stated supply,—Rev. Yates Hickey, for two years, and the present incumbent, the Rev. Belleville Roberts, of Norristown. The church has fifty-five members. The hotel, which is the only one in the place, is a large three-story stone building, upwards of forty feet square. It has an elevated position on the river's bank, and the Reading Railroad has a station near by. The Port Kennedy Bridge Company was incorporated by an act of Assembly passed March 9, 1846. It is a covered frame bridge, resting on three stone piers and is of sufficient width to admit of two wagons passing. It was not completed till the close of the year 1849. The post-office was established here before 1851. It is the lime business that has given this place its present importance, and probably in this respect it is not exceeded by any other in the valley of the Schuylkill. The lime manufactured is of superior quality, and most of it is shipped off by the canal to New Jersey, Delaware and Maryland; a considerable quantity is also sent to Philadelphia and New York. When we were here in August, 1858, three schooners, one sloop and a canal-boat were loading at the wharves. One of these, a schooner, was a neat and beautiful craft, and so symmetrical in form that one might have supposed that it had been intended rather as a pleasure-yacht than for the more useful purposes of trade. As the vessels, in order to reach this place from the city, have to pass under bridges, it becomes necessary for them to have falling masts, which are raised while loading.

According to the census of 1840, Upper Merion produced lime to the amount of seventy-four thousand seven hundred and seventy-two dollars. At this time Port Kennedy alone produces fully double that amount, thus showing that this business has greatly increased and will yet rise to much greater importance. The burning of lime is carried on here the most extensively by Andrew Blair & Co., by Mrs. Violetta, widow of Robinson Kennedy, and by Messrs. Hunter & Roberts. The business was carried on here very extensively for many years by the late John Kennedy, who died here September 4, 1877, aged sixty-one years. His kilns were the nearest to the village, and

in 1858 he had fourteen in operation, some of the largest containing as much as two thousand five hundred bushels, giving employment to sixty or seventy men. David R. Kennedy, brother of the aforesaid, and David Zook, at said date, were also extensively concerned in the business. Considerable limestone is also quarried here and sent off by navigation to the extensive furnaces at Phoenixville, six miles distant.

Alexander Kennedy, the founder of this place, and after whom it was called, was a native of Ireland and came to this country poor. He was first employed by a person of wealth in this vicinity. Through his industry and business qualifications he accumulated, in the course of years, a handsome fortune. The property on which this village is located belonged to Mordecai Moore, who died in 1803, at an advanced age. It was then purchased by Mr. Kennedy, who moved on it in the spring of 1805. He continued to reside here until in the fall of 1824, when he died at the age of about sixty-three years, and was interred at the Great Valley Presbyterian Church. He was a highly-respected and useful man, and his loss was lamented by a large circle of friends. He has four sons,—John and David R. Kennedy, who resided here, and became the principal property-holders of the village and vicinity; William, removed to Kent County, Md.; and Alexander, to East Pikeland, Chester Co. Before this village had attained its present size it was called by the less dignified name of "Kennedy's Hollow;" but time, the changer of all things, has transformed this uncouthness into its present more euphonious name.

In working in the limestone quarries here an extensive cavern was reached, which had an area equal to many of our largest public buildings. It contained a considerable number of stalactites of calcareous matter, some of which extended to the floor and formed several conical arches, with borders of variegated colors; also pyramidal columns of various sizes. This cavern, from the singularity of its chambers, was an object of considerable curiosity during the brief period it was open to visitors. A concert was held in one of its largest chambers on the 4th of July, 1846, at which several hundred persons were present. Its existence has now become only a matter of the past, for its walls have been quarried away these several years. No doubt it lay here concealed for ages, even before the creation of man himself, and his industry has only lately revealed and destroyed it in the process of the beneficial purpose of enriching his fields.

Valley Forge.—The village of Valley Forge is situated on the south bank of the Schuylkill and at the mouth of East Valley Creek, which here forms for nearly a mile and a half the boundary between the counties of Montgomery and Chester. It is six miles above Norristown and twenty-three from Philadelphia. That portion of it comprised within the limits of Upper Merion contains a store, grist-mill, paper-mill and ten houses. The Methodists have

held services at the place since 1870. The Rev. C. I. Thompson, a resident, served from that time for about ten years. The Rev. T. K. Peterson is now in charge. On the Chester County side there are a factory, store, post-office and fifteen houses. Palm Paper-Mill is under the management of Colonel Joseph Jordan, and does an extensive business. The Reading Railroad has a station here, and crosses the creek near its mouth on a bridge some thirty feet above the water, from which a beautiful view is offered looking up the stream. Among the interesting objects seen are the falls of the dams of the grist-mill and paper-mill, a short distance above each other, and of the venerable stone bridge crossing it about one hundred yards above; these, with the deep gorge of the stream and the high and rugged hills rising on either side and hemming in the village, form an interesting sight. Stolid, indeed, must be the person that has the recollections of the past stirring within him that can gaze on such a scene unmoved. The hills on both sides of the creek are generally steep, rugged and wooded to their summits, and present a wild appearance, much more so than one might expect from the populousness of the surrounding country.

In June, 1701, William Penn, in company with Isaac Norris, made a journey to the Susquehanna to treat with the Indians at Conestoga. On his return he came across the country to the Schuylkill and got lost among the woods on the hill near the present Valley Forge, and did not know where he was till he got on the hill this side of East Valley Creek, when, by a glimpse of the Schuylkill and the country to the southward, he regained his way, and in consequence named the former hill Mount Misery and the latter Mount Joy, which names they respectively bear to this day. On this occasion there is reason to believe he selected the tract, constituting in consequence the manor of Mount Joy, containing seven thousand eight hundred acres, located on the south or southwest side of the Schuylkill, adjoining the Welsh tract, patented to his daughter, Letitia, 24th of the following October, only ten days before his last return to England. In this grant Penn states as included, "all the powers of Court Baron, Court Leet and Frankpledge." Oldmixon, in 1708, speaks of this manor and of limestone having been procured thereon some time before. From Holme's map of original surveys we learn that it composed all of the upper portion of Upper Merion and part of the adjoining township of Tredyffrin, in Chester County.

The name of this place was derived from a forge erected here by Isaac Potts, a son of John Potts, the founder of Pottstown. How early this forge was erected we cannot say, but it must have been before 1759, for it is denoted on Nicholas Scull's map of the province, published in said year, as being on the Upper Merion side of the stream, which is confirmed on William Scull's map of 1770. On September 19, 1777, a detachment of the British army encamped

here and burned the mansion-house of Colonel Dewees and the iron-works, leaving the grist-mill uninjured. In the assessment of Upper Merion for 1780 we find Isaac Potts taxed here for a grist and saw-mill. In 1789 he is assessed here for one hundred and seventy-five acres of land, a forge, grist and saw-mill and eight horses, the forge having since been rebuilt. In these several authorities there is certainly sufficient evidence that the forge did stand on the Montgomery County side and not on the west of East Valley Creek, as a few writers have persisted. In addition, it is reasonable to suppose that, as the residence of Isaac Potts was in Upper Merion, as well as the iron-ore obtained near by, that necessarily, for convenience, the forge would also be on the same side.

Both Washington and his officers were satisfied that Whitemarsh was not the proper place for a winter encampment. The former, therefore, requested his general officers to communicate to him, in writing, their sentiments respecting the most eligible site for that purpose. A council of war was held on the 30th of November, at which a wide difference of opinion prevailed as to the locality and the best manner of cantoning the troops. So various and contradictory were the opinions and councils that unanimity could not be hoped for, and it was necessary for Washington to act according to his own judgment and upon his own responsibility. He decided to form an encampment at Valley Forge, where he might be near enough to the British army to watch its movements, keep its foraging-parties in check, and protect the country from the depredations of the enemy. For this purpose the patriot army left Whitemarsh December 11, 1777, but did not arrive at Valley Forge until the 19th. Two days before Washington issued a proclamation to the army, in which he gave his reasons for the course he was about to pursue. It is an interesting document, and breathes throughout the language of devoted patriotism, while at the same time it evinces the cool determination to conduct the war to a happy close. Owing to its length, we shall only give place to an extract,—

"The General ardently wishes it were now in his power to conduct the troops into the best winter-quarters; but where are they to be found? Should we retire to the interior of the State, we should find them crowded with virtuous citizens, who, sacrificing their all, have left Philadelphia and fled hither for protection; to their distresses humanity forbids us to add. This is not all. We should leave a vast extent of fertile country to be despoiled and ravaged by the enemy, from which they would draw vast supplies, and where many of our firm friends would be exposed to all the miseries of an insulting and wanton depredation. A train of evils might be enumerated, but these will suffice. These considerations make it indispensably necessary for the army to take such a position as will enable it most effectually to prevent distress and give the most extensive security; and in that position we must make ourselves the best shelter in our power. With alacrity and diligence, huts may be erected that will be warm and dry. In these the troops will be compact, more secure against surprises than if in a divided state and at hand to protect the country. These cogent reasons have determined the General to take post in the neighborhood of this camp, and, influenced by them, he persuades himself that the officers and soldiers, with one heart and one mind, will resolve to surmount every difficulty with a fortitude and patience becoming their profession and the sacred cause in which they

are engaged. He himself will share the hardships and partake of every inconvenience."

It is not our intention here to enter into the details of the important events that transpired at Valley Forge during the six months' encampment, for that belongs rather to the Revolutionary history of the county, but merely mention a few local facts outside of that subject. Washington, in the latter part of the summer of 1796, when his second term as President of the United States had nearly expired, and he was about to return to private life, concluded once more to visit this place, the scene of so many toils and struggles. This information was furnished the writer by the late Henry Woodman, a native of the vicinity, in 1858, then aged sixty-three years, as obtained from his father, who at the time was engaged in plowing on his farm, near the place of the encampment. In the afternoon he observed an elderly man, of dignified appearance, on horseback, dressed in a plain suit of black, accompanied by a colored servant, ride to a place in the road nearly opposite, where he alighted from his horse and came into the field. He stated he had called to make some inquiry concerning the owners and occupants of the different places about there, and also in regard to the system of farming practiced in that part of the country, and numerous other questions relating to agriculture. He also made inquiry after certain families in the neighborhood. As answers were given, he noted them down in a book. Mr. Woodman informed him that he could not give as correct answers as he wished, as he had only moved in the neighborhood since the war, though he had been in the army while it was encamped here. This gave a new turn to the conversation. The stranger informed him that he had also been in the army and at the camp, and as he expected to leave the city in a few months, with the prospect of never returning, he had taken this journey to visit the place which had been the scene of so much suffering and distress, and to see how far the inhabitants had recovered from its effects. On learning it was Washington, he told him that his appearance had so altered that he did not recognize him, or else he would have paid more respect to his late commander, now the chief magistrate of the nation. He replied that to see the people happy and the desolate fields recovering from the disasters they had experienced, and to meet with any of his old companions, now peaceably engaged in the most useful of all employments, afforded him more satisfaction than all the homage that could be paid to his person or station. He then said that pressing engagements rendered it necessary for him to be in the city that night, and taking him by the hand, bade him an affectionate farewell.

Among the prisoners of General Burgoyne's army was Captain Thomas Anbury, who gives the following interesting account of his stay here overnight in December, 1778, while on the march to Virginia under escort, exactly six months after the Americans

had vacated it. Some of this information is new and no doubt reliable, and also corroborates the great suffering and hardships of our army here,—

"Our troops slept in the huts at Valley Forge, which had been constructed by the Americans, and we remained till late the next day for the delivery of provisions before we marched. I had a full opportunity to reconnoiter the whole camp. On the east and south sides were entrenchments, with a ditch six feet wide and three deep, the mound not four feet high, very narrow, and easily to have been beat down with a cannon; two redoubts were also begun, but not completed. The Schuylkill was on the left, and, as I before observed, with a bridge across it; the rear was mostly covered by an impassable precipice formed by Valley Creek, having only a narrow passage near the river. This camp was by no means difficult of access, for the right was attainable, and in one part of the front the ascent was scarcely to be perceived. The defenses were exceedingly weak, and this is the only instance I ever saw of the Americans having such slight works, these being such that a six-pounder could easily have battered down. The ditches were not more than three feet deep, and so narrow that a drummer-boy might with ease leap over.

"A Loyalist, at whose house I was quartered, at Valley Forge, and who resided here at the time Washington's army was encamped, told me that when General Washington chose that spot for his winter-quarters his men were obliged to build their huts with round logs and suffered exceedingly from the inclemency of the season. The greater part of them were in a manner naked at that severe season of the year, many without shoes and stockings, and very few, except the Virginia troops, with the necessary clothing. His army was wasting away with sickness, that raged with extreme mortality in all his different hospitals, which were no less than eleven. His army was likewise so diminished by constant desertions in companies, from ten to fifteen at a time, that at one period it was reduced to four thousand, and those with propriety could not be called effective.

"The horses, from being constantly exposed to showers of rains and falls of snow, both day and night, were in such a condition that many of them died, and the rest were so emaciated as to be unfit for labor; had he been attacked or repulsed he must have left behind all his artillery, for want of horses to convey it. In addition to all those distresses, Washington had not in camp at any one time a week's provisions for men and horse, and sometimes he was totally destitute. The Loyalists greatly censure General Howe in suffering Washington to continue in this weak and dangerous state from December till May, and equally astonished what could be the motive he did not attack, surround or take by siege the whole army when the severity of the weather was gone. They expected that in the month of March, April and May they should hear of the camp being stormed or besieged. But it seems that General Howe was exactly in the same situation as General Burgoyne respecting intelligence, obtaining none he could place a perfect reliance on."

The house occupied by Washington as his headquarters is still standing, having undergone but little alteration since that time. It was owned in the Revolution by Isaac Potts, the proprietor of the forge. It is a two-story stone building, situated near the Reading Railroad. The main portion of it has a front of about twenty-four feet and is thirty-three in depth. The outside is of dressed stone, pointed. The interior wood-work is still in a good state of preservation, and with care this building may be made to last for centuries, as its walls appear as durable as when first built. No one familiar with our Revolutionary history can enter the room which served the great chief for nearly half a year, both as a reception-room and bed-chamber, and where he wrote many important dispatches, without feelings of the deepest emotions. In the sill of the east window of this room, and out of which can be seen a considerable portion of the camping-ground, is still pointed out a small, rough box, as having contained

his papers and writing material. We gazed at this depository and other objects around with considerable interest, hallowed as they are by so many associations of the times that "tried men's souls." Adjoining is a wing one and a half stories high and about twenty-four feet in length, which has been built since the war, but it occupies the site of a smaller structure that was erected for the accommodation of Mrs. Washington. In a letter to a friend this lady remarks: "The General's apartment is very small,—he has had a log-cabin built to dine in, which has made our quarters much more tolerable than they were at first." This property was long owned and carefully preserved by Mrs. Hannah Ogden, of whom, in 1878, it was purchased by the Centennial and Memorial Association of Valley Forge, which was specially organized for this purpose, and it can therefore be no longer regarded as private property.

There are various remains of the encampment still visible. On the road to Port Kennedy is a portion of land uninclosed, where the foundations of the hut occupied by Baron Steuben are still visible, and the ground is undisturbed on which he drilled his soldiers. At the distance of half a mile from the headquarters a line of entrenchments crosses the road, beginning near the Schuylkill, and extending southwards fully a mile, terminating near the Chester County line. On the farm of William Stephens, a few yards north of this road is a redoubt, not quite a quarter of a mile from the Schuylkill, placed there to command Sullivan's bridge, which was just below Catfish Island, in case of an attempt being made to enter the encampment from the north side of the river. This redoubt is about a mile from the headquarters. On the south side of the road, and in front of these entrenchments, is a redoubt called Fort Hamilton, and another called Fort Washington nearly a mile south and close to the Chester County line. These are now the most prominent remains existing and were among the most important. As most of the encampment-ground is still in a state of nature, it has therefore generally remained undisturbed to this day, though more than a century has passed away since that eventful period.

Relics are still occasionally found by persons living in that vicinity. Wm. Henry, Jr., found a number on his father's farm, which were shown to the writer in 1858. Among these were pewter buttons, having on them the figures seven, eight and ten, no doubt intended to show the regiment or brigade to which they belonged; also, spoons, bayonets and fragments of musket-locks, looking considerably time-worn, besides a variety of musket-balls, some of which were of a large size. Wm. R. Kennedy, in the spring of 1857, turned up with the plow, on his farm, several twelve and sixteen-pound cannon-balls and several hatchets. The latter were about the usual size, but shaped precisely like a modern chopping-axe. At the Montgomery County Centennial exhibit, Norristown, in September, 1884, a considerable display of relics was

made, many of them having been obtained in and around the place of this encampment.

The Swedes in Upper Merion.—The credit is due to the Swedes of having made the first permanent settlement in Pennsylvania. In the fall of 1637 two vessels arrived from Göttenburg, called the "Key of Calmar" and the "Bird Grip." A purchase was made by those colonists from the Indians the following year of the lands on the west side of the bay and river from Cape Henlopen to Santhicon, or the falls of the Delaware, which they called New Sweden. Tradition has it that the ancestors of the Rambos, Holsteins, Yocums and Matsons came in these vessels. After more arrivals, in February, 1643, Governor Printz, selected for settlement the low alluvial island in the Delaware, called Tinicum or Tinnekonk, situated below, but near the mouth of the Schuylkill. Here a settlement was made and a fort and a church built. Peter Lindstrom, the royal Swedish engineer, in 1654, made a map of New Sweden, on which the Schuylkill is denoted as far up as to contain a small part of the territory now comprised in Montgomery County. But no evidence, strange to say, exists of any early settlement or explorations up or along this river by the Swedes, even thirteen years after the arrival of Penn.

In 1696, John and Gunnar Rambo had secured by purchase a tract of land in the present Upper Merion, which had also been previously granted to Lasse Cock and company in 1684. Subsequent to any settlement it was ascertained that William Penn had granted the aforesaid tract, containing in all seven thousand eight hundred acres, October 24, 1701, to his daughter, Letitia, as the manor of Mount Joy. Upon investigation Penn's attorneys restored two hundred and fifty acres to John Rambo, March 6, 1709. A tract was surveyed to Gunnar Rambo, April 11, 1702, containing six hundred and fourteen acres, which is stated to have been bounded on the north by Peter Cock's and the south by Widow Yocum's land. It appears that afterwards a different survey was ordered, because "being within the bounds of Letitia Penn's Manor." How these matters were afterwards adjusted we have not definitely ascertained, but it is certain that what is known as the Swedes' Tract was located on the west side of the Schuylkill, between the present borough of Bridgeport and the Lower Merion line, and extending from the same a mile or more westwards, and came in possession of Mats Holstein, Gunnar Rambo, Peter Rambo, Peter Yocum and probably John Matson in 1712, and upon which they soon after settled and made the first improvements. It was a judicious selection, and their descendants to this day still retain a considerable portion of the same. According to tradition, these settlers commenced clearing away the trees and underbrush along the river early in the spring of this year and erected rude log dwellings, into which they moved with their families in June. Further additions were made by purchase from Robert Llewellyn, Evan Hughes and perhaps

other Welsh settlers in this vicinity, who had preceded them nearly a quarter of a century. The Swedes called this section Ammasland, probably after some district or place in Sweden.

Of these, Mats Holstein settled the farthest to the northwest of Philadelphia. His wife was Brita Gostenberg. His family consisted of sons, Andrew, Mathias and Frederick, and daughters, Deborah and Brita. His original dwelling stood beside the Schuylkill, within the present limits of Bridgeport. He died in 1738, aged sixty-one, when his eldest son, Andrew, inherited the home place, which we know in 1723 if not earlier, bore the name of Swedes' Ford. He married Mary Jones, of Lower Merion, and at his death left the property to his only son, Peter, who was rated in 1780 as holding here one hundred and ninety-seven acres, and was at this time the township collector. He died in 1785, and the property descended to his only child, Mary, who had married Levi Bartleson. On account of the French and Indian troubles in 1747, a company of volunteers was formed, of which Mathias Holstein was lieutenant and Frederick Holstein ensign.

Mats Holstein, the first settler, in 1714, built a stone house, about a mile from the river, to which he removed, with his family. Four generations of his descendants were born here, and its walls still stand, though they have been built upon and added to several times since. His second son, Mathias, already mentioned, who was born in 1717, married Magdalena, daughter of Marcus Hulings, of Morlatton, a Swedish settlement on the Schuylkill, four miles above the present borough of Pottstown. Mrs. Holstein survived her husband many years and related several incidents in her early life which at this day seem curious. She well remembered, when quite young, being carried some distance on a squaw's back. The traveling was then chiefly performed in canoes. When married and brought to Swedes' Ford, near where her husband resided, she and all her wedding friends came down the river in canoes. Mathias Holstein died December 10, 1768, aged fifty-one years, and was buried at the Swedes' Church. He is stated to have been one of the most active in its erection in 1760.

Samuel Holstein, son of the latter, was rated in 1780 as holding two hundred and seventy-eight acres. It is said that on this tract he shot deer as late as 1760. He had four sons,—Major Mathias, Charles, Colonel George W. and William. Some account of the former is given in the history of Bridgeport. The latter became the owner of the homestead, remained unmarried, and after his death the property was sold, and thus, after a long possession, it passed out of the family. George W. Holstein resided on Peach Farm, adjoining the old homestead. In 1812 he was secretary of the Mount Joy Horse Company, became captain of the Second Troop of Montgomery County and lieutenant-colonel of the Second Battalion. At a meeting held

at Norristown August 25, 1824, he was appointed one of a committee of six to invite Lafayette to visit Montgomery County, particularly Whitemarsh, Barren Hill and Valley Forge. In November, 1827, he was elected one of the first managers of the De Kalb Street bridge, since declared free. He died February 10, 1841, aged sixty-three years. He left three sons,—Isaac, William H. and Dr. George W., the former being lately deceased.

Of our early Swedish families, perhaps none are now so numerous as that of Rambo. The first ancestor, Peter Rambo, appears to have been a conspicuous man in the early settlement. In 1657 he was appointed one of the magistrates of the colony; he was also a commissary, which office he resigned in 1661. In May, 1668, was made one of the counselors of Robert Carr, Deputy-Governor; appointed a justice of the peace, with five others, October 3, 1676, for the jurisdiction of the Delaware River. He was a native of Göttenburg and had a sister living there in 1692, and the following year is mentioned, with Andrew Bonde, as perhaps the only survivor of those that came over in the first expedition, which would show that he must then have been pretty well advanced in years. He had four sons then living; these were Peter, Gunnar, Andrew and John. Peter Rambo, Jr., was present at the landing of Penn at Upland (now Chester) November 8, 1682. He is mentioned as having in 1693 six persons in his family. Charmed with the beauty and fertility of the Schuylkill Valley, he removed with his family from the vicinity of Upland, and settled on his tract in Upper Merion, with the others, in 1712, on which he spent the remainder of his days. Gunnar Rambo, in 1685, represented Philadelphia County in the Assembly; is mentioned in the list of 1693 as having also six in family. He arrived with his brother and settled on a large tract just below the present Bridgeport. A lot of land was purchased from his estate in 1758, upon which a school-house had been erected and subsequently the church.

Mons or Mounce Rambo was the son of Gunnar Rambo, and was born in 1693, and accompanied his father to Upper Merion, where he spent the remainder of his days. He was a famous hunter, and his exploits still live in the traditions of the neighborhood. He used to say that when he first came here there were numbers of friendly Indians about and among them. He stated that he had shot deer in the vicinity as late as the year 1770. Once he shot a panther which he discovered attempting to attack his dog. Another time he wounded a large deer, and, stepping across it to cut its throat with a knife, the deer made off with him at full speed; however, he clung to its back, and in this position succeeded in killing the animal. In the graveyard of the Swedes' Church may be seen a large stone which has inscribed on it, "In Memory of Mons Rambo, who departed this life October 23d, 1782, aged 89 years." In the list of settlers of Upper Merion, in 1734, we find the names of Mounce, Gabriel,

John and Elias Rambo, and for the same year Peter Rambo, holding two hundred acres in Providence township. On the ancient tombstones we find the names of Diana Rambo, who died January 30, 1744—45, aged thirty-six years; Peter Rambo, June 18, 1767, aged forty-two years; and Mathias Rambo, October 10, 1782, aged sixty-six years. In the assessor's list of Upper Merion for 1780 we find Ezekiel Rambo rated for 45 acres; Sarah Rambo, 40; John Rambo, 90; George Rambo, 200; Tobias Rambo, 57; Mounce Rambo, 100; and Abraham Rambo; as single men, Gunnar Rambo, James Rambo and Benjamin Rambo. Gunnar Rambo was assessed in Limerick township, in 1776, for one hundred and seventy acres, and Moses Rambo, a single man, probably a son. In the list of voters in Upper Merion in 1858, six Rambos are registered and the same number in Upper Providence.

Peter Yocum is mentioned in the Upland Court records as being on a jury held there in December, 1681. In March, 1682, he was appointed overseer of highways for one year, from Karker's Mills to the Falls of Schuylkill. The list of 1693 represents his having nine persons in his family. He also removed to Upper Merion, and settled immediately below the Rambo brothers. In the list of 1734 we still find the name of Peter Yocum; whether the same person or a son we are not able to state. In the assessor's list of the township for 1780, Moses Yocum is rated for one hundred acres and James Yocum twenty-five acres. Swan Yocum was a resident of Towamencin township in 1780. A stone in Swedes' Churchyard informs us that the aforesaid Moses Yocum died March 1, 1787, aged sixty-seven years. At Morlatton, Peter Yocum resided, and died July 13, 1794, aged seventy-six. The voter's list of Upper Merion for 1858 shows that the family has here become extinct, but is found in Upper Providence and several of the adjoining townships.

Nils Matson was a native of Sweden, and very probably the ancestor of John Matson, mentioned in the list of 1693. The latter is represented at that date as having eleven persons in his family. One of the same name, who was probably a son, is represented as having moved into Upper Merion on a large tract of land adjoining Lower Merion. As the country became settled a ford was established here, and thus received the name of Matson's Ford. During the Revolution the American army crossed several times at this place. It was then owned by Peter Matson, and on his death the land was divided among his sons, leaving each a farm. In the assessment of 1780, Peter Matson had here one hundred and seventy-nine acres, a portion being then farmed by his son, Isaac Matson. Jacob Matson at this date resided in Lower Merion, and was probably a brother of the latter. The land here has for some time passed out of the family. In the Upper Merion voters' list for 1858 one of the name is mentioned.

William Penn, it appears, was delighted with the kind reception he received from the gentle-hearted

Swedes. After his departure from this country he sent a letter from London, dated the 16th of First Month, 1684-85, to Thomas Lloyd, president of the Council, in which he says, "Salute me to the Swedes, Captain Cock, old Peter Cock and Rambo and their sons, the Swansons, Andrew Binkson, P. Yoakum, and the rest of them. Their ambassador here dined with me the other day." Again, in his "Present State of America," printed in London in 1687, at page 106, says, "I must need commend the Swedes' respect to authority and kind behavior to the English; they do not degenerate from the old friendship between both kingdoms. As they are people proper and strong of body, so they have fine children, and almost every house full, rare to find one of them without three or four boys and as many girls; some, six, seven, eight sons. And I must do them that right: I see few young men more sober and industrious."

In connection with this subject are a few matters deserving mention. The Swedish language, it appears, was still spoken by their descendants here as late as the Revolution. Mathias Holstein, who died in 1768, spoke it in his family. Andrew Rambo, aged seventy years, informed the writer at Swedesburg, in 1858, that when a young man he attended worship at Gloria Dei Church, at Wicaco, and heard the Rev. Dr. Colin preach there in Swedish, but was unable to understand it. He also stated that his grandfather, Tobias Rambo, spoke the language. It is supposed that no preaching in Swedish was ever done in the Swedes' or Christ Church here, but that Dr. Colin, would now and then, from habit, use a Swedish word in his sermon, which he would endeavor afterwards to explain. From the earliest period the Swedes and their descendants have shown a predilection to reside along the valleys of the Delaware and Schuylkill, and where they still hold most fertile tracts. As a people they have been honest and industrious, and remarkable for pursuing the even tenor of their way to prosperity, rarely venturing in any undertaking that partook of mere speculation. In consequence they have been rarely affected by those disastrous convulsions that now and then occur to wreck the more venturesome.

Christ Church.—The early Swedes were undoubtedly a moral and religious people, and under the most adverse circumstances never lost sight of their faith. On Tinicum Island, in 1646, they erected the first house of worship in Pennsylvania. At Wicaco, now in the lower part of Philadelphia, they converted a block-house to this purpose in 1677, which was torn down in 1700, and a commodious brick church, called Gloria Dei, built in its place. A patent was granted to Rev. Andrew Rudman and other Swedes, October 2, 1701, for ten thousand acres situated on the east bank of the Schuylkill, about four miles above the present borough of Pottstown. On this tract a settlement was made, very probably the following year,

which was called Morlatton, but now known as Douglassville. They had worship here in private houses until 1735, when a church, denominated St. Gabriel's, was commenced and finished in 1737. The graveyard, however, was used as a place of interment, according to the tombstones, at least as early as 1719.

About 1730 the Rev. Samuel Hesselius, the pastor of Morlatton, on his return from Wicaco, made a visit to the Swedes of Upper Merion, and at the house of Gunnar Rambo held services, at which there was a good attendance from the surrounding neighborhood. On this occasion he advised the erection of a school-house, that their children might enjoy the advantages of a better education than they had heretofore received in their home instruction, as well as for holding therein religious services. His suggestions were so well received that arrangements were soon afterwards made to carry out the project. A committee was appointed to secure the site and erect the building. An acre of ground was obtained from Gunnar Rambo, which was inclosed with a post and rail fence, which no doubt led to the origin of the burial-ground. The school-house was completed in 1735, if not earlier, but no regular teacher was employed for some time. Religious worship was now held here several times a year and at private houses, generally conducted by lay members. The Rev. Olif Parlin, a missionary stationed at Wicaco; it is known preached here at least on one occasion, in 1756. Before this marriages and baptisms had been performed at Gloria Dei, with which this congregation was united, as well as the one at Kingessing.

With a view of building a church, the school-house lot was purchased, for eleven pounds sterling, from the estate of Gunnar Rambo, deceased. The deed therefor was dated May 7, 1758, and was executed by Ezekiel Rambo and wife to Mounce Rambo, Andrew Holstein, Peter Rambo and George Rambo, who had been chosen trustees on behalf of the Swedish Lutheran congregation. It conveys the lot to them "in trust for the use of the said Lutheran congregation, their heirs and successors forever, and that for the use of a burying-ground, a church, a school-house and other buildings hereafter to be erected thereon, as the said congregation and their successors forever shall or will think meet or proper, and for no other use, intent or purpose whatsoever." Arrangements were now made for the erection of the church, and were so actively entered into, that it was completed and dedicated as Christ Church June 24, 1760. On this occasion the sermon was preached by the Rev. Charles Magnus Wrangle, who had been sent over the previous year to take charge of the three congregations already mentioned as constituting the mission. His sermon on this occasion was based on the text from Isaiah, "Thus saith the Lord, the heaven is my throne and the earth is my footstool: where is the house that ye build unto me? and where is the place of my rest?" He returned to Sweden in

1768 and was there made a bishop. He was a popular and eloquent divine, and because of the numbers that frequently attended to hear his discourses, often preached in the open air. During his ministry in Pennsylvania he generally held services here once a month. On these occasions numbers would come hither in canoes, even from Morlatton, and also by the same means to hear him at Wicaco. At this time the church and yard were inclosed by a stone wall, leaving the school-house outside the same.

The Rev. Andrew Goeranson succeeded in the charge, and continued therein until the close of 1779. In 1774, Rev. Charles Lute, of the Episcopal Church, was appointed his assistant. He was a warm patriot during the Revolution, and animated his hearers by introducing the subject in his sermons. It is a tradition that when Washington was in the vicinity with his army he attended worship here on one occasion, if not afterwards. In January, 1780, Rev. Mathias Hultgrew succeeded Mr. Goeranson, and officiated until May, 1786. In July of that year Rev. Nicholas Colin received the charge of the mission, which he held until his death, in 1831, the long period of forty-five years, and retained the high regard of his congregation to the close. In this interval he was occasionally assisted in his ministrations by several pastors of the Episcopal Church. Although Dr. Colin resided at Wicaco, he always took an interest in his Upper Merion congregation, whom he visited monthly on horseback. He loved his calling and the church flourished under his pastorate. He was buried at Gloria Dei, where a tablet has been placed to his memory, he being one of the last of a long line of missionaries sent out from Sweden to sustain in the faith her colonists and descendants.

Owing to a petition from the members of this and the other churches at Wicaco and Kingseessing, they were all three unitedly incorporated by Governor John Penn, September 25, 1765, as "Swedish Lutheran Churches." At a meeting of the vestry in July, 1786, it was resolved that whenever His Majesty, the King of Sweden, shall deem it proper or convenient to recall the Rev. Mr. Colin, "the mission to the congregations will undoubtedly cease." In consequence, application was made to the State Legislature for an amendment to the charter, which was passed September 10, 1787, which makes a provision in the fifth section for the election of a rector or other ministers and "that such rector or other ministers shall be in the ministry of the Lutheran or Episcopal Churches." The union of the three churches prior to 1765 was continued till 1843, when it was dissolved by a petition from the several congregations, through an act of Assembly, which severed their connection with each other as a corporate body, forming them into three distinct parishes, with their respective rectors.

After the death of Dr. Colin, the Rev. Jehu C. Clay became the rector of the three churches from January, 1832, until their separation, in 1843. Rev. Edwin N.

Lightner succeeded in the sole charge in July, 1844, and continued until February, 1855. In the spring of said year Rev. William Henry Rees became the rector, which relation he sustained for six years. The Rev. Thomas S. Yocum, of Swedish descent, followed in May, 1861, and remained till the summer of 1870. Rev. O. Perinchief, in July of said year, held the charge to September 8, 1873. The Rev. E. A. War-riner immediately assumed the rectorship until February 21, 1875. Mr. Perinchief resumed the charge in the following April, which he retained until his death, April 29, 1877. The Rev. A. A. Marple became his successor September 9, 1877, and is the present incumbent.

The graveyard having become too small, with a desire to its enlargement and making other improvements, a meeting was held at the church March 12, 1837, the vestry consisting of George W. Holstein, Benjamin B. Hughes, Andrew Shainline and J. Cleaver Rambo, to whom were added a committee consisting of William H. Holstein, Nathan Rambo, Ivins Rambo and Samuel H. Coates, to attend to the necessary arrangements. It was now agreed to enlarge the church. C. Ramsey & Sons were engaged to do the mason-work, and Andrew Rambo to superintend the carpentry. On the 1st of February, 1838, the church was consecrated by Bishop Onderdonk, assisted by Revs. J. C. Clay, William N. Deihl, William H. Rees and others. On this occasion the rite of confirmation was administered for the first time within its walls

to eleven persons. In 1845 the parsonage was erected at a cost of upwards of seventeen hundred dollars, and the Sunday-school building previous to 1870.

The church is a handsome, plain, stone, Gothic edifice, built in the form of a cross, with a square tower upwards of fifty feet high, in which a bell was placed in 1855. Few houses of worship have a more beautiful situation, being on an elevated, sloping, shady bank of the Schuylkill and to the traveler on the eastern side of the river forming a picturesque object, through some resemblance reminding one of the old church at Stratford-on-Avon. It is surrounded by a large graveyard, inclosed by a wall, in which grow maple, poplar and cedar-trees. A great many, as may be well supposed, have been buried here, one of the tombstones bearing the date of 1745, showing that it must have been thus used some time before the erection of the church. Among the names found here may be mentioned Broades, Brook, Holstein, Gartley, Supplee, Novioch, Custer, Ramsey, Thomas, Amies, Jones, Clay, Hughes, Munson, Learnard, Pastorius, Dehaven, Rambo, Engle, Coates, Roberts, Famous and Henderson. Though the form of worship is Episcopal, yet this church is not attached to the diocese, this right having been reserved by its members. Of all the Swedish Lutheran Churches in Pennsylvania, this is now the only one that has retained the privilege. Major Mathias Holstein related that down to 1780 the worshipers that came from any distance, and lived away from navigation, came to attend service here on horseback, which practice was pretty generally maintained down to 1830. Indeed, for this purpose, the side-saddle formed a portion of the young bride's outfit.

ASSESSMENT OF UPPER MERION FOR 1780.

Isaac Hughes, assessor; Samuel Holstein, assistant assessor, and Peter Holstein, collector.

Adam Eve, tailor, 32 acres, 1 horse and 2 cows; Leonard Shanline's estate, 22 a.; John Famous, 1 h., 2 c.; Evan Evans, 2 h., 2 c.; Margaret Bell, 125 a.; Joshua Phillips, 200 a., 2 h., 6 c.; James Abraham, 190 a., 3 h., 8 c.; John Cleaver, 80 a., 2 h., 3 c.; Benjamin Ramsey, 2 h., 5 c.; William Long's estate, 20 a.; Peter Wells, farmer, 112 a., 2 h., 2 c.; Isaac Davis, 250 a., 2 h., 2 c.; John Moore, 3 h., 2 c.; Abraham Griffith, miller, 1 h., 1 c., for Jacob Walker and Samuel Kelly, 195 a. and a grist-mill; Daniel Thompson, tailor, 1 c.; Jane Moore, 275 a., 2 h., 5 c.; James Hazelton's estate, 125 a.; Michael Sher, 1 h., 3 c.; Henry Casselberry, 2 h., 2 c.; Morris Stephens, 150 a., 1 negro; David Stephens, 300 a., 2 h., 2 c.; Mordecai Moore, 50 a., 2 h., 2 c.; Bernard Vanhorne, 1 h., 2 c.; George Hart, 2 c.; John Pugh, store-keeper, 1 h., 50 gals. rum, 200 lbs. brown sugar, 100 lbs. coffee; Isaac Potts' estate, 35 a., grist and saw-mill; James Berry, tavern-keeper, 2 h., 2 c.; John Britton, 190 a., 2 h., 5 c., 1 riding-chair; Henry Braunman, 50 a., 2 h., 1 c.; Lawrence Stuart, 100 a., 4 h., 5 c.; William Terrance, 3 h., 5 c., rents on shares; Robert Blunden, weaver, 1 c.; Thomas Sturges, 100 a., 2 h., 3 c., 1 negro wench; Amos Sturges; John Sturges, 100 a., 2 h., 2 c.; John Lyle, 160 a., 3 h., 4 c.; Thomas Edwards, shoemaker, 6 a., 2 h., 2 c.; William Farr, in the army, 150 a., 2 h., 1 c.; John Dugan, 2 h., 2 c.; Thomas Rees, 300 a., 4 h., 8 c., 1 negro; Benjamin Jones, 15 a.; Arthur Campbell, weaver, 2 h., 2 c.; George George, 470 a., 2 h., 6 c., saw-mill; Thomas Davis, 135 a., 2 h., 1 c.; Peter Whiteside's estate, 90 a.; Isaac Supplee, 80 a., 2 h., 2 c.; John Ingals, 115 a., 2 h., 2 c.; Griffith Powell, 100 a., 2 h., 6 c.; John Johnson, 90 a., 3 h., 4 c., 1 servant; William Crawford, 100 a., 2 h., 4 c., 1 servant girl; Abraham Thomas, smith, 1 c.; Isaac Matson, 2 h., 1 c.; Anthony Sturges, 90 a., 1 h., 1 c.; Amos Willets, fuller, 39 a., 1 h., 2 c., fulling-mill; Peter Matson, 179 a., 3 h., 2 c.; Isaac

Knight, 2 h., 3 c., rents from Edward Shippen's estate, 230 a.; David Jordan, 1 h., 2 c.; Henry Coldflesh, 100 a., 2 h., 2 c.; John Rees, 100 a., 3 h., 4 c.; Andrew Supplee, 64 a., 2 h., 3 c.; Moses Yocum, 100 a., 3 h., 3 c.; Benjamin Ramsey, 1 c.; Ezekiel Rambo, 45 a., 2 h., 2, 1 servant girl; Absalom Priest, tailor, 1 h., 1 c.; Jonas Yocum's estate, 25 a.; William Gabb, miller, 2 c.; Sarah Rambo, 40 a., 2 h., 1 c.; John Rambo, 90 a., 2 h., 3 c.; Dennis Collins, weaver, 2 h., 2 c.; George Savage, inn-keeper, 2 h., 1 c.; Philip Rees' estate, 28 a., 2 h., 2 c.; John Roberts, miller, 23 a., grist-mill, 2 h., 2 c.; Joseph Williams, 200 a., 4 h., 3 c.; Jonathan Roberts, 300 a., 3 h., 6 c.; William Cleaver, 180 a., 3 h., 3 c.; William Wilson, 1 h., 1 c.; Samuel Phillips, 150 a., 3 h., 5 c.; Jacob Eagy, 2 h., 2 c.; Jonathan Tucker, 93 a., 3 h., 2 c.; Moses Davis, 1 h., 1 c.; George Rambo, 200 a., 2 h., 6 c.; Jehu Jones, 250 a., 3 h., 6 c.; Nathan Sturges, joiner, 100 a., 2 h., 2 c.; Thomas Martin, tailor, 1 h., 1 c.; John Horn's estate, 60 a.; John Henderson, 100 a., 3 h., 1 c.; Benjamin Eastburn, 200 a., 3 h., 5 c., 1 servant; Henry O. Neal, 2 h., 2 c.; George Woolmore, weaver, 2 c.; Sarah Bryan's estate, 71 a.; Michael Wals, 1 h., 2 c.; Isaac Abraham's estate, 60 a.; Tobias Rambo, 57 a., 2 h., 2 c.; Andrew Shanline, shoemaker, 100 a., 3 h., 4 c.; Mounce Rambo, 100 a., 2 h., 2 c.; Abraham Rambo, 1 h.; Samuel Ramsey, smith, 1 h., 2 c.; William Dewees' estate, 120 a.; James Jones, 17 a.; Abijah Stevens, 60 a.; Jacob Bailets, 1 c.; Andrew Kiammon, 1 c.; Henry Priest, mason, 2 h., 3 c.; Cephus Bartleson, inn-keeper, 4 h., 6 c., pays 200 bu. of wheat rent to Peter Holstein; Peter Holstein, 197 a., 1 L.; Samuel Holstein, 278 a., 5 h., 9 c., 1 negro; Isaac Hughes, 489½ a., 3 h., 8 c., 1 negro wench; Abraham Nanna's estate, 196 a.; Lindsay Coats, 13C¼ a., 3 h., 6 c., negro boy and girl; Jesse Roberts, stiller, 1 h., 2 c., still holds 90 gals.; John Jones, 99 a.; Samuel Miles, 150 a.; Rev. William Smith, 125 a. *Single Men*.—Jesse Roberts, Jonas Rambo, William George, David George, Nicholas Bower, William Stuart, Arthur Rice, Levi Priest, Leonard Spade, George Cool, Jonathan Phillips, Israel Davis, Enoch Enox, Morris Rowland, William McClure, Benjamin Rambo, Henry Brinsley, Matthias Coldflesh, Nathan Cook, John Pugh, Henry Castleberry, Jonathan Cleaver, Richard Moore, Morris Stephens.

BIOGRAPHICAL SKETCHES.

JOHN KENNEDY.

John Kennedy, the youngest of eight children of Alexander and Margaret Robison Kennedy, was born on the 18th of October, 1815, in Upper Merion township, Montgomery Co., Pa., and spent his youth on the homestead farm, located in the above township. The common schools, and, later, a boarding-school, afforded opportunities for more than a rudimentary education, after which his time and energies, until the attainment of his majority, were given to the farm. He then began the purchase and sale of stock, which in after-years reached such proportions as to become an important feature of business in the county. Mr. Kennedy was, on the 27th of November, 1841, married to Miss Margaret S., daughter of Moore Connell, of Lancaster County, Pa. Their children are Josephine, wife of M. M. Ellis, of Phoenixville, Pa.; Maggie S., wife of N. D. Cortwright, Jr., of Mauch Chunk, Pa.; Moore C., and five who are deceased. Mr. Kennedy, after engaging for several years in the purchase and sale of stock; secured, in 1842, the lime-works at Port Kennedy, which he continued during his lifetime to operate. He erected wharves on the Schuylkill River, and owned many schooners which were constantly plying between this and other ports, bearing the products of his extensive limekilns. With his advent the neighbor-

hood assumed an aspect of business life before unknown, dwellings being erected, as also structures for the prosecution of various commercial enterprises. In all this activity he was the leading spirit which directed and encouraged, by capital and personal effort, the growth and development of the place. In 1855, Mr. Kennedy purchased five farms in Kent and other counties in Maryland, and, although not a resident of the State, gave his supervision to their cultivation and improvement, and gave special attention to the growth of peaches. He still retained his extensive interests at Port Kennedy, and engaged largely in the sale of blooded stock, the superior quality of the

for years officially connected. Mr. Kennedy was, in politics, formerly a Democrat, and later affiliated with the Republican party. He cared little for office, and although, from motives of public spirit, occasionally accepting minor township positions, he declined more important honors tendered him. His death, which was felt by the community to be a public loss, occurred on the 4th of September, 1877, in his sixty-second year.

DANIEL KINZIE.

Mr. Kinzie is of Scotch antecedents, Alexander McKinzie, his great-grandfather, having emigrated in 1775

John Kennedy

horses and cattle offered at these sales making Port Kennedy an objective-point for buyers throughout the State.

Mr. Kennedy was identified with most of the important interests in the county. He was president of the Farmers' and Mechanics' Bank, of Phoenixville, president of the Montgomery Agricultural Society, in which he felt a deep interest, and largely identified with the Grange movement in the county. He assisted in the construction of the Reading Railroad, having been awarded a contract for grading a section of the road. He was one of the originators of the Port Kennedy Bridge Company, with which he was

to America in company with his son Donald, who was born May 23, 1763, in the parish of Inverness. The latter was a soldier in the war of the Revolution, and was wounded while in service on board a privateer. He subsequently became a farmer and died in 1843 in possession of much valuable land, a portion of which is still in possession of the family. His children were John and Ann by a first marriage, and by a second union, Rebecca, Christiana, Peter Davies, Mary and Alexander. John was born in 1786 in Delaware County, and first engaged in labor on the farm, after which he was employed in teaching. He served with the Norristown Rifles, under Captain Robinson, in the war

of 1812, having been stationed at Sandy Hook. Mr. Kinzie married, in 1811, Mary, daughter of William Sheaff, of Haverford, Delaware Co., and had children, —Emily, Sabina, Daniel, Susan, William, Isabella, Rebecca, Charles, John and Horatio G. Daniel was born on the 7th of April, 1818, in Lower Merion township, and devoted his boyhood to acquiring a common-school education, after which he, in 1836, entered a store in Manayunk, Philadelphia Co., and remained two years as clerk. He then became a resident of Upper Merion, and filled the same position at Bird-in-Hand, in that township. In 1847 he formed a co-part-

CHAPTER LXXVIII.

UPPER SALFORD TOWNSHIP.¹

THIS township is bounded on the north and north-west by Marlborough, south by Perkiomen and Lower Salford, west by Frederick, northeast by Bucks County and east by Franconia. Its greatest length is above eight miles, and breadth nearly four, with an area of twelve thousand seven hundred and fifty-five acres, and in extent it is the fourth in the county. The surface is rolling and several hills extend through it whose surface is stony; the soil consists of loam and

Daniel Kinzie

nership with Perry M. Hunter, which continued until 1859, when he retired from business. Mr. Kinzie having previously studied surveying with his father, he adopted it as a profession, and has since his retirement from commercial life found his services much in demand as a civil engineer and surveyor. He has during his whole life been a Democrat, and active in local political issues, having served for nine years as a member of the school board, and in other positions of trust, and since 1875 filled the office of justice of the peace. He was educated in the faith of the Baptist Church.

red shale. The principal streams are the East Branch, the Ridge Valley and Perkiomen. The latter forms its western boundary nearly four miles, and propels in the township four grist-mills and several other manufacturing establishments. The East Branch rises in Bucks County and forms its eastern boundary for nearly four miles, and, like Ridge Valley Creek, furnishes water-power to several mills.

One mile north of Schwenksville, on the east side of the Perkiomen Creek is Stone Hill, probably the

¹ By Wm. J. Buck.

highest elevation in the township. On measurement it is ascertained to be two hundred and forty feet above the adjacent stream. Its top affords a fine prospect of the surrounding country and is covered with timber, abounding in huge rocks, which renders it at places unfit for tillage. Foxes, raccoons, opossums and pheasants are still found there. In 1852 five full-grown red foxes were captured here that had lived upon the poultry of the neighborhood; they have now become scarce. On the west side of Ridge Valley Creek is also a wild, rocky range, following its course, covered with timber and abounding in all of the aforesaid animals. On the farm of Abraham G. Kober, about half a mile north of Mechanicsville, a copper-mine was opened in 1879. It has been leased for a royalty to Tetham & Brothers, of New York, who made excavations to a depth of twenty-three feet in the fall of 1888. It was discovered in plowing by traces of the ore existing in the stones near the surface. It is evidently a continuation of the same vein discovered and worked long ago near Zeiglersville, four miles distant.

The Spring House and Sumneytown turnpike crosses the central part for upwards of three miles. The Perkiomen Railroad enters Upper Salford about a mile above Schwenksville, following close along the east bank of the stream for three miles, in which distance it has three stations, called Salford, Hendricks and Kratz. The villages are Salfordville, Tylersport, Hendricks, Salford Station, Branchville and Mechanicsville, the first four containing post-offices. According to the census of 1800 it possessed 676 inhabitants; in 1840, 1301; and in 1880, 1866. The real estate for taxable purposes was valued in 1882 at \$979,230, and including the personal property, \$979,230, the average per taxable being \$2429. In May, 1883, five hotels, four general stores, twelve flour and feed, one boot and shoe, one stove and one furniture-store, one coal-yard and two restaurants were licensed. The township contains eight public schools, open five months, with an average attendance of 305 pupils for the school year ending June 1, 1882. The census of 1850 returned 277 houses, 277 families and 195 farms. A small portion of the territory of the township in the vicinity of Sumneytown and the adjoining part in Marlborough was formed into an independent school district in October, 1882.

The township of Salford was originally formed in March, 1727, and then contained upwards of thirty thousand acres of land, including all of the present townships of Marlborough, Upper and Lower Salford and a part of Franconia. In the beginning of 1741 a petition was sent to the Court of Quarter Sessions, signed by a number of the residents, wherein they state "that said township is settled with many inhabitants, some of whom escape being taxed for want of the true bounds being ascertained, praying this court would be pleased to view a draught to the said petition annexed, being part of the land of said township

of Salford, which contains about ten thousand acres, and that the same may be erected into a township by the name of Upper Salford." The court having taken the said petition into consideration, and examined said draught and bounds, erected the same into a township to be called by the name of Upper Salford, and the bounds were as follows, viz :

"Beginning at a White Oak on the East Branch of Perkiomy Creek, at a corner of Marlborough township, thence by the same North East 91 perches to a Post, thence by the same South East 30 perches to a White Oak, thence by the same North East 160 perches to a stone, thence by the same South East 96 perches to a Black Oak sapling, thence by the same North East 106 perches to a Post, thence by the same South East 10 perches to a Black Oak, thence by the same North East 26 perches to the Swamp Creek, thence up the same 150 perches, thence by the township aforesaid North East 22 perches to a Post, thence by the same North East 1200 perches to a Post in a line dividing the counties of Philadelphia and Bucks, thence down the same by Franconia township about 1300 perches, thence by Franconia township South East 184 perches to a Post at a corner of Salford township, thence by the same South West 165 perches to a White Oak, thence by the same South East 89 perches to a Post, thence by the same South West 772 perches to a Post, thence by the same South East 18 perches to a stone, thence by the same South West 78 perches to a Post, thence by the same South West 126 perches to a Post, thence by Perkiomen and Skipack townships North West 430 perches to Perkiomy Creek aforesaid, thence up the same about 1560 perches to the place of beginning, containing 10,000 acres. Erected at March Sessions, 1741."

The townships of Lower Salford and Marlborough were also established at this time, and consequently occupied all the remaining territory of Salford since the formation of Franconia, in 1731.

The records of the Old Goshenhoppen Church furnish us with a partial list of the early settlers of this township and vicinity, who were members of the same, with the places, in most instances, of their nativity, and the year of their arrival. Elias Long and wife, from Würtemberg, in 1716; John George Gankler and wife, Anna Barbara, from near Zürich, in 1717; John Henry Boyer, from the Pfaltz or Palatinate; John George Weiker and wife, Elizabeth, from Darmstadt, 1724; John Martin Derr and wife from Rheinbaiern, in 1728; John George Wagner, wife and son, George Martin, from Baiern, in 1731; John Michael Reicher, from Würtemberg; John Philip Gabel and wife, from Zweibrücken; Mathias Waltner, from the Pfaltz; John Christopher Bickel, from Würtemberg; John George Underkoffler, in 1732; Andreas Boyer, from the Pfaltz; Valentine Nungesser, in 1733; Isaac Klein; John Klein; George Weigert; John Jacob Fillman, wife and son Philip, in 1736; John William Daub and wife from near Worms, in 1737; and George Michael Wonnkessel and wife, from Würtemberg, in 1748. Henry Worman purchased a tract of land here in 1742, Henry Bomberger one hundred and fifty acres the year following, and Jacob Eck one hundred and twenty-five acres in 1747.

In the list of land-holders and tenants of Salford in 1734 the following, through the assistance of James Y. Heckler, of Harleysville, have been located as residents of Upper Salford; Peter Kuntz, 100 acres; Hans Michael Wagley, 100; Valentine Kratz, 100; Hans Wollyberge, 100; Jacob Ingress, 100; Ulrich Steffe,

50; Martin Hildebidle; Dewalt Young, 100; Christian Lehman, 100; Hans Adam Maurer, 100; Rudolph Drake, 50; Yost Cope, 100; Christopher Ankabrant, 100; Andrew Haake, 120; Ludwig Schaffer, 100; George Cochler, 100; William Smith, 100; Philip Read, 50; Christian Younglin, 20; Hans Underkofler, 100; John Lebo; Abraham Titloe, 50; Michael Moll, 50; Mathias Haas, 100; Samuel Moyer, 100; Samuel Moyer, Jr.; Hans Moyer, Jr., 100; Hans Freed, 100; Jacob Cook, 100; John Henry Snyder, 100; Jacob Preuss or Price, 150 acres. Descendants of the name of Scholl, Moyer, Freed, Kratz and Hildebidle still hold lands here.

As this section of country from an early period has been called Goshenhoppen, and the first church erected in this township known only by this name, we deem the subject of sufficient importance to give some attention as to its origin and claims. The name has also been bestowed on several other places, as in Frederick and Upper Hanover townships and in the neighboring parts of Berks. It has puzzled numbers as to whether it is of Indian or German origin. By the modern spelling it would seem to belong to the latter, but the test of historical investigation indicates the former. The map accompanying Gabriel Thomas' "Account of Pennsylvania," published in London in 1698, establishes the fact, from the manner that the Perkiomen and its several branches are delineated thereon, that even previously to that date this section of country must have been pretty well explored, or it could not have been given with such correctness. A short distance north of Schwenksville, where the road crosses over Swamp Creek, veins of copper-ore are readily seen in the neighboring rocks, which is just below the mouth of what has been long known as Goshenhoppen Run, a stream about four miles in length. There is strong reason to believe that copper-mining was pursued here some time before any actual settlement was made for other purposes. In 1730 or thereabouts a large tract was taken up here for this especial object by a company, who sunk various shafts and entered into extensive operations. This was finally relinquished as not proving profitable. Hence it is our opinion that through these early labors the name of the aforesaid stream, in the absence of any other, became applied to this section of country, and it has been impossible to ascribe it to any other source. Nicholas Scull, in his map of the province, published in 1759, denotes these copper-mines. The earliest mention yet found of the name in records is in a petition of the inhabitants of Colebrookdale and parts adjacent, dated May 10, 1728, wherein it is called "Coshahapopin," and in another of 1745, "Quesohopin." In a petition to the court from this section for a road in March, 1751 it is "Cus-saoppin." In an address of Rev. George Michael Weiss to Governor Thomas, November 2, 1754, he styles himself as residing in "Goschhoppe." The name of Goshenhoppen Run has been found in deeds of 1732,

but further research can no doubt reveal it earlier. Some have supposed the name to be derived from Shakhoppa, one of four chiefs of whom a considerable purchase of lands was made in 1685, in the present limits of Philadelphia, Montgomery, Chester and Delaware. There was a school district in this township so called which was abolished by an act of Assembly passed in 1859.

The earliest road in Upper Salford, according to the records, was one laid out and confirmed in June, 1728, from Skippack, through the present Lederachsville and Salfordville, to Sumneytown, where it terminated. It was then called the Skippack and Salford road. The road from the present Spring House to Sumneytown was confirmed and opened in June, 1735, and turnpiked in 1848. What is now known as the Ridge road was opened in 1766, and commenced at a corner of Detrich Rudy's land, on the Bucks County line thence through the present Tylersport, by lands of William Mayberry, deceased, Frederick Wentz, Woolrich Hertzell, Philip Zeigler, John Eck, Widow Philmon, Bastian Heap, Valentine Boyer, Jacob Landis, John Gans and George Doctor; thence through Sumneytown, Perkiomenville, Fagleysville, terminating near the present Sanitoga Station on the Schuylkill. John Hildebidle and Philip Wentz were township supervisors in 1767, Richard Klein in 1773, Valentine Kratz and Michael Scholl in 1776, Frederick Berndt and Abraham Scholl in 1810. John Eck was constable in 1767, Adam Hildebidle in 1774, and Philip Gable assessor and George Frederick collector in 1776.

In the assessment for 1776 mention is made of John Bergy owning 180 acres and a grist and saw-mill; Jacob Graff, 200 acres and a fulling-mill; Ludwig Moyer, 50 acres and a grist-mill; George Moyer, 50 acres and a grist and saw-mill; Henry Deetz, 125 acres and a grist and saw-mill; Jacob Kulp, 88 acres and a fulling-mill; Daniel Heister, 130 acres and a tannery; Robert Coleman, ironmaster, one servant and ten horses; Conrad Epler, forgeman; Godfrey Kersneck and Henry Croll, saddlers; John Brown and Sebastian Nell, smiths; Henry Sauder, weaver; George Walt, tailor; William Antich, shoemaker; and Joseph Warner, fuller. Jacob Graff's fulling-mill is now the property of Jesse Zeigler, at Salford Station, and Jacob Kulp's fulling-mill was on the Ridge Valley Creek, about a mile from Sumneytown, on the property now owned by William Nice. A licensed inn was kept by Michael Croll in 1767, by Philip Gable from 1776 on to 1790, by Jacob Rudy in 1790, and by Frederick Rudy, Peter Wagoner and Jacob Croll in 1807.

On the east side of the turnpike, close to Ridge Valley Creek, stands a fine brick house bearing the date of 1757, and now the property of D. Krouse. A new slate roof has been recently put on it by the present proprietor, and its walls appear durable enough to last at least another century. Nicholas Scull, in his

map of Pennsylvania, published in 1759, thought it of sufficient importance to have it denoted thereon as "Heister's." This was the property of Daniel Heister, a native of Elsoff, in Westphalia, who arrived in Pennsylvania in 1737 with his brother Joseph, having been preceded a few years by his elder brother, John. Daniel settled on this tract, which was then known as Goshenhoppen, and raised a family of four sons and one daughter. He was rated for holding here, in 1776, one hundred and thirty acres of land, one negro, three horses, three cows and a tannery. He died in 1795, aged eighty-two years, and was the uncle of Governor Joseph Heister. Daniel Heister's sons were John, Daniel, Gabriel and William, who were born on this homestead. They all served in the army of the Revolution, the first three being officers. John and Daniel Heister afterwards became members of Congress, the former from Chester and the latter from Berks County, where they had removed.

From 1785 to 1807 Upper Salford belonged to the Third Election District, and the people voted at Creps' tavern at the present village of New Hanover Square, distant from the central part of this township about six miles, and having to cross the Perkiomen, which at this period was bridged. In 1838 it was placed in the Fifth District, voting at the house of John Hartman, Sumneytown. In July, 1878, the township, from its great length, was divided into two districts, called East Upper Salford, voting at Tylersport, and West Upper Salford, voting at Mechanicsville.

Tylersport is the largest village, and is situated in the northern part of the township, near the Bucks County line. It contains a store, hotel, post-office, meeting-house and about fifty houses, and, according to the census of 1880, two hundred and twenty-four inhabitants. In 1849 the place contained only a few houses. R. R. Cressman carries on extensively the manufacture of segars; his taxes on the same for 1882 amounted to twenty-seven thousand seven hundred and seven dollars. There are here also several mechanic shops.

Salfordville contains a store, hotel, post-office and nineteen houses. T. W. Cressman has a cigar manufactory here, besides the usual mechanic shops. A creamery has been recently established about a quarter of a mile to the northeast of the village. This place in 1858 possessed eleven houses. It was at the upper end of this village where Michael Croll, in 1767, kept an inn and owned a farm of two hundred and sixty acres. He was long a justice of the peace, and died about 1810.

Mechanicsville contains one hotel, a restaurant, hall, shoe shop, wheelwright-shop, store and twelve houses. At the north or upper end of this village a splendid view is offered of the Oley Hills, Methacton, and of Bucks County for many miles. The elections for West Upper Salford are held at this place. About half a mile west of this is the Methodist Episcopal

Church, built about 1858. It has no regular stationed minister. It was at the sign of the "Black Horse" here where Jacob and Frederick Rudy so long kept an inn. This village formerly bore the name of Croppa Stettle, or Crowtown.

Salford Station, on the Perkiomen Railroad, contains a merchant mill, a grain and feed-store, coal-yard and five or six houses. Rudy post-office has recently been established here, called after the late Samuel D. Rudy, sheriff of the county in 1856-59. Branchville contains a store, hotel, several mechanic shops and three houses.

The Old Goshenhoppen Church.—This long-established place of worship is situated but little over half a mile northeast of Salford Station and nearly midway between Salfordville and Mechanicsville. It dates back nearly to the early settlement of this section, when the country for miles around was only known as Goshenhoppen, and hence applied to denote the locality of this church, and which it has ever since retained. The settlers of the Lutheran and German Reformed faith united, in 1732, to procure by warrant a tract of land, upon which they erected a log school-house in the fall of that year, which was also used as a place of worship. However, the tract was not surveyed until January 26, 1737, when thirty-eight and one-quarter acres, with allowances, were taken up for the express purpose mentioned, and the deed recorded the following 7th of February. Michael Royer, on the part of the Lutherans, and Jacob Keller, for the German Reformed, made final payment for the same January 12, 1738, the cost being £8 9s. 3d., equivalent to \$23.34 of our present currency.

As the German Reformed members were without a pastor, they worshiped together in the aforesaid building until the spring of 1744, when it was decided to proceed to the erection of a church. The masons commenced their work the 9th of May, and on the following 14th the corner-stone was laid. It was erected that year, but the interior wood-work was not finished until 1748. An agreement was made with a carpenter to complete the same for fifteen pounds, which included a gallery, pews, benches and painting. The pulpit was made by Gabriel Schuler, of Lower Salford, as a present to the church. The expense incurred in the erection of the building is not exactly known, the members doing considerable of the work without charge. At the settlement, in 1751, a debt of thirty pounds remained, which was subsequently paid off. The building committee on the part of the Lutherans was composed of Michael Reyer, Balthasar Gerlach, John Philip Gable and Conrad Schneider; and for the German Reformed, Christian Schneider, Christian Lehman, Bernhard Arndt and John Servier. The first Lutheran elders were John Michael Reisser and John Philip Gable; Deacons, William Ganckler and John Lenhart Durkheimer. The German Reformed elders were Jacob Hauck and John Getz. Deacons, Isaac Summers and Andreas Ohl.

The first Lutheran members of this congregation were Conrad Schneider, John Martin Derr, Elias Long, John William Daub, John Jacob Nuss, John George Weikel, Heinrich Schmidt, Isaac Klein, John Klein, George Weikel, John Christopher Bickel, Ludwig Adam Bickel, John Jacob Fillman, Philip Fillman and John George Wagner. The German Reformed members were Jacob Hauck, John Getz, Gabriel Schuler, Heinrich Bomberger, Daniel Kuster, Jacob Isett, Samuel Schuler, Jost Keller, John Nice, Christian Hollebush, Peter Hollebush, John Faust, John Knouss, Nicholas Wolfart, Frederick Getz, Christopher Dickenscheit. The pastor's book commences in 1751, and the entries since have been made by the several clergymen. Mr. Raus, who commenced the record, was evidently a well-educated man, his writing being excellent, and on the title-page he made a considerable inscription in Hebrew characters. In 1751 there were forty-six

Rev. John Wm. Ingold, 1780-81; Rev. Frederick Dilleker, 1781-84; Rev. Frederick Wm. Vonder Schlotte, 1784-86; Rev. John Thomas Faber, Jr., 1786-88; Rev. Albert Helfenstein, 1808-11; Rev. Albert Zent, six months in 1811; Rev. Frederick Wm. Vonder Schlotte, Jr., 1812-18; Rev. Jacob Wm. Dechant, 1818-33; Rev. Andreas Hoffman, 1833-56; Rev. Robert Vancourt, 1856-63; Rev. Augustus L. Dechant, since 1863.

The school-house mentioned, in which worship was first held, stood until 1808, when it was torn down and another erected in its place. The first church was built of stone, two stories high, and in dimensions fifty by thirty-five feet. After standing above one hundred and thirteen years, it was resolved by the two congregations to tear it down in the spring of 1858 and erect a larger and more commodious building in its place. The writer of this account, learning

THE OLD GOSHENHOPPEN CHURCH.

members composing the two denominations. The Lutheran population was estimated at one hundred and ninety-five and the German Reformed one hundred and five.

The congregation was originally formed by the Rev. J. Conrad Andreas, an expelled Lutheran clergyman in Germany, who, without any recommendation so insinuated himself into their confidence as to become their pastor, but who was soon after discharged for immoral conduct. The first regular Lutheran minister was the Rev. Lucas Raus, from 1751-53; Rev. Frederick Schultz, 1753-59; Rev. John Joseph Roth, 1759-71; Rev. Frederick Neimier, 1771-72; Rev. Conrad Roeller, 1772-95; Rev. Frederick Geisenhainer, 1795-97; Rev. John George Roeller, son of Conrad, 1797-1840; Rev. Engelbrecht Peixto, 1841-64; Rev. Frederick Waltz, from 1865 to the present time. The first German Reformed pastor was Rev. Jacob Reisz, 1751-66; Rev. John Thomas Faber, 1766-80;

this, proceeded hither a few weeks previous on purpose and made a drawing of the same, which has since been ascertained to be the only one extant. By the 1st of May it was leveled to the ground, and in the corner-stone was found two silver coins, one dated 1652 and the other 1695. The former proved to be the pine-tree shilling of Massachusetts and the other an English shilling bearing the head of William III. A pint bottle contained a tasteless yellow fluid which it was supposed had been wine. All these were replaced in the corner-stone of the new building, which was laid, with appropriate ceremonies, May 15th and 16th of said year. The church was completed by the close of 1858, and is a fine two-story stone structure, sixty-two by fifty feet in size, with a spire one hundred feet high, the total cost of which was six thousand one hundred dollars. The church is calculated to hold about eight hundred persons. It possesses a fine organ, made in 1837 by A. Krauss

& Son, of Allentown. The bell is of five hundred and thirty-seven pounds weight, and can be heard from its elevated position for some distance around. There is an ample churchyard and sheds for horses and carriages, besides a shady, unfenced woods of several acres adjoining.

The graveyard contains about five acres, and few in the county can surpass it in the number of its tombstones. The oldest graves are near the centre of the yard. The earliest inscription observed was that of "1745, H W B H." One is said to be here bearing the date of 1733. It has been stated on reliable authority that seventy-two persons have been buried here, killed by powder-mill explosions in this vicinity previous to 1859. Three Revolutionary soldiers are known to be interred here,—John Andrew Artman who died in 1843, aged eighty-six years; John Sallide and Jacob Schaeffer, in 1840. The ground here is hard to dig, being composed of a shelly, red slate-stone. The following surnames were copied within the ample inclosure: Fliieger, Schneider, Geisinger, Hiltebidle, Groff, Wagner, Ruckstuhl, Cope, Humel, Langbein, Schuler, Mayer, Geyer, Heebner, Lunn, Hertzell, Hoffecker, Musselman, Gabel, Gerges, Klein, Boyer, Grimley, Smith, Scholl, Walt, Shied, Miller, Bock, Hillegass, Detweiler; Wambold, Fried, Weishe, Ried, Roudenbush, Gerhab, Borneman, Kehs, Daub, Richards, Meyers, Hutt, Wail, Neidig, Reiman, Zepp, Cressman, Nyce, Pannapacker, Kerr, Ratzel, Shade, Zink, Jacoby, Ache, Johnson, Neitz, Wohlfard, Dietz, Hauberger, Schwartley, Schell, Wandelich, Reichert, Fillman, Sallade, Zeigler, Weidemeier, Erdman, Bibighaus, Schwartz, Kerwer, Schwenk, Wirth, Roeller, Mayberry, Ettinger, Steiner, Bout, Roshong, Hendricks, Dietz, Ochs, Liedtke, Underkoffler, Sheib, Wisler, Koppelberger, Souder, Kuhlman, Anderson, Herbst, Adrian, Seit, Rahn, Kneezel, Keyser, Faust, Long, Kolb, Sleifer, Schäfer, Emert, Brey, Cressman, Kemerer, Hartranft and Troll.

John Eck and Reminiscences of his Family.—Jacob Eck, the ancestor of the family in this county, with his son John, arrived from Baselbede, in Alsace, possibly in 1746 or near the beginning of the following year. He was by occupation a locksmith, and perhaps a widower, his son being then a young man and single. The father took up by patent in Upper Salford, in two tracts, one hundred and twenty-five acres. The survey was made June 3, 1747, and the deed given April 6th of said year, under the great seal, by Governor George Thomas. The cost of the land was £19 7s. 6d., under a yearly quit-rent of a half-penny sterling for every acre, payable on the 1st day of March at the manor of Springettsbury, near the city of Philadelphia. This tract lay near the northern part of the township, within Ridge Valley and near the present Dietz's grist and saw-mill. Here the father and son at once commenced the first improvements, not only in building, but in clearing the land to render the same fit for tillage.

It is likely that within the first ten years Jacob Eck died and the son inherited the property and took in marriage for his first wife Savina Ott, the daughter of a neighboring farmer. She died before 1764, leaving him several children, when he married Mary Snyder, who died a short time before the Revolution, for in the assessment of Upper Salford for 1776, John Eck, who it is noted had ten children and had "lost his wife," is rated as owning one hundred and twenty-five acres, with a dwelling, two horses, three cows and five sheep, taxed £10 7s. 8d. In 1766 the Ridge road was opened from the Bucks County line, through the present Tylersport and along the whole length of his farm on to Summeytown. In 1767 he was appointed, greatly against his will, by the Court of Quarter Sessions at Philadelphia, constable of the township. About the close of the Revolution he married Dorothy Yost, who survived him. He died in the beginning of June, 1809, at an advanced age.

His will was made January 30th and proven June 20th of said year. In it he appoints his son Dorus and Nicholas Buck his executors. He leaves to his son John twenty-five acres, with all the improvements thereon; to Dorothy, his wife, in addition to her other allowances, he leaves "£150 in lawful gold or silver money." Eleven children are mentioned therein, as follows: Conrad, Dorus, John, Anna (widow of Martin Miller), Catharine (wife of Simon Adams), Margaret (wife of Joseph Storm), Magdalena (wife of Nicholas Buck), Sabilla (wife of Mark Zeigler), Theresa, Catharine and Fanny. He had in all fifteen children, a son, Michael, and three daughters having previously died. Although the surviving descendants of John Eck at this day may number thousands, the surname has become extinct in the township within the past sixty years. Dorus settled on a farm in Maryland, some moved to Berks County, others to Philadelphia and out West. The witnesses to the will were John Keller, Jacob Bäer, and Cadwallader Foulke, the last of whom very probably wrote it. Through the descendants of the first two, who still exist in the vicinity, the homestead of the Ecks was ascertained and visited in September, 1883, in company with Solomon K. Grimley, Esq.

The original tract has since been divided into several farms, now owned by Henry Richards, Andrew Loch, William L. Nace, Thomas Roth and Frederick Beltz. The latter, who is the owner of the original homestead portion, took pleasure, on learning our object, to point out the several remaining objects of interest. The site of the old house is still readily discernible about two hundred yards northwest of Mr. Beltz's dwelling, within a few yards of which are still standing two venerable pear-trees, about two feet in diameter, the fruit of which was then ripe. We do not question that their growth must have begun very close to 1747, or one hundred and thirty-six years ago. The spring was shown, about one hundred and fifty yards to the north of the site of the old house. Though

now long unused, except for cattle, it never has been known to fail. Strange to say, the original barn still remains in use, and must now be one of the very few existing in the county that antedate the Revolution. It is part stone and part log, thirty by forty-two feet and we know of no other that has so old and primitive an appearance. In the beginning of this century John Eck built himself a new house, to which he retired, and died in 1809, the site of which was also pointed out, and is still discernible on the premises of William L. Nace.

Mary Magdalena was the daughter of John Eck and his second wife, Mary Snyder, born on the homestead in June, 1767, where she remained until her marriage, in 1793, with Captain Nicholas Buck, a native of Springfield township, Bucks Co., and the founder of Bucksville. She attained the age of nearly ninety-one years, and at her death left ninety-five living descendants. Her memory remained unimpaired almost to the last. In 1856 her reminiscences were written down by one of her grandsons, and that portion relating to her residence in Upper Salford will be briefly given. In the vicinity of Jacob and John Eck's settlement here, in 1747, deer still abounded, of which several were shot by the latter. Wolves were becoming scarce, but occasionally destroyed sheep. Wild fruit was abundant, as grapes, red plums, hazel-nuts, shell-barks, huckleberries and crab-apples. Her father raised considerable hemp and flax, which was manufactured by the family into goods for household and other purposes, their clothing being all home-made. The women assisted considerably in out-door labors connected with the farm, and all grain was reaped by sickles, even corn and buckwheat. Her father kept a heavy farm-wagon, but the produce was chiefly taken in panniers and wallets, on horseback, to Philadelphia. Rye was chiefly grown for bread, as in Germany, with which beans were ground to increase the quantity. While Washington and his army were encamped by the Skippack, in Towamencin, seven miles distant, her father drove down with his wagon, taking her and several of his children along to behold so novel a sight. The incidents connected therewith she often related, being at that time past her tenth year. In connection with those reminiscences one fact is remarkable, that though John Eck reared so large a family, and was entirely dependent on his farming operations for a subsistence, yet, with all the disadvantages he labored under and the aid given his children, the inventory of his estate, which is still preserved, shows that his effects amounted to above eight thousand dollars, which was no inconsiderable sum three-quarters of a century ago, originating from such limited means, and may raise a query whether farming may not have then been more profitable than now.

ASSESSMENT OF UPPER SALFORD, 1776.

Philip Gable, assessor, and George Frederick, collector.

John Bergy, 180 acres, 3 horses, 5 cows and a grist and saw-mill; George Slotterer, 200 a., 3 h., 6 c.; Jacob Wagoner, 100 a., 2 h., 2 c.; Frederick Rudy, 180 a., 2 h., 3 c.; Philip Gable, Jr., inn-keeper, 260 a.,

4 h., 3 c. and 1 cow; Thomas H. Gable, 100 a., 2 h., 3 c.; Philip Zeigler, 378 a., 3 h., 8 c.; George Mousers, 100 a., 3 h., 9 c.; Henry Landis, 75 a., 3 h., 7 c.; John Foust, 40 a., 1 h., 1 c.; Adam Hildebide, 145 a., 2 h., 4 c.; Abraham Cassel, 103 a., 2 h., 3 c.; Frederick May, 100 a., 2 h., 3 c.; Jacob Groff, 207 a., 4 h., 6 c. and a fulling-mill; Philip Fisher, 120 a., 2 h., 3 c.; Conrad Grim, 100 a., 2 h., 3 c.; Valentine Nungesser, 150 a., 2 h., 4 c.; Leonard Snyder, 150 a., 2 h., 3 c. and 7 children; Godfrey Kersneck, saddler, 55 a., 2 c.; Henry Streaker, 100 a., 2 h., 3 c.; Charles Derr and Henry Kepple, 160 a., 2 h., 4 c.; John Brown, blacksmith, 2 c.; Henry Hersch, 160 a., 2 h., 3 c.; Michael Kroll, inn-keeper, 260 a., 4 h., 3 c.; Richard Cline, 150 a., 2 h., 4 c.; John Eck, 125 a., 2 h., 3 c., 10 children, and lost his wife; Ulrich Hertzell, 128 a., 2 h., 4 c.; John Foust, 140 a.; Christian Reiff, 1 c.; Caspar Walt, 100 a., 2 h., 3 c.; John Hoot, 125 a., 3 h., 6 c.; Dorothy Welshey, widow, 50 a., 1 c.; Margaret Wentz, widow, 100 a., 2 h., 2 c. and 6 children; Martin Leightle, 50 a., 1 h., 3 c.; Abraham Krider, 1 c.; Ludwig Moyer, 50 a., 2 h., 3 c. and a grist-mill; George Moyer, 50 a., 2 h., 3 c. and a grist and saw-mill; Dewalt Nace, 375 a., 3 h., 4 c.; Henry Walt, 250 a., 2 h., 3 c. and 9 children; Philip Wentz, 185 a., 2 h., 4 c.; George Hertzell, 430 a., 4 h., 10 c.; John Fillman, 2 h. and 150 a. for his father's estate; Sebastian Heap, 10 a.; John Nice, 100 a., 2 h., 3 c.; Jost Martin, 120 a., 2 h., 3 c.; John Oberholtzer, 158 a., 3 h., 4 c.; Jacob Landis, 160 a., 1 h., 2 c.; Michael Young, 100 a., 2 h., 2 c.; Henry Moyer, 180 a., 4 h., 8 c. and 8 children, George Wyant, 60 a., 3 c., old and poor; Hans Ulrich, stover, 200 a., 3 h., 8 c. and 8 children; Henry Mertz, 125 a., 2 h., 4 c. and a grist and saw-mill; Jacob Kulp, 88 a., 2 h., 4 c. and a fulling-mill; Adam Smith, 40 a., 2 h., 2 c.; Daniel Heister, tanner, 130 a., 1 negro, 3 h., 3 c.; Frederick Koch, 2 c.; Elizabeth Wentz, widow, 100 a., 2 h., 1 c.; Valentine Kratz, 150 a., 2 h., 5 c.; Jacob Daub, smith, 60 a., 1 h., 2 c.; Jacob Ellinger, 12 a., 1 c.; Sebastian Nill, smith, 2 c.; Henry Sander, weaver, 2 c.; Elizabeth Wentz, widow, 62 a., 1 c.; William Zirkle, 2 c.; Henry Zeigler, 1 h., 2 c.; Robert Coleman, iron-master, 10 h., 4 c., 1 servant; Conrad Epler, forgerman, 1 c.; Jacob Cline, 110 a., 2 h., 3 c.; Jacob Landis, Jr., 2 h., 4 c.; George Walt, tailor, 2 c.; Martin Riddlemier, 1 c.; William Antick, shoemaker, 2 c.; Henry Hass; Peter Wentz, 100 a., 2 h., 2 c.; Jacob Wyant, 1 c.; Christian May; Peter Gerhart, 1 h., 3 c.; Henry Strowman, 1 c.; Joseph Warner, fuller, 1 c.; Henry Croll, saddler, 1 c.; Jacob Young, Philip Benn. *Single Men.*—Killian Fisher, Jacob Fillman, Dewalt Young, Adam Shearer, Henry Foust, George Landis, Michael Swartz, Christian Martin, Valentine Kooker, Abraham Groff, Christopher Streaker, Wilder Bevans, John Moyer, Andrew Zeigler, Christian Bergy, Henry Hartinistine, Anthony Treale, Wendle Wentz, John Nice, Valentine Snyder, Daniel Murray, Peter Kepple, John Landis and Michael Derr.

CHAPTER LXXIX.

WHITEMARSH TOWNSHIP.¹

WHITEMARSH is bounded on the northeast by Upper Dublin, southeast by Springfield, southwest by the Schuylkill and Conshohocken, west by Plymouth and northwest by Whitpain. Its length is six and one-fourth miles and breadth two and one-half, and it contains an area of eight thousand eight hundred and fifty-seven acres. In 1850, by the erection of Conshohocken into a borough, its territory was reduced three hundred and twenty acres, but by a change of the boundary line, in 1876, about one hundred and sixty acres were added from Springfield township along the Schuylkill. The surface is rolling and the soil generally of a superior quality, being a rich loam, with an abundance of excellent limestone. Edge Hill extends through this township a distance of two

¹ By William J. Buck.

and a half miles, and crosses the Schuylkill below Spring Mill. It is a singular circumstance that no limestone, iron or marble is found anywhere on the south side of this hill. Barren Hill, Militia Hill and Camp Hill are well-known elevations that figure in our Revolutionary history, but do not extend to any length.

Whitemarsh possesses several fine lasting streams of water. The Wissahickon Creek rises from two small branches in Montgomery township, and then flows through Gwynedd, Whitpain, Upper Dublin, Whitemarsh and Springfield townships into the Schuylkill, nearly a mile below Manayunk. Its total length is about nineteen miles, of which thirteen are in this county and three and a half in this township. It is an excellent mill-stream, being steady, copious and rapid in its current. Its principal branches are Valley Run and Sandy Run. At a very early period the Wissahickon was used for mill purposes, a grist-mill having been erected on it by Edward Farmar very near the beginning of the last century. On Holme's map of original surveys it is called "Whitpaine's Creek," after Richard Whitpaine, a large land-holder on this stream in the present township of Whitpain. In the Upland Court records for 1677 it is called "Wissahitkonk," which, according to Heckewelder, in the Delaware Indian language, signifies the "catfish or yellow-water stream." Sandy Run has a course of upwards of a mile through the east corner of the township, and empties into the Wissahickon below Fort Washington. It is a clear, spring-water stream, abounding in native trout, and propels a grist-mill and an auger-factory. We know from records that it bore its present name in 1703, if not earlier.

After Lower Merion, Pottsgrove, Upper Providence and Upper Merion, Whitemarsh is the most populous township in the county. In 1800 its population was 1085; in 1840, 2079; and in 1880, 3239. The real estate for taxable purposes, in 1882, was valued at \$2,284,915, and including the personal, \$2,454,050; the average per taxable, \$2981, Montgomery, Upper Dublin and Towamencin being rated higher. In May, 1883, licenses were issued for six hotels, eleven general stores, two hardware-stores, four dealers in flour and feed, one lumber and two coal-yards. In 1858 it contained ten hotels, fifteen stores, six grist-mills, three furnaces, two marble-mills, one paper-mill and one auger-factory. In 1785 five inns, five grist-mills, three paper-mills and two tanneries are mentioned. The public schools are eleven in number, open ten months, with an average attendance of three hundred and one pupils for the school year ending June 1, 1882. In 1856 the township had eight public schools, open nine months. In 1880 a small portion of Whitemarsh was attached to Ambler School District. The census of 1850 returned 398 dwellings, 426 families and 149 farms. The villages are Barren Hill, Plymouth Meeting, Fort Washington, Spring Mill, Marble Hall, Lafayette, Lancasterville and Whitemarsh or Val-

ley Green. The first four places contain post-offices. Barren Hill has lately been changed to Lafayette Hill, and William Penn post-office is at Spring Mill. There are six houses of worship in Whitemarsh, namely,—one Episcopal, one Lutheran, one Lutheran and Reformed, one Friends', one Baptist and one Evangelical. Besides the common roads, which are numerous, five turnpikes traverse the township. The Norristown and Schuylkill Valley Railroads pass beside each other along its southwestern border upwards of two miles, with stations at Lafayette and Spring Mill; also the Schuylkill navigation for the same distance. The North Pennsylvania Railroad crosses the eastern angle near the Upper Dublin line for about a mile, with a station at Fort Washington. The Plymouth Railroad passes through its central part upwards of three miles, with stations at Plymouth Meeting, Williams and Flourtown. The Schuylkill Valley Railroad was commenced in 1883 and finished in the summer of 1884, extending from Philadelphia, through Norristown, to the coal regions.

Through the researches of Hon. William A. Yeakle it has been ascertained that the executors of Edward Farmar, in a deed of a portion of his estate, dated April 14, 1746, to George Greenfield, mention that it was a "part of the lands by the Indians called Umbilicamense." Through this information an additional discovery has been made in regard to an excursion on horseback by William Penn to view the country. In a bill of charges made out by Thomas Fairman, commencing in 1682, he states, among other items, of his being debtor "To a journey with the Proprietor and his friends to Umbolekensin, with 3 of my horses, 12 shillings." This trip was no doubt made in 1683, as on August 12th of the following year he embarked for England. It was under these singular circumstances that we have been enabled to locate Umbilicamense, and prove that it was actually within the rich valley of the Wissahickon and not more than a mile from the centre of the township. Another interesting circumstance in this connection is the discovery of the origin of the name of Whitemarsh. In the petition of the inhabitants of Skippack and vicinity to the Court of Quarter Sessions, dated June 2, 1713, for a road, they state that it may be laid out "from the upper end of the said township down to the *wide marsh* or Farmar's Mill." At the latter place, by the Wissahickon, as is well known, there is an extremely broad, level expanse of meadow greatly subject to overflows, and we do not doubt, from its miry, wet nature at that early day, that it was known as the "*wide marsh*," which has needed but a slight change to convert it as now called. The settlement at this mill, too, has borne the name of Whitemarsh from the earliest period, Lewis Evans having thus denoted it on his map of the province published in 1749.

The Farmar family were the earliest and most extensive purchasers of land in Whitemarsh, as well as

the first of its settlers. Major Jasper Farmar was an officer in the British army and a resident of Cork, Ireland. Hearing of the advantages offered by William Penn in colonizing his province induced him to purchase from Penn, by a patent dated January 31, 1683, two tracts, containing together five thousand acres.¹ When all arrangements had been made for the voyage Major Farmar died, when his widow, Mary and children,—Edward, Sarah, John, Robert, Catharine, Charles, Jasper and Robert,—accompanied by Thomas Farmar, Catharine Farmar (widow), Elizabeth Farmar, Edward Batsford and servants Joanna Daly, Philip Mayow and Helen his wife, John Mayow, John Whitlow, Nicholas Whitlow, Thomas Young and his wife, William Winter, George Fisher, Arthur Smith, Thomas Alferry, Henry Wells, Robert Wilkinson, Elizabeth Mayow, Martha Mayow, Sarah Burke, Sheele Oceven, Andrew Walbridge, all from Ireland, embarked on the ship "Bristol Merchant," John Stephens, master, and arrived at Philadelphia November 10, 1685. In the same ship also arrived Nicholas Scull and his servants Samuel Hall, Cornelius Davye, George Gooding, Miles Morin, Daniel Morin, John Ward and Mary Cantwell. All these must have soon after their arrival settled on the aforesaid purchase, which it is likely had not been long located. It appears from the colonial records that John Scull, as overseer for the Farmar family, had settled on the tract with a number of servants several months before their arrival, probably with a view to the immediate erection of buildings and other improvements and preparations in advance of their coming. Complaint was made by Indians to the Governor's Council, July 21, 1685, that the servants on Jasper Farmar's place had made them drunk and abused them. A warrant was issued and sent out by a messenger, who, after being lost in the woods, returned, when it was deferred. When the time arrived the servants made their appearance, but the Indians did not appear as accusers, and so the matter was probably dropped. This would show that in the immediate vicinity there must have then existed an Indian settlement, and from this circumstance Edward Farmar acquired his knowledge of the Indian language which enabled him, in May, 1701 and 1712, to perform for the government the duties of an interpreter.

As legatee of her husband's estate, Madame Farmar, as she was usually called, and Catharine, wife of Jasper Farmar, deceased, made a partition of the estate, by which one-half of the five thousand acres under the will became in fee her property and the other one-half that of her two sons, Richard and Jasper Farmar, Jr. Shortly after this Richard disposed of his share, one thousand two hundred and fifty acres, to Thomas Webb, who sold his interest to Madame Farmar, who, by will, devised the whole to her son Edward Farmar, who thus became the owner of three-fourths of the original purchase. The mother, prior to 1690, married a gentleman by the name of Billop, of Philadelphia, and must have died within a few years thereafter. Respecting this lady, Chief Justice Nicholas More mentioned, in a letter dated from his residence at Green Spring, in the manor of Moreland, September 13, 1686, to William Penn, then in England, that "Madame Farmar has found out as good limestone on the Schuylkill as any in the world, and is building with it; she offers to sell ten thousand bushels at sixpence the bushel upon her plantation, where are several considerable hills, and near to your manor of Springfield." This would show that she must have been an energetic woman, and that probably the earliest lime from limestone used in Pennsylvania came from her kilns, at what has been so long known as the village of Whitemarsh.

Edward Farmar was one of the early noted men that settled in this county, and, judging from his penmanship, must have received a good education in his

SEAL OF EDWARD FARMAR.

youth, which eminently qualified him for the important trusts he afterwards assumed. The family, from purchasing here so much land, retaining so many servants and making the extensive improvements they did, must have been in affluent circumstances, at least wealthier than the majority of the early emigrants. At his arrival Edward Farmar was not fourteen years of age, and consequently did not attain his majority until in 1693. With John Sotcher, of Pennsbury, he was sent, in May, 1701, to the Lehigh River to ascertain the intentions of the Indians in that vicinity. He was commissioned a justice of the peace for Philadelphia County September 2, 1701, which office it is known he held continuously till or near the close of his life. Andrew

¹ Since this article was written we have secured the following interesting document, which has not heretofore been published:

"L. S.: William Penn, Proprietary and Governor of Pennsylvania and the Territories thereunto belonging. At the request of Jasper Farmar, Junior, in the behalf of his father, Major Jasper Farmar, his brother Richard and himself, that I would grant him to take up 5000 acres of land, being of the lanes by the Indians called Unioilicamence, fronting at one end upon the River Schuylkill. These are to will and require thee forthwith to survey or cause to be surveyed unto him the said five thousand acres in the aforementioned place where not already taken up, according to the method of townships appointed by me, and make return thereof unto my Secretary's office. Given at Philadelphia the 31st of the 10th month, 1683.

"WM. PENN.

"FOR THOMAS HOLMES, Surveyor-General."

Hamilton, the Lieutenant-Governor, appointed him, with John Guest and Samuel Finney, justices of the court, February 23, 1703, for the trial of criminal cases. His settlement in Whitemarsh, we know in 1708, if not earlier, was called "Farmer's Town," and probably several years before this he had erected a grist-mill on the Wissahickon, which had an extended reputation in 1713. In 1710 he presented the lot of ground on which St. Thomas' Episcopal Church was built, besides taking an active part in its erection, for which he may be almost regarded as its founder. A council with the Indians was held at his house May 19, 1712, at which was present the Governor, Charles Gookin, and several of his friends, besides a number of Indians. The most prominent chiefs at this meeting were Sasoonan, Ealochelan and Scholitchy, the latter being the principal speaker, Mr. Farmer acting as interpreter. He was elected to the Assembly in 1710, and held the office almost continuously to 1732, and was also for several years one of the county commissioners. He died November 3, 1745, aged seventy-three years, and was buried in the graveyard of St. Thomas' Church, where a tomb is inscribed to his memory. From the Penn-Physick manuscripts we learn that he furnished lime and flour to Thomas and Richard Penn, at Springettsbury, at various times from 1735 to the period of his death. His extensive estate was settled by his son, Joseph Farmer, and Peter and Jonathan Robeson, who had married his daughters. Though once so numerous, the name of Farmer has now become extinct, not only in Whitemarsh, but probably in all the surrounding townships. Strange to say, in the assessment of Horsham township for 1702, the name of Edward Farmer is mentioned as holding a small farm there. From the similarity of names, it is very probable that he belonged to this family. Descendants exist through intermarriage in the families of Robeson, Shoemaker, Mitchell and Pierce.

From what has been stated, it appears the Scull family settled early here with the Farmers, and it has been supposed, from their intimacy, they were related. Nicholas Scull, who arrived here in 1685, made a purchase in the vicinity, in 1688, of four hundred acres, but which was not located until December 24, 1692. John Scull, who had arrived here previously as overseer for the Farmer family, was a brother of the aforesaid, and also came from Ireland. Nicholas Scull died in 1703, leaving a widow, Mary, and six sons,—Nicholas, Edward, Jasper, John, James and Joseph. Nicholas, the eldest son, and subsequently surveyor-general, was born in Whitemarsh, and, in 1708, married Abigail Heap. The latter was buried in the family ground on the south side of Camp Hill, now on the estate of Gillingham Fell, where a stone has been erected to her memory stating that she died May 21, 1753, aged sixty-five years. Her husband, it is said, was also buried here, and his head-stone was removed, but from attending circumstances, this is regarded as doubtful. Mr.

Scull as a land surveyor in his day had few equals, and could also speak the Indian language, which, in his youth, he had acquired here, acting on several occasions on behalf of the government as an interpreter. From what information we have been able to procure respecting him, he must have received a better education than was usually given at this early period of our colonial history. In 1722 he made the survey of the road leading from where is now Willow Grove to Governor Keith's residence, in Horsham, and from the latter place another road on the county line to York Road. He was sent, with his brother, John Scull, as interpreter, by Governor Gordon, in May, 1728, to hold a council with the Indians at Conestoga. This year, a disturbance happening between several Indians and whites residing in the vicinity of New Hanover township, he was sent with presents to pacify them, in which he was successful. He was sent on a similar errand to Shamokin in 1729. Mr. Scull, we know, in 1731 resided in Philadelphia, and for several years afterwards. In February, 1734, he was appointed deputy-surveyor for the counties of Philadelphia and Bucks. Governor Thomas, in May, 1740, sent him to the Minesinks to settle a difficulty between a white man and an Indian, by which the former was wounded, for which service the Assembly allowed him fifteen pounds. In October, 1744, he was commissioned sheriff of Philadelphia County, which office he held for several years. The Indians from Shamokin having visited Governor Thomas, in Philadelphia, in July, 1745, he again served as interpreter. Through ill health, William Parsons resigned the office of surveyor-general of Pennsylvania, when, June 14, 1748, Mr. Scull was appointed to fill his place, which he continued to hold to the close of his life,—a period of thirteen years. Dr. Franklin speaks of him, in his autobiography, as one who "loved books and sometimes made verses." In connection with George Heap he published "A Map of Philadelphia and Parts Adjacent" in 1750. In 1759 he had published a large map of the improved parts of Pennsylvania and Maryland, which, for correctness, far surpassed all previous ones. Mr. Scull died at an advanced age about the beginning of November, 1761, when his associate, John Lukens, of Horsham, was appointed his successor. Respecting Mr. Scull, Richard Peters, in a letter dated Philadelphia, May 11, 1753, wrote to Thomas Penn, that "though he is industrious and enjoys a good office, yet he has a large family and is not beforehand in the world." All efforts at finding some notice of his death in the Philadelphia newspapers at the time has proved unsuccessful.

By order of Thomas Penn, one of the proprietaries of Pennsylvania, the constables of the several townships of Philadelphia County were required to make a return of the names of all the land-holders, with the number of acres respectively held by them, and also of the tenants. This list was made out in

1734, and is called an "uncertain return," prepared by John Hyatt, but, in the absence of anything better or more reliable, possesses unusual interest at a particular period, when the country had been sufficiently settled to warrant the care of the government in the due enforcement of the laws. From said list, as pertaining to the township of Whitemarsh, the following forty-seven names have been copied: Edward Farmar; Jonathan Robeson; Edith Davis; John Klinky, 150 acres; Henry Bartlestal, 170; Marchant Maulsby, 40; Nicholas Stiglitz, 150; Benjamin Charlesworth, 200; John Morris, 200; Jonathan Potts, 80; Samuel Gilkey, 50; Josiah White, 18; David Davis, 50; John Petty, 500; Margaret Nichols, 200; Francis Cawly, 50; David Hart, 200; William Williams, 200; Frederick Stone, 150; Joseph Williams, 200; Adam Kitler, 170; Ludwig Knoos, 100; Walter Gahone, 100; Casper Simons, 50; Jacob Coltman, 50; Isaac Morris, 300; William Trotter, 100; James Stroud, 200. Tenants: John Anderson, Joseph Wooleq, Evan Jones, John Scull, John Parker, Henry Rinkard, John Ramsey, Jr., Edward Stroud, John Ramsey, — Campbell, Henry Steward, Thomas Shepherd, William English, Jenkin Davis, John Patterson, Joseph Faris, John Coulson, Handle Hansell, Mathias Ignorance. It will be observed that no figures appear after the first three names, information probably being refused to evade a higher rate of taxation. The list serves as an aid in arriving at a knowledge of the early settlers, though no doubt the number of acres in most instances is given only in round numbers, without aiming at exactness.

The name of Robeson does not appear in Whitemarsh on the list of 1734, but the family were quite early settlers along the lower Wissahickon. Before the death of Edward Farmar, in 1745, Peter Robeson had married his daughter Sarah, and his nephew Jonathan Robeson, Jr., Catharine, a younger sister. Through this connection they came in possession of considerable real estate in the township. Peter Robeson's tract contained nine hundred and fifty-two acres on the Wissahickon, and was part of the tract which the Indians had called Umblicamense. He sold a portion containing five hundred and fifty-two acres, March 4, 1755, to Anthony Williams, of Bristol township, for £1666 4s. 9d. Charles Williams, a descendant, still retains a valuable portion, that has ever since been in the family. Jonathan Robeson, in 1780, was assessed for two hundred and thirty-eight acres, a grist-mill, and three negroes, one riding-chair, five horses and four cattle. He is reported as having eleven children, who have numerous descendants in the county and elsewhere. Jonathan inherited the mill property now owned by Silas Cleaver, and a portion of the tract is comprised in the farms of John Cleaver and Thomas S. Phipps, adjoining. Among the sons were also Peter and Andrew Robeson. Judge Andrew Robeson, the ancestor of the family, died February 19, 1719-20, aged sixty-six years. Robeson

township, where he was a considerable land-holder, was called after him.

Adam Kitler, who is mentioned in the list of 1734 as owning one hundred and seventy acres of land, resided in the vicinity of the present Marble Hall, where buildings erected by him in 1743 are still standing. In 1745 he purchased additional land, which extended southward to Barren Hill Church. His name is mentioned in the assessment of 1780, and John Kitler, who may have been a son, as holding one hundred and sixteen acres. The former was buried in the Barren Hill graveyard. This tract has proved itself rich in marble and iron-ore; large quantities of both have been sent off to Philadelphia or to the neighboring works and furnaces.

In the list of 1734 we find the name of John Morris as holding here two hundred acres, and in Abington, at said date, Morris Morris, four hundred acres. It is a tradition that the family in Whitemarsh are descended from Evan Morris, who came from Wales and settled a mile east of Friends' Meeting-house, in Abington, and it may be, in consequence, that the aforesaid John and Morris Morris were his sons. Samuel Morris was a justice of the peace in Whitemarsh from 1745 to 1753 and an overseer of Plymouth Meeting.

He died in 1772, leaving an estate of three hundred and fifty acres, which descended to his brother Joshua, of Abington, long a member of Assembly. He donated a lot of land for a school-house and five hundred and thirty pounds in trust, the interest to be applied to the building and keeping the same in repair, which went into operation before 1790, and was long known as the Union School. In the assessment of 1780 the only names found in Whitemarsh are Samuel Morris, tanner, rated for twenty-nine acres, and Owen Morris, a single man.

In the northern part of the township, adjoining Upper Dublin, a tract of six hundred acres was taken up by the Free Society of Traders, who sold three hundred and ten acres of the same to John Jones, which was located by Jacob Taylor, surveyor-general, April 4, 1724. This descended by will to his son, John Jones, Jr., who, with Sarah, his wife, May 21, 1760, conveyed twenty and three-fourths acres, for £39 5s., to Abraham Houser, chair-maker. The original deed of this purchase was by the latter buried in the ground for greater safety while the British held possession of Philadelphia in 1777. When it was taken up the parchment was found to be almost entirely illegible through the effects of moisture, when the owner thereof called on Mr. Jones, "gentleman, of Philadelphia," who executed to him a new deed, bearing date November 14, 1793, wherein the aforesaid circumstances are related.

Abraham H. Carn, a descendant of Mr. Houser and the owner of said tract, possesses both the deeds, which are thus invested with singular interest, the latter having been executed a third of a

century later, denoting that the parties thereto had been favored with longevity.

The Scheetz family has been for some time in Whitemarsh, several members of which have been noted business men and held office in the county. It has been stated that John Jacob Scheetz, a minister of Creyfelt, on the Rhine, was a member of the Frankfurt Company, organized in 1683 to promote and encourage settlement from Germany. His son Henry was thus induced to come to Pennsylvania and first settled at Germantown, afterwards removing on a purchase in this township, where he spent the remainder of his days. This property was inherited by his son Henry Scheetz, who, in the assessment of 1780, is called a "paper-maker," and rated for owning a paper-mill and eighty acres of land. This mill he built in 1769, on Sandy Run, to which he added afterwards a grist-mill, which is still standing. It is said he also erected, at a later date, the paper-mill on the same stream, a short distance over the Springfield line, which is still in possession of the family. He was appointed a justice of the peace before the Revolution, and on the formation of Montgomery County commissioned, December 10, 1784, one of the justices of the Courts of Quarter Sessions and Common Pleas. He died about 1794, leaving two sons, Henry and Justice. The latter was elected sheriff, serving in the office from 1816 to 1819.

General Henry Scheetz, son of the aforesaid Henry and Catharine Scheetz, was born at the homestead on Sandy Run, in Whitemarsh, in 1761. His education was received in the schools of the neighborhood. During the rebellion of John Fries, in 1798, the command of a county brigade was assigned him. When they arrived in the vicinity the affair had subsided; he returned and the troops disbanded. In 1805 he was elected a member of the Assembly, followed, in 1808, as one of the directors of the new poor-house. In September, 1811, was appointed by Governor Snyder major-general of the Second Division of the Pennsylvania militia. After the breaking out of the war with England he marched with his command to Marcus Hook and the protection of Dupont's powder-works, near Wilmington. After the unsuccessful attempt of General Ross on Baltimore the militia were recalled and discharged. In 1817, General Scheetz was elected one of the directors of the Montgomery Bank, at Norristown. He was appointed, in 1830, one of the six viewers for laying out the State road from New Hope, on the Delaware, through Doylestown, Norristown and West Chester, to the Maryland line. Though in his seventy-seventh year, he was elected, in 1837, one of the members from Montgomery County to frame a new Constitution for the State, the duties of which he faithfully performed. Having a competency, he retired from business, making his home in Valley Green, where he died September 4, 1848, at the advanced age of eighty-seven years. The plain, substantial two-story house he occupied is still stand-

ing on the east side of the turnpike, near the Springfield line, above Flourtown, and is now owned by Samuel Van Winkle, Jr. He left nine surviving children, all by his first wife. His descendants are numerous, bearing the names of Scheetz, Hitner, Sechler, Wentz and Acuff. His daughter Catharine was married to Daniel Hitner, of Marble Hall, and was the mother of Daniel O. and Henry L. Hitner, long and well-known business men of the county.

Among the eminent teachers of the past may be mentioned Patrick Menan, a native of Ireland, who resided on a farm of fifty acres at the east corner of the cross-roads at the present Marble Hall. Here, in addition to school-teaching, he followed for a long time conveyancing and surveying. He wrote, in 1746, the deed for the old burying-ground near Williams' school-house and witnessed it, which indicates that he must have resided in the township some time previously. He was made one of its trustees in 1786. Among the pupils of his school can be mentioned General Andrew Porter and the eminent philosopher, David Rittenhouse; to attend, they came daily from the homes of their parents, in Norriton and Worcester, six miles distant. Through his instructions they made rapid progress in mathematics. In the assessment of 1780 he is reported as being "aged" and as keeping a horse. He died February 5, 1791, aged eighty years, and is interred in the graveyard mentioned, where a tombstone has been erected to his memory.

The road from Plymouth, through Whitemarsh, to the city was laid out quite early, as also that from the present village of Whitemarsh. The latter, we know, was opened in 1703. What is now known as the Reading or Manatawny road was laid out, fifty feet wide, from Wissahickon Mill to Edward Lane's, at the Perkiomen. In 1714 the Skippack road was opened, striking the road to the city at Farmar's mill, in the present village of Whitemarsh. What is now termed the Church road, leading from St. Thomas' Church to Oxford, was laid out in 1811. The Germantown and Perkiomen turnpike was completed in 1804, twenty-five miles in length, at a cost of two hundred and eighty-five thousand dollars, and solely built by individual subscription. In 1874 the company forfeited its charter through a suit with the city of Philadelphia, by which the latter was required to pay to the stockholders ninety-one thousand dollars, and the whole road made free to travel. Since said date the several townships in the county through which it passes are required to keep it in order. The Skippack road was turnpiked in 1855, and the Township Line road, from Plymouth Meeting to Upper Dublin, the same year.

The mill built by Edward Farmar, on the Wissahickon, before 1713, stood where the Gwynedd and North Wales and Philadelphia roads cross the Skippack. In 1722 a well-traveled pathway is mentioned leading from the present Bridge Point, on

the Neshaminy, below Doylestown, through Graeme Park, to this mill, thus showing a necessity of coming hither for flour, a distance of thirteen miles, previous to said date. After the death of Edward Farmar it came in possession of Samuel Morris, thence to his brother, Joshua Morris, and next to his son-in-law, Isaac Mather, who erected the present mill and mansion-house. After his death it passed to William Miller, who owned it but a short time, when Samuel W. Comley became the possessor, who carried on milling for many years; next, Wm. H. Witte, from whom it passed to Charles Otterson, Esq., of Philadelphia, the present owner. A violent tornado visited this property in 1837, unroofing the buildings, twisting off the tops of trees and carrying them towards Camp Hill, on which occasion also a huge spiral column of water arose from the dam to a great height, dropping the fishes in the neighboring fields. Its fury was chiefly confined to this locality.

What was known as Joseph Lukens' grist-mill, near the Upper Dublin line, has been converted into a manufactory of woolen goods, but has not been in operation for some time. Before the Revolution it was owned by Daniel Morris. A grist-mill was erected on the Sandy Run, beside the Spring House turnpike, which has been converted into an auger factory, before 1850, by Albert Conard, and who still carries on the business. The mill now owned by Silas Cleaver is near the Springfield line, and has been greatly improved. He is now enabled, with the assistance of a steam-engine, added in 1882, to grind two hundred bushels of wheat per day. This mill was also originally built by Edward Farmar, on whose death it passed into the hands of his son-in-law, Peter Robeson, thence descended to his son Jonathan, after which William Dewees, Esq., became owner. About the beginning of this century it came in possession of Nicholas Kline, of Flourtown, who erected the present mill and was for some time its owner. There is also a grist-mill on the Wissahickon, three-quarters of a mile above this, belonging to J. B. Comly, the history of which we have not ascertained. The average volume of the Wissahickon, like that of other streams, by the removal of forests and the drainage and cultivation of the adjacent land for nearly two centuries, has been materially reduced.

On the farm lately owned by Lewis A. Lukens, near the Wissahickon, is an old burying-ground that deserves notice. It was used for this purpose in 1722 and most probably earlier. Samuel Farmar, a son of Edward, conveyed, by a deed dated September 2, 1746, half an acre of ground to Henry Bartleson, Peter Knight and James Stroud, for the purpose of a burying-ground and place of worship, for the consideration of five pounds Pennsylvania currency. Peter Knight, as the last surviving trustee, continued the trust, August 2, 1786, to George Hocker, Nicholas Kline, Patrick Menan, Peter Bartleson and Bartle Bartleson, for the object contemplated. For its better

preservation and care the whole was inclosed in a wall, which has now become greatly dilapidated. The earliest tombstone here containing an inscription is that of John Nicols Knight, who died December 29, 1729, aged forty years and ten months. It is of some size, deeply paneled, with antique-looking letters, which, for that early day, must have cost some labor as well as expense. Isaac Knight and Isaac Knight, Jr., who were land-holders in Abington in 1734, may have been relatives. A stone is inscribed to the memory of Elizabeth Bartleson, who died March 24, 1769, aged sixty, and another to Bartle Bartleson, deceased February 17, 1777, aged eighty years. The names of Trump, Menan, Siddon, Hench, Coleman, Mason and Bilger are also found here. A number of the graves are unmarked, which, of course, cannot now be ascertained. Among those were some of the Kline family and George Heydrick. That no house of worship was built here, as originally designed, was probably owing to the erection of Barren Hill Church, in 1761.

On the main roads passing through this township from the northwestward, and leading to Philadelphia, there was, before the introduction of railroads, a great amount of travel, which, of course, necessitated a use for inns. From the records we learn that Joseph Norris was licenced in 1773 and James Stringer in 1774; in 1778, Conrad Bean, Jacob Hauser, George Hitner and Isaac Lyle. Besides Bean and Lyle, the following year the names of Ludwig Dagen, Frederick Houseman and Andrew Gilkison are mentioned. In 1785 five public-houses were licensed; four of these were kept by George Daub, George Eckhart, Christian Steer and Ludwig Dagen. Conrad Bean kept at Barren Hill and George Eckhart at Whitemarsh, where the elections were so long held. Sandy Run tavern was advertised for sale in 1809, with stabling for one hundred horses; it has recently ceased as a public-house. George Streepner advertises the "Rising Sun" tavern for sale, on the Ridge road in 1810, eleven miles from the city. The stand of George Eckhart, on the Spring House turnpike, must have been an old and noted one. It was kept by a Mr. Bisbing; next by Philip Sellers, who was here at least in 1811 and continued in the business until after 1829. He kept the post-office here in 1816, and was sheriff from 1819 to 1822. Jacob W. Haines afterwards became the owner and kept it and the post-office many years. On coming into the possession of William H. Witte, of Philadelphia, who moved here, he converted it into a private dwelling, which it still remains.

Among those who held township offices in the past may be mentioned Nicholas Stiglitz, collector in 1721, and Peter Robeson in 1742; Samuel Morris, appointed, in 1745, justice of the peace, as successor to Edward Farmar; John Kitler and Jacob Edge, supervisors in 1767, John Kitler and James White in 1773, Joseph Lukens and George Freas in 1785, and in 1810, Jacob Gilbert and Andrew Fisher. Samuel

Williams was constable in 1774; John Bower collector and Leonard Streeper assessor in 1780. From the assessment of 1780 we get some additional information. The manufacture of paper was then carried on by Henry Scheetz, Henry Katz, William Kagge and Jacob Hagge, in four paper-mills, showing that this was quite an industry. Jonathan Robeson, Evan Meredith and Joseph Paul carried on grist-mills; the latter, in addition, a saw-mill. Christopher Shupart is mentioned as having in operation two stills, and Leonard Kulp one, probably for the manufacture of apple whiskey. We next find the names of Henry Kuntzman and Peter Streeper, smiths; Samuel Morris, tanner; Jacob Jones and William Fitzgerald teachers; Richard Maers, millwright; Jacob Cook, weaver; Samuel McCool, James White and Benjamin Krouse, tailors; John Clinton, Robert Kane, Henry Seabolt and Israel Everly, shoemakers. William West is rated for two hundred and eighty acres, part of the property being now owned by Thomas Wentz. Anthony Williams' estate of four hundred and seventy acres, in tenure of Isaac Williams, is now chiefly owned by Charles Williams; Joseph McClain, two hundred and thirty acres, now partly comprised in the Sheaff estate; Evan Meredith rented three hundred acres and a grist-mill from Robert Walls. The latter is now Eberhart Flues' woolen manufactory, near Fort Washington.

Whitemarsh is rich in Revolutionary associations, and on its hills are still to be seen the remains of redoubts and entrenchments erected in that memorable struggle. While the British held possession of the city they made several excursions out here, and the damages thus committed upon the people of the township were estimated by commissioners appointed for the purpose at six hundred and sixty-one pounds. The large stone building used by Washington as his headquarters is still standing in Upper Dublin township about half a mile over the line, owned by Charles K. Aimen, and may be seen from the passing cars on the North Pennsylvania Railroad, just above Sandy Run Station. The army was encamped here from about October 20th to December 11, 1777, when they proceeded on their march to Valley Forge for winter-quarters. From his autobiography we learn that Col. Samuel Miles, in 1774, removed from Philadelphia to a farm he purchased at Spring Mill. While here he took an early and active part in opposition to the arbitrary proceedings of the British government. He states that the second company of militia raised in Pennsylvania for the service was organized by him in Whitemarsh, and that he commanded forces raised in Whitemarsh, Plymouth and Germantown. At the battle of Long Island he was taken a prisoner and retained above two years before being exchanged, when he returned to his farm to recruit himself after his long and severe confinement. He shortly afterwards sold his place and removed to Cheltenham, where he died in 1805, in the history of which town-

ship additional particulars are given concerning him.

Before the Revolution the electors, not only of this township, but of the whole county, voted at the inn opposite the State-House, in Chestnut Street, Philadelphia. By an act passed June 14, 1777, the elections of this and all adjoining townships were required to be held at the public-house of Jacob Coleman, in Germantown. After the erection of Montgomery County an act of Assembly was passed, September 13, 1785, which divided the same into three districts, and the freemen of the townships of Whitemarsh, Springfield, Cheltenham, Abington, Moreland, Horsham, Upper Dublin, Gwynedd, Montgomery, Towamencin, Hatfield, Lower Salford and Franconia were required to hold their elections at the tavern of George Eckhart, in the present village of Whitemarsh. By an increase of the number of districts, in 1797, the townships voting here were reduced to Whitemarsh, Springfield, Upper Dublin and Horsham. This district in October, 1802, polled 476 votes. In 1838 the townships of Whitemarsh, Upper Dublin and Springfield still voted here, the house being then kept by Jacob W. Haines. Springfield continued voting here until 1847, when the elections of that township were ordered to be held at Flourtown. By an act of Assembly passed April 18, 1853, the elections were ordered to be held at Barren Hill. By a decree of the court, July 2, 1875, Whitemarsh was divided into two districts, to be called the Eastern and Western, the elections of the former to be held at the Clifton House, at Sandy Run, below Fort Washington, and of the latter at Barren Hill.

Samuel Morris, of Whitemarsh, having died in 1772, by an unsigned will donated a lot of land for the purpose of a school, extending the benefit to the neighborhood around for the distance of a mile and a half, and five hundred and thirty pounds in addition for the erection of a school-house and keeping it in repair, for which the interest was only to be applied. The aforesaid objects were fully carried out by his brother, Joshua Morris, to which was afterwards added the sum of \$33.33 from Mr. Ulrich. A conveyance from the aforesaid was executed, January 13, 1773, to John Cleaver, of Upper Dublin, Thomas Lancaster, Joseph McClean, Jacob Edge, Joseph Lukens and Henry Scheetz, of Whitemarsh, in trust. The school-house was built not long afterwards, with a building attached on the lot fronting on the Spring House turnpike, about half a mile below Fort Washington. It was incorporated by an act of Assembly passed May 12, 1797. The first entry in the minute-book is dated 11th of Fourth Month, 1791, but the school was opened several years before this. The first teacher was Ezekiel Hill, who retained the position for several years; afterwards Thomas Livezey, who became a justice of the peace; Francis Murphy, about 1812, followed by Robert Kerr, William Kerr, John M. Jones, Daniel Sellers, Samuel Davis, Thomas

Bitting and others. It was known as the Union School and used as such until 1869, when the school directors of Whitemarsh built the house adjoining for the public school, when the former building was remodeled by the trustees. It is now used principally for lectures, concerts, etc.

A lot of ground, containing two acres and eighty perches, adjoining the aforesaid school-ground was conveyed, 23d of Sixth Month, 1791, by Joshua Morris to Joseph Lukens, Isaac Mather, John Wilson, Thomas W. Pryor, Joseph Jeanes, Thomas Lancaster, Jr., and Jesse Trump, of Whitemarsh, and Jesse Cleaver, of Upper Dublin, in trust to Gwynedd Monthly Meeting, for a meeting-house and burial-ground forever. Four of the surviving trustees, the 25th of Second Month, 1815, continued the trust, which, in 1847, was again transferred, to William Longstreth, Charles Williams, Joseph Jeanes, Ellis Cleaver, Thomas Livezey, Daniel Foulke, John L. Jones and Henry Jones. The present meeting-house and dwelling on said lot was erected about 1860. Friends hold occasional meetings here, the dwelling part being occupied.

The first school-house where is now the Williams Public School was built by a committee of Plymouth Preparatory Meeting in 1816. It was octagonal in form and hence bore the name of Eight-Square School-house. The first teacher was Thomas Paxson, father of Judge Edward M. Paxson, of the Supreme Court, who died in Buckingham, Bucks Co., April 19, 1881, in his eighty-eighth year. He was followed by his sister, Grace Paxson, next David Lukens, John H. Callender, Hughs Bell, Jacob Paxson and others. When the common-school system went into operation the building was taken in charge by the board of directors, who, in 1866, had it torn down and a more commodious one erected in its place.

Iron-ore has been obtained in considerable quantities in Whitemarsh for some time. Mention is made in Gabriel Thomas' "Account of Pennsylvania," published at London in 1698, of the discovery of ore in the province several years previous, but the locality is not specified. Near the present Edge Hill village, in Abington township, the existence of mines is stated in 1725. Just a short time previous to the completion of the Schuylkill navigation, in 1826, iron-ore was discovered in abundance near Spring Mill, from whence great quantities were shipped to furnaces in New Jersey and elsewhere. It was pronounced to contain seventy-five per cent. of pure iron, for which, in 1827, a royalty of fifty cents per ton was paid on the ground and when delivered in the city, \$4.50. From the quantity of ore taken from his farm, at Marble Hall, Henry S. Hitner had, to 1858, attained to a depth of ninety-five feet perpendicular, a steam-pump being used to remove the water. Great quantities have also been dug in the vicinity of Harmanville, Barren Hill, Cold Point and Lancasterville. According to the census of 1870,

nineteen iron-ore mines were worked in the county, employing two hundred and twenty-seven hands, producing 52,179 tons, valued at \$152,736. It is probable that Whitemarsh may have produced one-third of this amount, the other iron-producing townships being Abington, Upper Dublin, Springfield and Upper Merion.

Marble has also been procured for some time in Whitemarsh. Several quarries were worked before the beginning of this century. The Hitner quarry, at Marble Hall, in 1858 had reached a depth of two hundred and forty-two feet, showing that a considerable amount of marble must have been taken out to cause such an excavation. The Fritz quarry, which had been opened before 1800, in 1858 had attained a depth of one hundred and seventy-five feet. Besides these may be mentioned the Lentz and Dager or Potts quarries, that have also produced considerable of this material. The marble is of various colors and differs in quality,—white, blue and clouded, the former being the most valuable. Considerable of the marble used in the construction of Girard College was obtained from Mr. Hitner's quarry and Henderson's, in Upper Merion. The census of 1870 returned five marble-quarries in the county, which are limited to Whitemarsh and Upper Merion, the former producing the most. The business appears to be a very fluctuating one, at times the mills and machinery connected therewith being in full operation, and at intervals long idle or applied to other purposes. James Traquar had a marble-yard established near Marble Hall, in 1801, if not some time earlier, in charge of William Bush, keeping on hand a supply of tombstones, mantel and chimney-pieces, steps, sills, etc.

Lime was burned for building purposes in Whitemarsh, we know, in 1686, and in the vicinity of Plymouth Meeting before 1698. Its excellence and whiteness are known over the Union. According to the census of 1840, Whitemarsh produced lime to the value of fifty-one thousand four hundred and fifty-eight dollars, but the business has since been greatly increased through the extension of the railroad to Oreland. It is most extensively burned in the vicinity of Plymouth Meeting, Corson Station, Williams Station, Sandy Run and Whitemarsh village.

Peter Le Gaux, a native of Lorraine, France, where he was born in 1743, was a counselor of law by profession, and came to America in 1785 and settled the following year at Spring Mill. He resided on the hill to the north of the railroad station in an imposing, substantial two-story house, now occupied by his granddaughter, Mrs. Toland, to which was attached a considerable plantation. An act was passed by the Assembly, September 8, 1787, empowering him to establish and keep a ferry here. From 1786 to 1790 he was a contributor to the *Columbian Magazine*, published in Philadelphia, especially on meteorology, of which he was a close and practical observer and a man of scientific ac-

quirements. He was on intimate terms with the Audubons, father and son, of Lower Providence. While residing here he entered into vine-growing, with a view to the manufacture of wine. Robert Sutchiff, an English traveler, in a visit here, in August, 1804, thus mentions it in his work: "We crossed the Schuylkill at Spring-Mill Ferry, and had a sight of a vineyard of about five acres, under the management of a Frenchman. As the vines were not suffered to grow more than three feet in height, it had somewhat the appearance of a field of raspberries." No doubt he endeavored to introduce the cultivation of the foreign grape; hence, like many others, was unsuccessful. Mr. Le Gaux died here in 1828, aged seventy-five years. His will, in the register's office, is quite lengthy, and exhibits an eccentric mind.

With a view to changing the boundary line between Whitemarsh and Springfield, William Sibley, Michael O'Brian and Florence Sullivan were appointed commissioners, and made a report, which the court, November 11, 1876, modified and confirmed as follows:

"That instead of the Ridge turnpike road being the northeastern boundary, the dividing line shall be the line dividing the lands of J. Kratz and Wm. L. Rittenhouse, on the southwesterly side of said Ridge turnpike road, so that the township of Whitemarsh shall comprise that part of Springfield lying between the River Schuylkill, the line of Philadelphia City and county and the said line, between lands of J. Kratz and Wm. L. Rittenhouse."

By this change Springfield township no longer extends to the Schuylkill, and Whitemarsh has gained about one hundred and sixty acres of additional territory.

About half a mile southwest of Flourtown, on the Wissahickon, is the residence and farm of Norman W. Kittson, of St. Paul, Minnesota, containing four hundred acres, devoted to the rearing and improvement of blooded horses; with this purpose in view, Aristides Welsh, about 1861, purchased here a farm of one hundred and fifty acres, which he increased to two hundred and fifty acres. Among the most noted horses owned or bred by him may be mentioned Rysdick, Strathmore, Lexington, Susquehanna, Leamington, Lady Duke, Alarm, Reform, Iroquois (the winner, several years ago, of the Prince of Wales' stakes at the Ascot races), Harold and others. He likewise became the owner of Flora Temple, the famous trotter of thirty years ago. In May, 1882, Mr. Welsh sold the property known as Erdenheim to Mr. Kittson for one hundred and twenty-five thousand dollars, who has increased its area by adjoining purchases and making additional improvements, with a view to the enlargement of stock-raising. Three tracks for training and exercising the horses and colts have been recently laid out, of a mile, half-mile and the eighth of a mile in length, the latter under cover, so that it can be used in bad weather. For the purpose of affording readier communication between the grounds on the opposite sides of the Wissahickon, Mr. Kittson, in the summer of 1883, had a stone bridge erected across the stream, which, as a private enter-

prise was, possibly, not previously surpassed in the county. About one hundred and twenty-five acres of this estate are in Springfield township.

On the line adjoining Plymouth and Whitpain townships is an elevation known as Cold Point, where there is a scattered hamlet, containing on the Whitemarsh side more than a dozen houses. The Cold Point Baptist Church, located at this place, was first known as the Plymouth Church, and the locality became a preaching-place about 1842, when the Rev. Robert Young, then pastor of the Chestnut Hill Baptist Church, began service in the school-house, which then stood opposite the present church. The corner-stone of the old stone church edifice was laid in the summer of 1845, and after completion was in use until 1867. The corner-stone of the present stone house, sixty by forty feet, was laid in August of that year and completed and dedicated in 1868 and is still used. It stands a short distance west of the old church. The Rev. Mr. Young retired from the charge of Chestnut Hill Church in 1849 and the Revs. — Wilson and Barnhurst preached at the place until 1854, when the present church was regularly organized and the Rev. Jesse B. Williams became the pastor. He was succeeded by Alexander H. Folwell, — Trotter, J. B. Williams, H. H. Lemy, — Oakley, Rolando Kocher and John C. Jacobs. The churches are at present without a pastor. The membership is about one hundred and fifty. The grounds occupy about two and a half acres and are kept in neat condition. We find on the tombstones the names of Freas, Rodebaugh, Lysinger, Fight, Phipps, Hellings, Williams, White, Sands, Bisbing, Hallet, Rex, Coulson, Moore, Robinson, Fisher, Nagle, Schlater, Yetter, Butler, Kirk, Radcliff, Getman, Wood, Jones, Childs, Wimmer, Roberts, Heller, Gilbert and Dewees. From these grounds a fine view is obtained of the surrounding country, particularly towards the north and west, embracing the greater portion of Plymouth township. Near this is the residence of the late Alan W. Corson, well known as a teacher, surveyor, nurseryman and botanist, who died June 21, 1882, aged ninety-five years.

The Union Church, as it is called from being held in common by the Lutheran and Reformed denominations, is situated in the lower part of the village of Whitemarsh, on the turnpike, and was originally built in 1818. In 1867 it was remodeled with a tower in front. It is built of stone, one story high, with stained-glass windows. The grounds comprise about five acres and extend from the turnpike to the Church road. Quite a number have been buried here, as may be judged by the following surnames transcribed from the tombstones: Van Winkle, Kehr, Shriver, Smith, Cox, Shaffer, Schofield, Francis, Aimen, Heist, Swimp, King, Bisbing, Gratty, Pierce, Trexler, Stout, Herrman, Hoover, Hallowell, Ruch, Robbins, Kübler, Wallace, Thompson, Baum, Detweiler, Fisher, Prince, Rodebaugh, Dewees, Bolland,

Keyser, Wentz, Armstrong, Steevy, Ball, Slingluff, Heydrick, Day, Bitting, Sorber, Wolf, Dager, Yetters, Quandrill, Dotts, Faringer, Everhart, Harmer, Cook, Carr, Engard, Hocker, Scheetz, Gilbert, McClellan, Clemens, Nace, Jones, Graff, Wimmer, Hess, Heister, Redifer, Fries, Lear, Hallman, Benner, Ott, Heany, Frantz, Hersh, Fultz, Bryan, Heller, Cox, Carn, McNeill, Sechler, Farr, Davis, Neiman, Kline, Coar, Peterman, Hauss, Brooke, Daub, Shugard, Irwin, Bush, Yeakle, Burnet, Closson, Hemp, Kerper, Bowers, Hogg, Cooper, Shaw, Frederick, Steer, McClay, Jacoby and Roberts. A handsome monument has been erected here to the memory of General Scheetz, who died in 1848. On the part of the Lutherans, the pastors of Barren Hill Church had charge here until the Rev. Mr. Sentman's time. Since the erection of the Upper Dublin Church, in 1857, this congregation has been assigned to the same pastor, the Rev. Lewis Hippee having charge until August, 1859; Rev. Edward Koons, from March, 1860, to May, 1863; Rev. George Sill, from September, 1863 to 1869, who was succeeded by the Rev. Mathias Sheeleigh. The Rev. George Wagner was the German Reformed pastor in 1858; the present is Rev. J. D. Dietrich, who reported that there were, in June, 1883, one hundred and sixty church members and one hundred and sixty Sunday-school scholars.

Barren Hill has a high location on an eminence of this name, which appears to be a spur of Edge Hill, and affords a fine view of the surrounding country. The Chestnut Hill and Perkiomen turnpike and Ridge turnpike approach here within a quarter of a mile of each other, and between them the village is chiefly situated. It contains three stores, three hotels, several mechanic shops, school-house, a three-story hall, post-office, mill and about fifty houses, St. Peter's Lutheran Church, a handsome edifice, founded in 1731, of which a further account will be given. The post-office was established before 1827. A steam grist-mill was built in 1858. The public school-house is a large two-story building. A passenger railway was completed from this place to Roxborough about ten years ago, over which five or six daily trains are drawn by two horses. The elections for the Western District of the township have been held here since 1875. That this place has improved, the following statistics will show: In the Revolution it contained a church, school-house and four or five houses; in 1858, thirty-three houses; and in 1880, four hundred and sixteen inhabitants. A meeting of the people of this county was held in December, 1799, to raise by subscription a sufficient sum to have the hill here on the Ridge road graded, when Colonel Andrew Porter, Abraham Webb and Andrew Norney were appointed a committee to make a survey and to report thereon. The work was accomplished by the middle of the following April and duly paid for. In the summer of 1883 an effort was made by some of the citizens residing here to have the name changed to that of Lafay-

ette Hill, which, being assented to by the post-office department, took effect January 1, 1884.

Spring Mill until recently was the most populous village in the township, but owing to the demolition of its furnaces and several manufacturing establishments, its prosperity has been impaired. It is situated on the east side of the Schuylkill, with two railroads having double tracks passing through it from Philadelphia. It contains at present four stores, one hotel, two clay-works, a grist-mill, several mechanic shops and about fifty houses. The census of 1880 gives seven hundred and eighty-eight inhabitants; if this is no typographical error, it is entirely too high; the number of houses will not admit of half this population. Mr. Hitner has sold his two furnaces here to the Schuylkill Valley Railroad Company to give room to their improvements. The village received its name from several copious springs of water near by, the principal ones being five or six in number. They are all situated within an area of half an acre, and flow into one stream, which, after a course of a quarter of a mile, empties into the Schuylkill. In this distance it has sufficient power to propel the whole year round the grist-mill mentioned, which was built here before 1715, and then owned by David Williams, next by Robert Jones. Thomas Livezey, in January, 1812, advertised it for rent, stating that it was affected by "neither frost nor drought." Mr. Hitner's furnaces were erected here in 1844 and 1853, with an estimated capacity to produce annually twelve thousand tons of iron. John Meconkey advertised the tavern and ferry here for sale in December, 1803, stating that the house was thirty-five by eighteen feet, two stories high, with an ice-house attached, and that the ferry had the advantage of not being fordable at any time of the year. Edge Hill crosses the Schuylkill just below the village, and continues up the other side of the river to West Conshohocken, where it turns to the southwest. The river is quite narrow where it flows through the hill and rises on both sides to an elevation of upwards of two hundred and fifty feet, contributing to the beauty of the scenery. Its flourishing neighbor, Conshohocken, bids fair to absorb the entire place, it being no easy matter now to a stranger to tell where the one begins or the other ends. The post-office here is called William Penn, and was established before 1876.

Marble Hall is situated on the Germantown and Perkiomen turnpike and extends within half a mile of Barren Hill. It contains two stores, a marble-mill, several mechanic shops and above twenty houses. The census of 1880 gives it one hundred and twenty-two inhabitants. Daniel Hitner, the father of Daniel O. and Henry S. Hitner, was the founder of the place; he died here March 3, 1841, aged nearly seventy-six years. It was some time before the Revolution when Patrick Menan kept school here and taught the higher mathematics. Daniel O. and Henry S. Hitner hold

considerable real estate, and have long carried on the iron and marble business. The latter, according to the report of Henry D. Rogers, the State geologist, secured from his farm of two hundred and thirty-five acres here, in 1852, ten thousand tons of good ore, and in the following year over twelve thousand tons. The village appears to have improved very little since 1858.

Fort Washington is situated near the Upper Dublin line, at the intersection of the Spring House turnpike and North Pennsylvania Railroad. It contains two stores, hotel, post-office, railroad-station, coal and lumber-yard and about eighteen houses. The post-office was removed here from Whitmarsh village in 1873 and A. H. Carn appointed postmaster, who still retains the position. Its title was changed from Whitmarsh to its present designation January 1, 1879. A woolen-mill and a silk-factory are in the vicinity, but have not been in operation for some time. Near this is also Isaac & Albert Conard's auger manufactory, who have been in the business many years. What was known in 1702 as the *wide marsh*, on the early North Wales road, and gave name to the township, begins at this village and extends southwardly nearly a mile. The venerable stone bridge over Sandy Run bears the date of 1792, and gives fair promise soon to be a centenarian. About half a mile south of Fort Washington Station a terrible collision between two trains took place July 7, 1856, by which forty persons were instantly killed, twenty died subsequently and nearly sixty were wounded. The accident was occasioned through the up train being behind time with a Sunday-school excursion, and the down train not waiting here, as it should have done. What pleasing anticipations that party must have had but a few moments before, when the object of their journey was almost in sight!

Undoubtedly the oldest settlement in the township is the village of Whitmarsh, situated on the Spring House turnpike, thirteen miles from Philadelphia. It contains two merchant mills propelled by the Wissahickon, two churches, school-house and seventeen dwellings. A considerable quantity of lime is burned here. An account of the Episcopal and Union Churches is given elsewhere. The Skippack road, laid out in 1713, was turnpiked from here, in 1855, a distance of five miles. It was at this place where the elections were so long held and the Whitmarsh post-office established before 1816. The lower portion of the place has for some time been denominated Valley Green. Here resided, from 1837, Morris Longstreth, appointed associate judge of Montgomery County, in 1841, afterward elected canal commissioner, and in 1848 defeated by a very small majority for Governor by William F. Johnson. A few years after this he died here on his farm. The buildings and a portion of the land are now owned by Franklin P. Seltzer, the balance by Franklin A. Comly, president of the North Pennsylvania Railroad, who resides here. This is a populous sec-

tion of country and abounds in fine, productive farms.

Lancasterville is situated near the Whitpain line, and formerly owed its prosperity to the manufacture of lime, but since the completion of the Plymouth Railroad to Oreland the business has been removed to its proximity, and the place has gone to decay. Here resided Thomas Lancaster, a Friend, who, in 1774, emancipated his negro man, Cato, aged forty-six years, and, in addition, gave bond that he should not fall for his keep on the public charge. He was assessed in 1780 for holding a farm of two hundred acres and keeping four horses. He had a son of the same name, who inherited the property. It was from this family that the place received its name. The numerous neglected kilns and quarries abounding here attest the industry that once prevailed.

Lafayette is the name of a station a mile below Spring Mill, on the Norristown Railroad. An extensive paper-mill was built here in 1856 by Mr. Cope, of Germantown, who carried on the business for several years. It is now owned and operated by W. C. Hamilton & Sons, who employ about one hundred hands. The census of 1880 gives one hundred and thirty-nine inhabitants. In 1858 there were but four or five dwellings and the ruins of a grist-mill that had been propelled by a stream that empties here into the Schuylkill.

At Plymouth Meeting, on the Perkiomen turnpike, in this township, are now some twenty houses, and it appears to be an improving place. An Evangelical meeting-house was commenced here in 1876, but not dedicated until July 22, 1883. It is a two-story stone edifice, with a capacity to seat five hundred persons. The pastor is the Rev. H. M. Capp.¹

St. Thomas' Episcopal Church.—This congregation ranks among the earliest of the denomination in Pennsylvania. The Farmar family, who were its founders and principal patrons, arrived in September, 1685, and had probably settled here the following year. Tradition derived from several sources states that between 1690 and 1700 a church was built, of logs, which, in 1710, was destroyed by fire, when a stone building was erected in the northeast corner of the old graveyard, on land given for the purpose by Edward Farmar, and which stood there and served all the purposes of a house of worship to the congregation for the long period of one hundred and seven years. Who was its first pastor remains undetermined. It was not, however, till about 1695, that the Rev. Mr. Clayton first established the services of the Church of England in Philadelphia; his death occurred only three years later. He was followed by the Rev. Evan Evans, who came to this country in 1700, and was for many years rector of

¹ The writer acknowledges himself under obligations to the Hon. William A. Yeakle for some information relating to Whitmarsh, having written a series of interesting sketches on the subject, recently published in the *Norristown Herald*.

“RIVERSIDE PAPER-MILLS.”

WHITEMARSH TOWNSHIP, MONTGOMERY COUNTY, PA.

Christ Church. He was frequently invited by those that visited his church to make journeys of fifteen and twenty miles from the city to minister to their spiritual wants, which opportunities he did not neglect, and thus an interest was maintained for worship.

The Society for the Propagation of the Gospel in Foreign Parts, in 1718, appointed the Rev. Mr. Weyman as their missionary at Oxford and Radnor. He came to this country and entered upon his ministry with diligence and made his residence at the former place. He shortly afterwards informed the society "that there is a congregation at Whitemarsh, about ten miles distant from Oxford, who are desirous of a minister, and have, for the decent performance of divine worship, erected a goodly stone building." This certainly implies that at that early date the congregation could not have been small, and that they had a creditable church. Mr. Weyman now resigned the Radnor charge and confined his labors chiefly to the Oxford and Whitemarsh congregations, which came thus to be associated for a long period. He was succeeded, June 24, 1733, by the Rev. Alexander Howie, whose ministry lasted nine years, when he left for the West Indies. The Rev. William Currie assumed the duties in 1742, at which time the wardens were John Barge and Hugh Burk, and the vestrymen Thomas Bartholomew, William Malchior, Edward Burk, Francis Colley, William Dewees, Jr., and John Burk.

From a record of the business proceedings of the wardens and vestrymen for 1742 the following interesting extract is taken :

"It was agreed that James Whiley, for officiating as Clark, cleaning the church and keeping things in decent order, should receive five pounds per annum. That the old tiles be sold for the best price, and the roof covered with cedar shingles. That a new pew and pulpit be made in the northeast corner, and new bannisters round the communion table. Also to fence in the graveyard with red cedar posts and cedar boards, and make three gates, one on each side, and the other at the end of the graveyard."

This establishes the fact that the original roof had been covered with tiles. The expense of repair was met by some forty contributors. The accounts show that Samuel Gilkey repaired the roof and Jacoby Whiley and George Lawrence attended to the carpenter-work.

The Rev. Eneas Ross came over from London in June, 1741, and became pastor of Christ Church, Philadelphia, which he resigned in June, 1743, to take charge of the churches at Oxford and Whitemarsh, in which he continued until 1758. He was the first minister to make any record of baptisms and marriages; unfortunately, his example was not followed for over half a century afterwards. Mr. Ross having been transferred to New Castle, Del., the Rev. Hugh Neill became his successor, who stated, on entering on his duties, that the attendance at worship was about one hundred and fifty, of which not more than thirty were members, the rest being Dis-

senters, or Germans who had received some knowledge of English. It is supposed that on the removal of Mr. Neill, in 1766, that the Rev. Dr. William Smith, provost of the college at Philadelphia, officiated occasionally until 1779.

From the following entry made April 17, 1786, it will be observed that all early records of the church have been unfortunately lost, except one book from 1742 to 1766: "Ordered, That proper books be provided for keeping the registers of this Parish, the old books and registers having been destroyed during the late war." At the aforesaid meeting of the congregation John B. Gilpin and Andrew Redifer were elected wardens, and Edward Burk, Levi Stannerd, William Hicks and Frederick Hitler vestrymen. Efforts were at once made to repair the injuries resulting from the war. It is therefore "*Resolved*, That, as the church is much gone to decay and the fence round the graveyard totally destroyed, the church be immediately put into decent repair, a communion table provided and a desk made for the clerk. Also, that a rail-fence of cedar be made round the graveyard." The Rev. Joseph Pilmore was, on this occasion, chosen minister and John Stewart appointed clerk. For the long space of twenty years, extending from 1766 to 1786, they had no regular pastor and but irregular worship, the members being scattered and the building and grounds in a ruinous condition.

Mr Pilmore retained the charge until 1794, when Rev. Dr. Wm. Smith succeeded until 1796, followed by the Rev. John H. Hobart to 1797, who afterwards became bishop of the diocese of New York, next the Rev. Slater Clay until 1812, then his son, Rev. J. C. Clay. The Rev. Bird Wilson, rector of the church in Norristown, officiated until 1821, followed by Rev. Mr. Robertson for a short period. He was followed by Rev. John Rodney, in connection with St. Luke's Church, Germantown, to 1833, the Rev. Dr. Cruse and Rev. John Reynolds to 1836, Rev. Wm. H. Deihl to 1852, Rev. George Foote to 1855, Rev. David C. Millett from 1856 to 1864, Rev. Charles Bonnel to 1869, Rev. Mr. Stryker to 1876, who was succeeded by the present rector, Rev. H. I. Meigs.

On the erection of the church, in 1817, the tower and spire were not completed until between the years 1847 and 1857, when the parsonage and school-house were built, additional ground purchased and a bell of eleven hundred pounds weight and a communion service presented. The church was forty by sixty feet in dimensions, built of stone, one story high, with a spire of one hundred and thirty feet. So weak at times has been the congregation that in 1817 the membership was only fifteen and worship was held only once a month. A drawing was made of this building in May, 1857, which may now be the only one extant. The distance to the Oxford Church does not exceed nine miles, and it was not till 1734 that the road was opened between them and declared a public

highway, which has ever since borne the name of Church road. The remains of Edward Farmar, who died in 1745, were placed in the upper part of the north aisle; the original slab retains its position, thus denoting the site of the old church. Tradition states that several Indian chiefs were buried here, but the exact place of their interment is unknown.

The church in the Revolution was occupied by both parties. During Washington's encampment in the vicinity soldiers were quartered in it, who made hearths of the grave-stones for their cooking purposes, which will account for the loss of head-stones from the earliest graves, fragments of which may be still discovered with lettering on them. On the retreat of the Americans from Germantown, the British, in their pursuit, occupied it, and again on their march out here to attack Washington. On this last occurrence they made use of it for several days. The late church, believed to be the third erected here, was torn down in 1868, and the present large and beautiful edifice commenced in the previous year, which, however, was not used for worship until 1877, and not fully completed until 1881. It is built of dressed red sandstone, procured in the neighborhood, forty-two by one hundred and twenty-four feet in dimensions, with a tower at the east end eighty-two feet in height. The windows are of stained glass and of the most elegant designs. From this elevated churchyard a fine prospect is afforded of the surrounding country, including Flourtown, Chestnut Hill, Barren Hill, Camp Hill, Fort Washington and the romantic valley of the Wissahickon. It is undoubtedly one of the handsomest church buildings in the county.

The grounds embrace all of six acres, substantially inclosed and kept in a neat condition. As may be expected from its antiquity, many have been buried here, probably above two thousand. The oldest stone bearing a date is that erected to the memory of James Allison, who died in 1727, aged forty-five years. Several quaint and curious epitaphs are here, bearing the dates of 1732, 1738, 1749, 1755 and 1763. Among the numerous surnames to be found here can be mentioned Burke, Barge, Wells, Farmar, Allison, Woolen, Brant, White, Shay, Houpt, Ingleman, Cleaver, Bisbing, Robinson, Nash, Acuff, Donatt, Taylor, Nague, Loeser, Bradfield, Hayes, Hinkle, Lukens, Smith, Jackson, Hickling, Young, Warley, Comly, Corson, Aimen, Stackhouse, Hersh, Summerfield, Grafty, Hart, Gibbs, Janney, Dodson, Kifer, Platt, Foote and Vancourt. In the spring of 1883 this church was represented in the Episcopal Convention by William H. Drayton, John H. Bringhurst and Hamilton Taggart as lay delegates. The present communicants number nearly one hundred; the children attending the Sunday and parish-schools number about eighty. Of the eleven Episcopal Churches now in the county, this was established the earliest, the next being St. James', in Lower Providence, in 1721.

St. Peter's Lutheran Church.—The origin of this church appears to be greatly due to the early and active efforts of the Rev. Henry M. Muhlenberg, which is thus acknowledged in the minutes: "Our collectors having, in his name and with his letters of recommendation, raised contributions to defray the expenses of the school-house, and having, after these were paid, also, by means of his written petitions, collected money in Philadelphia and in the Provinces of New Jersey and New York for the building of St. Peter's church, he himself having, at the same time, as far as it was possible for himself and his fellow-labourers, served us in the preaching of the gospel." From the deed of the school-house, dated March 15, 1758, we learn that Christopher Roberts, Philip Cressman, Valentine Miller, Philip Hersh and Adam Snider, of Whitemarsh, had commenced the building, but, through a

ST. PETER'S CHURCH, BARREN HILL.

majority of votes, transferred their rights to Rev. Richard Peters; Charles Magnes Wrangel, D.D., provost of the Swedish Lutheran Churches in Pennsylvania and New Jersey; Henry M. Muhlenberg, first minister of the United German Evangelical Congregations in Pennsylvania; Henry Keppeler, Sr., of Philadelphia; John Koplin, of Providence; Valentine Miller, Ludwig Kolb and Mathias Sommer, members of the church in Whitemarsh.

The aforesaid school-house was completed in 1758, and worship was held in it until the completion of the church. The first teacher was Michael Seely, who subsequently had the misfortune to become blind. The church, it is supposed, was commenced in 1761, but was not finished until a few years later. It was a substantial stone edifice, with galleries on three of its sides, surmounted by a steeple, which remained stand-

ing until 1849,—a period of nearly eighty-eight years. The school-house was built of logs; since, three others have been successively erected on the same spot, the two last, by the directors, under the public-school system. Conrad Bischoff, in 1765, taught the school, followed by John George Kuhn in 1768. Mr. Muhlenberg officiated at the laying of the corner-stone of the new church, and gave towards it, out of a certain legacy, twenty-four pounds, and preached in it before roofed, in which state it had cost five hundred pounds, and on its completion, upwards of five hundred pounds more.

It appears that the congregation had subscribed but little towards its building, for they were in debt upwards of £1000 (\$2666.66) when the church was finished. Hearing of the pecuniary embarrassment Dr. Ziehnhausen, chaplain to the King of England, authorized Mr. Muhlenberg to draw on him for five hundred pounds sterling. After the most clamorous of the creditors had been paid the church, school-house and lot of ground were conveyed to the German Lutheran congregation of Philadelphia. But what principally enabled the securities to meet their engagements was a legacy of thirteen thousand gulden (five thousand two hundred dollars) from the Count of Roedelshelm, in Germany, which he bequeathed to the German Lutheran congregations of Pennsylvania, three thousand gulden (twelve hundred dollars) of which were expressly given towards the indebtedness of this church. Thus was the debt of the church paid off to save it from being sold, and not long afterwards the whole was freed from incumbrances.

At an election held at St. Peter's, April 1, 1766, Henry Katz, John Bauer, Andrew Koeth and Philip Lehr were chosen elders, and William Hiltner and John Fisher deacons. In June, 1769, Rev. John Frederick Schmidt accepted the charge of the Germantown congregation, and preached every other Sunday in the parochial churches of Frankford and Whitpain, and occasionally at Barren Hill, in which church divine service had been previously held every other Sunday by the Germantown ministers, during the time of Pastors John Nicholas Kurtz, John Ludwig Voight and James Van Buskirk. Through the war and for several years after its close the Rev. H. M. Muhlenberg, no doubt, occasionally officiated here, also his son, the Rev. H. E. Muhlenberg, of St. Michael's, Philadelphia, followed by the Rev. Daniel Schroeder and John Henry Weinland, in 1786 to 1789, of the Germantown congregation, whose several labors helped to keep the congregation together.

During the Revolution the church received considerable injury, having been by turns occupied by the contending armies, and used as a battery and stable. The Rev. H. M. Muhlenberg, in his journal, under date of November 4, 1777, says "that it was used as a stable for horses by a portion of the American army, encamped in the vicinity," and further mentions that a short time previous the British army had been here,

and taken from the people their horses, oxen, cows, sheep and hogs. Lafayette quartered in the church, as a point for observation, during his brief tarry on the hill, in the middle of May, 1778, and came near being captured by General Grant, with a strong detachment of the British army. After the war, as may well be supposed, it was almost a ruin, full of rubbish and dirt, and its members, from being pillaged, were miserably impoverished and destitute of even the necessities of life.

The Rev. Frederick D. Schaeffer has left the following interesting account of the condition of affairs here:

"In the year 1790 I was called to the congregation of St. Peter's Church as their regularly ordained minister, and found the church and school in such a lamentable condition as to be commiserated. Only a few heads of families adhered to this congregation; the greater number of the children had already been sent to English schools, and an English school-master had been appointed to teach without my knowledge. The church building was in a deplorable condition, like a neglected or disordered house, the rude walls, windows and frames broken and shattered, and the roof appeared also ready to fall in."

Like St. Thomas' Church, at Whitemarsh, it seems it required sometime to get over the disasters occasioned by the war and relieve themselves from the difficulties under which they had labored.

Through the exertions of Mr. Schaeffer the church and surrounding premises were put into better condition, but from having been built nearly half a century considerable repair was needed. To carry this out, the congregation made application to the Assembly, who passed an act, April 13, 1807, authorizing them to hold a lottery to meet the expense. For the want of unanimity this was not carried out, when a committee of seven members was appointed, in 1809, to rebuild the structure and restore the fence and graveyard, which was accomplished within the year. It was dedicated January 7, 1810, in the presence of a numerous assemblage. The preaching in the forenoon was in the German, and in the afternoon in English. After a service here and with the Germantown congregation of over twenty-two years, Mr. Schaeffer resigned and went to Philadelphia, preaching his farewell sermon August 23, 1812. The Rev. John C. Baker succeeded in the charge and remained its pastor until 1828. During his ministry the German language was entirely dispensed with and the English substituted. The Rev. Benjamin Keller, D.D., commenced his labors in February, and remained till 1835.

Under the charge of Rev. C. W. Schaeffer the parsonage was built, in 1836, at a cost of nearly nine hundred dollars. The Rev. F. R. Anspach, D.D., became the pastor January 1, 1841, and remained until 1850. He held the last communion in the old church April 8, 1849, when the present fine edifice was erected, at a cost of six thousand five hundred dollars. Through the industry and perseverance of Dr. Anspach the membership of the congregation here and at Whitemarsh was greatly increased. In connection with his other duties, he conducted a select school wherein the higher branches of English education were taught. Rev. Wm. H. Smith succeeded in 1850, and resigned

May 10, 1852. In November of said year Rev. Wm. Baum, D.D., accepted, and served until May, 1858, and was followed by Rev. S. Sentman, who remained till April, 1862. In his ministry the centennial celebration of the church was observed with appropriate ceremonies. Rev. C. F. Keedy was the next pastor, followed by Rev. J. Q. Waters, when Rev. R. Demme succeeded in 1867. The Rev. T. C. Pritchard received the charge September 1, 1871, and remained until July, 1883, and was succeeded by Rev. J. Q. McAtlee. To the pastors of this congregation was also assigned the charge of the Union Church at Whitmarsh from 1818 until 1858, when the latter was connected with the Upper Dublin Church.

The present church, as has been stated, was built in 1849, in the Gothic style, two stories high, with buttresses and stained-glass windows. Its dimensions are forty-eight by seventy-two feet, with a tower and spire one hundred feet high. The steeple, from its high situation, is seen for many miles around. From the churchyard a fine prospect is obtained, particularly in a northeast direction. The ground probably comprises in all eight acres, inclosed by an iron railing and wall. A considerable number have been buried here in the past one hundred and twenty-five years. On the stones are found the names of Dettere, Dager, Morris, Prutzman, Barnet, Crawford, Bell, Rapine, Harbst, Cook, Gilinger, Gulp, Dewees, Hitner, Robinson, Righter, Bond, Pflieger, Young, Staley, Lyle, Johnson, Jago, Keys, Mattis, Rex, Bolton, Sassaman, Wolf, Thomas, Lysinger, Kline, Ellis, Garn, Becher, Boyer, Lightcap, Gray, Neil, Klair, Streepier, Bartle, Haugh, Culp, Wampole, Hiltner, Cole, Heritage, Colman, Kirk, Davis, Johnson, Goshen, Bickings, Ludy, Pifer, Kenzie, McIntire, Matlack, File, Haines, Butter, Markley, Marple, Fisher, Shinkle, Hellings, Freas, Peters, Heilman, Hagy, Harner, Graver, Vandike, Cressman, Kirker, Ritter, Van Winkle, Moyer, Nelson, Faringer, Deshong, Spealhofer, Hart, Thorp, Keely, Hesser, Potts, Zern, Schiæler, Herman, Baraholt, Hallman, Steer, Share, Sharp, Fight, Bauer, Calender, Kutz, Shaw, Dennison, Snyder, Wood, Thompson, Cress, Jacoby, Faust, Edelman, Scheetz and Brant. A handsome white marble monument, about twenty-five feet high, was erected to the memory of the soldiers who died in the late civil war. The oldest stone observed, bearing a date, is to the memory of "Johan Heinrich Klein, gestorben 1760." During a severe storm in November, 1878, which passed over the centre of the township and did considerable damage, the steeple of the church was blown down and greatly injured, but was restored in the following year.

ASSESSMENT OF WHITEMARSH, 1780.

Leonard Steeper, assessor, and John Bower, collector.

Andrew Cate, 100 acres, 2 horses, 3 cows; John Sheppard, 83 a., 2 c.; Christopher Shupart, 50 a., 1 h., 3 c., 2 stills; Jacob Cate, laborer; Henry Katz, 17 a., 2 h., 3 c., paper-mill and 43 a. in Springfield; Joseph Ake, miller, 1 c.; Wm. Kagge, 3 c., paper-mill; Hagge, 100 a., 2 h., 2 c., paper mill; Caspar Wampole, 50 a., 1 h., 2 c.; Adam Miller, 3 h., 3 c.; John Shupart, 1 c.; George Knitle, 2 h., 2 c.; George Geiger, 2 h., 2 c.;

Fitzgerald, school-teacher, 6 a., 1 h., 1 c.; Abraham Houser, 20 a., 1 h., 2 c.; George Aimen, 45 a., 1., 3 c.; Conrad Bean, 2 h., 1 c.; John Derrick, laborer; James Haslett, 1 c., laborer; Richard Mairs, millwright, 2 h., 1 c.; Isaac Mathers, 2 h., 3 c., 1 still; William West, 280 a., 6 h., 10 c., 2 negroes, one four-wheel carriage; Samuel Morris, tanner, 29 a., 3 h., 2 c.; Jesse Gilbert, 1 h., 1 c.; Henry Scheetz, paper-maker, 80 a., 3 h., 4 c., paper-mill; Joseph Lukens, 190; a., 3 h., 6 c.; George Ankele; William Jones, laborer; Marchant Mauleby, 80 a., 3 c., aged; John Kerbaugh, 18 a., 4 h., 1 c.; Edward Hopkins, 1 h., 2 c.; Martin Faringer, 80 a., 2 h., 3 c.; Jacob Mathews, smith, 1 c.; Samuel Cox, shoemaker, 1 c.; Andrew Miller, 3 h., 1 c.; Henry Enghart, 2 h., 2 c.; Henry Gordon, laborer; Edward Davis, 50 a., 2 h., 2 c.; Walter McCool, 1 negro, 50 a., 2 h., 2 c.; Samuel McCool, 1 h., 2 c., tailor; David Evans, laborer, 1 c.; Joseph McClean, 230 a., 3 h., 5 c.; Jacob Cook, weaver, 1 c.; David White; James White, 4 h., 2 h., 2 c., tailor; Robert Kane, shoemaker, 1 c.; John Cox, schoolmaster; Thomas Cox, 11 a., 1 h., 1 c., laborer; Dorothy Jarret, widow, 200 a., 3 h., 5 c.; John Hollowell, 120 a., 3 h., 4 c.; John Wilson, 117 a., 2 h., 3 c.; John Eldridge, 1 servant, 150 a., 4 h., 5 c.; Sarah Egbert, widow, 60 a., 4 h., 1 c.; John Egbert; Lawrence Egoert; Thomas Lancaster, 200 a., 4 h.; Thomas Lancaster; Joseph James, 160 a., 2 h., 2 c.; George Shatinger, laborer, 2 c.; Evan Meredith, miller, 6 h., 4 c., 1 chair, rents of Robert Wells 300 a. and grist-mill; Joseph Wood; Samuel Williams, 2 h., 2 c.; Casper Freas, 3 h., 4 c.; Jacob Lesley, laborer, 1 c.; Jonathan Robeson, 238 a., grist-mill, 3 negroes, 1 chair, 5 h., 4 c.; Michael Knorr, 170 a., 5 h., 5 c.; George Harker, 200 a., 4 h., 6 c.; Melchior Knorr, 170 a., 5 h., 5 c.; Bernard Knorr, laborer, 2 h., 2 c.; Isaac Williams, 470 a., belonging to Anthony Williams' estate; Michael Bowman, 2 h., 1 c.; Henry Seabolt, shoemaker, 1 c.; Michael Miller, 33 a., 1 h., 1 c.; Frederick Miller, 11 a., 1 c.; Michael Miller, 1 c.; Joseph Ransey, laborer, 1 c.; Israel Everly, shoemaker, 2 c.; Patrick Menan, aged, 50 a., 1 h., 2 c.; Josiah Dickeson, 2 h., 3 c.; Frederick Hitner, 4 h., 2 c.; Jesse Greenfield. *Single Men*—George Geiger, George Aimen, Owen Morris, Philip Keesee, Morris Mauleby, Lawrence Egbert, Joseph Wood, Lewis Wood, Peter Robeson.

BIOGRAPHICAL SKETCHES.

ELIAS HICKS CORSON.

The subject of this biography is the son of Alan W. and Mary Corson, of Whitmarsh township, and was born on the 19th of February, 1816. His father,

a distinguished mathematician and botanist, was able to give his son superior opportunities of instruction, to which primary store of knowledge he added by reading and observation. At the time of his majority he engaged in lime-burning in Chester County, but soon returned and began the same business in Plymouth, where it was continued with energy and profit until his death, on the 5th of November, 1877. He was also engaged in the coal business, and was the owner of a fine farm adjacent to the quarries, which he cultivated to its fullest capacity. Mr. Corson, on the 13th of March, 1845, married Miss Emily R. Harris, daughter of Henry and Rachel Harris, of Philadel-

It may be said of Mr. Corson that few men in his section of the State were better known or more universally esteemed. He displayed a varied knowledge, was quick of apprehension and possessed a rare facility of conversation, combined with the kindness and gentleness of a child. He possessed a strong individuality, was a marked man in stature, strength and symmetry, and possessed not less remarkable business qualifications than strong mental endowments. He was fond of literature, a reader of the poets, and kept pace with the transactions of the times. His conversation and presence were magnetic, his manner agreeable and his wit devoid of sting or bitterness. Good,

E. H. Corson

phia. Their children are Henry H., George, Emily, Martha, Walter H., Carroll, Percy H. and four who died in early youth.

Mr. Corson, early in the anti-slavery movement, joined his efforts to those put forth by the friends of human rights, and through the long years of that strife was active in the cause, contributing freely and aiding in all proper ways to give freedom to the slave. To the temperance cause he also gave his heartiest approval, for which work he was eminently fitted, no amount of opposition or inconsistency of others being able to tempt him to unbecoming violence or prevent his administering a deserved rebuke.

pure, strong and true, his influence will survive, while to his friends he remains as a bright memory, a spur to noble deeds in the cause of humanity.

JOSEPH FREAS.

Mr. Freas is of German extraction, his father having been George Freas, who married Barbara Wolf. Their children were John, George, Samuel, Jacob, Benjamin, Daniel, Joseph, William, Mary (Mrs. Samuel Roberts) and Catherine (Mrs. William Freas). Joseph was born on the 6th of May, 1794, on the homestead farm, in Whitmarsh township, and during his youth remained with his parents, receiving

meanwhile such education as the neighboring schools afforded. He then chose as his trade that of a blacksmith, and became an apprentice to his brother Samuel, in Plymouth. This trade he followed for some years in Plymouth, but, concluding that the occupation of a farmer, with which he had been made familiar in his youth, was more to his taste, he abandoned his trade and returned to Whitmarsh. Here he purchased of his father the farm, which for many years he cultivated, and on retiring from active farm-labor he erected the residence on the same farm which is now the home of his widow and daughter. His political sentiments were those of the Old-Line

universally esteemed in the township. His death occurred November 22, 1879, at his home, in Whitmarsh.

JESSE W. FREAS.

The great-grandfather of Jesse W. Freas (or Fries, as originally spelled) and uncle of Jacob Frederick Fries, the founder of a philosophical school in Germany and professor at Heidelberg in 1805, was from Saxony. His son, Simon, resided at Marble Hall, in Whitmarsh township, where he followed the blacksmith's craft. He was united in marriage to Margaret Rapin, born in 1773, died in 1863, a descendant

Joseph Freas

Whig party, though he did not take an active part in the public movements of the day, and devoted his time and efforts wholly to his own business. Mr. Freas was married, on the 15th of January, 1818, to Ann Keely, daughter of Henry and Elizabeth Keely, of Philadelphia County, whose birth occurred November 17, 1792. Their children are Henry, born in 1818; Joanna, in 1820; Walton, in 1822; Essachar, in 1824; Elizabeth, in 1826; John Quincy, in 1828; Orlando, in 1830; Caroline, in 1834; Tacy A., in 1836; and Barbara A., in 1839. Mr. Freas was not less favorably known for his industry than for his upright character and integrity, which caused him to be

of the celebrated Paul de Rapin de Thoyras, an eminent historiographer, born in Languedoc in 1661. A member of the family, Philip Rapin, was a commissioned officer in the Revolutionary war, and Daniel Rapin was the first mayor of Washington City, justice of the peace, appointed by President Jefferson, and postmaster of the House of Representatives at the time of his death, in 1825. The children of Simon and Margaret Freas were William, David, Ann, Charles, Nicholas, Sarah, Elizabeth, Philip, Henry, Elizabeth (2d) and David (2d). William, of this number, was born December 27, 1796, in Whitmarsh, where he was early a blacksmith, and later became the

owner of a productive farm. He married Catherine Freas, daughter of George Freas, the latter of whom was but an infant of one year on his emigration from Germany. Their children were a son, Jesse W., and a daughter, Barbara Ann, now Mrs. Philip Cressman, of Philadelphia. Jesse W. was born on 23d of October, 1818, in Whitemarsh township and devoted his boyhood to labor, varied by attendance at the nearest school, where he acquired a substantial education. He was instructed at an early age in the uses of the hammer and forge, as also in the various occupations pertaining to the life of a farmer, and continued thus industriously occupied until his mar-

also engaged in a general merchandise business. The Freas family have been blessed with great longevity. Jesse W. is now sixty-seven, William died at eighty-four, Margaret at ninety, and nearly all her children at advanced ages. Mr. Freas is in politics a Republican, having formerly voted with the Democratic party, as did his father. He has served as school director, but declined other official positions, though holding the commission as postmaster at Lafayette Hill. He is a Lutheran in his religious faith, and member of the Lutheran Church at Barren Hill, as are his wife and most of the children, his son, William S., being a clergyman of that denomination, settled at Carlisle,

Jesse W. Freas

riage, December 24, 1846, to Miss Ann Catherine Streeper, daughter of Leonard and Sarah Streeper. Their children are William S., born in 1848; Frederick R., in 1851; Eva, in 1853 (died in 1854); Luther, in 1855; Henry M., in 1859; L. Streeper, in 1862; Oliver S. Abold, in 1864; Lilly, in 1868 (died in 1888); and Ida M., in 1872. Mr. Freas, on his marriage, removed to a farm belonging to his father, which he cultivated in conjunction with the mining of iron-ore. Though at a later period his residence was changed, a spacious dwelling erected by his father becoming his home, he continues his customary pursuits as a miner and farmer. For a number of years he was

Pa. Mr. Freas was for many years superintendent of the Sunday-school of his church.

SILAS CLEAVER.

The Cleaver family are of German antecedents, though little is known of the advent of the first representative in America or of his immediate descendants. Salathiel Cleaver, the father of Silas, a brief sketch of whose life is here given, was a resident of Montgomery County, where he followed farming pursuits during his active life. To his wife, Mary Shoemaker, were born five sons,—Nathan, Josiah, Daniel, Silas and John. The birth of Silas, of this number, occurred on

the 7th of February, 1819, on his father's farm, in Gwynedd township. He was educated at the boarding-school of Joseph Foulke, in Gwynedd, and at the age of nineteen repaired to Whitemarsh township, where he entered the mill of William Ely for the purpose of acquiring a thorough knowledge of the miller's trade. On completing his apprenticeship he removed to Walnut Mill, in Lower Dublin township, and became the lessee of a mill, which he operated for a period of eight years. Mr. Cleaver, at the expiration of this time, purchased a mill property at Wissahickon, in Whitemarsh township, which, in connection with his brother John, he operated for thirty-six years. Hav-

He was a member of the Corn Exchange of Philadelphia for many years, and at his death a director of the Mutual Fire Insurance Company. He was by birthright a Friend, and worshiped with the Plymouth Meeting. Mr. Cleaver, though a man of modest and unobtrusive demeanor, wielded a commanding influence in the township. His sterling integrity in all matters of business won the respect of the community, while the qualities of gentleness, kindness and sympathy caused him to be greatly beloved by those who, through daily intercourse, became familiar with the tender and loving heart and the generous and unselfish nature.

John Cleaver

ing during this time been assiduous in his devotion to business, it was his intention to have abandoned active labor in connection with the mill, and he retired to a home he had purchased. His life was, however, suddenly ended on the 18th of February, 1884, before this project was consummated. Mr. Cleaver was, on the 9th of March, 1848, married to Miss Mary E., daughter of John Ruppert, of Lower Dublin, who survives him. In politics the subject of this sketch was a Republican, his affiliations having formerly been with the Whig party. Apart from the office of school director, he held no official positions in the township.

JOHN CLEAVER.

Salathiel Cleaver, the son of Nathan and Ruth Cleaver, who was of German descent, and born on the 10th of August, 1780, was numbered among the enterprising farmers of Montgomery County, his residence during his lifetime. He married Mary, daughter of Daniel Shoemaker, of Upper Dublin township, Montgomery Co., who was of Welsh extraction, and had children,—Nathan, Josiah and Daniel (deceased), Silas and John. The last-named and youngest of the number, who is the subject of this biographical sketch, was born November 1, 1822, on the home-

Silas Cleaver

stead, in Montgomery township. Here his youth, until the age of nineteen, was spent, his education having been received at a private school on his father's property, and later at the boarding-school under the direction of Joseph Foulke. He decided upon acquiring a trade, and chose that of a miller, entering as apprentice a mill on the Pennypack stream, near Bustleton. Two and a half years after, having completed his apprenticeship, he repaired to Byberry, in Philadelphia County, and spent a year as journeyman, at the expiration of which period he formed a copartnership with William Buckman, and continued this business relation for two years. In the spring of 1848 an ad-

ried, on the 11th of November, 1852, to Miss Sarah Jane, daughter of Chalkley and Ann Jarrett Kenderdine, of Horsham township, Montgomery Co. Their children are William J.; Anna K., wife of George Rex; Ella (deceased); Chalkley K., married to A. Laura White; Mary R.; Emma; Sallie; Tacey K.; and Silas, Jr. (deceased). Mr. Cleaver has for twenty-five years been a member of the Commercial Exchange of Philadelphia. He was formerly, in politics, an Old-Line Whig, and readily adopted the platform of the Republican party on its organization. Aside from the exercise of his privilege as a voter, he, however, finds little leisure for participation in mat-

D. W. Yeakel.

vantageous opportunity was offered in connection with his brother Silas, who owned a mill in Whitemarsh township. This copartnership of social and business relations of the most agreeable character continued until the death of the senior partner, in the spring of 1884, William J. and Chalkley Cleaver having been admitted to the firm in 1883, under the name of S. & J. Cleaver & Sons. The mill has been greatly improved, much new machinery and many modern appliances having been introduced, and its capacity largely increased. In the fall of 1876, Mr. Cleaver purchased the farm adjoining the mill property, known as the Peter Phipps farm. He was mar-

ried, on the 11th of November, 1852, to Miss Sarah Jane, daughter of Chalkley and Ann Jarrett Kenderdine, of Horsham township, Montgomery Co. Their children are William J.; Anna K., wife of George Rex; Ella (deceased); Chalkley K., married to A. Laura White; Mary R.; Emma; Sallie; Tacey K.; and Silas, Jr. (deceased). Mr. Cleaver has for twenty-five years been a member of the Commercial Exchange of Philadelphia. He was formerly, in politics, an Old-Line Whig, and readily adopted the platform of the Republican party on its organization. Aside from the exercise of his privilege as a voter, he, however, finds little leisure for participation in mat-

DAVID W. YEAKEL.

Mr. Yeakel is the great-grandson of Christopher Yeakel, who emigrated to America in 1734, and married Susanna Schultze. Among their sons was Abraham, who was united in marriage to Sarah, daughter of Christopher Wagner, whose children were Isaac, born in 1777; Samuel, in 1779; Jacob, in 1780; Susannah, in 1782; Maria, in 1784; and Christopher, in 1787. Isaac, of this number, whose birth occurred

November 9, 1777, married Regina, daughter of Andrew Schultz, on the 4th of November, 1800. Their children were Jacob S., born in 1802; Sarah, in 1805; Samuel, in 1807; John, in 1809; Charlotte, in 1811; Emeline, in 1814; Daniel, in 1816; Mary, in 1818; and David W., the subject of this sketch. Isaac Yeakel died on the 23d of October, 1847, and his wife, Regina, on the 16th of January, 1860. The birth of their youngest son, David W., occurred on the 30th of December, 1821, in Springfield township, where the early years of his life were spent. After a period of youth devoted to the acquirement of a plain English

marsh township, settled near Lafayette Hill, where he at present resides, having some years since retired from active business. He was, in his early political associations, a Whig, and joined the ranks of the Republican party on its formation. He has neither desired nor accepted office, nor been actively allied with the working phalanx of the party. He was a loyal supporter of the Union during the late war and actively interested in filling the quota for his township. Mr. Yeakel is not identified by membership with any religious denomination, though his belief is that of the New Church (Swedenborgian).

James M. Coulston

education, he began the routine of farm labor, and continued thus occupied until thirty years of age, when, being ambitious for a larger sphere of industry than was opened in his native county, he removed to Lehigh County, Pa., and engaged in the foundry and machine business at Allentown. Here he remained nine years, having meanwhile, in September, 1852, married Sarah Lentz, of Whitmarsh township. Their children are John L., married to Bertha Hellings, who had four children; George K., of Whitmarsh; and M. Lula. Mr. Yeakel, on his return to White-

JAMES M. COULSTON.

The Coulston family is of Welsh descent, the grandfather of James M. having been William Coulston, who resided in Whitmarsh township, where he was an enterprising farmer. His children were Charles, William, John, Thomas, Mary (Mrs. William Kettler) and Sarah (Mrs. Jacob Rohrer). William Coulston was born August 9, 1797, in Whitmarsh, where he devoted his active life to farming employments. He married Ann, daughter of Joseph and Hannah Meredith, whose birth occurred October 29, 1802. Their

children are James M., Elizabeth and Hannah. William Coulston died April 17, 1863, in his sixty-sixth year, and his wife, Ann, March 25, 1833, in her thirty-first year. Their son, James M., was born on the 27th of January, 1831, in Whitmarsh. His youth was similar to that of other lads whose parents were farmers. At the age of eight years he removed with the family to his present home, attended school for a period and lent a willing hand at the labor of the farm. He was married, April 7, 1857, to T. Amanda, daughter of Joseph and Ann Freas, of the same township, and granddaughter of George and Barbara Freas. Their children are Ann Freas (Mrs. Daniel Maguire), Alice Hinckley (Mrs. Harvey Lentz), William Carpenter, Lizzie, Sarah Roser, Francis Coudie, Joseph Percival and Walter. William Coulston, having died in 1863, his son, James M., inherited his portion of the estate and purchased the remainder of the paternal home. Here he has since continued the healthful pursuits of a farmer. He has always affiliated with the Republican party in politics, and served as a school director of his district. He is also a director of the Montgomery Mutual Fire Insurance Company, and active in the promotion of the best interests of the township of which he is a representative citizen. He is identified as a member with Marble Hall Lodge, No 351, of Independent Order of Odd-Fellows. He adheres to the faith of the Society of Friends, and worships with the Plymouth Meeting.

CHARLES WILLIAMS.¹

Charles Williams, born Fourth Month 11, 1814, married Fourth Month 27, 1837.

He very decidedly prefers having a biographical sketch of his wife's father, Charles Stokes.

Charles Stokes, farmer, of Rancocas, son of David and Ann Stokes, born in Willingborough (now Beverly), in the county of Burlington, N. J., Eighth Month 12, 1791, traces his genealogy from Thomas Stokes, of London, England, who was born in 1640, married Mary Barnard, daughter of John Barnard, Tenth Month 30, 1668, and settled in Burlington County, N. J., soon after the making of "The Concessions and agreements of the proprietors, freeholders and inhabitants of the province of West Jersey, in America." To this instrument he was a party. This constitution or form of government for the province was thus characterized, in a letter to Richard Hartshorne, by William Penn, Gawen Lawrie, Nicholas Lucas and others, dated Sixth Month 25, 1676: "There we lay a foundation for after ages to understand their liberty as men and Christians, that they may not be brought into bondage but by their own consent, for we put the power in the people, etc., etc. In it was established a representative form of government, trial by jury

and liberty of conscience, all conscisely, but fully set forth, especially the last, which commences with the memorable declaration that no 'men nor number of men upon earth hath power or authority to rule other men's consciences in religious matters,' etc."

Although it formed "the common law or fundamental rights and privileges of West New Jersey," it has been but little improved in this or any other county since its promulgation, though two centuries have elapsed.

Thomas Stokes became the proprietor of a farm on the north side of the North Branch of the Rancocas River, about three miles west of Mount Holly, and had three sons,—John, Thomas and Joseph,—all of whom were farmers. The latter two were heads of large families of children, by whom the name has been widely extended. John, who married Elizabeth Green, daughter of Thomas Green, and granddaughter of Arthur Green, of Bugbroke, county of Northton, England, became proprietor of a farm on the north side of the Rancocas River, less than two miles westwardly of his father's location. He had but one son, John, who married Hannah, daughter of Jervis Stockdale, and succeeded his father on his farm on the Rancocas. He left three sons,—John, David and Jervis. David married Ann, the daughter of John and Elizabeth Lancaster, of Bucks County, Pa., and succeeded his father on the farm on the Rancocas; he had four sons, named Israel, John L., Charles and David Stokes, but no daughters. Charles Stokes married Tacy, daughter of William and Ann Jarrett, Montgomery County, Pa., Tenth Month 18, 1816. He erected buildings and commenced business on part of the homestead farm on the Rancocas River. They had three sons—David (who died when an infant), Jarrett and William—and three daughters—Hannah, Alice and Annie—married as follows: Jarrett, married Martha, daughter of William and Hannah Hilyard; William, married Annie, daughter of James and Rebecca McIlvaine; Hannah, married Charles, son of Joseph and Ann Williams; Alice, married William, son of J. R. and Letitia P. Parry; and Annie, married Chalkley, son of John and Ann Albertson,—all forming an unbroken succession of farmers, including a space of nearly two centuries, and continuing to the present time. Charles Stokes, the subject of this sketch, received the greater portion of his school education at Friends' School, at Rancocas.

At a time when but few aspired to anything further than such branches as were thought necessary to qualify for the ordinary business of life, he, having a taste for study and the acquisition of knowledge, with a few others of about the same time of life, availed themselves of an opportunity which presented, and took a deep interest in advanced studies, particularly of a mathematical character. These tended to enlarge his views and stimulate in his mind a desire to obtain useful knowledge from every available source. Books

¹ Written by the family.

of a character to gratify this desire were but few and hard to be obtained in the vicinity of his residence. No library existed nearer than Burlington, five miles distant, where was an ancient and good collection of books for that day. In addition to this, he was proffered by Joshua Wallan, a venerable citizen of Burlington, the free use of his extensive private library. He now commenced a study of history, seeking to make himself acquainted with the rise and fall of nations and the acts of distinguished characters who had signalized themselves in the different departments of life. Love of liberty and aversion to tyranny of every description appeared to be inwrought in his nature, and he felt it to be his mission to cherish and support the one and discountenance the other on every proper occasion, and by all suitable means.

He endeavored to make himself acquainted with the history, constitution and laws of his State and country, to judge of the acts of such as were in power to administer them calmly and without excitement, and in his own judgment mete out impartial justice to ail.

In his early life he became impressed with the conviction that Infinite Wisdom was not unmindful of man after his introduction into this life, but, by His omniscience and omnipresence, was always with him as a sure and unfailing rule, to rightly instruct him in all things in matters of duty, furnishing ability to perform it, providing the terms were accepted.

This conviction, deeply engraven, had much influence in moulding his character and pursuits. He endeavored in all things so to conduct himself that his mind would be at ease and avoid remorse, being satisfied that this rule of life gave all the liberty necessary for its enjoyments and would qualify for its duties.

Agriculture was the pursuit chosen by him. He labored on his father's farm during the summer months, teaching the balance of the year. This was continued for several years, keeping him in sympathy with the manual laborer, and also brightening what he had acquired of school learning, and furnishing opportunities for extended improvement. His time was occasionally employed in surveying land, writing, and taking acknowledgments of deeds, etc., being a master in the Court of Chancery, settling estates and performing the duties of township offices, as township committee, clerk, chosen freeholder, etc. He was one of the originators and stockholders of the Mount Holly Insurance Company, an institution organized in 1831, with which he was identified from its commencement, and served until his decease as a member of its finance committee. In the fall of 1830, without his wish or desire, he was elected a member of the House of Assembly for the county of Burlington. After taking his seat the first duty presented to his mind was to have repealed an enact-

ment to pay a chaplain for services at the State Prison, and this was effected on the ground that the constitution as it then stood prohibited the payment of money for the support of a ministry, etc. In those days New Jersey did not have any clergyman to open the session of the Legislature with prayer. The old sentiments embodied in the "concessions and agreements" had not become entirely obliterated in the minds of the people, and legislative bodies left the important matter of approaching Infinite Mercy in supplication to the individual members. It was believed by Charles Stokes to have been quite as well done and with more safety to our religious liberties.

In 1831 the constitution required the Legislature to be elected and meet in the fall of the year, the custom being to meet, organize, perform a few official acts and adjourn to an early day in the ensuing year. At this adjourned session in 1831, Dr. W. B. Ewin, an old and influential member from Cumberland, moved that J. Hancock (a worthy member from Morris) should open the session with prayer. Charles Stokes objected to the right of the House, by resolutions or otherwise, to direct a member to perform an act of this kind, stating that if any member should find it to be a duty to engage in the solemn act of public invocation he would be among the last to object. Hancock arose and stated that such was his case, but he did not wish to impose upon the House without consent.

Charles Stokes then withdrew his objections, whereupon Hancock knelt, and the House arose, as by common consent, without vote. The prayer was impressive and accompanied by due solemnity. When the House was about to close, *sine die*, and the members separate to their several homes, Hancock made a short address, suited to the occasion, and said if there was no objection he would address the Throne of Grace in supplication. The House (without vote) manifested their approval by rising, and a fervent prayer was uttered by Hancock; immediately the Speaker pronounced an adjournment without delay, and the members separated to their respective homes with much friendly feeling. At the preceding session of the Legislature two companies were incorporated, one to unite by canal the waters of the Delaware and Raritan Rivers, the other to construct a railroad from Camden to Amboy, under the names of Camden and Amboy Railroad Company, and Delaware and Raritan Canal Company.

Stock was taken; both companies organized and commenced operations. In the session of 1830-31 the Canal Company asked for additional powers to enable them to build a railroad on the bank of their canal. This was vigorously opposed by the Railroad Company, and upon this point the House of Assembly was nearly equally divided. The result was the introduction of a bill to unite the two companies under the name of the Delaware and Raritan

Charles Williams

Canal and Camden and Amboy Railroad and Transportation Company.

This was opposed by Charles Stokes, on the ground that the location of the works and the union of two such companies would concentrate a power not to be managed or controlled by the State.

The union was sanctioned by the Legislature, and at the ensuing session an act was passed prohibiting any other railroad being built to compete in business with the works of the joint companies, thus giving them the exclusive right of transportation and travel between New York and Philadelphia, which for many years greatly retarded the improvement of the State. During all this time Charles Stokes, always a friend of the companies, but steadily and unyieldingly opposed to their monopoly privileges, with a few others, by availing themselves of every suitable opportunity, at length had the gratification of seeing the State enfranchised and freed from the incubus which had paralyzed every effort in the way of railroad improvement.

At the close of the session he retired to an active private life, positively refusing to be again a candidate, until the public became much divided in regard to the policy of Andrew Jackson, President, concerning the Bank of the United States. His refusal to allow the bank further to receive the revenues of the government on deposit created much excitement and dissatisfaction with a large portion of the community; so much so that but comparatively few would speak in advocacy of his measures. That there might be no doubt as to his opinion Charles Stokes permitted his name to be used as a candidate for Council in the State Legislature, in connection with others who approved of the policy of the President. They were defeated then, as was expected, but very soon the public sentiment subsequently became so much changed upon the subject that in the fall of 1836 he was returned a member of the Legislative Council.

Having discharged this trust in such a way as to meet his own approval, he declined a further candidacy and again resumed his former avocation. The Legislature of New Jersey passed an act providing for an election of delegates to meet in convention to frame a constitution for the government of the State, Second Month 23, 1844. Charles Stokes was elected a member of this body, and Fifth Month 14th of the same year took his seat at the organization of the convention, which was composed of men distinguished for talent and high moral character, selected with the intention that party preferences should be balanced.

Early in the session R. S. Field offered a resolution "that the sittings of the convention be opened every morning with prayer, and that the clergymen of the city of Trenton and its vicinity be invited to officiate on such occasions." Charles Stokes said that he appreciated the importance of the service for which they

were assembled and the necessity for Divine assistance to enable them to wisely perform their duties. They were in their seats representing different sections of the State, the whole people and the interests of all. Different views, no doubt, were entertained with regard to the proper mode of offering prayer, and each one was entitled to his opinion; and no man, nor number of men, had a right to impose religious services upon another, contrary to what he believed to be right. The provisions of the eighteenth and nineteenth sections of the Constitution of 1776, which they had bound themselves, by solemn asseveration, to maintain, guaranteed this protection, and up to this time had been sacredly observed. If now, on this momentous occasion, they should sanction the principle embraced in the resolution offered by the member from Mercer, they would open a door for practices, for legislation, leading to a subversion of liberty of conscience, to a union of church and state; Legislatures would have imposed upon them prayers, gratuitously for a time, but soon compensated by enforced taxation.

He believed the mind should always be in the attitude of prayer, that men should "pray without ceasing," that they should do their own praying, and not by proxy.

He was satisfied with Scripture doctrine; that such things as are revealed belong to us, and those things that are secret and not revealed belong to the Great Fountain-Head and source of all good. It is truly wonderful, his disregard of popularity and determination to uphold what he believed to be right. His life was one of remarkable energy and activity throughout all of seventy-five years of the same, was exceedingly useful, desirous of wearing out instead of rusting out. He was prompt to form opinions of measures touching public welfare, and solicitous to discharge every duty. He was well informed in matters of law, and when consulted on those points gratuitously gave counsel and advice; and where parties were at variance his advice rarely failed to promote harmony. He lived to the advanced age of ninety-one years. His death occurred Second Month 27, 1882. He was buried in Friends' burial-ground, Rancocas, N. J.

He attributed his long and happy career through life to the fact that he always endeavored to follow that beacon, "The Light within," which never misled or betrayed his conscience. The rule of life by which he had lived proved to be a perfectly safe one in the hour of death. He bore his illness with resignation, and remarked "that Divine Providence has been good to me; I have the comforts of life and am surrounded and cared for by a loving and attentive family. The manifestations of friendship on the part of others is exceedingly joyful to me; I love them all; I do not entertain an unkind feeling for any one. I feel that life is ebbing away; I am resigned. My mission is nearly ended; I am prepared and ready to die." Thus ended a long, happy, useful and well-spent life.

CHAPTER LXXX.

WHITPAIN TOWNSHIP.¹

In the years 1681, 1682 and 1683, William Penn, the proprietary, executed leases and re-leases to Samuel Fox for fifteen hundred acres; Charles Marshall, two thousand acres; and James Claypole, one thousand acres. James Claypole shortly afterwards sold his tract to John Marshall, containing in all four thousand five hundred acres. Richard Whitpain, citizen and butcher of the town of London, subsequently became seized in fee of the whole four thousand five hundred acres.

This tract, to distinguish it from the rest of Whitpain's purchases, was called or known by the name of "Whitpain's Creek," situated in Philadelphia County.

Richard Whitpain made his will and testament, dated April 27, 1689, and willed the payment of his debts and funeral expenses, and authorized his wife, Mary, his executrix, to sell so much of his lands in the province as she should find needful for the payment thereof, and shortly after the said testator died.

Mary Whitpain, in accordance with the provision of the will, by her indenture dated July 20, 1689, sold the entire tract to Mary Davice, John Eldridge, William Ingram, John Blackhall and John Vace, all of whom were creditors. Shortly afterward John Blackhall, the surviving trustee, sold the great tract above named to William Aubrey, of the town of London.

William Aubrey, by his indenture dated April 24, 1713, sold the tract to Anthony Morris, maltster and brewer of Philadelphia, and Rees Thomas, of the township of Merion.

John Whitpain (the only surviving son and heir-at-law of Zachary Whitpain, and also heir-at-law to his uncle, John Whitpain, which John Whitpain, the uncle of the oldest son and heir-at-law of Richard Whitpain) became dissatisfied with the sale. An agreement was entered into, dated May 28, 1718, by which the entire tract fell into the hands of Morris Rees and Whitpain, and they requested of the commissioners a resurvey thereof.

In pursuance of a warrant from the commissioners, dated Third Month 20, 1726, the property was resurveyed by Nicholas Scull, May 23, 1727, and found to contain four thousand eight hundred and fifty-eight acres.

John Whitpain made his last will, dated December 20, 1718, and willed the property that was due him (real estate), according to the agreement made with Morris and Thomas, his portion thereof, to his two children, Sarah and Zachariah, and left his wife, Ann, his executrix. Concerning the Whitpain family, Buck, the historian writes,—

"Zachariah Whitpain removed on the same the summer of 1685, if not earlier, and making extensive improvements, he settled on the property a number of tenants. In 1686 he married Sarah Owens, and was ap-

pointed by the Governor's Council, with Thomas Holmes and Lacey Cox, to make inquiry into the cause of the Indian disturbances at the house of Nicholas Scull, grandfather of the Surveyor General, near the present village of Whitemarsh. He died near the latter end of March, 1693, and was buried in Philadelphia. Mention is made in the Colonial Records of a visit paid by Thomas Jenner and Polycarpus Roe, in December of said year, to his plantation. His widow, in 1697, married Charles Saunders. He left a son of the same name, who died in March, 1792. It would appear that he lived a portion of the time in the city."

This township is among the oldest in the county, being mentioned as "Whitpain's township" as early as 1701, when the township of Plymouth was first laid out, and is one of the central townships of the county, bounded on the north by Worcester, east by Upper Dublin and Gwynedd, south by Whitemarsh and west by Plymouth and Norriton. It is of regular form, four and a half miles in length and three in breadth, and contains about eight thousand six hundred and forty acres.

The soil is shale and loam, and near the southern corner a strip of sandy soil predominates. On almost all of the farms south of the Stony Creek good quarries of fine building-sand can be found.

The township forms a summit-level, from which the water flows in different directions. The eastern and southern portions are drained by the Wissahickon Creek, which crosses the eastern angle and propels two grist-mills.

The word "Wissahickon," according to Heckewelder, is an Indian name, and in their language signifies the "catfish stream, or the stream of yellow water."

On Holme's map of surveys (begun in 1681) it is called Whitpain's Creek.

Two branches of the Stony Creek have their rise in the township, and drain the western and northern portions, one of which furnishes water to propel one saw-mill and one grist-mill.

Land-holders, Population and Taxables.—In 1734 there were 24 land-holders, as follows: Philip Boehm, 200 acres; Peter Dehaven (Dehaven), 200; Cadwalader Morris, 200; John Rees, 150; William Coulston, 100; Humphrey Ellis, 50; William Robinson, 150; Thomas Fitzwater, 150; Henry Levering, 100; Alexander Till, 100; Henry Conrad, 200; Jacob Yost, 80; George Franks, 200; William Roberts, 100; Daniel Burn, 40; John David, 170; Isaac Williams, 100; George Castner, 200; William David, 100; Peter Hoxworth, 100; John Thomas, 100; John Mircle, 100; Jacob Levering, 100; and Abram Daws, 350.

John Philip Boehm, Henry Conrad, Jacob Yost, Jacob and Henry Levering, Peter In De Haven and John Mircle (Markley) were Germans, and paid quit-rent.

The lineal descendants of Dehaven, Conrad, Yost and Daws still own a portion, and some the original plantation.

Eight or nine of the aforementioned were Welsh, six or eight German and the remainder English. The English were the first to take up and locate, followed by the Welsh, and as early as 1711 we find the Germans making inroads and locating farms. So numerous

RESIDENCE OF THOMAS A. BIDDLE.
WHITPAIN TOWNSHIP, MONTGOMERY CO., PA.

have their descendants become that at the last Presidential election held in 1880 nearly three-fourths of the voters were of that extract.

Number of taxables in 1741, 56; 1762, 80; 1785, 144 and 14 single men; 1788, 119 and 19 single men; 1800, 140; 1828, 249; 1858, 344; 1860, 358; 1875, 345; 1883, 456.

In 1785 land was valued at £4 10s. per acre; 175 horses at £10 per head; 346 cattle at £3 per head; 2 bound servants at £20; one phaeton, £30; 2 grist-mills, £700; 1 saw-mill, £150; one oil-mill, £50; 2 tan-yards, £300; (now none, in 1884). In 1786 land was valued at £4 15s. per acre; 1787, £5; 1788-89, £5 2s. 6d; 1796, \$8; 1800, \$10; 1810, \$10; 1820, \$30; 1830, \$30; 1840, \$20; 1860, \$50; 1870, —? 1880, 150.

Population: 1790, —? 1800, 771; 1810, 995; 1820, 1126; 1830, 1187; 1850, 1351; 1870, 1350; 1880, 1429.

Taxes, —1777: whole amount of supply tax £241 11s. 7d.; stationary tax, £251 8s. 9½d. 1785: whole amount of duplicate, £91 6s. 6d. 1788: £187, 1s. 1d. 1794: £90 12s. 6d. 1800: \$355.17. 1810: \$520.18. 1860: whole amount of county tax, \$1549.41; State tax, \$1291.67. 1880: county tax, \$2497.50; State tax, \$412.00. 1883: whole amount of duplicate for county tax, \$2410.59.

In 1811 the assessor returned 99 dogs liable to taxation according to the act of Assembly, March 23, 1809, which amounted to \$27.

The tri-annual assessment for the year 1880 is reported as follows: 394 taxables; value of all real estate, \$1,305,580; value of all household furniture exceeding \$300, including gold and silver plate, \$3900; horses, mares, geldings and mules 419, valued at \$26,565; cattle 851, valued at \$24,545; notes and bonds, \$5400; occupations, \$31,050; pleasure carriages 103, valued at \$6525; aggregate amount of property taxable for county purposes, at the rate of two and one-half mills to the dollar, \$1,403,565; mortgages and judgments, \$83,000; number of gold watches, 12; common watches, 2.

In 1788 there were 90 farms, the largest, James Morris, 350 acres; 1883, largest farm, Albanus Styer, 150 acres; number of farms of 100 acres and upwards, 13; number of farms of 80 acres and under 100, 15; number of farms of 50 acres and under 80, 24; whole number of farms over 20 acres, 125; 1883, whole number of horses taxable, 389; cows, 821, William Singerly being the largest owner of stock, having 10 heads of horses, and 61 cows taxable.

The Styer family are the largest property-holders, holding in the aggregate 555 acres. Next largest, William Singerly, 191 acres.

Slaves or Servants.—In the assessment of 1763 three slaves are there mentioned.

During the Revolution there were several families that held slaves. In the *Pennsylvania Packet* of September 26, 1777, "David Knox offers a reward of twenty dollars for the return and recovery of a mulatto wench, 26 years old, named Stiffany." The last

that were held in the district were those of James Morris, two in number, but were freed prior to the year 1799.

Industries.—The chief occupation of the inhabitants has been farming, there being no minerals (yet discovered) to induce them to engage in other pursuits.

The land is now generally cleared and under a high state of cultivation, and produces good crops.

The first industry that we have any notice of was that of weaving, carried on in a small log house near Centre Square by Jacob Yost, in 1727. In 1732 he purchased what is known as the "Yost Farm," and carried on the business more extensively.

The Yosts were famed far and near for their sickles, scythes and edge-tools, which they made and carried on from 1760 to 1816 at the old homestead. These implements were all forged by hand. In 1746 the first grist-mill in the township was built, on Stony Creek, in the western portion, near the lines of Norriton and Worcester. The mill is yet standing.

James Morris, in the latter part of 1779 or 1780, built the grist-mill long known as Wertner's Mill. This was considered the best flouring-mill in the neighborhood.

About the year 1804, Charles Mathers built a mill along the Wissahickon.

In the assessment of 1785 there are two tanneries mentioned and one oil-mill.

The Conrad augers were first manufactured by John Conrad about the year 1806, and the business was carried on extensively until 1857, when it was removed to Fort Washington, Whitemarsh, and still continued by his sons, Albert and Isaac Conrad.

The one horse-power and threshing-machines were made at the Blue Bell by Samuel F. Shaeff in 1847.

Mowing and reaping-machines were first introduced and worked by Robert Findlay, of Centre Square. The machine was the Hussey pattern, and when in order for reaping took eight hands, including the driver, to operate it.

Justices of the Peace.—The first justice was Abram Daws, commissioned May 25, 1752. (Col. Rec. vol. vi).

June 6, 1777, Andrew Knox was appointed justice of the peace, and held that position until the time of his death, January, 1808.

Job Roberts and John Wentz were commissioned justices of the peace May 26, 1798, and filled that position until 1878.

In 1818, John Shenenberger was appointed, and filled that position by appointment and election until about the year 1856. John Heist and John Rile filled the position.

Since the change in the Constitution of 1838 the following persons have been justices: David Roberts, John Styer, Jacob Fisher, Ephraim H. Shearer, Jacob R. Yost, Jacob L. Rex, George G. McNeil and Victor Baker.

During the Revolution the citizens of the town-

ship shared the trials and conflicts of that dark period along with the other districts of the county.

According to the act of Assembly passed June 13, 1777, the county of Philadelphia was divided into seven battalions. The township of Whitpain was in the Fifth, and John Ryneer captain.

During the Revolutionary struggle, Brig.-Gen. Weeden's regiment of Virginia troops was encamped from October 19th to November 2, 1777, on the Morris and Gregar farms. The former is now owned by Saunders Lewis, and the latter by William Heyward Drayton.

about six miles from Norristown, three from White-marsh and one from Ambler Station, on the North Pennsylvania Railroad.

The present owner, Phœbe M. Lewis (wife of Saunders Lewis), represents by inheritance the fifth generation of continuous ownership: through her mother, Hannah M., wife of Dr. Thomas C. James; her grandmother, Elizabeth, wife of James Morris; her great grandfather, Abraham Dawes (son), whose father, Abraham Dawes, purchased four hundred acres of land in the year 1726, and of which the house, with a tract of one hundred and eight acres, is a part.

Residence of Saunders Lewis, Esq.

Condition in 1884.

WASHINGTON'S HEADQUARTERS, "JAMES MORRIS'" OCTOBER, 1777.

During their stay here the weather was very wet, rain falling almost every day. The soldiers were compelled to seek shelter during the night in the barns of the neighborhood. Several of the soldiers died here from sickness, and are buried in the graveyard at Boehm's Church.

Gen. Washington, during the time of the encampment, had his headquarters in the house then owned by James Morris. The house was built in the year 1736, and remains substantially in its original proportions, with the addition of a south wing (twenty-four feet by twenty-three feet), built in the year 1821. It is situated in Whitpain township, Montgomery County, between the Skippack and Morris roads;

Washington having removed his headquarters from Worcester to Dawsfield House (now the name of the property), called Camp Whippin, or James Morris, as appears by letters addressed by Col. Walter Stuart to President Wharton, dated "Camp Whippin, October 27, 1777," in Hazzard, and one other, by Gen. Reed to President Wharton, dated "Headquarters, James Morris', seventeen miles from Philadelphia, on the Skippack road, October 30, 1777," in which he says,—"The long residence of the army in this quarter has proven very distressing to the inhabitants, whose forage must be drawn from their subsistence."¹

¹ "Life and Correspondence of President Reed," edited by his grandson William B. Reed, Phila., 1847, vol. i., p. 332.

In the *Pennsylvania Packet*, August 29, 1878, the following appeared:

"Thirty Dollars reward. Stolen from Camp Whippin, 20th of October, 1777, a bay horse, fourteen hands high, with a bald face, and is six years old. The reward will be paid by applying to Andrew Porter, Capt. of Artillery, or Stephen Porter, Worcester township."

"Washington, in his march from Pennypacker's Mills to the Battle of Germantown, passed through the township. His course lay along the Skippack Road. Isaac McGlathery, a well-known and respected citizen of the district, acted as a guide to Maxwell's Brigade on that occasion, and led the way until a short distance of Chew's house."

After the fatal battle, during the retreat of the American army, a slight skirmish took place at Oil Mill Run, on the Skippack road, near the Broad Axe. A few were slightly wounded.

"The English Cavalry pursued the Americans on the Skippack Road, 16½ miles from Philadelphia, into Whitpain Township, as far as the Blue Bell. We have heard from an old friend, a witness, now at that place, that our militia was already there when the British cavalry arrived, and wheeled about to make good their retreat and return. He describes the confusion that existed among the Americans as past the power of description; sadness and consternation was expressed in every countenance. While the dead and dying (which had preceded this halt at the Blue Bell) were before seen moving onward for refuge, there could be seen many anxious women and children rushing to the scene to learn the fate of their friends, and to meet, if they could, the fathers, brothers, or other relatives who had been before sent forward for the engagement. Again and again the American officers were seen riding or running to the front of the militia with their drawn swords, threatening or persuading them to face about and meet the foe; but all efforts seemed to fail, and officers and men were still seen everywhere borne along on the retreat. They broke down fences and rushed away in confusion, as if determined no longer to hazard the chances of war in another onset."¹

"Andrew Knox, a prominent citizen of the Township, took an active part in the struggle for Independence. Having served as a Captain of a Volunteer Company, and rendered effectual service, Washington selected him as one, for his courage and efficiency, to prevent supplies being carried to the British army during their occupation of Philadelphia."

Upon the news reaching Gen. Howe of his appointment, Howe immediately offered a reward of one thousand four hundred pounds sterling for Mr. Knox's head, dead or alive, and dispatched a squad of men to capture him.

"About four o'clock, on the morning of the 14th of February, 1778, seven armed refugees approached his house; two stood sentry at the back windows, while the other five attempted the door. Mr. Knox, seizing the opening door with his left hand, and with a cutlass in the other, saluted the aggressors in a manner they did not expect, and repeating his strokes. The assailants meanwhile made repeated thrusts with their bayonets. By these Mr. Knox received two or three very slight flesh-wounds, and had his jacket pierced in several places, but the door standing ajar covered his vitals and saved his life. The attacking party presented their pieces and fired five balls and several buckshot through the door, one of the balls slightly wounding Squire Knox. Thinking the reports of the guns would alarm the neighborhood, the enemy retreated towards the city."²

Buck, the historian, in speaking of the affair, states "that the attack was made by the Tories of the neighborhood, the principal of which was Enoch Supplee, of Norriton, and who immediately fled, and, is supposed, joined De Lacey's battalion, in which he became an ensign, and in 1780 was sent to Georgia, where they got into a spirited skirmish with a detachment of Gen. Pickens' command."

"Esquire Knox, at the approach of day, collected some friends and went in pursuit. They tracked the party several miles by the blood on the snow. One of them, who took refuge in a house, was taken, brought back and made an ample confession. This fellow, being found to be a deserter from the American Army, was tried by a court-martial for desertion only, but condemned and executed near Montgomery Square. Another was apprehended after the British left Philadelphia, condemned by a civil court, and was executed."³

The desperation of the struggle at Knox's house is shown by the bullet-holes through the door and bayonet-marks. The door is preserved, and still kept in the family of his grandson, Hon. Thomas P. Knox.

"At a meeting of Council, held in Philadelphia, February 24th, 1783, a letter was read from the Commissioners of the County, that John Shearer and Henry Conard, Collectors of Whitpain, had been robbed of Township Funds."⁴

This robbery was perpetrated by the notorious band of Doan's, of Bucks County, and occurred one dark night at the cross-roads, where the Sandy Hill school-house now stands.

According to the Act of Assembly, passed September 21, 1782, Daniel Yost was appointed assessor to assess the damage done to the inhabitants during the time that Gen. Howe held possession of Philadelphia, and returned the amount at six hundred and ten pound. The heaviest loss was appraised in favor of the Knox family.

Churches.—There are at present in the township four places of public worship, viz.: Boehm's (Reformed), St. John's (Lutheran), Union (Methodist) and Mount Pleasant (Baptist). In its early settlement there was little homogeneity among the emigrants to its borders; a century ago we find a great mixture of people, differing in lineage and religious faith; and so it has continued until the present day, comprising Friends, who either attended Gwynedd or Plymouth Meetings, Reformed, Lutheran, Methodist, Presbyterian and Baptists.

BOEHM'S REFORMED CHURCH, so called from its founder, is the oldest place of worship in the township and is situated at the intersection of the Blue Bell and Penlyn turnpike road with the old and ancient road, leading from North Wales to Plymouth, near the village of Blue Bell, and sixteen miles from Philadelphia.

There is no certain data concerning the time of the organization of the church at this place, on account of the early records having all been destroyed. The records of the founder were all kept as his private property, and destroyed by fire more than a half-century ago in an old house then standing at Second and Quarry Streets, Philadelphia, and those of his successor, Schlater, by the British at Chestnut Hill, when the army held possession of Philadelphia.

The earlier members of the church came from the Patatinate, Alsace, Swabia, Saxony and Switzerland between the years 1720 and 1760, and scattered themselves through the townships of Whitpain, Plymouth, Norriton and Upper Dublin.

⁴ Col. Rec., vol. xiii., p. 515.

Many of them were poor, and were sold as redemptioners to pay their passage over.

In I. D. Rupp's collection of German names, gives the time of their arrival, and the same names are recorded in the church-book. The Yosts arrived in 1727; Engarts, 1728; Clime, 1731; Sheive 1737; Rumer, 1741; Kurr, 1743; Shearer, Eberhard (Everhart), Etris and Korndeffer, 1748; Dull, Greger, Lotz, Klarr, Houser, Martin and Seltzer, 1749; Shaub, 1750; Schlatter, Ernst, Gubler, 1751; Singer, 1752.

The deed for the property, containing one acre of ground, was given February 8, 1748, by John Lewis, of the township of Merion, to the Rev. John Philip Boehm, Michael Clime, Arnold Rettershan and Andrew Acker, church wardens of the said congregation, for the sum of four pounds and tenshillings, "for the use of the congregation of the High Dutch Reformed Church founded by the Christian Synod, held at Dordrecht, in Holland, in the years 1618 and 1619, so that the said congregation shall hold, follow and adhere to the principles of the Heidelberg catechism and in subordination to the Reformed Classis at Amsterdam (Holland), and for no other use, intent or purpose whatsoever."

The first church, a small stone structure with pointed walls, was erected in 1740. At the building of this church Mr. Boehm labored with his own hands.

In 1818 a second church was built, forty-six by fifty feet (the first becoming too small), at a cost of four thousand dollars. This stood until 1870, when it was remodeled to the present size, surmounted with a steeple and bell, at a cost of five thousand four hundred and thirty-eight dollars, and can seat five hundred people.

A neat parsonage, sexton's house and comfortable shedding for thirty-two carriages adjoins the church. The first sheds were erected nearly fifty years ago.

The congregation now, 1884, numbers two hundred active members.

The graveyard adjoins the church and covers nearly three acres of ground, with seven acres adjoining to be used for burial purposes when needed.

All of the communicant members that are contributors, rich or poor, are entitled to lots for their families, without distinction of race or color.

There is a lot of free ground open to all for interment.

The most ancient names found on the tombstones are Knorr, Etris, Martin, Greenawalt, De Haven, Doll, Eberhard, Singer, Sheive, Greger, Yost, Rumer, Schlatter, Shearer, Klair, Spitznogle, Engard and Remig; those of more recent, are Hoover, Earnest, Jones, Detwiler, Dager, Rile, Sechler, Frantz, Wentz, Sholl, Levering, Hentz, Bodey, Wertsner and Selser.

The pastors have been the following: Revs. John Philip Boehm, the founder, from 1740-49; Michael Schlatter, the missionary, 1749-56; 1756-60, supplies; John George Alsentz, 1760-69; Christian Foehring, 1769-72; Gabriel Gebhard, 1772-74; John W. Ingold,

1774-75; John H. Weikel, 1775-76; 1776-83, vacant; John Herman Winkhaus, 1784-87; 1787-89, vacant; Philip Pauli, 1789-93; Thomas Pomp, 1793-96; Samuel Helfenstein, Sr., D.D., 1796-99; for six months in 1799, supplied (Frederick Herman); 1799-1800, Thomas Pomp, Jr.; Gabriel Gobrech, 1800-2; George Wack, 1802-34; Samuel Helfenstein, Jr., 1834-44; William E. Cornwell, 1844-50; Jacob B. Keller, 1850-54; George D. Wolfe, 1854-55; Samuel G. Wagner, 1855-68; Charles G. Fisher, 1868-73; John H. Sechler, 1875 to the present, 1884.

The remains of the founder slumber beneath the walls of the present building, being buried there in 1749. In the yard the remains of the Rev. George Wack, who preached for the congregation thirty years,

REV. MICHAEL SCHLATTER.

Hons. Philip Hoover and Mahlon Sellers, members of the Pennsylvania Legislature, Jacob Yost, Casper Schlatter and Daniel Yost, commissioners of Montgomery County, are interred.

During the Revolution the old church was used for a hospital by Brigadier-General Weeden's brigade, which was encamped on the farms of James Morris and George Greger (now owned by Saunders Lewis and W. Heyward Drayton), near the church. Several soldiers that died in the church and at the camp are buried in the yard, without any stone to point to their final resting-place.

The old record-book still extant was commenced in 1764 by Rev. George Alsentz, pastor; John Marten, Frederick Dull, Jacob Gobler, John Etris, elders; Philip Rittershau and Casper Schlatter, deacons.

The first baptism is that of a child of "John and

Barbara Schlater, baptized May 27, 1764, and received the name of John."

The descendants of Dull and Schlater and Shearer are still in connection with the church as members, and the descendants of the Yosts, down to the sixth generation, are still in membership, and through that long line almost continuously have been officers.

A piece of ground was purchased in 1760 for a school-house, adjoining the church, and a building erected thereon, which was kept for several years as a parochial school, and was almost the first school in the township where public instruction was given.

This congregation was among the earliest to adopt and open a Sunday-school under the present system. On July 17, 1834, a school was opened with one hundred and seventeen scholars, and has been kept open ever since, and now numbers nearly two hundred teachers and scholars.

The following persons have filled the different offices connected with the school since its foundation:

Superintendents: Frederick Nuss, Benjamin Hill, Charles Gearhart, James McCombs, John Fitzgerald, Sr., Anthony Bernhard, Abm. Dull, Charles H. Rile, Rev. Samuel G. Wagner, Hiram C. Hoover, Rev. Charles G. Fisher, Jones Detwiler and Francis C. Hoover.

Presidents: Rev. Samuel Helfenstein, 1837-43; Rev. William E. Cornwell, 1844-48; John Fitzgerald, 1848-55; Hiram C. Hoover, 1855-58; Rev. S. G. Wagner, 1858-61; Hiram C. Hoover, 1861-84.

Secretaries: Benjamin Hill, Anthony Bernhard, George Hoot, Samuel B. Davis, Charles H. Rile, Jones Detwiler, 1855-84, twenty-nine years.

Treasurers: John Fitzgerald, Charles Gearhart, Samuel B. Davis, Anthony Bernhard, Samuel B. Davis, George Hoot, Abm. Dull, Jacob Hoover, Samuel D. Shearer, Francis C. Hoover, George Rossiter and Alexander Miller.

REV. JOHN PHILIP BOEHM.—There is nothing at hand to tell us when the subject of this sketch was born. The date of his birth and circumstances of his early life would have probably been learned from certain papers, to which and their loss more particular reference will be hereinafter made. Very little is known of the Rev. Boehm prior to his coming to America. Of the date of his arrival nothing definite is known, nor is it probable that the precise date can ever be known. Certain documents extant enable us to approximate the time.

"Among the Protestants who were subjects to the Emperor of Germany, a Prince in Amity with the Crown of Great Britain, transported themselves and estates into the province of Pennsylvania between the years 1701 and 1718."¹

In the translation of the proceedings of the Classis of Amsterdam in regard to the case of the Rev. John Philip Boehm, held in the city of New York, July,

1728, by the Rev. T. W. Chambers, pastor of the Collegiate Protestant Dutch Church, New York (1876), and published in the *Mercersburg Review*, (vol. xxiii., October number, 1876), the following is found:

"From this document it appears that Mr. Boehm arrived in this country as early as the year 1720. He came from the Palatinate. Having been schoolmaster and foresinger in Worms, a city of Germany, for about seven years, he found a demand for his services as reader (*Vorleser*) upon his arrival here. The Reformed people around him were destitute of the means of grace, and he became a sort of pastor to them, without receiving any compensation for his services. So well did he perform these services for the destitute Reformed people that they besought him to assume the functions of his ministerial office. This he did in 1725, receiving as compensation only the voluntary contributions of the people."

It appears that he began to officiate as a minister before he had a regular license, to which he was no doubt pressed by the peculiar necessities of the times. That it was not a willful disregard of ecclesiastical order may be seen from the fact that as soon as the way was open he cheerfully submitted to a regular introduction into the holy office.

The great influx of the German emigrants began about the year 1707, and in 1730-40 there were nearly twenty thousand Germans in the province, and many were connected with the Reformed Church; hence the necessity of having some one to attend to their spiritual wants,—preaching, catechising and the administration of the ordinances.

Mr. Boehm was the first Reformed (either Dutch or German) that taught the doctrines of the Heidelberg Catechism in the province of Pennsylvania.

When the Rev. Geo. Michael Weiss, the first licensed and ordained minister of the Reformed (German) Church, arrived here, September 21, 1727, he visited Schippach (Skippack) congregation and preached there. This brought him into collision with Mr. Boehm, who had been preaching there for some time without regular license and ordination. Some of the people then disclaimed Mr. Boehm's ministerial acts, because he was not ordained, and wished to retain Mr. Weiss as their regular minister.

In July, 1728, the Consistories of the three congregations where Mr. Boehm had been preaching,—Wit Marshen² (Whitemarsh), Schippach (Skippack) and Falkner's Schwam (Swamp),—sent an application to the New York Classis to have Mr. Boehm licensed, ordained and his former pastoral acts approved,—

"The appeal sets forth that Johan Philips Böhm has so borne himself in the discharge of his Godly office, not only in the doctrine of the Reformed Church, but also in his life, that we have not the smallest complaint to make against him in our hearts.

"Our three still small and poor congregations of Falkner's Schwam, Schippach and Wit Marshen, of which the greatest is composed of only twenty-four males, the second about twenty, and the least of not more than fourteen, are spread out more than sixty English miles from each other, and full one hundred and seventy distant from New York.

"Signed by William DeWees, Isaac Dilbeck, George Philip Trotterer, Frederick Antes, Joh. Meyer, Jac. Meyer, Gabriel Schuller, John Berkenbell, Sebastian Reifsnnyder, Ludwig Knauwa, Laurens Bingeman, Joh.

² Whitemarsh, where the Barren Hill Lutheran Church now stands; Skippack, now Wentz's Reformed Church, Worcester; Falkner Swamp, now Swamp Churches, New Hanover township, Montgomery Co., yet a large and flourishing congregation.

¹Arch. of Penna., vol. vii., 2d series, p. 114. The name of John Philip Boehm is mentioned.

Ravenstock, Georg Klauer, Leonhard Sperr, John Stephen Ulrich and John Le Fevre, in behalf of the three congregations, July, 1728."

This appeal was forwarded to the Classis of Amsterdam, in Holland, under whose jurisdiction the American Classis was at the time (and so remained until 1790), and a favorable answer was returned, declaring that all the public acts and ministrations of Mr. Boehm were made valid, dated June 20, 1729.

To this Mr. Weiss assented, and on the 23d of November of that year the Rev. Mr. Boehm was ordained and set apart to the work of the holy ministry by Henricus Boel and Gualterius du Bois, under the oversight of the Consistory of the Low Dutch Church of New York.

The labors of Mr. Boehm were exceedingly exhausting in Eastern Pennsylvania. His labors extended, besides the congregations already named, to Philadelphia, Germantown, Whitpain, Forks of the Delaware, then Bucks County, now Northampton, ministering unto them and laying the foundation for future churches.

The Moravians, headed by Count Zinzendorf, inaugurated a Pietistic movement, and called several Synods, and invited Christians of all denominations to meet with them. In the Reformed Church, Jacob Lischy, John Bechtel, Henry Antes and many others favored the movement. Against this movement Mr. Boehm took a firm stand, and had great concern of mind, and had it not been for the timely arrival of Muhlenberg, who sided with Boehm, the Reformed and Lutheran Churches would have been swallowed up by the movement.

Schlatter, in his journal, says, "Shortly after my arrival in Philadelphia I went to visit Mr. Boehm, one of the oldest ministers of the Reformed Church, and the old man, after he heard of my business, felt very glad and promised to assist me in my labors."

At the organization of the first German Reformed Synod, held in Philadelphia, September 29, 1747, the Rev. John Philip Boehm was present. He was secretary of that body in 1748; a copy of the minutes in his own hand is still extant, and shows that he was an excellent penman.

The exact time when Mr. Boehm located in Whitpain is not known. Among the list of land-holders marked in the survey of the province in 1734 his name is marked as having two hundred acres, and paid a *quit-rent* for the same.

The deed for the property where he resided at the time of his death (near the church bearing his name), is dated September 9, 1736, and contains two hundred acres, and cost £165 13s. 1d.

In Whitpain, Mr. Boehm preached at his own house and other private houses of the neighbors.

On the 29th of January, 1749, the Rev. Boehm, at the request of Mr. Schlatter, took upon himself the duty to attend to the wants of Macungie and Egypt (now Northampton County), with his congregation in Whitpain.

Confining now his labors to a narrower circle, on account of the growing infirmities of old age, he continued zealous for Christ and the church up to the day of his death, at the house of his oldest son, April 29, 1749, having on the previous day administered the Holy Communion to the Egypt congregation, in Northampton County.

He was interred under the altar of the church, in front of the pulpit, of the church bearing his name. The funeral sermon on the occasion was preached by Martin Kolb (Kulp), a Mennonite minister.

On the 7th of May, 1749, Mr. Schlatter, who was absent on a missionary tour when Mr. Boehm's death occurred, improved the occasion and honored his memory with a funeral sermon, delivered in the church at Germantown; and he testifies that his memory is cherished and blessed by many.

Mr. Boehm was a man of ability and bore a strong attachment to the church which he labored so hard and zealously to establish and plant in the then new country. He held extensive correspondence with the church in Europe at an early day, and was careful to preserve all such letters, documents and records as pertained to the business of the church in those primitive days. These he carefully kept in a large iron-bound chest. After his death this chest was moved to Philadelphia and was there lost in the flames.

Mr. Boehm became a heavy land-owner, although he did not set his heart upon it, as has already been stated. At the time of his death he owned five hundred and fifty acres and one hundred and forty-six perches of land, as follows: In Whitpain, two hundred acres (homestead); Saucon, Bucks Co., two hundred acres; Skippack, Philadelphia Co., one hundred and fifty acres, one hundred and forty-six perches.

ST. JOHN'S LUTHERAN CHURCH is situated on the Skippack turnpike, about one mile above the village of Centre Square. It stands upon an elevated spot overlooking the surrounding country in every direction, and is built of stone surmounted by a belfry.

The deed for the property, containing one acre, was given on the 26th of June, 1773, by George Kastner and wife to Philip Bower and George Berkeimer, of Whitpain; Michael Henkey, George Gossinger, Adam Fleck, and Peter Young (of Gwynedd), and George Heyberger (of Worcester), building committee. After the church was finished, on the 28th of June, 1773, the building committee conveyed the building and grounds to Abm. Dannewer (of Gwynedd), Michael Hufacre, Jacob Carr and Philip Shenaberger (of Whitpain), and Leonard Berkeimer, and Philip Hoffman (of Worcester), trustees of the congregation.

The first positive evidence we have of a church here is in 1769, when the Rev. John Frederick Schmidt, having accepted a call to the charge of the church at Germantown, preached here every alternate Sunday.

The first edifice was erected about the year 1771 and stood until 1838, when the present one was erected.

The Rev. Mr. Schmidt served as pastor from 1769 to 1786. When the British took possession of Philadelphia the Rev. Mr. Schmidt, on account of his well-known republican sentiments, deemed it most prudent to retire to New Goshenhoppen, where he remained until the royal army evacuated the city. Whilst Washington had his headquarters in Worcester the building was used by the Americans for a hospital. Many of the soldiers of the Revolution, who died from wounds or sickness after the battle of Germantown are buried here, without any stone to mark their final resting-place.

A handsome marble stone marks the grave of Christian Moser, who died December 22, 1838, aged eighty-four years. He personally shared in the sanguinary conflicts of Paoli, and at the taking of Stony Point and the battle of Germantown.

The Rev. Anthony Hecht was the second minister in charge, 1786 to 1792, when he was succeeded by the Rev. Jacob Van Buskirk until 1796, who also had charge of Puff's, Upper Dublin, and the Yellow Church, Gwynedd.

There was a vacancy in the pastorate for a short time, which was supplied by the Rev. Messrs. Shaffer, of Germantown.

Rev. Henry Geisenheimer came about 1797. The Rev. Charles Wildbahn was the next pastor. Shortly after Mr. Wildbahn took charge death removed him, and his remains lie in the graveyard. In 1806 the Rev. J. C. Rebenach assumed the charge. In 1810 the Rev. John Wiand took his place and stayed until 1826, when the Rev. George Heilig took charge and continued until 1843. He was succeeded by the Rev. Jacob Medart until 1855. The Rev. John W. Hassler was the next pastor until about 1864; the Rev. Rightmyer until 1868. The Rev. E. L. Reed preached his introductory sermon June 28, 1868, and resigned June 27, 1869. Rev. H. M. Bickel was elected pastor February 20, 1870, and resigned July 11, 1875. Rev. L. D. Coleman was installed December 12, 1875, and resigned February 20, 1881. Rev. H. B. Strodach was elected pastor October 24, 1881, and preached his farewell sermon July 1, 1883. Rev. L. D. Coleman was again elected pastor January 7, 1884.

From its first organization until 1870 the congregation stood in connection with the Gwynedd or North Wales congregation and constituted a charge.

In the graveyard in the rear of the church, upon the tombstones the most common are the following names: Osborne, Dannehower, Fetzner, Berkheimer, Zearfoss, Werkheiser, Hurst, Hallman, Gouldsey, Layman, Dotts, Hoffman, Preston, Choyce, Longacre, Deal, Hoffecker, Kibblehouse, Lightcap, Castner, Moser, Miller, Knipe, Lutz, Bisbing, Cowden, Zeiber, Hunsberger, Markley, Fleck and Fulmer.

The whole inclosure is well shaded with trees and is surrounded with a good and substantial fence. The

congregation owns a good and comfortable house for the sexton and fine shedding for horses, and has expended for repairs and buildings since 1880, \$1583.69.

The present officers are: Elders, Henry Moser, Victor H. Baker; Deacons, Jacob Denner, Samuel C. Seiple, M.D.; Trustees, Jacob Beidman, Josiah M. Beyer and William Gray.

About the year 1840 a Sunday school was first organized, and is regularly kept open during the summer season, and now, in 1883, numbers one hundred scholars.

Whole number of communicant members, one hundred and twenty.

UNION METHODIST EPISCOPAL CHURCH is situated near the centre of the township, on a public road leading from the Skippack turnpike to the Jolly road.

The deed conveying the land was given September 4, 1813, by James Buck and Elizabeth, his wife, to Abm. Supplee, Samuel Supplee and Nathan Supplee (of the township of Worcester), John Giffin (of Gwynedd), David Supplee (of Norriton), Isaac Zimmerman and Jacob Zimmerman (of Whitpain), Samuel Harvey and Samuel Ashmead (of Germantown), and contained one hundred and twenty-one perches.

The above-named trustees were nearly all members of the Methodist Episcopal Church or in sympathy with the same.

The next year a stone meeting-house was built. The date-stone says, "Union Meeting-House, built in 1814." The pastors of the Bethel Methodist Episcopal Church preach here every two weeks. The intent of having a Union meeting-house here was to accommodate ministers of all Christian denominations when not in use by the Methodists.

During the excitement, and at the time the division among Friends took place, Edward Hicks frequently preached within its walls; and to this day Friends frequently hold appointed meetings here.

The names most common on the tombstones found in the yard are those of Zimmerman, Supplee, Brown, Smith, Fitzgerald, Kibblehouse, Shaeff, Roberts and Beck.

During the summer and latter part of 1882, the building was entirely remodeled, and the present neat structure finished at a cost of one thousand dollars, which was chiefly borne by a few persons; the entire membership at present does not exceed twelve persons.

The church was rededicated December 10, 1882; the sermon on the occasion was preached by Rev. G. McLaughlin; text, Rev. xxii. 5.

The present trustees are George F. Shaeff, Charles De Prefontaine and Thomas Stockdale.

A Sunday-school is now regularly kept open during the summer season, with Charles De Prefontaine as superintendent.

MOUNT PLEASANT BAPTIST CHURCH is situated on a high and beautiful location on the Morris road in the eastern portion of the township. The deed for

the property was given by Thomas C. James, of the city of Philadelphia, Doctor of Medicine, and Hannah, his wife, to Philip Matthias, Benjamin Mattis and Jacob Conrad, all of Montgomery County, and is dated 3d of Seventh Month 1834, and contains three-fourths of an acre.

The same year a stone building was erected, not of large dimensions, but repaired and assuming its present appearance in 1865; surrounding is a small graveyard, beautifully laid out, and shedding erected for several horses.

The most common names in the graveyard, are Coleman, Matthias, McClay, Bartleson, Rynear, Jones, Conrad, Speery, Gregar, Pontzler, Davis and Caldwell.

The first organization of the congregation took place May 24, 1834, with sixteen members. The Church Council consisted of Revs. Joseph Kennard, Levi Beck, David Trite and Jacob Coleman. The congregation now numbers about one hundred and twelve.

The Pastors have been Rev. Levi G. Beck, the founder; Rev. R. F. Young of Chestnut Hill. The stay of Mr. Young embraced three years, and was succeeded on the 20th of September, 1837, by Rev. Thomas S. Griffith, whose pastorate lasted nearly five years. Rev. John S. Eisenburg was ordained March 17, 1842. Rev. John S. Baker succeeded him July 1, 1843, in which year Charles Matthias and Jacob Conrad were elected deacons, and still fill that position with much credit to themselves and acceptance to the church. Baker's term expired in May, 1848. Rev. John S. Christine became his successor. A vacancy of two years occurred. In 1850 the church was supplied by the venerable Rev. Joseph Matthias, of Hilltown, Bucks Co. On the 8th day of September, 1852, the Rev. Uriah Cauffman became pastor; his stay was short. In March, 1853, the Rev. Joseph Sagebeer took charge. In August, 1856, Rev. Thomas C. Trotter became pastor, and remained until 1860. In 1865, Mr. Trotter again took charge and stayed until 1870. In 1860 the Rev. W. B. Toland became pastor and remained during the war of Rebellion. In 1870, on the 1st day of October, the Rev. Chas. T. Hallowell, a student from the Crozer Theological Seminary, at Chester, took charge and remained until 1875. He was succeeded by Rev. C. T. Frame, who remained until 1879. The Rev. Joseph Sagebeer is the present pastor.

Jacob Conrad and wife, Ann, of the original founders, are still living, 1884. "In December, 1823, the Rev. John S. Jenkins, of the Baptist Church, Lower Providence, preached the first sermon ever delivered by a Baptist minister in that neighborhood. Nine years later Mr. Jenkins, in company with the Revs. T. Robinson and Horatio Gates Jones, held meetings for two days near the present locality of the church, and four persons were afterwards baptized." The Wissahickon Creek is the usual place for baptism.

In 1868 the annual meeting of the North Philadel-

phia Baptist Association was held with the church at this place.

Private Burying-Grounds.—The first and probably the oldest is on the farm of Wm. Funk, along the Skippack turnpike, near the bridge over Oil Mill Run. At one time, tradition says, there were fifty or more graves visible here.

There is one large stone (made of soapstone) yet standing, and containing the following inscription: "Here lyeth y^e body of Ann, late wife of Thomas McCarty, who departed this life March 21, y^e year of our Lord 1714-15, aged 57." On the back of the stone the following quaint inscription is contained:

"Although my body lies in earth,
I wish my friends both joy and mirth,
Their interest prize
To live with Christ, we all shall rise;
For as the Scripture text declares
That we shall live; and if not live,
Then woe be to that mortal man
That in God's judgment cannot stand."

On the farm now owned by Tyson Wentz, on the road leading from the Skippack turnpike to the Morris road, the remains of a burying-ground are yet visible. Two graves are marked with head-stones, with the following inscriptions: "Barbara Kress, died January, 1757, aged 62 years;" "Charles Kress, died November 10, 1766, aged 72 years."

Tradition says that it was originally intended to erect Boehm's church on this spot.

Villages.—CENTRE SQUARE is situated at the intersection of the State of Swedes' Ford road with the Skippack turnpike.

Nicholas Scull on his map mentions an inn here in 1758, called the "Waggon." On the maps prepared by the British during the Revolution in the campaign of 1777, it is marked and called by that name. In 1762, Thomas Fitzwater is marked in the number of taxables as inn-keeper here.

The first post-office in the township was established here in 1828, and James Bush appointed postmaster. The distance from Washington is one hundred and fifty-three miles; Harrisburg one hundred and six miles. It is still kept here, and Mr. Rouff is postmaster.

In the past few years the village has rapidly improved, and now contains one inn, two stores, post-office, wheelwright and blacksmith, tin, baker, and shoemaker-shops and forty private dwellings. The walks are laid with boards.

A store was first started here about 1800 by Thomas Humphrey.

For many years an extensive lumber-yard was carried on here by Thomas H. Wentz, who afterwards became a heavy dealer in lumber and a builder in Norristown.

The general elections and the township business has been transacted here since 1867.

The Centre Square Creamery started in 1880 is here located, and does a flourishing business.

Centre Square Lodge, I. O. of O. F., has a large hall

with two dwellings underneath, and hold their regular meetings on Saturday evenings.

At a large meeting of the citizens of the county, held here October 8, 1806, it was agreed to locate the present site for the Montgomery County Almshouse.

The Centre Square Association of Montgomery County for the recovery of stolen horses and the detection of thieves, was first organized at the public-house of Samuel Wentz, Centre Square December 11, 1819.

The permanent organization took place at the public house of Abrm. Wentz on the 23d following, when twenty seven persons signed the constitution, as follows: Joseph Butler, Daniel Wentz, Jonathan Paul, Samuel Wentz, Jonathan Ellis, Edward Foulke, Cadwalader Roberts, Abrm. Wentz, William E. Davis, William Ellis, Jr., Evan Jones, John Holt, Jesse Jenkins, Levi Foulke, John Styer, Henry Stern, Morgan Morgan, Jr., Nathan Evans, Thomas Humphrey, Jesse Spencer, David Acuff, Antrim Foulke, George M. Wentz, Isaac Shoemaker, Isaac Ellis, Jacob Styer and Daniel Kneedler.

The first president was Abrm. Wentz, succeeded by Evan Jones in 1822, who held the position twenty years; then John Rex, who held the position for a few years, and was followed by John Styer, Esq., who filled the position until his death.

The annual meetings are held alternately in the townships of Whitpain and Gwynedd, on the second Thursday in November, and no person can be a member who does not reside within seven miles of the point where the Swedes Ford road crosses the line dividing the townships of Whitpain and Gwynedd.

Present officers (1884): President, Algernon S. Jenkins, Esq.; Secretary, William Jenkins; Treasurer, Aaron Styer; Committee on Accounts, Septimus Roberts, Frank Zimmerman, J. W. Bisson and George Castner.

BLUE BELL is situated at the intersection of the old North Wales and Plymouth road and the Skippack turnpike.

The place contains one inn, store, post-office, blacksmith and wheelwright-shop, and nine dwellings; population in 1880, sixty-one.

In 1758 there was an inn here called the "White House," and the military maps of the surrounding country, prepared in 1777, call the place by that name.

In the year 1774 there was a large stone house built by James Bartleson on the west side of the Skippack road, and an inn was established here called the "Black Horse," a license was granted at the May Sessions of 1796, and the inn was kept open until about 1826. In this house the terrible Rader tragedy occurred on the morning of June 2, 1877.

For many years the village was known by the name of Pigeontown. The name is supposed to have originated from the large flocks of wild pigeons that frequented that section fifty years ago, and from an old resident, Morgan Morgan, who was a great trapper of pigeons and a famous gunsmith. The name was

changed to that now in use in 1840, and the present post-office established, (Benjamin Hillan, ex-member of the Legislature, appointed postmaster), which is still kept by Charles De Prefontaine. "On the evening of October 22, 1813, Pigeontown was illuminated in honor of General Harrison's capture of Malden," (*Norristown Herald* of that date). In the same paper, dated October 15, 1812, "Samuel Ashmead advertises a house and lot of six acres, a noted store-stand at Pigeontown."

In 1814, there was a volunteer infantry company rendezvoused here, by the name of Pigeontown Guards, commanded by Captain Kneezel.

The Whitpain Library Company, founded December 16, 1817, is kept here. The library contains two-thousand volumes. Original price of shares, four dollars; present, three dollars. The collection contains many valuable and rare books; number of share-holders about fifty.

Present managers, Benjamin P. Wertsner, William H. Slingluff, Jesse Streeper, Charles De Prefontaine, Charles K. Shoemaker, George G. Rossiter and Jones Detwiler.

The Blue Bell Horse Company, for the detection of thieves and the recovery of stolen horses, was first organized here November 23, 1841, with 54 members. Present officers: President, George F. Shaeff; Vice-President, Linford S. Preston; Secretary, Joseph P. Conard; Treasurer, David De Haven; Committee of Accounts, Jacob Hoover, Benjamin P. Wertsner and George G. McNeil. The annual meetings are held alternately at Centre Square; number of members eighty.

The Blue Bell Live-Stock Insurance Company organized September 15, 1855, holds its regular meetings here. Present officers: President, George F. Shaeff; Secretary, Jones Detwiler; Treasurer, Linford S. Preston; Managers, Jacob Hoover, Andrew Hart, Rynear Bradfield, George H. Tippin, George Amberg, Sr., and Henry C. Hoover.

The Blue Bell Benevolent Society was first organized April 15, 1867; number of members 133. Present officers: President, Jacob Hoover; Vice-President, George Shoemaker; Secretary, George G. Rossiter; Treasurer, William H. Slingluff; Trustees, Samuel D. Shearer, Linford S. Preston and Henry F. Conard.

BROAD AXE is situated in the lower part of the township along the Whitemarsh line, at the intersection of the Skippack turnpike and the Upper Dublin and Plymouth turnpike roads.

The village contains one inn, store, post-office, blacksmith and wheelwright-shops and six dwellings. A portion of the village is in the adjoining township.

Reading Howell, on his map of 1792, denotes a tavern here called "Broad Axe." The sign originally contained a broad axe, square and compass.

The post-office was first established here in 1855, with John Cadwallader, postmaster. The office is still kept here, and Jacob G. Dannehower, postmaster.

During the days of horse-racing a running course was here, one-half mile in length, extending from the village to the road leading to Wertsner's Mill. Many an exciting race here took place and was witnessed by large crowds. The ground was finally abandoned for that purpose in 1840.

The Washington Benevolent Society of the township of Whitpain, organized February 12, 1841, holds its regular meetings on the last Saturday evening of each month in the hall of the hotel. Present officers,—President, Francis Schlater; Vice-President, Charles Harner; Secretary, Charles Kehr; Treasurer, George Lower; Trustees, Reuben Ellis, Charles Aimen and Sylvester Jones; Door-Keeper, Anthony Hallman. For a period of thirty-eight years Francis H. Kehr filled the position of secretary.

The society, from its organization until 1881, paid out the sum of \$36,268.42 for relief and \$6565 for funerals, making a total of \$42,833.42.

FRANKLINVILLE is situated near the eastern portion of the township, at the intersection of the Morris and State roads, and contains one inn and seven dwellings.

The fine country-seat, farm and summer residence of William M. Singerly, of the *Philadelphia Record*, is located here. Here is to be seen one of the finest herds of "imported Holstein cattle" in Pennsylvania. In the assessment of 1882 he returned to the assessor sixty head, mostly of that breed, and kept on the farm.

Washington Square is located at the intersection of the township line, dividing the township from Norriton, and Centre square and Norristown turnpike, and contains one inn, wheelwright, blacksmith-shop and five dwellings.

Along the line of the Stony Creek Railroad,¹ which passes the entire width of the northern portion of the township, are the villages of Caster and Belfry. The former is located in the extreme western part, near the line of the townships of Norriton and Worcester, and contains a steam mill for grinding grain, coal-yard and several fine dwellings.

Belfry is located at the Worcester line, dividing that township from Whitpain and the Skippack road. A flour, feed, coal and lumber-yard, kept by Theodore Harrar, blacksmith shop and several houses, constitute the village. There is a post-office here, making the third in the district.

Schools and Education.—The first school-house in the township was located near the centre, along the Skippack road, where the road leading to the Union meeting-house intersects, and was taught by one William Knox about the year 1766.

Philip Dotterra and his wife, Jannegan, by their deed, dated April 16, 1760, sold sixty-one and a half perches of land for five shillings, situated at the junction of the North Wales road and the Pennlyn turn-

pike, to Philip Wentz, John Martin, Frederick Dull and Jacob Cobler for a school-house. A stone structure was shortly afterwards erected thereon. This was for a parochial school, as it was the custom of the early Germans, as soon as the church building was completed, to provide a school-house and teacher. The school was kept open to all that chose to comply with the regulations. The above-named persons were members and officers of Boehm's Church. The property now belongs to the congregation, and a house for the sexton occupies the old spot. Nicholas Korn-doffer taught the school in 1777.

Centre School is now located near the original spot of the first school, and was erected in 1800.

Ellis' school-house is located in the forks of the Swedes' Ford road and the Centre Square and Norristown turnpike road, and was first built on ground deeded September 10, 1787, by Isaac Ellis, Andrew Knox and wife, Isabella, containing six and one-half perches, for the sum of six shillings. The persons to whom the deed was given resided in the townships of Whitpain, Norriton and Plymouth, and the sum of forty-seven pounds was raised towards building a house, which was built the same season.

Sandy Hill school is situated at the Six Points, and was first built on ground deeded by Joseph Lukens and wife, Mary, in 1796, to trustees, members of Plymouth Meeting and Society of Friends. The supporters resided in the townships of Whitpain, Plymouth and Whitemarsh, and it was kept open to all that wished to send there.

The teacher was always employed by the trustees. In 1837 there were 40 males and 28 females from the district; from other districts, 29 males and 5 females, making a total of 106 scholars, all taught by one teacher, Benjamin Conrad.

Centre Square School was first erected on grounds purchased from Henry Groff and wife, Elizabeth, November 1, 1825, by Rev. George Wack and Henry Hurst, trustees appointed by the district.

There are at present six school-houses in the district; the last two, Franklinville and Shady Grove, have been located and built since the adoption of the school law.

The enactment of the school law, of 1834, raised a storm of opposition, especially among the Germans or their descendants. This was, however, not because they were opposed to education, but because it was "something new." To the credit of the township, be it recorded, that although there was strenuous opposition, it chose to adopt the common school system from the first, and never faltered in its support.

The school law first went into operation May 26, 1836; length of term, six months. On May 2, 1837, a vote was taken on the continuation of the system, and was continued by a vote of 70 in favor and 59 against.

The last election on the subject was held March 19, 1841, when eighty-nine votes were given in favor of its continuation and fifty-five against.

¹The Stony Creek Railroad was built, commencing in 1871, and opened January 1, 1874.

This virtually ended the opposition to free schools. They have been regularly kept open, varying in term from six to ten months; and to its credit there have been female teachers employed since 1841—forty-three years.

Prior to the adoption of the school law, the usual branches taught were spelling, reading, writing and arithmetic. Some few scholars studied grammar, mensuration and surveying. The books in general use were Comly's Primer and Spelling-Book; introduction, English Reader; sequel, Columbian Orator, Scott's Lessons and the American Speaker. The three last were considered high branches. Arithmetics: American Tutor (by Zachariah Jess), Pike's and Rose's. Geographies: Adams', Olney's and Smith's. These were generally used for reading-books, and the questions asked by the master (teacher).

The early school-houses were all built of stone. The desks were placed around against the walls, and the pupils occupying them sat facing the windows. Benches without backs, for the smaller scholars, occupied the middle of the room.

A desk for the teacher, a huge wood-stove in the middle of the room, a bucket, tin-cup, splint-broom, and what was called a "pass," a small paddle, having the words "In and Out" written in opposite sides, constituted the furniture of the room.

During the time of wood-stoves, it was customary for the larger boys at noon to cut the wood and carry the same in the house and place it around under the desks for use.

The larger girls took their turns in keeping the room clean.

The law for the education of poor children was passed April 4, 1809. By that act the assessors were required to take the census of all children between the ages of five and twelve years whose parents were unable to pay for their schooling.

In 1830 the assessor returned eighteen children from the district to be supported by the county.

The first teachers and their salaries in 1836.—Centre School, Dr. Pile, teacher, \$20 per month; Ellis School, George Roney, teacher, \$20 per month; Sandy Hill School, Benjamin Conray, teacher, \$20 per month; Centre Square School, T. G. Bates, teacher, \$20 per month; Franklinville School, Samuel Arnold, teacher, \$20 per month; Mount Pleasant School, Joseph Roney, teacher, \$20 per month.

Teachers and their salaries in 1883.—Centre School, Lizzie Hallowell, teacher, \$38 per month; Ellis School, Lillian Rynick, teacher, \$30 per month; Sandy Hill School, Annie Whitecomb, teacher, \$30 per month; Centre Square School, Reuben Beyer, teacher, \$38 per month; Franklinville School, Kate Hallman, teacher, \$38 per month; Mount Pleasant School (now Shady Grove), Maria Taggart, teacher, \$38 per month.

Whole number of scholars in the district in 1836, 294; whole number of scholars in the district in 1883,

216. Whole amount of cost for tuition and repairs in 1836, \$1203.09; whole amount of cost for tuition and repairs in 1883, \$1949.41.

Directors in 1836.—Charles Greger, Jacob Fisher, Peter C. Evans (secretary), John Styer, John Rile (president), John Heist, Abraham Wentz (treasurer, appointed outside of the board).

Directors in 1883.—Henry Hobensack (president), Jones Detwiler (secretary), Albert Katz (treasurer), Joseph C. Beyer, Samuel D. Shearer, Reuben Rodebaugh.

Roads.—The main roads that pass through the township are the Skippack, Morris, State or Swedes' Ford, and the road leading from North Wales Meeting-house to Plymouth.

The Skippack road, the most important highway in the township, was opened at an early date, concerning the inception of which we happen to have documentary evidence which is transferred to these pages. Before the year 1713, settlers had begun to occupy the country along the Skippack Creek, then known as Bebbler's township or tract; that it began to be felt necessary to have a central public highway leading to the northwest that would answer better than the crooked, winding paths through the woods and in places over almost impassable swamps. Accordingly, a petition was drawn up and presented to the Court of Quarter Sessions, held in Philadelphia, June 2, 1713.

"To the Court of Quarter Sessions held, in Philadelphia, June 2, 1713:

"The petition of the inhabitants of the townships of Skippack and several adjacent plantations in said county, humbly sheweth, that whereas, in the aforesaid township and neighbourhood thereof, pretty many families are already settled, and probably not a few more to settle in and about the same, And yet no road being laid out and established to accommodate your petitioners; but what paths have hitherto used are only upon sufferance, and liable to be fenced up. Therefore, your petitioners, both for the public good and their own convenience, humbly desire an order for the laying out and establishing a road or cartway from the upper end of said township down to the wide-marsh, or Farmer's mill, which will greatly tend to the satisfaction of your petitioners, who shall thankfully acknowledge the favor, etc."

"Signed by Dick Rosenberry, Henry Frey, Jacob Kolb, Claus Jansen, Peter Bon, Henrich Pannebecker, Thomas Kentworthy, Johannes Sholl, Peter Bellar, John Newberry, Peter Wentz, Abraham Le Fevre, William Renberry, John Krey, Andrew Shrager, Johannes Umstat, Hermanus Kuster, Heinrich Kolb, Daniel Dismant, Jacob Gaetsblack, Lorents Sweltzer, Mathias Tyson, Gerhard In Hoven, Gerhard Clemmens, James Been, Johannes Kolb, Martin Kolb, Jacob op den Graeff, Herman In Hoven."

The following is the report of the jury to lay out said road:

"Whereas, by virtue of an order of Court obtained by the Petition of the Inhabitants of Skippack for the laying out of a road from the said Skippack to Edward Farmer's mill, and the same being laid out, dissatisfaction to some of the Inhabitants of Farmer's township, application being made to the next succeeding Court for a review of the road, and persons being appointed, namely, Henry Sellen, James Shadeck, Robert Jones, John Roady, Edward Farmer, and Nicholas Scull, or any four of them, and they having reviewed the said Road, as Likewise a Certain Northeast line extending from the said Farmer's Mill up into the country, dividing Divers parcels of land, as by the platform hereunto annexed May more plainly appear, we do find the said line to be a more Direct and better Road with the variations therein laid down, and considerably and less injurious to the Inhabitants, greatly to the satisfaction of the

petitioners and the inhabitants in general, as witness our hands this twenty-sixth day of February, Anno Domini, 1713-14."

(Signed by)

"HENDEICH SELLEN.

"ROBERT JONES.

"JOHN RODY.

"EDWARD FARMER.

"NICHOLAS SCULL."

The following are the courses and distances:

"That this is a true return of the road from Skippack Creek, in Heber township, by Edward Farmer's mill, unto North Wales road bearing in course from the Skippack Creek 380 perches, varying from southeast seven degrees easterly; thence due southeast 2829 perches, except two small variations."

(Signed)

"MATTHEW ZIMMERMAN."

The following remonstrance was presented to the court:

"Whereas, this Honorable Court has lately granted a Road from Skippack to Edward Farmer's Mill, and the same having been viewed and laid out, We find it to be very much to our Prejudices and hurt, And whereas your Petitioners have already three allowed Roads through the township, and your Petitioners being generally poor, and have but small tracts of land, the said Road last granted Cutts four of these said small tracts, to the great prejudices of the owners, and laid out through four very bad swamps, not passable without bridges; therefore your Petitioners humbly pray that there may be a second review, and we doubt not but we can lay them out a Road far more convenient and straighter, and your Petitioners shall in duty bound pray."

(Signed)

"ABRAHAM DAWS.

"J. NICHOLAS SLEEGLEETZ.

"CASPER STAHL.

"NICHOLAS SCULL.

"and thirteen others."

On the northeast side of this road, on the draft, are marked the lands of Edward Farmer, William Taylor, Joseph Knight, Abm. Daws, Richard Whitpain and Basely Cox, passing through Worcester township, which is named "New Bristol." On the southwest side, beginning in the same order, are Casper Stahl, Robert Ashton, John Palmer, Mary Dane, Jonas Smyth and Basely Cox.

The bridge on the road over the Wissahickon Creek, near Farmer's Mill, was built about the year 1796.

The bridge over Oil-Mill Run, near the Broad Axe, was built in 1804, and cost \$1054.15.

The Skippack Creek at the road-crossing was bridged in 1826.

The Zachariah Creek at Stong's Mill, in Worcester township, was bridged in 1848.

An attempt was made in the year 1844 to turnpike the road, and a charter was obtained March 1, 1845. It was to commence at its junction with the Chestnut Hill and Spring House turnpike road, in Whitemarsh, and running through Skippackville to where the Skippack road intersects the Swamp road in Perkiomen township. John Jones, John Rex, Abm. Wentz, Sr., Joseph M. Mather, Morris Longstreth, Jacob G. Sorber, Cornelius Tyson, Henry Bergstresser, Jesse Gable, Charles Hendricks and Abraham Hydreck, were named the commissioners in the act, and the price of shares was fixed at fifty dollars.

This attempt failed, and the subject was again renewed, and another charter obtained dated March 13, 1853, the capital stock to consist of two hundred shares at twenty-five dollars.

William Michener, Charles Stout, John Hobensack, Frederick B. Robeson, David De Haven, George Scheetz, Philip S. Gerhard, John Fitzgerald, Sr. Francis Kehr, John Jones, Matthias Farringer, John F. Styre, Lawrence Lawrence, Levi Miller, Enos Hoxworth, Samuel F. Shaeff, Henry Dickinson, Samuel Streep, J. L. Rex, Joseph P. Conrad, Abram Wentz Sr., and Jacob Hoover were the commissioners named in the act, with power to construct a turnpike road, commencing at the Chestnut Hill and Spring House turnpike in Whitemarsh, passing through the villages of Broad Axe, Blue Bell and Centre Square. A supplement to the charter was procured, and extended the distance to St. John's Lutheran Church. Work was soon commenced and the entire distance was turnpiked. The first officers were the following: President, Joseph P. Conard, Secretary, Frederick Robeson; Treasurer, John Hobensack; Managers, Charles Stout, William Michener, Jacob Hoover and Francis Kehr. The old Swedes' Ford road was laid out in 1730. By an act of the Legislature, passed April 6, 1830, William Stokes, Merrick Reeder, of Bucks County, Joel K. Mann, Henry Scheetz, of Montgomery County, Dr. William Darlington and David Dickey, of Chester County, were appointed commissioners to straighten and widen the road from a point on the Delaware River, in Bucks County, through the above-named counties, and from that time the road has been called the State road. A turnpike road is constructed on portion of the same from Centre Square to Norristown.

The Morris road was first laid out according to the order of the court held in Philadelphia, September, 1741, to commence at Morris Mill (now, 1883, Conard's auger works), in Whitemarsh township, to Garret Clemmens' mill, in Upper Salford township.

The old road leading from North Wales Friends' Meeting-house to Friends' Meeting, Plymouth, was laid out at a very early date, probably before 1710, as Friends had settled both localities, but its course in the township has been considerably changed.

The rest of the roads have all been laid out since the formation of the county.

There are four turnpikes in and around the township, viz.: Skippack, Centre Square and Norristown, Blue Bell and Pennlyn, and Plymouth and Upper Dublin, along the southeast portion.

By the act of March, 1762,¹ the townships of Whitpain and Plymouth were formed into a district; each township was to elect one supervisor, and they were to act jointly in levying the taxes and mending the roads. With this act the inhabitants became dissatisfied, and after the year 1763 the township became a separate district.

In the year 1762¹ the whole amount of duplicate

¹ "Whereas, John Roberts being chosen Supervisor in the township of Whitpain by the direction of an Act of Assembly of this Province in March, 1762, and Barnabas Coulston, in the township of Plymouth, the said townships being made in one district by said act, and to act in conjunction in all expenses on public roads and highways in said district,

James H. M. Singletary

assessed for road purposes was £15 19s. 3d; whole amount paid for labor on roads, £9 1s. 9d.; cash paid John Roberts, supervisor, for commissions, 16s.; cash paid ditto for "assessing and drawing the duplicate and getting the same rectified before two justices of the peace, &c.," 5s. The wages paid at that time were 3s. 6d. per day.

Taverns and Public-Houses.—There has always been a good supply of public-houses in the township. Nicholas Scull, on his map of 1758, mentions two,—the "White Horse" and "Waggon." In 1749, John Bouton is marked as an inn-keeper.

In the list of taxables, of 1762, Abraham Wentz is marked as inn-keeper, and one hundred and fifty acres of land; Derrick Vaupelt, ditto, twenty-five acres; Thomas Fitzwater, ditto, and forty acres.

At the August Sessions of 1797, Barbara Rynear, John Wentz, Leonard Styer, James Bartleson and Nicholas Swoyer were licensed to keep public-houses.

In 1808, Joseph Haws, Thomas Humphrey, Joseph Prichard, John Yetter, Valentine Bush, Jesse Fitzgerald and Jonathan Philips kept licensed houses, and were as follows: Bush's or "White Horse," Centre square, Wentz, Pigeontown (Blue Bell), "Black Horse," ditto, and Broad Axe. These were all located along the Skippack road, within the distance of four and a half miles. Of this number, Bush's "Big Brick" and Wentz's have been abandoned.

Wentz's, having the "Rising Sun" for a sign, was built in 1764. The house is still standing, and in good condition, being built with heavy brick walls, two stories in height, with heavy plaster cornice on all four sides. In the days of wagon travel this was the chief stopping-place for the heavy teams and was called the wheat market. The millers from the lower mills would meet the farmers here and purchase their grain.

The general elections were held here from 1831 to 1867, when the house was closed to the public. For one hundred and three years this same building was known as a public-house.

On the 4th of October, 1788, the county meeting for the nomination of a county ticket to be supported at the general election was held at the public-house of John Wentz.

Francis Swaine, high-sheriff of Montgomery County, advertises for sale, in the *Pennsylvania Gazette*, on

Monday, February 23, 1789 at the public-house of John Wentz, a tract of land containing fifty acres, the property of Peter Bisbing.

BIOGRAPHICAL SKETCHES.

WILLIAM M. SINGERLY.

The establishment, by William M. Singerly, of a country home in Whitpain, at Franklinville, Gwynedd Station, on the North Penn Railroad, was an important event for the people of the township and the county, for it ultimately led to the development of what is probably the most extensive and elaborate high-grade stock-farm in the country, which, as a kind of informal agricultural academy, has exerted a marked influence upon the advancement of farming and stock interests in the region round about. It has, as an educational institution, taught many practical object-lessons. The way in which it came to pass that a young business man, city-born and city-bred, became the owner and manager of a great farm and herds of cattle and sheep, and gained an intimate knowledge of agricultural methods and scientific systems of feeding and caring for animals, was this: In 1872, his health and strength having become slightly impaired by close and constant application to weighty business matters, and by the varied and unceasing demands always made upon the time and consideration of a man of affairs, he was urged by his father to seek the recuperation which a summer home in the country would afford. Thus counseled, he bought a little farm of sixty-eight acres, to which, in the summer of 1873, he removed. From this little beginning, made with no other thought or object than we have indicated, grew, by occasional additions, the "Record farms" of six hundred acres, which, in their improved condition, with the immense buildings upon them and the stock which they support, represent an investment of about a quarter of a million dollars. The land, which had been somewhat impoverished, was, by careful fertilizing processes, brought into a high degree of richness, a careful plan of drainage was carried out and the utmost pains taken to produce the most desirable crops in greatest possible quantity and best quality. Mr. Singerly's latent natural taste for the healthful freedom of outdoor life, and his love for the nobler domestic animals, were both quickened, and with the energy which has characterized him in other extensive enterprises, and the organizing ability which has made them successful, he entered ambitiously upon the difficult but absorbing task of perfecting the best stock-farm in the State. No effort or expense was spared which tended toward the realization of his ideal in this direction.

Some idea of the extent of Mr. Singerly's stock

The said townships being nearly equal burthend with roades, and the inhabitants of each township near as equal in number and ability to maintain the said roades, doth rather chuse to act separately, and for the better confirmation the said John Roberts, of Whitpain, doth hereby discharge and acquit the said Barnabas Coulston, of Plymouth, of all and every charge and expense of what kind soever of all roades in the Township of Whitpain."

"Signed by order of the Inhabitants of Whitpain, March 5th 1763, John Roberts, Charles, Jolly, Abraham Wentz, Jacob Levering, Jacob Roberts, John Lewis, Andrew Knox, Thomas Adams, Philip Richardson, Philip Sheuenberger, Joshua Dickinson, Benjamin Dickinson, William Davis, Jonathan Taylor, Joseph Conrod, John Dehaven, Joseph Roberts, Joshua Richards, Jonas Supplee, George Robinson, William Robinson, Owen Thomas and William Dehaven.

farming enterprise may be conveyed by the statement that in February, 1885, he had about one hundred and sixty thoroughbred Holstein yearlings, constituting undoubtedly the finest private herd in the country, and he does not propose selling until he has three hundred, which number will far exceed in size any high grade herd upon this side of the Atlantic, and, perhaps, in the world. He has two hundred cows, heifers and calves, all thorough or high-breeds; about one hundred and thirty fattening steers, and eight hundred and fifty sheep. Of the latter he is a very large pen-feeder, and one year wintered over twelve hundred. His sheep are mostly high grade Cotswolds, but he has some South-downs for the purpose of insuring plumpness as well as large size in the spring lambs. In the spring of 1882 he sold in New York, for export, four hundred and forty-three, which averaged one hundred and sixty-six pounds each, and were probably the finest lot of sheep ever sold in the United States.

Mr. Singerly is a strong advocate of the system of "soiling" or stall-feeding cattle, and the practice is followed at the "Record farms" on a large scale with the result of proving its great superiority over pasturing in economy of food and production of milk. In one stable, in what has come to be known throughout the Southern part of the county as "Singerly's big barn," are to be seen a hundred handsome Holstein cows, all comfortably stalled, and with pure running water before them.

Always fond of a fine horse, Mr. Singerly's regard for the noblest of our dumb friends has increased considerably, as he has become from year to year more interested in his farm and in out-door life. The horses in use at the farm are fine specimens of their kind, but it is in Kentucky that he is interested in steeds of a finer strain of blood and higher spirits. He has ten selected mares, every one of which has shown him portions of a mile at a two-thirty gait. It may be mentioned as indicative of his success in breeding trotting stock, that a colt Ben Van, (foaled by his road mare, Rena C. and sired by Red Wilkes), sold recently for one of the largest prices on record, and was pronounced the choicest yearling of Kentucky.

The breeding of stock on such an extensive scale as that followed at the "Record Farms," of course, renders necessary commodious buildings provided with all of the conveniences known to the most advanced students of farming. The main barn is two hundred and fourteen feet in length by forty-four in width, and two stories in height. The first story is built of brick, resting upon a substantial stone foundation, and the second story is frame. Other structures, extending from either side of the barn proper, increase the line of buildings nearly four hundred feet, while from the centre of the main building a wing, thirty feet in width, extends one hundred and fifty feet forward, dividing the yard into equal portions. The

great barn presents a pleasant appearance in detail and as a whole. A writer, in describing it in a local paper, says: "It is certainly about as near perfection as the present state of advancement of agricultural, mechanical and architectural science, coupled with abundance of means, will admit of. It is . . . the model barn of the country, and, in point of capacity, stands, it is said, second to none in the United States." Other buildings are clustered about the large structure, which has been briefly described, or located elsewhere about the grounds, as Mr. Singerly and his superintendent, Mr. Jason Sexton, have thought best. The system of soiling cattle and feeding ensilage, inaugurated in this portion of the country by the proprietor of this farm, made requisite a very large silo, one sufficient to hold three hundred tons of ensilage, an amount which will keep the entire herd of cattle for six months. There is an extensive creamery, in which golden butter is made from the rich milk of the Holstein cows; an engine-house, in which lies the motive-power that is made to serve various purposes; a blacksmith shop, where the horses of the farm are shod and tools repaired, and dwellings for various employees, all well adapted to the uses for which designed.

The colossal farming enterprise which identifies Mr. Singerly with Montgomery County will not only prove, as years go by, a great benefit to the people of this region in the way of giving innumerable suggestions, but will produce good results throughout the country wherever stock-raising is carried on and improved methods of farming are appreciated.

Concerning the other enterprises of the proprietor of the farm, it is scarcely within our province to speak in detail, for they belong more properly to the Philadelphia field of his activity than to that of Montgomery County. As the son of the late Joseph Singerly he enjoyed the advantages of inheriting business ability and receiving a business training. He graduated from the City High School in 1850, immediately entered mercantile life, and after ten years passed amidst commercial surroundings he was called to the management of the Germantown Passenger Railway, in which his father was a large stockholder. His ministration was sagacious and successful. Toward the close of his father's life he had absolute control of the road, a position involving great responsibility; and upon his death, in 1878, came into possession of its stock, valued at \$750,000, which he afterwards disposed of for twice that amount. On the 1st of May, 1877, Mr. Singerly secured control of the *Philadelphia Record*, and in 1881-82 erected the superb building on Chestnut Street, from which that journal is now sent broadcast through town and country, and which is a monument to its remarkable success. Neither journalism nor stock-farming have, however, claimed all of his time or talent. One of the largest of his recent undertakings has been the building of several hundred dwelling-houses upon a

HOME FARM.
WILLIAM M. SINGERLY,
GWYNEDD PA.

tract of land in Philadelphia, between Seventeenth Street and Islington Lane and Diamond and York Streets. This, probably the largest building operation ever attempted by any one person in the city, for the erection of more than a thousand houses is contemplated, has in it a large element of practical philanthropy and is one of several actions which entitle Mr. Singerly to be called a public benefactor. Another way in which his business sagacity and money have been determinedly and effectively devoted to the benefit of the public has been in the breaking down of the exorbitant price of coal. He has succeeded in placing it in the market at seventy-

benefit to the "Record Farms" and as worthy of their projector and the promotion of Philadelphia's welfare.

MATHIAS SHOEMAKER.

Mathias Shoemaker, now of the city of Philadelphia, is a native of Whitpain township, Montgomery County, where he was a resident for many years. His great-grandfather was Jacob Shoemaker, one of the early settlers of Philadelphia County, who was the father of eight children, viz.: Mathias, born December 14, 1736, died January 17, 1816; Barbara, born June 30, 1738; Jonathan, born December 16, 1739; Isaac, born November 16, 1741; Hannah, born Sep-

Mathias Shoemaker

five cents per ton less than the rate which railroad discrimination has dictated,—a measure which it would surprise nobody should he characteristically so push it as to save Philadelphia a half-million dollars annually and thus greatly enhance its manufacturing interests and at the same time aid the poor.

As Mr. Singerly is scarcely beyond the meridian of life (having been born December 27, 1832), it is within the realm of the probable that he will not only carry forward to successful completion all of the various enterprises he has auspiciously begun in city and country, but that his activity will find exercise in the inauguration of new ones, fully equal in scope and

tember 10, 1743; Elizabeth, born November 30, 1745; Sarah, born February 3, 1748; David, born January 30, 1753. The eldest of these children, Mathias Shoemaker, and his wife, Hannah (grandparents of the present Mathias), had five daughters,—Agnes, Margaret, Dorothy, Rachel and Mary, and one son, Thomas. In 1777 Mathias Shoemaker, the elder, purchased the farm in Whitpain township, which afterwards became the property of his only son, Thomas, and is now owned and occupied by Charles K., son of Thomas and brother of Mathias Shoemaker, the subject of this memoir.

Mathias Shoemaker, one of the seven sons of

Thomas and Jane (Supplee) Shoemaker, was born on the homestead farm of his father in Whitpain, February 17, 1810. Through the years of his youth his life was passed like that of other farmers' sons of his time, doing the boy's work on the farm and studying in the common schools during the short winter terms. His education was obtained in the "Cross Roads School-house" in Whitpain, and at the "Supplee School-house" on the Swedes' Ford road, in Norriton township. In the fall of 1826, when he was a little more than sixteen years of age, he was apprenticed to Samuel Cowden to learn the blacksmith's trade. Cowden's shop was at the "Broad Axe Tavern," on the township line of Whitpain and Whitemarsh. He served four years in his apprenticeship, which closed in the fall of 1830, a few months before he was twenty-one years of age. During those few months he again attended the "Cross Roads School" (then taught by Benjamin Conrad) until the spring of 1831, when he went to Philadelphia, and engaged as a journeyman in the shop of Franklin W. Coggins, on Queen Street above Second, where he remained more than three years. In the fall of 1834 he went to Chestnut Hill, where he worked in the employ of Andrew Fisher. In 1835 he returned to the family homestead in Whitpain, where he commenced business for himself, and worked about four years in a shop which his father built for his use. At that place he commenced the business of making elliptic springs for wagons and other vehicles. The first pair of springs which he made were for John Slingluff, of Whitpain, and they were also the first springs of that kind ever manufactured or used in Montgomery County.

In 1839 (being then married) Mr. Shoemaker removed to the vicinity of the "Cross Roads School-house," where he had purchased a house and about eight acres of land, on which he built a shop. Afterwards he added twenty-four acres by purchase from the estate of Christopher Mathias. At that place he remained engaged in the work of his trade and in farming for more than ten years. In 1850 he moved to Philadelphia, and there worked at journey work for about eight months, after which time, for about one year, he carried on business in a shop which had been built for him by John Conrad. He then bought a shop of Samuel Wooley, on Hutchinson Street above Master, where he recommenced the business of spring-making, living in a house which he had bought, located on Master Street. At his commencement of business on Hutchinson Street he employed three hands, but as his business grew he increased the number, so that at one time during the war of the Rebellion he employed twenty-five hands. After the war he put in machinery driven by steam-power, which enabled him to reduce his force of hands. He continued to manufacture springs at his shops on Hutchinson Street for about nineteen years. In 1870 he moved from this city to Abington township, Montgomery County, but still continued to carry on the

business in Philadelphia until 1871, when he sold it out to a company. From Abington he removed to Cheltenham township, where he purchased a residence and lot of ground, and lived there till 1874, when he moved to his present residence in Mount Vernon Street, Philadelphia.

Mr. Shoemaker was married, February 23, 1837, to Sarah M. Fisher, daughter of Andrew Fisher, of Chestnut Hill. She died October 14, 1883. Their only surviving child, an unmarried daughter, lives with her father in Philadelphia. Mr. Shoemaker is a Republican, but has never held or sought public office. In his youth he, with his father and other members of his family, affiliated with the Friends, but he was never a member of the Society until 1865, when he joined the Green Street Meeting. He is now a member of the Meeting at Fifteenth and Race Streets, Philadelphia.

CHARLES K. SHOEMAKER.

Charles K. Shoemaker is the great-grandson of Jacob Shoemaker, one of the pioneers of Eastern Pennsylvania, who was the father of children as follows: Mathias, grandfather of Charles K., born December 14, 1736, died April 17, 1816; Barbara, born June 30, 1738; Jonathan, born December 16, 1739; Isaac, born November 16, 1741; Hannah, born September 10, 1743; Elizabeth, born November 30, 1745; Sarah, born February 3, 1748; and David, born January 30, 1753.

Of these children, Mattis (or Mathias), the eldest, purchased, March 28, 1777, from John Yedder, forty-seven acres of land, upon which his grandson, Charles K., now resides, in the township of Whitpain. April 30, 1796, he added to his original tract, thirty-three acres, purchased from Henry Conard and wife, the whole forming the original Shoemaker farm in this township. Upon his demise, Mathias left the farm to be divided equally between his children. By an amicable arrangement between the heirs, the farm came into possession of Thomas, the only son.

The children of Thomas were Enoch, born September 25, 1804; Job, born October 7, 1805, died August 14, 1828; David, born January 6, 1807; Alan, born September 22, 1808; Mathias, born February 10, 1810; Hannah, born January 3, 1813, died April 10, 1817; Jesse, born March 31, 1815, died June 28, 1854; and Charles K., born June 4, 1819, on the farm, and in the house where he now lives, where also his father, Thomas Shoemaker, was born.

In 1857, Charles K., purchased from the heirs the old homestead, and although involving himself in a large bonded debt, with little or no capital beyond good health and a strong determination to succeed in life, he has, by honest industry and frugal habits, relieved himself from all financial obligations, reared a large and highly respected family, and amassed a sufficiency of this world's goods, so that in his declining years he has been enabled to retire from the active

duties of life, having transferred the responsibility and care of the old homestead upon his son Jesse. Mr. Shoemaker was married, March 4, 1841, to Miss Sarah, daughter of Peter and Sarah Childs, of Whitemarsh township, Montgomery Co., Pa. Mrs. Shoemaker was born December 2, 1818, and is still in possession of all her faculties, and in the performance of the active duties of the household.

The children of Charles K. and Sarah Shoemaker, are Phebe G., born March 1, 1842, married, in 1866, to Charles C. McCann, of Whitpain township; Mathias, born August 9, 1843. At the first call of President Lincoln for troops, in April, 1861, to defend the

Libby Prison, from which place he was transferred to that hell of the Southern chivalry, commonly dignified by the title of "Andersonville Guard House," or prison. There he was literally starved, and in June, 1865, died the death of a noble martyr. George, born February 20, 1846, married, in June, 1864, to Harriet Henshall, of Norristown, Pa.; Emma Jane, born August 28, 1848; infant daughter, born October 16, 1850, died same day; Albert, born September 6, 1851, married in November, 1875, Miss Ray R. DeHaven, of Whitpain township; Jesse, born September 6, 1854, married, January 1, 1880, Miss Annie C. Smith, of Norriton Township; Sally C., born

Charles K. Shoemaker

life of the nation against the assaults of the southern slaveocracy, young Shoemaker volunteered his services, and at the end of his term of enlistment returned to the paternal roof, where he remained until the dark cloud of the slaveholders' war covered the land, when he once more offered himself as a living sacrifice upon the altar of his country, enlisting August, 1862, in Company H, Thirteenth Regiment, Pennsylvania Cavalry, where, by his strict obedience and soldierly-bearing, he passed through the several gradations, to the honorable position of second-lieutenant. While on picket duty in September, 1863, he was captured by the enemy, and consigned to

January 19, 1857, married, in October, 1877, Harry C. Hoover, of Whitpain township; Charles T., born November, 10, 1859, died December 8, 1876; Anna C., born March 29, 1864.

Phebe G. McCann, daughter of Charles K. Shoemaker, is the mother of children as follows: Mary L., born April 29, 1867; William, born November 3, 1868; Sallie S., born November 11, 1871; Charles S., born February 1, 1874; Anne, born July 18, 1876.

George Shoemaker is the father of George M., born March 17, 1865, died July 6, 1865; Sarah P., born August 20, 1866, died November 9, 1872; Charles H., born July 9, 1870; Fannie M., born June 26, 1873, died

August 18, 1873; Ella M., born October 28, 1879, died October 13, 1884.

Albert Shoemaker's children are Irene D., born October 13, 1876; Lida May, born April 23, 1880.

Jesse Shoemaker's children are C. Harvey, born January 13, 1881; Katie Vaughan, born July 19, 1882; Gertrude M., born January 5, 1884.

Sallie C. Hoover, daughter of Charles K. Shoemaker, is the mother of children,—Elsie C., born October 15, 1879; Emma S., born April 11, 1881.

The children of Mathias and Hannah Shoemaker (grandparents of Charles K.), were Agnes, born 23d Ninth Month, 1765, died June 29, 1851; Margaret,

paternal great-grandfather of the present Abram, was the pioneer of the family of that name in Whitpain township, and came to be one of the prominent and progressive men of his time. Under the old militia laws of the State, John, above named, was commissioned colonel of a regiment, and was ever after known as "Colonel Wentz." His ancestors were either German or of German descent, but when they came to America is not known. Colonel Wentz owned the farm now occupied by Abram, and in the latter part of the last century built the house in which his grandson, Abram, now lives. Colonel John Wentz was not only a military officer, but a civil officer as well.

Abram Wentz

born First Month 9, 1767, died November 10, 1816; Dorothy, born 25th Seventh Month, 1769, died in August 1777; Thomas (father of Charles K.), born Eighth Month 1, 1771, died January 26, 1853. He was married, December 1, 1803, to Jane Supplee, who died July 6, 1857; Rachael, born Twelfth Month 13, 1773, died January 20, 1855; Mary, born Seventh Month 19, 1776, died in August, 1777; Hannah, wife of Mathias Shoemaker, and mother of the above named children, died in October, 1777.

ABRAM WENTZ.

Colonel John Wentz, son of Abram Wentz, the

He was for many years a justice of the peace, and was as popular in that capacity as in the military. His justice dockets were neatly and accurately kept, and might properly be used as a model for like officers at the present day. It was customary in those days for justices of the peace to do their share in the matter of uniting lovers in bonds of holy wedlock, and the colonel was as popular in that line as in the other two. His side-board was never empty, and no newly married couple ever left his house without being refreshed with the best of wine, and that in abundance. It is one of the misfortunes that we sometimes labor under, that neither the date of the birth or

death of so good and great a man as he was cannot be given.

His son, Abram, inherited the farm, and added to it the farm on the opposite side of the road, where his son Abram Wentz now lives. He, like his illustrious father, was a man of sterling worth, respected by all who knew him. He was one of those unobtrusive men, always attending strictly to the affairs pertaining to the duties of the farm, allowing others to look after township and outside affairs. He died in September, 1870, at the ripe old age of eighty-four years; Charlotte, wife of Abram Wentz, died December, 1881, in her ninety-third year. His children were Joseph Tyson (who owns forty acres of the old homestead and in whose house he died), Hannah (died in infancy), Mary (deceased), Elizabeth, Barbara, John (deceased), Abram (who owns the fifty acres formerly owned by his father, Abram, and grand-father, John Wentz) and Henry (deceased). It is proper to state here that the property upon which the present Abram now resides has been in possession of the Wentz family for about one hundred and twenty-five years.

Abram Wentz was born in the house now occupied by his brother, J. Tyson, on the opposite side of the turnpike, where, and upon his own farm, his life, thus far, has been spent. He has quietly and honorably followed in the footsteps of his father, seeking not the plaudits of men, nor places of public trust or political preferment; yet his townsmen discovered in him the qualities best suited to fill a position where honesty is requisite to a just balancing of accounts, and for many years have kept him in the board of township auditors. He has also been honored with a seat in the board of directors of the Montgomery National Bank, at Norristown.

He was married, April 30, 1868, to Miss Louisa, daughter of Jesse and Parthena Castner, of Gwynedd township. They are the parents of four children three of whom are deceased. The surviving son, Earl Castner, was born October 27, 1883.

Mrs. Wentz's father, Jesse Castner, died September 9, 1883, in the seventy-second year of his age. Her grandfather, Jesse Castner, was in his ninety-second year when he died, and her great-grandfather, Samuel Castner, died when in his ninety-eighth year. Her mother, Parthena Castner, died May 15, 1881. They were all residents of the township of Gwynedd. Mr. Wentz and wife are members of Boehm's Reformed Church, at Blue Bell.

JOSEPH P. CONARD.

Among the hardy pioneers who sought the shores of America, was one Dennis Conard (as the name was anglicized), who came in the ship "Concord," in the year 1683. He was from Saxony, Germany, and upon his arrival settled with the German colony, in Germantown. From him all of the Conards of Whitpain township are descended. The family were Friends,

and when Henry, the youngest son of Dennis, moved to Whitpain township May 16, 1711, he brought with him a letter from the Germantown Friends, signed among others by Francis Daniel Pastorius. This letter is now in the possession of Lewis Conard. Upon his arrival in Whitpain, Henry settled on a tract of two hundred and twenty-three acres, a part of which is now comprised in the property owned by the Strogdale family and by Christian Duffield. The Strogdale farm is a part of the original tract owned by direct descendants of the first owners, making a period of one hundred and seventy-four years in which it has been in the possession of the family.

Upon the decease of Henry, the land comprising these two farms passed to Joseph, his fifth son, being willed to him under date of September, 1758. Joseph had two sons, Joseph and John, and to them the property descended in equal parts.

John Conard, son of Joseph, was born in 1782 and spent the earlier part of his life upon the home farm. Having a taste for mechanics he served an apprenticeship with James Wood, one of the pioneers in the iron business and the first iron-master in Conshohocken.

John intermarried with Sarah Childs, of Abington, who was born in 1786, and in 1805 settled upon the Duffield farm. Here he built the house and barn, which are yet standing, and transformed the then uncultivated tract into one of the most productive farms in the neighborhood. Here he also built a log blacksmith-shop, where he subsequently began the manufacture of the "Conard Screw Auger." This business is now greatly enlarged and improved by the introduction of machinery, and is carried on by two of his sons, Albert and Isaac, at Fort Washington, upon the site of Daub's old oil-mill. John Conard's death occurred in Seventh Month 30, 1853, he having lived to the good old age of seventy-one years and filled well the position of an energetic but quiet and modest life of a useful citizen and a sincere and devout Friend. To John and Sarah Conard were born twelve children,—James, Mary, Peter, Joseph P., Tacy, John R., Albert, Charles, Elizabeth, Lewis, Isaac and Levi R., of whom nine are still living.

Two of the sons merit special mention, on account of their patriotism. James, the oldest, though having passed the age of those subject to military duty, enlisted in Company B, of the First Pennsylvania Cavalry (Forty-fourth Regiment Pennsylvania Volunteers), and served till sickness caused by exposure necessitated his discharge. Levi R., the youngest son, was a private in the Nineteenth Regiment Pennsylvania Volunteers, and died at Columbia College Hospital, from the effects of a bullet wound received at the second battle of Bull Run. He was buried in the Plymouth Friends' graveyard September 21, 1862. Most nobly was the motto of his regiment, "Non sibi sed Patrie" exemplified in him.

Joseph P. Conard, fourth child, of John and Sarah

Conard, whose portrait accompanies this sketch, was born Twelfth Month 24, 1812, upon the original Conard tract in Whitpain township. His early life, until he was sixteen years of age, was spent upon the home farm, and he followed the pursuits incident to his method of life. At that age he began to acquire the trade of screw auger making, which he followed till twenty-one years of age, when he purchased the Wentz farm upon the Skippack Road, near Blue Bell. Upon this farm he has lived the period of forty-six years, till 1882, when he sold it to his son, Henry Fasset, and now resides with his daughter, Mary S., wife of Charles Shoemaker, of Whitpain township.

Alice, born 10th of Fifth Month, 1843, married John Walton, of Horsham township.

Elizabeth, born 15th of Third Month, 1847, married Frank Stackhouse, of Upper Dublin township.

Henry Fasset, born 22d of Tenth Month, 1849, married Sarah, daughter of Harper Nice, of Whitmarsh township.

Ellwood, born 25th of Ninth Month, 1852, has a large roller grist-mill, at Kellogg, Jasper Co., Ia., and was married to Ella Burke, of Kellogg, Iowa, formerly of the State of Ohio.

Israel S., born 1st day of Sixth Month, 1856, married to Jane Cline, of Whitmarsh township.

Joseph P. Conard

He has been for many years a prominent farmer and market gardener, supplying the Philadelphia markets. Though now in his seventy-second year he is hale and hearty, and is enjoying, in his declining years, the fruits of an industrious and useful life. He was married in Meeting, Third Month, 1834, to Rebecca A. Shaw, formerly of Richland township, Bucks Co. To them have been born the following children,—Sarah, who died in infancy.

Ann, who was born 13th of Sixth Month, 1837, and married Jacob T. Buckman, of Abington township.

Mary S., born 9th of Twelfth Month, 1840, married Charles Shoemaker, of Springfield township.

Rebecca A. Conard, died 28th of Fourth Month, 1874.

The Conard family are nearly all Friends, and Joseph P., is a birthright member of that Society.

CHARLES KRIEBLE.

Charles Kriebel, who resides near Centre Square, is a descendant and bears the name of an old family of Schwenkfelders. His ancestors upon both sides were early settlers in this region, and his paternal grandfather, Melchior Kriebel, was born in America. His son John married Agnes Yeakle, daughter of the Christopher Yeakle who built the historic house still

standing, at Chestnut Hill, a cut of which appears in this volume.

Charles, the eldest of five children of John and Agnes Krieble, of whom the juniors were Samuel, now a resident of Norristown; Mary (Mrs. Schultz, of Colebrookdale); Susannah (Gerhart), deceased, and Sarah (Anson), of Worcester township, was born in 1814, at Chestnut Hill. Working during his youth upon his father's farm he acquired a practical knowledge of agriculture, which he put to good use when he began for himself, in 1842, upon the farm of eighty-five acres, where he now lives, and which his father

Mr. Krieble was married the year he made his home in Whitpain, February 18th, 1841, to Sarah, daughter of Abraham Anders, of Worcester township, and enjoyed her loving companionship until her death, November 21, 1884. They were the parents of two children,—Hiram A. Krieble, who is a farmer and lives with his father at the old homestead, married Susannah, daughter of Rev. Jacob Meschter, of Upper Hanover. They have had four children, viz.,—Alan (deceased), May, Charles (deceased), and Edna. Mary Ann Krieble is the wife of Dr. George K. Meschter, of Worcester township.

Charles Krieble

assisted him to procure. Ten years after he removed to this spot, one of the evidences of his prosperity appeared in the erection of the substantial house in which he now lives. Other improvements were made from time to time. His life has been a busy one, and the thrift which has followed industry has enabled him not only to enjoy comparative ease during his later years but to help others. He is a liberal sustainer of the Schwenkfelder Churches in Worcester and Towamencin. He has been a friend of the educational and other interests of the community in which he dwells, and has served a number of years as a school director.

ENOS ROBERTS.

Enos Roberts, of Whitpain, is a descendant of the Roberts family of Gwynedd, which figures largely in the history of that township, and whose progenitors were among the earliest Welsh settlers of Montgomery County, coming over the sea soon after William Penn. Sketches of several other representatives of this family, we may remark in this connection, have places in the present volume. The grandfather of our subject, Enos Roberts, was a resident of Gwynedd, and his remains repose with those of many others of his kindred and faith in the burying-ground at the Friends' Meeting in that township. The parents of the gen-

tleman we now have in consideration were Nathan and Barbara (Ruth) Roberts (the latter the offspring of David Ruth). He was born in Gwynedd, November 25, 1856, and was the oldest of three children, the younger of whom were David and Annie (now Mrs. David Wismer, of West Point, Gwynedd township).

Enos was left an orphan by the death of his father when about four years of age, and was brought up by his paternal uncles, John and Edward Roberts, both of whom are now deceased. He was reared to the vocation of a farmer, which he now follows, and on April 1, 1878, bought his present farm of about eighty acres near Blue Bell, which he has brought by judi-

CHAPTER LXXXI.

WORCESTER TOWNSHIP.

IN its location Worcester in the most central township in the county, and is bounded on the north by Towamencin, south by Norriton, east by Gwynedd, southeast by Whitpain, west by Perkiomen and southwest by Lower Providence. Its greatest length is four and a half miles, greatest breadth four and a quarter miles, with an area of 10,180 acres or 1575 square miles. The surface is rolling, the soil red shale and under good cultivation. Methacton Hill is a considerable

Enos Roberts

cious labor into an excellent state of cultivation, and upon which he has a comfortable home. The farm absorbs his attention, and he ranks among the most successful agriculturists of the neighborhood. He is a Republican in politics, but is not a very active worker in the cause of the party, and is not in any sense a seeker for place, being satisfied with such activity as his occupation calls for.

The family, of long descent in Montgomery County, is still farther perpetuated through Enos Roberts, for he is married and the father of three children. Miss Clara E. Ralston, of Philadelphia, became his wife upon May 23, 1878. The offspring of this union are Edith E., Annie V., and Kate A.

elevation, that commences in Lower Providence and extends in a northeast direction across almost the entire southern part of the township for a distance of five miles. The summit of these hills, more familiarly known as the Fairview Hills, is equal in altitude to the highest point of the Chestnut and Cheltenham Hills, in the southeastern portion of the county, or those near Green Lane, to the northward. From points on them the traveler obtains beautiful and extended views of the Schuylkill and Perkiomen Valleys. The forests that once covered these highlands have, during recent years, been cleared away, and the land is well cultivated and improved by thrifty farmers.

It was the commanding prospect afforded by these

hills that enabled General Washington's advance-guard to observe the movement of the British army in moving on Philadelphia in the autumn of 1777, and from which he subsequently moved to attack them at Germantown. Washington broke up his camp at Pennypacker's Mill October 8, 1777, and the army proceeded on its march down the Skippack road and Reading and Ridge turnpikes. On the 16th, Washington established his headquarters at the house of Peter Wentz, near said church, from where he wrote an interesting letter to Congress, in which he says,—

"It is with the highest satisfaction I congratulate Congress on the success of our arms northward in the action of the seventh, an event of the most interesting importance at this critical juncture. From the happy train in which things are now, I hope we shall soon hear of the most decisive advantages. We moved this morning from the encampment at which we had been for six or seven days past, and have just arrived at the grounds we occupied before the action of the 4th. One motive for coming here is to direct the enemy's attention from the forts."

This communication establishes the fact that it was from the encampment at Wentz's church that the army proceeded to make the attack at Germantown. Having retreated to these same hills after their defeat in this battle, they maintained a strong position on them for several days, when they took up their march and proceeded to Whitemarsh township, where they established Camp Hill.

Zacharia Creek is the prominent stream of Worcester township, and has a course of about four miles across its northern angle, in which distance it propels three grist-mills and a saw-mill. In 1758 mention is made of a saw-mill where the Zacharia Creek crosses the Skippack road, near the present Centre Point. It may be possible that the singular name given to this creek has been applied from Zachariah Whitpain, an early resident of the adjoining township. A branch of the Skippack crosses near the western extremity of this township and furnishes power to a grist-mill. Five-Mile Run and Stony Creek have their sources in its southern and eastern parts.

The name of Worcester has been applied from a city and county in England, and is supposed to be derived from the Saxon word *Caester*, signifying a station or camp. It was at the battle of Worcester, in 1650, where Cromwell and his party defeated the Royalists and took eight thousand prisoners, most of whom were sent to America and sold as slaves. According to the list of 1734, this township contained twenty-five taxables and land-holders. Amongst these may be mentioned Robert Jones, James Baine, Lawrence Switzer, Henry Flower, Leonard Spare, Conrad Conrad, John Lefevre, John Baine, Adam Vanfossen, Jacob Engle, Henry Rittenhouse, Stephen Stahr, John Vanderslice, Peter Keyser, Richard Osborn, William Robert Foulke, Conrad Vanfossen, Daniel Chrisman and Anthony Conrad. Derrick Keyser and his son, Peter, were naturalized in 1709 the better to hold and enjoy lands. One bearing the latter name

resided at Germantown before 1700; Conrad Conrad settled at Germantown before 1700. The population in 1800 was 782; in 1830, 1135; in 1850, 1453; in 1870, 1587; in 1880, 1641. Taxables in 1741, 70; in 1828, 249; in 1858, 425; in 1875, 426; in 1884, 478.

For the last twenty-five or thirty years this township has remained almost stationary in population. In 1785 there were within its limits two taverns, two grist-mills, one saw-mill and five slaves. In 1884 the following licenses were granted according to the mercantile appraiser's list: Beyer & Swartley, live-stock; William H. & W. R. Baker, merchandise; Daniel Cassel, merchandise; Daniel Cassel, hardware; S. L. Frank, live-stock; M. J. Harley, merchandise; Krebel & Son, flour and feed; A. B. Schults, live-stock; Joseph Shults, flour and feed; Frank Swartley, live-stock.

In 1884 the value of improved lands was \$1,316,180; value of unimproved lands, \$34,295; value of 378 horses, \$47,975; value of 526 cattle, \$46,500; value of property taxable for county purposes, \$1,493,398.

The Germantown and Perkiomen turnpike road, commonly called the Reading, passes through the western extremity of Worcester about two miles. The Stony Creek Railroad has a course of about a mile near its southeastern angle. The villages are quite small, and are Centre Point, Fairview and Cedar Hill. The post-office at the first-mentioned place is Worcester, and at the second, Fairview Village. The township was formed into a separate election district in 1828, and the township elections are held at Centre Point.

There are eight public schools in Worcester, with three hundred and sixty pupils in attendance. The school term is seven months, and eight teachers (three males and five females) are employed at a salary of forty dollars per month.

Wentz's Reformed Church is situated on the Skippack road, nearly a mile above Centre Point. The congregation existed as early as 1727, but was known as "Skippack Reformed Church," which was then located in Lower Salford township, in the vicinity of the Northwest Branch of the Skippack Creek, on the tract of land known for many years as the farm of Benjamin Reiff. The church was built of strong logs and stood on the border of an oak-grove, on the farm mentioned. Close by, the visitor beholds a small circular rise in the ground, which marks the place once held sacred. It was on that spot where the Rev. George Michael Weiss and other German emigrants from the Palatinate settled down, after they had, on the 21st of September, 1727, subscribed the oath of allegiance, by which they promised to be true to the British crown and the laws of the province of Pennsylvania. The organization of the Skippack congregation, with its consistory, was constituted of the emigrants who accompanied the pastor named, and followed immediately upon their settlement, and the Rev. Mr. Weiss became the first pastor, who also, at a later period, served, in connection with

it, the Falkner Swamp and Old Goshenhoppen congregations. The first officers of the old Skippack Reformed Church were Jacob Deimer, Michael Hillegas, Peter Hillegas, Yost Schmidt, Henry Weller, Jacob Seigel and William Rodrick. How long Mr. Weiss preached to this congregation cannot be definitely determined. It was doubtless, however, until 1746, when we again find him in Old Goshenhoppen after his return from Rheinbach, Dutchess Co., N. Y., from which neighborhood he had to flee on account of Indian troubles. The Rev. Michael Schlatter remarks, in his journal, among other things, in reference to the Skippack Reformed Church, as follows: "This congregation, which was, previous to this time, one of the most respectable, has been so much reduced through the seducing influences of the many various sects that the number remaining are not able to

WENTZ'S REFORMED CHURCH.

collect for the support of a minister more than eight pounds, which is equal to fifty-three Dutch guilders," or twenty-one dollars of the present day. The old log church already named stood from 1757 until 1760, when it was torn down and never rebuilt. About this time the congregation transferred its place of meeting to the spot now occupied by Wentz's church, inasmuch as the majority of those who faithfully adhered to the church resided in that neighborhood. It is said that the logs of the old church building were, at a later period, used in erecting a grist-mill, known as Allebaugh's mill, on the Skippack Creek, where they still at the present day form a part of the walls of the old building. The graveyard of the congregation, located not far from the church, or, more correctly speaking, all traces thereof, with the grave-

stones which were once there, have long since disappeared, and the plow of the busy farmer draws its furrows over the resting-place of the silently-reposing pioneers.

According to recollection, supported by the facts indicated, the assumption is fully correct that Wentz's church is the same organization of the former Skippack congregation, and that the only difference is to be found in the change of the name and place of meeting. It has been asserted that this was the first Reformed Church organized on this new continent.

This statement, however, has been earnestly called into question, and as there cannot be found any direct evidence in regard to this point, no positive claims are set up for this honor. The name Wentz is derived from the well-known families of this name which at that period were quite numerous in this neighborhood; but at the present time there is not one of this name, still held in honor, to be found among the large membership of the congregation. In 1760 a few isolated members of the Skippack Reformed Church held a conference meeting, the object of which was the making of preparations for building a new church. After long deliberation and consultation it was resolved to build a new church on a spot a little in the rear of the one recently torn down, and that on the boundary line between the properties of two members, who had each given an acre of ground for the purpose. According to the records, these members were, on the one part, John Lefevre and Christiana, his wife (the latter's family name is supposed to have been Wentz), and on the other part, Jacob Wentz and his wife, Elizabeth. The original deeds are dated January 2, 1762, and the land is conveyed to Philip Wentz, Peter Wentz, Jacob Weber, Philip Spare, Henry Conard and Jacob Reiff, in trust for the congregation, as a legacy for their descendants and those who may connect themselves with the Spiritual Reformed Zion. At a later period a small piece of ground was added to the original grounds, so that the whole then contained two acres and twenty-seven perches, the strip at the upper end, where the sheds stand, and the acre and a half on which the parsonage is erected not included.

The first church building, after the removal and assumption of the new name, was commenced in 1762, but, on account of repeated pecuniary troubles, was not completed until nine years later (1771). It was painted inside with strong colors, and highly ornamented with a number of inscriptions on the walls, as is still remembered by many of the older persons who frequented the first church on this spot in earlier years. The few highly-colored pieces of wood, found underneath the wood-work of the recently demolished church, and which are remains of the old church, still indicate the remarkable character of the painting. The congregation, at that time poor and numbering only about fifty members, was not able of itself to provide the means required to finish

the church, and hence a subscription-book was sent around, in which the names of neighboring clergymen appear, encouraging contributions, the recommendations being written in German, Low Dutch and Old English. Owing to an extraordinary money-pressure which prevailed at that time, the subscriptions were but small, and the congregation still laboring under a heavy debt, they at length resolved to raise money by means of a lottery, a method by no means uncommon in those days. In this they were successful, for the proceeds furnished not only enough money to pay off the debt, but also left a small balance in the treasury. The first church was an exceedingly strong and durable building, erected of stone, with the joints closely cut and pointed with mortar, and the roof was high and steep, after the old Holland style. The building cost two hundred and fifty pounds, and was dedicated on the 18th of November, 1763.

This building withstood the storms for eighty-nine years, during which time it was served successively by fifteen different pastors, all of whom, except one, have closed their labors and rest peacefully in their graves.

With the removal of the old Skippack Church, and the change of name which followed, all further connection of its former pastor, Rev. G. M. Weiss, with it ceased, and the Rev. John George Alsentz became the first pastor of the recently organized congregation. He continued in charge until his death, a period of seven years. His remains repose in the old cemetery of what was once the Reformed Church of Germantown, Pa. The successor of Alsentz was the Rev. Christian Fohring, who continued in this relation only two years. It was during his ministry that the interior of the church received the peculiar gaudy painting for which it was characteristic until it was torn down. He was succeeded by the Rev. John Gabriel Gebhard, who also remained only two years. During his pastorate the Sacrament of the Lord's Supper was administered on Easter Sunday of 1772 to fifty-eight members. In the following year Mr. Gebhard was succeeded by Rev. John W. Ingold, whose connection with the congregation was short. At the opening of the Revolutionary war, in 1776, Rev. John H. Weikel was pastor of the congregation. His connection with the charge, however, did not continue many years. Various difficulties arose, growing out of the war, of such a nature as to lead to his separation from the congregation. At the commencement of the Revolution he preached a sermon from Eccl. iv. 13: "Better is a poor and wise child than an old and foolish king who will no more be admonished." This sermon so excited a great portion of the congregation that the dissatisfaction led at last to his resignation of the charge. Mr. Weikel resided at the time on the parsonage farm owned by the two congregations (Wentz's and Boehm's). He was often seen, after having turned his horse into an inclosure in front of the house, firing pistols over his

head from the windows for the purpose of training him to the fire should his services be needed in the war. His sympathies were warmly with the colonies during the struggle for freedom. The congregation was now vacant for several years. In 1784 the Rev. John Hermann Winkhaus became pastor and continued in this relation until 1787. After a vacancy of three years the church received a pastor in the person of Rev. Philip Pauli. He remained four years and then removed to Reading, Pa. From this time forward the church was for a number of years without any settled pastor, but was served interchangeably by the Rev. Nicholas Pomp and his son, who, in addition to the church at the Trappe, preached to the congregations at Falkner Swamp and Old Goshenhoppen. The pastor who next served Wentz's church was the Rev. Dr. S. Helffenstein, who also remained only two years, and then accepted a call from the Race Street Church, Philadelphia, which he served during the following thirty years. His successor at Wentz's church was the Rev. Gabriel Gobrecht. At the end of eighteen months, however, his labors here were also brought to a close. The congregation remained vacant until 1802. A call was then extended to the Rev. George Wack, at that time a young man who had just brought his studies preparatory to the ministry to a close. He accepted the call, and soon thereafter commenced his labors amongst this people. They were attended with marked success, and he added largely to the congregation by baptism and confirmation. His pastorate extended through forty-three years, during which time he baptized seven hundred and five children. In consequence of growing infirmities, he resigned the charge of the congregation in 1845, and retired to private life. He died at the house of his son-in-law, Philip S. Gerhard, near Centre Square, Pa., on the 17th of February, 1856, at the age of seventy-nine years. His remains lie interred in the cemetery attached to Boehm's church. Rev. Abraham Berkey became successor to the Rev. George Wack. He did not succeed, however, in gathering together the members who had become scattered during the last years of the ministry of his predecessor. Hence he resigned at the close of the first year of his pastorate.

On the 21st of February, 1846, the Rev. John Naille became pastor of the congregation. He at first served it only as a supply, as he belonged to the Goshenhoppen Classis, and the congregation then was connected with the Philadelphia Classis.

At a later period the congregation was transferred to the Goshenhoppen Classis, and along with Keely's and Towamencin congregations constitute what has been since then known as "Wentz's charge of Goshenhoppen Classis." Rev. Mr. Naille found his hands full in contending with existing difficulties. However, through the help of the Great Head of the Church, he succeeded in overcoming them in a short time, and as the congregation was now in a flourishing

condition, but were still without a parsonage, steps were taken for the purchase of a lot on which to erect one. The contract for building the house was given to Mr. Naille himself, who handed it over completed to the trustees of the congregation on the 21st of October, 1849. The congregation continued to grow still stronger, so that in 1851 the pastor began to remind them of the necessity for a larger house of worship. The church was, it is true, in a good condition, but it was not by any means convenient, and was, besides, too small for the congregation, and as it also did not meet the taste of the people any longer, the congregation soon gave its consent to the erection of a new church. Within the same year a resolution to that end was unanimously adopted, and preparations being made immediately for the erection of a new church, the corner-stone was laid on the 21st of August, on which occasion the Rev. Dr. Samuel Helfenstein preached in the German and the Rev. Jacob Keller in the English language. The new building was ready for dedication on the 29th of January, 1852, when the same brethren officiated who had participated in the services at the laying of the corner-stone, and were assisted by the Rev. Mr. Medtard, of the Lutheran, and Rev. Reuben Kriebel, of the Schwenkfeldian Church. The new church was a plain one-story building, with a gallery at the end, and with difficulty would seat only three hundred persons. It was soon felt that the house was too small to comfortably accommodate the continually increasing congregation. After Rev. Mr. Naille had served the church eleven years, he resigned charge of it in February, 1857. Notwithstanding his advanced age, Rev. John Naille is still laboring in the vineyard of the Lord, as a minister in the Reformed Church. A vacancy of eleven months followed, at the close of which a call was extended to Rev. William G. Hackman, which he accepted, and commenced his labors in January, 1858. His efforts in the interests of the congregation were from the very first crowned with success. The Sunday-school largely increased, and as there was not room for its accommodation in the old school-house, it was resolved, in the fall of 1858, to build a school-house for its special use. This was erected during the following year and dedicated on the 4th of August. General satisfaction prevailed at this time, and the congregation continued to prosper for some years to come. After a pastorate of eight years Rev. Mr. Hackman resigned and accepted a call in St. Joseph's County, Mich., in which he has continued to labor up to the present time. The people were extremely sorry to see their pastor removed from their midst, and hearty prayers for his welfare accompanied him to his new field of labor. He had succeeded in getting a fast hold upon the affections of the people, and was highly esteemed by the community generally outside of the congregation. After the resignation of the Rev. William G. Hackman, the church succeeded in securing the services of the present pastor, Rev. S.

M. K. Huber, who was at that time serving the Keely's congregation, now a part of the Wentz's charge. He was chosen on the 1st of January, 1867. At this time the membership numbered one hundred and ninety, of whom only one hundred and twenty-seven partook of the Lord's Supper at the first communion held by the new pastor. Success attended his unintermitted labors, and during the first year fifty-two persons were added to the church by confirmation, which number, through his activity, has been increased from year to year until it has reached two hundred and fifty, more than half of its present membership. During the first year of his labors, the great disadvantages resulting from the remoteness of the parsonage from the principal congregation became sensibly manifest both to pastor and people. After considerable deliberation the old parsonage property was sold on the 4th of September, 1869, and active efforts were immediately entered upon to erect a new parsonage upon a lot of ground, containing an acre and a quarter, adjoining the Wentz's church property, which had been purchased from Samuel Schultz. The work was carried forward to a successful completion, so that the pastor took possession of it on the 21st of March, 1870. The good results from the change of the location of the parsonage soon became manifest. The contiguity of the parsonage to the church enabled the pastor to look more carefully after the spiritual interests of his flock, and especially to give his personal attention to the Sunday-school work in his church. So great were the additions to the number of scholars and general prosperity of the school that the room in the school-house soon became inadequate to the wants of the school.

The subject of providing better and more suitable accommodations for the Sunday-school was agitated, and as the church itself was too small for the comfortable accommodation of the membership, and also needed extensive repairs, the Consistory resolved to lay the entire subject before the congregation for its decision. Accordingly, it was almost unanimously resolved that the new church should be built during the summer of 1878. On the 17th of March, 1878, the last communion season in the old church was held. It was a specially interesting and solemn occasion. The demolition of the building was commenced the following Monday, and by the close of the week the third church on this spot was a thing of the past. The corner-stone of the new building was laid on Easter Monday, the 22d of April, and was the same that had been used in the first building erected on this spot, in 1762. The following articles were placed in the box: the Minutes for 1878 of the Synod of the United States, the Synod of the Potomac and of the Pittsburg Synod; German and English almanacs for 1878, monthly *Guardian*, *Reformirte Hausfreund*, constitution of the Reformed Church, English and German hymn-books and catechisms, English Bible, large issue of *The Messenger*, *Christian World*, United States coin to the amount of

\$3.14 of the coinage of 1878, a silver quarter of a dollar found in the old corner-stone, and a half-cent piece found in tearing down the old church. In a temporal point of view the congregation has made remarkable progress during the pastorate of the present pastor, and if the outward may serve as a basis for conclusions in regard to the inward, the necessary inference must be that a corresponding progress has also taken place in the spiritual condition of the membership. The congregation has been remarkably active during late years as regards its property. The greater part of the extensive sheds, for sheltering horses and vehicles, has been built, the dwelling for the sexton of the church has been enlarged and improved, the new parsonage has been built and the church provided with a new organ. At the time the erection of the new church building was entered upon the following were the officers of the congregation: Pastor, Rev. S. M. K. Huber; Elders, James W. Slough, Tobias G. Hange and John Custer; Deacons, William G. Markley, Samuel G. Fenstermaker, Hillary M. Snyder, Henry Slough, Daniel Beyer and George F. Strong; Trustees, Peter S. Fry, S. K. Kriebel and John Deckert; Building Committee, Peter Fry, S. K. Kriebel, John Deckert, Reuben Scheffy, Eli Frick and Henry Slough.

The basement of the new church was dedicated on the first Sunday in September the same year, and the pastor was assisted by the Rev. S. R. Fisher, of Philadelphia, who preached a very impressive sermon on Sunday morning, and in the afternoon addressed the Sunday-school, which was for the first time assembled in its new home. The work on the auditorium was resumed immediately after the basement dedication, and by the 1st of November the new church was completed, and dedicated on the 9th and 10th of November, 1878. The following clergymen took part in the dedicatory services: Rev. Moses Godshalk, of Schwenksville (Mennonite); Rev. Frank J. Mohr, of Quakertown; Rev. C. Z. Weiser, D.D., of Pennsylvania; Rev. J. A. Schultz, of Worcester; Rev. J. H. A. Bomberger, of Collegeville (these last-named Reformed); Rev. S. Coleman, of Centre Square (Lutheran); Rev. H. Rodenbough, of Eagleville; and Rev. C. Collins, pastor of Centennial Church, Jefferson (Presbyterian).

The burial-grounds are large and well attended to; there are so many families interred here that it would seem invidious to mention but a few, and space forbids to name the many. The Hon. John Weber and wife are buried in these grounds.

The **Bethel Methodist Meeting-House** is situated on the Skippack road, a little over half a mile above the Whitpain line. The first house of worship was built in 1770 by Johannes Supplee, but for no particular denomination. In 1784 a congregation was regularly organized by the Methodist Episcopal Church, under whose control it has since remained. This was the first congregation organized by this de-

nomination in the county. Joseph Pillmore, a minister from England, had the first charge. The present church was erected in 1845, and the old one torn down a few years afterward. The oldest stone in the graveyard containing an inscription is that of Johannes Supplee, who died in 1770, a short time before the first meeting-house was finished. The most numerous names on tombstones are the Supplees, Zimmermans and Bissons. For further information in regard to this meeting, the reader is referred to the chapter on Methodism in Montgomery County.

A **German Baptist, or Dunker, Meeting-House** is located at the corner of the township, where it adjoins Lower Providence and Norriton. It is a small one-story building. The principal names on the tombstones are Harley, Cassel, Detweiler, Balser, Goshow, Rittenhouse, Damuth, Tyson, Dettra, Yost, Bauer, Baker, Garner, Stem, Coulston and Stauffer. The earliest stone observed bearing a date was that of 1809.

Worcester Schwenkfelder Meeting-House is situated on the Township Line road, dividing Norriton from Worcester township, about two miles north of Norritonville. It is a plain stone building, with a seating capacity of from three to four hundred persons. Quite a large congregation worships here. The one hundred and fiftieth anniversary of the arrival of the Schwenkfelders in America was celebrated in this church September 24, 1884.

Among the notable persons present at the anniversary were General John F. Hartranft; Rev. Chester D. Hartranft, D.D., of Hartford, Conn.; Revs. Dr. Rice, of the Moravian Church, Philadelphia; Moses Godshall, of Schwenksville; J. H. Hendricks, of Collegeville; Eli Keller, of Zionville; Charles Wierand, of Pottstown; Charles Collins, of the Centennial Presbyterian Church; J. H. A. Bomberger, of Ursinus College; and others.

The morning services were mostly in German. Rev. William S. Anders, the pastor, opened the exercises by announcing the hymn, commencing,—

“Great God of Nations! now to thee
Our hymn of gratitude we raise.”

Rev. Howard W. Kriebel, of Clayton, Berks Co., in the Upper District, delivered a sermon in English, partly historical in its character.

Rev. Jacob Meschter, of Palm Station, also in the Upper District, delivered an able sermon from the text: “Bless the Lord, oh my soul, and forget not all his benefits.”

Rev. Joshua Schultz, of Hereford, Berks Co., also in the Upper District, read a “Sketch of the Development of the Church in this Country.”

The singing of a hymn closed the morning exercises.

A recess was taken for dinner, which was served in the basement of the church, being furnished by the members resident in the neighborhood. Nine hundred persons in all were fed. The dinner consisted of

bread and butter, cold meat and other substantial, cold water being the only beverage.

The event of the afternoon was the able and exhaustive history of the Schwenkfelders and their founder by Rev. Charles D. Hartranft. It was collated partly from manuscripts of Schwenkfeld. The paper treated of the works of Schwenkfeld, his wanderings and those of his people after his death and also of the doctrines he taught. Speaking of the latter, he said,—

"Schwenkfeld taught the need of individual reformation before you can have a reformation of society. The very revolution from Rome had increased the degeneracy of the age. The first great essential in Schwenkfeld's preaching is repentance. No wonder he loved the ancient prophets, and declared there could be no Christian life which did not flow from repentance. A man's Christianity must be seen in his actions and not heard merely from his lips, according to his doctrine. And what a sublime life was his! Whether for strength, courage, gentleness, devotion or loyalty to Christ, I know not his peer. Who faced graver dangers without the shadow of fear? Who disputed more courteously? Where do you find the breath of slander in him? He was a Christian gentleman, who never forgot his manners, nor did he give signs of a too prostrate sensibility. Many and many a reformer acknowledged his benign piety and they could not account for it; his doctrine, they said, was so bad.

"The principles which Schwenkfeld emphasized have made themselves everywhere living forces. In what sphere of Christian activity are they not prominent factors? His doctrines are remarkable for the conspicuous exaltation of the heavenly over the earthly, the living inward word over that which is written. They teach the nourishment of the soul by the presence of Christ himself instead of the hollow observance of sacraments.

"How immeasurably superior do the qualities of Caspar Schwenkfeld shine forth in comparison with his contemporaries! It was but another indication of his possession of the new life. What he preached he first did. He was equipped on every point, and had a masterly eloquence. The press was his greatest pulpit. And yet not half his manuscripts have been published.

"He found his vocation in the graces God had given him. How he lashed the priests in their notions that they were the successors of the apostles! He insisted on social worship. He could not but regard the ecclesiastical machinery of the church, even in the Reformation, as tyrannical. His ideas are being practically carried out in the churches around us.

"He believed in liberty of conscience and the right of private judgment, with the Scriptures as a test. Everything was to be brought to this test. He taught individual liberty among believers. How rich are his works in practical arguments against the interference of the State with conscience! He never used the State to advance his own views. How can I represent to you the sorrows of his exile? With his zeal to advance the cause of Christ, to be hunted from village to village! Ah! that we might recall the afflictions of those bands of wanderers! Sons and daughters of those noble sires, let us rise up and call them blessed. Was the seed, which Schwenkfeld planted, without fruit? Behold! to-day its fair fruits wave from every branch of Protestant Christianity. Let the children of such sires love Christ as they loved him, and we need not fear for the future of the American Republic."

Christopher Heydrick, of Franklin, Venango Co., followed and read an account of the causes which led to the exodus, commencing with 1724. To prevent it the Schwenkfelders were forbidden to sell their property. They had sought the intervention of the States-General of Holland and of the sovereign of Great Britain. On July 30, 1725, the Schwenkfelders were handed over to the Jesuit missionaries by an edict of the Emperor, after having been two hundred years in Silesia.

They loved their German Fatherland, but they craved only to be allowed to sell their goods and leave

the country. They addressed the Mennonites of Holland to intercede for them with their government, where liberty of conscience was allowed. The crisis had now come and they resolved upon flight.

Mr. Heydrick explained the reason of their coming to Pennsylvania, which was the similarity of their belief to that of Friends and the unexampled liberality of the offers made by Penn. They arrived here September 24, 1734, and at once set up the altar of their religion.

He dwelt upon the history of the sect since they came to this country, and closed with the words,—

"Such were the distinctive institutions of the early American Schwenkfelders—the church, according to what the church should be, has its charities and schools. From these institutions planted by our fathers in the free soil of Pennsylvania and maintained by their prayers and sacrifices, have, under the divine favor, flowed blessings which we cannot over estimate. They have reached us who are here assembled at the end of one hundred and fifty years, in obedience to the injunction of our godly ancestors, to commemorate their deliverance from their persecutors; they have reached us whether we have remained in the fold, or from accident or choice, cast our lot with other communions; and by whatever name we may be called, we can to-day unite together in thanksgiving and praise for them unto him from whom all blessings flow."

General John F. Hartranft prepared a paper for this occasion, and in his remarks said,—

"The Schwenkfelders have never surrendered, never compromised their religious liberty. They unwittingly became instruments with other sects, the Huguenots, the Puritans and others, in building up the civil government and establishing the civil liberty we enjoy. They established the grandest republic on earth."

Rev. Charles Collins offered the closing prayer.

Rev. J. H. A. Bomberger, D.D., made a brief address, expressing the satisfaction he had experienced in joining on so glorious an occasion.

The exercises then closed by singing the doxology.

An Evangelical German Methodist Church built about 1850, is on the road from Fairview to Centre Point. It is a one-story stone building, with a seating-capacity of one hundred and fifty persons.

The Methacton Mennonite Meeting-House.—

This meeting-house is located on a public road leading from the Germantown turnpike to the Skippack road, about one-half mile northwest of Fairview village. It is a plain, one-story stone structure, and was early founded by the denomination worshipping there. There is a large burial-ground connected with it, and some of the oldest settlers of the locality and many of their descendants are buried there. It was a well-attended place of worship as early as 1812, and many interments were there made prior to that date. Prominent among the names noticed on the tombstones may be mentioned the following: Drake, Ritzenhouse, Wismer, Detwiler, Longacre, Gallagher, Landes, Funk, Baughman, Styer, Conard, Roosen, Freed, Fenstermacher, Beyer (1744), Beard, Wagner (1769), Yeakel (1768), Gearhart, Zimmerman, Clouard, Schrack, Casselberry, Stem, Sower, Steiger, Custer, Vanfossen, Heebner, Reiff, Bean, Clemmens, Cassel, Heyser, Wanner, Sechlar, Schwartz.

BIOGRAPHICAL SKETCHES.

DAVID CUSTER.

The family of David Custer, of Worcester township, is both upon his side and his wife's, a very old one in the county of Montgomery. The great-grandfather of the citizen whose name forms the caption of the present brief article was Jacob Custer,—or, as the name was originally spelled, Kister,—a native of Holland, who was among the earliest settlers of that nationality to locate in Pennsylvania, and with the

delphia of ye first part and Adam Van Voson . . . of ye second part.

In the early part of the last century Jacob Custer built the old house which still stands upon this farm fronting a by-road leading from the Reading turnpike. Here he lived and died. The stone over his grave in the burying-ground at the old Mennonite Church in Skippack shows that his death took place December 4, 1804, and that he was in the seventy-third year of his age. He and his wife Elizabeth Van Voson were the parents of Jacob, the father of our subject. He was born upon the farm in 1778 and died December 4, 1854, aged seventy-six years.

David Custer

Van Vosons took up a large quantity of land in Skippack and Worcester, extending from the farm now owned by David Custer to Skippack Creek.

His son, Jacob, owned the farm on which David now resides, which was originally a portion of the large property acquired at an early day by his father-in-law, Adam Van Voson. An old parchment in the possession of Mr. Custer, recites that the "indenture was made the eighteenth day of May, in the sixth year of the reign of our Sovereign Lord, George, King of Great Britain," etc., A. D. 1720, . . . "between Thomas Shute of ye county of Philadelphia, and James Steel of ye city of Phila-

His wife was Mary, daughter of David Gouldy, who owned the David Rittenhouse farm. Jacob's religious affiliation was with the Mennonites, while his wife was a member of the Lutheran Church, and they brought up their children to revere those great principles of Christianity which are the precious property alike of the two sects or denominations, and of many others. They were the parents of three sons and five daughters, all of whom save one are now living. Samuel, the first-born, died without issue; Charlotte (Tyson), is a resident of the county; Rebecca (Heiser), lives in Skippack; Jacob, in Lower Providence; Mary (Davis), in Philadelphia; Elizabeth (Getty), in the county;

David, upon the homestead farm and Barbara (Detwiler), in Lower Providence.

David Custer was born April 21, 1820, and served upon the farm, gaining under his father's directions an accurate and practical knowledge of the vocation which he has successfully followed. Of school advantages he enjoyed but few, and the deficiency of his early education had therefore to be supplied through the later and slower, but perhaps better, processes of general reading, of observation and of mingling with men. After his marriage he carried on his father's farm on shares, and inherited it in part upon his death in 1854. By his skillful management of these one hundred and twenty-eight acres he was enabled, not only to bring up his family under conditions far superior to those which had governed his own early life and to contribute liberally to the needs of others, and advance the interests of good institution, but to secure a second farm of one hundred and forty-six acres. Mention of this property, located in Norriton township, not far from the Schuylkill River, suggests an incident which is fairly illustrative of one of Mr. Custer's energy and activity. In the autumn of 1884 the barn upon the Norriton farm caught fire and was quickly consumed, with all of its contents, causing a very considerable loss. Mr. Custer went immediately to work to replace the burned building, and in less than six weeks a handsome and commodious structure seventy-four by fifty-two feet—a combination of stone and frame—was completed, greatly to the surprise of his friends and neighbors. It is this faculty for quiet, quick organization and execution which has been one of the largest factors in his success. A substantial and hospitable appearing home was erected upon the Worcester farm a few years since. Mr. Custer holds a high place in the regard and esteem of his fellow-citizens. He is a Republican in politics, but has never been an aspirant for place within the gift of the party or people, and his interest in public affairs being entirely unselfish, is only such as it is the duty of every man to take in them. His religious predilections long since led him into membership with the Lower Providence Presbyterian Church, of which he has been a consistent adherent and supporter, for nine years subsequent to 1860 a trustee, and since the close of his service in that office until the present, an elder.

In 1872 Mr. Custer was united in marriage with Margaret, daughter of Christian and Catharine (Heebner) Detwiler, who was born January 26, 1829. Her father was from Perkiomen township and her mother from Norriton. The latter was the daughter of Abram and Catharine (Rittenhouse) Heebner, who were the descendants of very early Montgomery settlers of the Schwenkfelder faith.

Mr. and Mrs. Custer are the parents of five children, all now living,—Christian, who married Susannah, daughter of Ephraim Boorse; Jacob, married Belle, daughter of Samuel Lewis; and Urias, married Annie,

daughter of George Hallman. He is of the fourth generation of the family who have lived on the homestead farm. David graduated from the Medical Department of the University of Pennsylvania, in 1834, and is a promising physician at Manayunk. The youngest of the family, Mary, resides with her parents.

ANDREW MORGAN.

Andrew Morgan, the well-known farmer and tanner of Worcester, is of Welsh descent and a representative of the fourth generation of the family in Montgomery County. His great-grandfather, William Morgan, a native of Wales and one of the earliest settlers of his nationality in this country or region, located, on his arrival here, in Hatfield township, between the Hatfield road and what is now the Bethel turnpike. His grandparents were Andrew and Rebecca (Levering) Morgan, and his father, Daniel Morgan. Their eldest son¹ was born February 6, 1770. He married Jane Wigton, daughter of Samuel and Elizabeth Wigton, of Bucks County. They made their home in Lower Providence township, and it was there that their seven children, five of whom grew to maturity, were born. Their names and dates of birth were as follows: Samuel, born July 10, 1803, (died in infancy); Rebecca, born August 2, 1805; Mary, born October 14, 1808, (died in infancy); Theodore, born November 26, 1811, (died March 20, 1870); Andrew, born September 28, 1814; Elizabeth W., born April 2, 1817, (died October 20, 1883); and Mary Jane, born December 26, 1818.

Rebecca was married February 24, 1824, to John Casselberry, one of the sons of William Casselberry, of Lower Providence township, Montgomery County, Pa., and he died September 4, 1834, leaving issue, four children, as follows: D. Morgan, D. Hearn, Melville L. and Catharine J. D. Morgan Casselberry was born April 3, 1825, and was married March 25, 1852, to Ann Eliza, daughter of John and Susanna Heebner, of the same township, and have eight children living, as follows: John H., M. Alice, Ann Rebecca, C. Wigton, Catharine J., Theodore M., Hannah Amelia, Leonora Russel, with two who died in infancy. The eldest, John H., married Clara, daughter of Emanuel and Kate Gouldy, who have two children living, Flora and Arthur. Ann Rebecca was married to D. M. Y. Weber, of the same township, and have two children, J. Stroud and Morgan C. D. Hearn Casselberry was born April 27, 1827, and was married in 1854 to Ann Elizabeth, daughter of Henry and Sebor Loucks, of the same township; said Ann Elizabeth died February 11, 1857, and left two children, who both died in infancy. Dr. M. L. Casselberry was

¹ The other children were William, Mary, who married Septimus Evans, Benjamin, Andrew. The last-named married Elizabeth, daughter of Jesse Beans, and he has one daughter, Elizabeth, surviving, who resides on her grandfather Beas's farm, in Warminster township, in Bucks County.

born November 29, 1830, graduated at the Homeopathic College in 1853, removed to Morgantown, W. Va., where he married Mary, daughter of William and Ellen Willey, on the 10th of May, A.D. 1859. She died September 24, 1862, without children, and in October, 1866, he married Margaret, daughter of John Prutzman, of Morgantown, W. Va., and have three children,—Mary, Byron and John. Catharine J. was born October 27, 1833, and was married March 6, 1856, to Henry W. Bonsall, attorney-at-law, Norristown, Pa., and had two children, Alice C. and J. Bartram. She died August 2, 1861, aged twenty-seven years.

able to make additions to his farm, effect many improvements, and erect a good house and out-buildings, the former being built in 1852 and the latter at different times as needed.

Mr. Morgan has been a very active man, but having no particular taste for public affairs, has taken but little part in them, preferring the more modest and quiet walks of life. In politics he was a Whig, and is now a Republican. He has been for forty years a member of the Baptist Church.

Although in his seventy-first year, Mr. Morgan is hale and sturdy and his mind unimpaired. He lost

Andrew Morgan

Theodore was married to Mary, daughter of Christian Detwiler, February 3, 1835.

Andrew, whose name forms the caption of this sketch, as he grew to manhood gained a practical knowledge of the tanner's trade and farming. In 1836 he married Ann Rebecca Allabough, of Perkio-men township, daughter of David and Sarah Allabough. In 1841, having purchased about sixty acres of the farm in Worcester township, on which he at present resides, he removed here with his little family. He bought a tannery and began business in that useful department of industry, and at the same time carried on farming. He applied himself closely to his two avocations and prospered in both so that he was

his wife, his faithful helpmeet through the years of his mature life, on September 4, 1881. Six children, of whom one died in infancy, were the offspring of this union.

Sarah J., oldest child of Andrew Morgan, was born March 11, 1839, and married Dr. John S. Shrawder, October 27, 1870. They have had five children, the oldest of whom died in infancy; the other four are living. In the order of their birth, their names are as follows: Clifford Beecher Shrawder, born December 3, 1871, died October 1, 1872; Larrie E. Shrawder, born October 8, 1873; Joseph Shrawder, Jr., born August 27, 1875; Laura K. Shrawder, born March 15, 1879; James M. Shrawder, born June 7, 1881.

John C., who was born October 20, 1840, succeeded his father in the tanning business in 1866. He was married December 17, 1868, to Cornelia, daughter of Benjamin Baker, of Norriton township, and have two daughters, Adele C. and Anna Rebecca.

James A. was born March 9, 1844, and married Bella, daughter of Henry Baker, of Norriton township.

Theodore, who was born September 22, 1847, resides with his father at the old homestead and carries on the farm. He married Fannie, daughter of Joseph Brower, of Upper Providence. Their children are Theodore H., born November 8, 1873; Mary B., born December 16, 1875; Helen A., born December 31, 1878; Flora R., born September 14, 1880; Andrew, born February 18, 1884.

Belle was born March 4, 1850, and was married to William Wood, of Whitpain township, January 9, 1883, and their children are as follows: Andrew Morgan, Jonathan Howard, and Rebecca Allabough Wood.

Elizabeth W. Morgan married Garrett D. Hunsicker, February 19, 1839. The latter died February 19, 1879, and the former October 20, 1883. Their children are Theodore M., born June 14, 1841, died March 14, 1843; John Quincy, born March 23, 1844, an attorney in Philadelphia; Morgan, born June 10, 1846, died March 14, 1847; Mary M., born June 1, 1848, died July 31, 1876; Ella M., born January 25, 1851; Robert Melville, born April 25, 1854. Mary M. Hunsicker married John R. Thomas, February 16, 1871. John Quincy Hunsicker married Mary E. Stiles, June 26, 1873. She died December 21, 1879.

Mary Jane Morgan married George Knabb, February 22, 1842. He was at that time a resident of Upper Providence, but was a native of Union township, Berks County, and was born January 26, 1809. He died at Port Indian, in Montgomery County, on November 7, 1865, and was buried at the Lower Providence Baptist Burial-Ground. The children of George and Mary Jane (Morgan) Knabb were Morgan, born February 10, 1846, died in infancy; Ida, born October 11, 1850, died February 27, 1879; Theodore, born April 28, 1854; Wigton, born June 8, 1856, died in infancy; and Ella, born March 17, 1861. Mrs. Knabb is a resident of Norristown.

REV. SAMUEL AARON, A.M.¹

The most noted clergyman that has figured in Montgomery County annals during the past forty years was undoubtedly Rev. Samuel Aaron. In mere scholastic sermonizing or revival power we may have had his superiors, but in breadth of intellect, exalted imagination, gifts of oratory, melting pathos, abounding charity and liberality, both of religious sentiment and alms-giving, we never had a greater. He was preacher, politician, philanthropist and teacher, all combined in

one. There was no necessary incongruity in this strange conjuncture of functions, for, says one of his biographers, "his religion was his politics and his politics his religion." He drew his political aphorisms from the Bible, and his faith within the compass of Scripture morals had no sect in it.

Samuel Aaron was born in New Britain township, Bucks Co., Pa., October 19, 1800, and was at the time of his death (April 11, 1865), in the sixty-fifth year of his age. He was of Welsh-Irish extraction, his father being of Welsh and his mother of Irish descent. The offspring of a second marriage of his father, he was the youngest but one of four brothers, the family consisting also of three sisters. His father, Moses Aaron, a farmer of respectable circumstances, was (also his wife, Hannah,) a member of the Baptist Church, and a man of sincere piety. Mr. Aaron always spoke of his father as "a good man," and cherished his memory. His mother died when he was but three years old, and at the age of six he had the misfortune to lose his father also. Left an orphan at this tender age, he was placed under the care and control of an uncle, a kind-hearted man by nature, but unfortunately addicted to habits of intemperance. The little boy was frequently obliged to trudge bare-footed to the village store and back with a jug of liquor; and the sad condition of his guardian's family and business affairs, and the neglectful treatment he experienced then, made him in after-life the terrible enemy he was of every form of intemperance. He worked on his uncle's farm till about sixteen years of age, receiving each winter a little schooling, when, obtaining a small patrimony inherited from his father, he entered the academy of Rev. Uriah Dubois, of Doylestown. At twenty he connected himself with the Classical and Mathematical School of John Gummere, at Burlington, N. J., as both a student and assistant teacher. In the year 1824 he married Emilia, eldest daughter of his old friend and preceptor, Rev. Mr. Dubois, and not long after left Burlington and opened day-school at Bridge Point, about two miles from Doylestown. Remaining there but a short time, he next became principal of Doylestown Academy. In 1826 he made a profession of religion, became a member of the Baptist Church and was ordained a minister, and in 1829 became pastor of the church of New Britain, near Doylestown. In February, 1830, his wife died, leaving him two children, Martha and Charles E. Aaron, two others having died in infancy. The death of a wife, with children to care for, is a terrible loss to a young minister; so three years after, April, 1833, he married Eliza G., daughter of Samuel Curry, a farmer of New Britain township. He immediately removed to Burlington, N. J., where he was assigned to the principalship of the High School; he also became pastor of the Burlington Baptist Church. In April, 1841, he was called to the Norristown Baptist Church, at the same time opening a select school for boys on the premises of the late Dr. Ralston. Mr. Aaron's popularity at

¹ For portrait of Samuel Aaron, see chapter on Education.

this date as a champion of temperance and anti-slavery, and also as a teacher of youth, was such as prepared the way for the establishment of "Tree-mount," which was operated in 1844. He taught for a period of forty-five years, and for seventeen years added the duties of an active, aggressive pastor,—three years at New Britain, five at Burlington, three at Norristown and six at Mount Holly. The degree of Master of Arts was conferred upon him in 1838, and later he was tendered the presidency of Central College, at McGrawville, which he declined. His declining years were darkened by financial reverses, but

of its most successful farmers,—so successful, in fact, that he is about to retire from active labor,—was the son of Arnold and the grandson of Peter Saylor, and was born in Lower Providence, September 15, 1828, the fourth in a family of nine children,—seven girls and two boys. Those older than Andrew J. were Elizabeth (widow of Abram Hallman, now living in Philadelphia), Emmeline (Mrs. George L. Bosser, deceased), and Mary Ann (Mrs. Jesse Hallman), of Norristown. Those younger are John C., who married Mary Ann Detwiler, and is now a resident of Lower Providence; Susannah, Angeline, Sarah K.

Andrew J. Saylor

these troubles never obscured his philosophic visions of life and its true source of happiness. Mr. Post, his biographer, says of him: "He lived to see the triumph of the principle he advocated, and the dawning of a new national day. On hearing of the fall of Richmond, and the surrender of Lee, April 9, 1865, two days before his death, he exclaimed, 'Thank God, I rejoice in the salvation of my country!' His last words were,—'Thy grace is sufficient for me.' He died April 11, 1865, in the sixty-fifth year of his age."

ANDREW J. SAYLOR.

Andrew J. Saylor, of Worcester, and known as one

and Isabella. The wife of Arnold Saylor and mother of these children was Mary Casselberry, a native of Lower Providence, who is now living and in her eighty-fourth year. Her home is in Philadelphia, and she has, in her old age, a great comfort in the companionship of her daughters, who reside with her.

Reverting to Arnold Saylor, the father of our present subject, it may be stated that in 1843 he purchased, and in 1844 removed to, the farm in Worcester, which his son now owns. He died here in 1856, and Andrew J. Saylor, who came to the farm a lad of sixteen, being then in his twenty-eighth year, possessing a practical knowledge of farming, and being full

of energy and ambition to make his way in the world, bought the homestead from the heirs. It consisted of seventy-two acres of good land, but the improvements upon it were not of the best order.

Mr. Saylor's industry and good management, however, soon provided means for the erection of suitable buildings and a very material betterment of the condition of the farm. The dwelling—a spacious stone structure, plastered—is three stories in height. The barn and other out-buildings are in keeping with it.

As we have already said, years of diligent and judicious labor had placed Mr. Saylor in an independent position, and the remainder of his life will, if no unforeseen disaster should take place, be passed in well-earned ease. He has always been an adherent of the Democratic party, but never has taken more than a good citizen's interest in politics and has never had a thought of office-holding.

His religious affiliation is with the Lower Providence Presbyterian Church.

On January 1, 1857, shortly after Mr. Saylor had acquired ownership of the farm, he took, as his wife, Julia A. Johnson, of Norristown, who was born in Worcester township in 1830, her parents being Isaac and Catherine Brumback Johnson, the latter a daughter of Matthias and Mary Brumback.

DAVID TRUCKSESS.

This active, influential and well-known resident of Montgomery County was born in Würtemberg, Germany (im Maulbronner Oberamt), March 25, 1814, and was of noble blood, but his ancestral branch of the family did not enjoy any of the usual privileges of the titled classes because their descent was not in the line of the oldest son. It may be added that if they were of such sturdy stuff as that of which the present generations of the family in Worcester are made, they did not need the advantages of class prerogative or inherited wealth to insure successful careers.

The parents of David, Jacob and Reghena Trucksess brought him, with a younger brother, who died soon after, to America, in 1819. There were no steamships then, and the tedious trip from Amsterdam, Holland, to Philadelphia, occupied about four months' time—from balmy April in the old world to burning August in the new. The family settled in Worcester township, Montgomery County, and there the parents passed the remainder of their lives with the exception of a few years. They are buried at the Trappe Lutheran Church. A daughter was born to them, but she died in her sixteenth year, leaving David the only child. The boy was hired out during the summer seasons and sent to school a little in the winter, but his early education was limited, because there were then no free schools for the poor and his parents could not afford to pay his tuition for long periods at the private schools. At the age of seventeen he was bound as an indented apprentice to learn the shoemaking

trade in Philadelphia. He served his time faithfully, learned the trade thoroughly, went to Norriton and worked six months as a journeyman, and then began business for himself, boarding in the house of George Anders. A year later, on the 19th of April, 1835, he married Sophia Foster. The young couple rented two rooms of Mr. Anders, and a year later, upon his advice and assistance, Mr. Trucksess bought the little farm of sixteen (now twenty-eight acres), upon which he now resides. In April, 1836, he had a house and barn built, and in April, 1837, he and his wife made their home upon the place. Farming was carried on in connection with shoemaking, and Mr. Trucksess succeeded, finally, in bringing the land, originally quite poor, into good condition. Mr. Trucksess, in recalling the beginning of his business career, says that he "had no capital, but good health, willing hands, and a good wife." This seemed, however, to be sufficient. There was then but one shoe-store in Norristown, but he made boots and shoes for Bean & Schrack, Hoven & Thomas and Moore & Longaker, general store-keepers of that place. The first ten years was a period of hard work and self-denial and many discouragements, but better days came, as they are apt to, to those who do the best they can during the dark ones. The farm was made to maintain the family, and what was made by labor at the shop was either used in making improvements or invested from year to year in other property. Close application to business and economy have been the elements of Mr. Trucksess' prosperity. He has now four farms and two houses, all paid for, and enjoys a comfortable independence. He was able to care for and give a home to his parents during their old age and has brought up a large family of his own in the enjoyment of unusual advantages.

The subject of our sketch has been, outside of the strict lines of his calling, fully as untiring and industrious as within, and enjoys a wide reputation as a man of affairs. His activity has been almost incredible and his reputation for carefulness and strict probity has led his fellow-citizens of the township and county to place him in various positions of trust, which have largely added to the demands upon his time. Early in life he was identified with the militia, being chosen first lieutenant in 1838, captain in the following year, and major ten years later. He was first lieutenant of the Washington Gray Artillery, and served during the riots in Philadelphia in 1844. He was an early advocate of the free-school system, and used his influence toward bringing about the adoption of the law providing for that measure, when it was quite an unpopular one. When the general law came into force, in 1851, he was made president of the board of directors for Worcester township, appointed by the court, and was once afterwards elected to the same position. Having considerable natural talent for music, he occupied his spare hours for a period of fifteen years in teaching singing and organizing choirs.

At one time he had nine different classes and over six hundred pupils to meet each week. Mr. Trucksess served, for five years, as a justice of the peace, and has held numerous other offices since 1838, among them being that of assistant internal revenue assessor in 1867-68. This position, like the others, was given to him without any solicitation upon his part, and was unexpected.

A very fair idea of the estimate of the high consideration in which he is held by those who know him best—the people of his own community and those of the county—is afforded by a glance at the list of honorable positions to which he has been elected by various bodies. He was a charter member and was

1835, a half-century of union has now been completed. Mrs. Trucksess' father was John Foster, and her mother's maiden-name was Birkenbine. She was born in Reading, Pa. Mr. and Mrs. Trucksess are the parents of ten children. The oldest son, Jacob, married Mary Roudenbush, of Salfordville, and is the father of two daughters. The second son, George A., married Mary W. Irwin, of Norristown. They have one son and two daughters. David, Jr., married Sarah Hallman, of Bridgeport, and is the father of two sons and three daughters. John F. married Mary Dettera, of Worcester, and has two daughters living. Andrew J., who succeeded to his father's shoemaking business, has been the organist at the Presbyterian

David Trucksess

chosen president of the Union Mutual Fire and Storm Insurance Company of Norristown; president the last six years; has been president of the Norritonville Live Stock Insurance Association for the past fifteen years; has been president of the Farmers' Union Horse Company (for the protection of horses and the detection of thieves), during the past forty years, and is also president of the board of trustees of the Norriton and Lower Providence Presbyterian Church and of the Fairview Village Creamery Company, having held the latter office since the organization of its management.

In politics he is a Democrat.

Mention has been made of the marriage of Mr. Trucksess. As that event was solemnized on April 19,

Church twenty years, and has inherited something of his talent for music, resides with his parents at the old homestead. His wife was Sarah J. Landis, of Perkiomen Bridge. They have four sons and one daughter. Margaret A. Trucksess is the wife of John Detwiler, of Philadelphia. Ann Rebecca is the wife of William H. Van Horn, of Philadelphia, and the mother of three children,—two sons and one daughter. Sophia F. is the wife of Leshar W. Mattern, of West Point, Montgomery County, and has two children, one son and one daughter. Elizabeth A. married C. C. Keeler (now deceased), and has two children, twin sons, and resides with her parents. The youngest of the ten children, Miss Ida V., resides with her parents.

APPENDIX.

THE CENTENNIAL CELEBRATION OF MONTGOMERY COUNTY, AT NORRISTOWN, PA., SEPTEMBER 9, 10, 11, 12, 1884.

CERTIFICATE.

The following constitutes a correct record of the proceedings connected with the Centennial Celebration of Montgomery County, Pa., with a list of exhibits and exhibitors, compiled from the original Entry Books, under the direction of the Centennial Association of Montgomery County, Penna.

Attest:

Joseph Fornance

President.

F. G. Hobson.

Recording Secretary.

Muscoe M. Gibson,

Corresponding Secretary.

At a regular meeting of the Montgomery County Historical Society, held May 25, 1882, the project of a suitable celebration of the centennial of the county's organization, in 1884, was discussed at some length, and a committee appointed to confer with a similar committee of the county officials to consider the proper observance of that occasion; said committee consisting of F. G. Hobson, Esq., Hon. Jones Detwiler and A. K. Thomas. On the same day the county officials met at the office of Irving P. Wanger, Esq., district attorney, to take similar action. At that meeting a committee, consisting of Henry W. Kratz, recorder of deeds, J. Roberts Rambo, register of wills, and Jacob R. Yost, county treasurer, was appointed to act in conjunction with the committee of the Historical Society. On the afternoon of the same day the two above committees met in the rooms of the Historical Society and effected a permanent organization. At the same time it was determined that a general committee be appointed, consisting of one person from each election district in the county, into whose hands the whole work of the celebration be placed. That general committee was gradually selected and the names of its members made public at the annual meeting of the Historical Society, February 22, 1883.

Here the matter was again left to rest until Monday, the 10th day of September, 1883, when, on the call of the chairman, the General Committee came together in the room of the Historical Society, at the courthouse. Here the real work began. Though few responded to the first call, yet those that did assemble were imbued with the idea that the matter was worthy of considerable effort and could be made a pronounced success. The following persons were present at the first meeting, viz.: Dr. J. E. Bauman, of Franconia; the Rev. C. Z. Weiser, D. D., of East Greenville; Dr. C. H. Mann, of Bridgeport; Isaac R. Rosenberger, Hatfield; John Walton, Horsham; William J. Buck, Jenkintown; J. J. Morrison, Moreland; Hon. Isaac F. Yost, New Hanover; Joseph For-

nance, Esq., First Ward, Norristown; John W. Bickel, Esq., Second Ward, Norristown; Hon. George N. Corson, Sixth Ward, Norristown; Dr. Samuel Wolfe, East Perkiomen; Albert Bromer, West Perkiomen; D. Morgan Casselberry, Lower Providence; and Joseph Fitzwater, Upper Providence; in addition to Col. Theodore W. Bean, F. G. Hobson, Esq., and Hon. Jones Detwiler, of the Historical Society, and J. Roberts Rambo, of the county officials. The chairman of the joint committee called the body to order, and stated the object of the assembling, after which Hon. Jones Detwiler was unanimously chosen temporary president. On suggestion of the committee on permanent organization the following officers were unanimously elected: President, Hon. B. Markley Boyer; Vice-Presidents, Joseph Fornance, Esq., Wharton Barker, Hon. Isaac F. Yost, Philip Super, Warner Roberts, Robert Iredell, Dr. Hiram Corson, Abraham H. Cassel, Rev. J. H. A. Bomberger, D. D., George Lower and Daniel Foulke; Recording Secretary, F. G. Hobson, Esq.; Corresponding Secretary, Muscoe M. Gibson, Esq.; Treasurer, Lewis Styer. At the same time the following chairmen of the various committees were appointed and authority was given each to appoint a number of members on each committee. Executive, F. G. Hobson, Esq.; Finance, David H. Rose, Esq.; Antiquarian, William J. Buck; Literary Exercises, Hon. George N. Corson; Music, Prof. Thomas O'Neill; Parade, Col. John W. Schall; Programme, Col. Theo. W. Bean; Memorial, Hon. Jones Detwiler.

The next meeting of the association was held at the same place, on the 15th of November, 1883.

Prof. Thomas O'Neill, declining to serve as chairman of the Music Committee, Henry W. Kratz was appointed in his stead and place. At this meeting the several chairmen of committees announced their associates. As the business to be brought before the Association accumulated, it was resolved to meet each month, on the Thursday next following the 22d of the month.

At this time the general nature of the celebration was discussed at length, resulting substantially in the plan afterwards successfully carried out.

The Memorial Committee was instructed to have prepared and erected a granite monolith to the memory of David Rittenhouse, the astronomer, to be placed in front of the Court-House, marking a continuation of the surveyor's meridian line.

On December 27, 1883, and January 24, 1884, regular meetings were held, at which the various committees reported and further plans were discussed concerning the manner of celebrating the forthcoming anniversary. The next meeting of the association was held on February 22, 1884, Hon. B. Markley Boyer presiding, when plans were discussed for raising money to defray the necessary expenses of the celebration and were referred to the Finance Committee. Col Theodore W. Bean was appointed chairman of a committee to invite the different civic and fraternal organizations of the county to parade, and Mrs. Sarah S. Rex was appointed chairman of a committee to prepare and issue a circular to the householders of the county, suggesting the kind of articles desired for the exposition, and requesting their loan for the same, with the power to appoint committees of ladies in each township and ward who were to make a complete canvass of the several districts. The thoroughness with which these instructions were carried out is attested by the complete list of ladies reporting from nearly every district in the county; and to these committees is due the credit of canvassing, reporting and actually collecting most of the exhibits placed in the antiquarian exposition.

On April 10, 1884, an adjourned meeting of the association was held, at which the important question of finance was finally decided, and upon suggestion of the Finance Committee a season-ticket, good for four admissions to the antiquarian exposition, was ordered to be issued at once. to be sold at one dollar each, with which was to be presented a memorial certificate of membership of the association. A communication from Hon. B. Markley Boyer was read, asking to be excused from further services as President of the Association, on account of the press of his judicial duties, but still extending to the association his best wishes for success, and promise of hearty co-operation. The vacancy was filled at the following meeting, May 15, 1884, by unanimously electing George W. Rogers, Esq., as President, but as he was about to sail for Europe, to be absent until the close of the Centennial, he tendered his resignation at the meeting of May 29, 1884, when Joseph Farnace, Esq., was unanimously elected to that position.

Of first importance were the finances. Money had to be raised in sufficient amount to assure success. The Finance Committee organizing with David H. Ross, Esq., chairman, and J. A. Strassburger, Esq., as its secretary and treasurer, soon had a plan matured. It pressed the sale of season tickets and memorial certificates vigorously, and popularized this plan of raising the needful funds. Each election district was asked to subscribe one hundred dollars. Within four days of sending out the supplies to the different committeemen, the upper district of Upper Providence, under the canvass of Professor J. Shelly Weinberger, had subscribed and paid its full quota. Other townships rapidly followed, until the total amount realized from advance sale of tickets and memorial certificates amounted to the sum of three thousand five hundred and fifty dollars. Credit is undoubtedly due to Mr. Strassburger for his active, energetic and systematic work in raising the necessary funds as well as arousing public interest.

The next meeting of the association was held on July 24th, and was one of its largest gatherings. The Philadelphia and Reading Railroad Company announced their willingness to return free of charge all articles shipped over their line, by express, consigned to the exposition, and also to give the association a liberal rebate on tickets sold to and from Norristown during the centennial. The full committees on parade, antiquarian and memorial were announced: also a committee, composed of persons

identified with the county, but residing in Philadelphia at the present time, said committee being known as the "Auxiliary Committee in Philadelphia," of which James B. Harvey was chairman.

At the meeting of the 6th of August, a great amount of detail work was attended to, and from that time the Executive Committee met almost daily, to pass upon the various questions as they arose.

The Building Committee had a space one hundred feet square floored over in the Court-House lot, upon which were erected four large tents. The court-room was floored over the tops of the seats, and glass cases arranged around the sides of the room and upon three large tables running its entire length. The Grand Jury room was prepared as the Art Gallery, and placed in proper shape under the special direction of Mr. J. W. Ridpath, of Jenkintown, who is deserving of special mention, as giving invaluable assistance in fitting up the room and arranging the pictures in proper place. He was assisted in this by Miss Sophia S. Freedly, of Norristown, a teacher in the Philadelphia School of Design for Women. The two arbitration rooms were fitted up with tables, upon which were exhibited the old and rare books of the county. When the exhibition opened everything was in readiness.

The Committee on Vocal Music met soon after their appointment, and invited about two hundred persons to assist in singing, on September 10. About half of that number assembled in response to the invitation, and selecting Professor J. V. Bean as their leader, soon became an efficient chorus.

An immense amount of work was necessary to get everything in running order. But so well was it managed, that when Tuesday morning the 9th of September, A. D. 1884, came, it found everything in its place. A committee of ladies and gentlemen devoted special attention to the decorations of the Court House and Music Hall, and both were greatly improved in appearance by the artistic arrangement of plants, flags and red, white and blue bunting. The work of the Committee on Parade, the Antiquarian Committee, memorial and literary exercises were most complete and satisfactory.

The morning of Tuesday, September 9, 1884, witnessed the opening exercises of the centennial celebration of Montgomery County. The crowd early gathered at the County Court-House, and upon its porch and steps were the officers of the Centennial Association and invited guests.

Shortly after nine o'clock, Joseph Farnace, Esq., president of the Centennial Association, came forward and said: "Citizens of Montgomery County, we have met here to hold the opening exercises of the celebration of our county's centennial. I present to you the Rev. Dr. Bomberger, president of Ursinus College

Dr. Bomberger then spoke as follows:

"I have been asked, my friends, to open these commemorative festivities with prayer; with prayer to Almighty God. It is eminently fitting that an occasion like this should be so begun. We owe to Him the blessings we enjoy from the first establishment of our fathers in this country, and especially in this section of it. We owe to Him all that we possess to-day in the way of real prosperity and progress. Let us therefore endeavor, not with the ceremonial formality of a merely decorous prelude to this interesting occasion, but with devout reverence for Him to whom our heartiest adoration belongs, to engage sincerely and heartily, in supplication, thanksgiving and prayer. Let us pray."

PRAYER.

"Almighty God, the Creator of the Heavens and the Earth, and our Creator, gathered here under Thine own Heaven, and surrounded by the works of Thy hands, and realizing that we are Thy creatures, we would come at the beginning of these interesting solemnities and festivities, and look to Thee with devoutly worshipful and thankful hearts, to praise Thy name as we ought to praise Thee for all Thou art, glorious in Holiness, fearful in praises, doing wonders, and for all Thou art pleased to be to us, and thus worthily magnify Thy Great and Excellent Name. Help

us in these festivities thankfully to call to mind all Thou hast done for us, all Thou didst for our fathers in generations past. Although we have proved unworthy of Thy many mercies, grant us grace most heartily to feel, deplore and confess our unworthiness, and yet penitently rely on Thy forgiving grace in Jesus Christ Thy Son. We desire heartily to thank Thee for all Thou hast done for us as a people in days gone by; that Thou didst bring our fathers to a land rich and richly furnished in all things needful for their bodily comfort. We praise Thee for the temporal prosperity that has attended their effort; and the rich inheritance we have received from them and through them in the earthly gifts which so abundantly surround us; for a rich and fertile land; for a healthful country, and for all the resources of it, the wealth and temporal comforts which abound on every side. But above all do we praise Thy Name that Thou wast pleased to bring to this land a people that feared God and loved righteousness; that brought with them not only desires for worldly prosperity, but principles founded on Thy Holy Word, derived from Thy Gospel, and that have been faithfully sown and maintained in our midst. O! help us to remember with grateful hearts how largely we are indebted to them, and above all to Thee through them, in these respects. May we prove worthy of the holy and blessed inheritance that has been secured and handed down to us. May we not forsake the God of our fathers nor the gospel of our fathers, never turn our backs upon the grace which gave them such peace, such power, and influence for good. We thank Thee for the educational institutions which they founded along-side of the churches they built here years ago, and praise Thy name that what was thus planned has been carried forward and that we enjoy the improvements that have been so secured. And now, Lord, we invoke Thy blessing upon this occasion. Throughout these days of joyous festivities, help us to fear Thy name, and amidst all our gladness to praise the Lord, and may our purpose to serve Thee be deepened and confirmed, that we may go forward into the future a people full of the fear of the Lord, sober, righteous, God-loving, cleaving to the great truths of the gospel, handing them down in Thy name unaltered and uncorrupted to generations to come, that when another centennial shall occur our descendants may rise up to magnify Thy name for what Thou hast through us accomplished on their behalf. Hear our prayer and accept of us in Christ, our adorable Redeemer, unto whom with Thee and the Holy Ghost, we will give immortal praise. Amen."

After music by the band Mr. Farnance said:

"The Burgess of the town, John H. White, was to have been here to welcome you this morning. Unfortunately he is prostrated on a bed of sickness. In his absence the Solicitor for Town Council, J. P. Hale Jenkins, Esq., of Norristown, will address you."

Mr. Jenkins delivered the following

ADDRESS OF WELCOME.

"In behalf of the Burgess of the borough of Norristown, now stricken with disease, I speak to you, Mr. President, and to you, ladies and gentlemen, fellow-citizens, all, welcome.

"To-day closes the first century of our existence as a county. There can be no hesitancy in saying that none of those who lived within its borders at the time of its organization, imagined that the close of the first century would find it the home of a hundred thousand happy souls. It is but proper, therefore, that we should meet to inaugurate the ceremonies about to take place and eminently fitting is it that these ceremonies should commence by dedicating a meridian stone to the greatest son of her soil, the father of olden science.

"The men of one hundred years ago knew nothing of steam as a motive power. To-day iron roads traverse our county from end to end and from side to side. Little did they know of the mechanical arts, but now, by the aid of inventive genius, our beautiful valleys are dotted all over with the busy mill and work-shop. The Constitution of the United States was not framed when our county was organized. Now, securing

to all political freedom and religious tolerance, 'life, liberty, and the pursuit of happiness,' it is an assured fact—a union of States which none can sever.

"Let me then say in welcoming you to our county seat on this gala day, that we should devoutly thank an indulgent Providence for the many blessings bestowed upon us in the past, and pray that the institutions which made these blessings possible be secured to us, our children, and our children's children forever

"Again I bid you, in the name of the Burgess and Town Council of the borough of Norristown, a hearty, thrice hearty welcome."

At the conclusion of Mr. Jenkins' remarks, Mr. Farnance, President of the Association, delivered the following

ADDRESS:

"To-day closes the first century of the existence of Montgomery County. We are here from all parts of the county to celebrate the event. Not only from our own county have you come, but also from adjoining counties some are here to rejoice with us. You have just been welcomed by the representative of the municipal authorities of Norristown. On behalf of the Centennial Association, and speaking for the people of Montgomery County, I also give you a welcome.

"It is proper for us to come together and celebrate the occasion in a manner befitting the event. We have cause to rejoice. The century just rolled by has brought us great prosperity. In forming the county, the chief idea was nearness to the Court-House. The act of Assembly, establishing the county, states that the cause for cutting off three-fourths of Philadelphia County and making Montgomery County of it, was its great distance from the courts at Philadelphia. That seems a strange reason now; for railroads and telegraphs and telephones have annihilated distance. The easy access to this Court-House is shown by the presence of many of you who have left your distant homes to-day, and are here at this early hour. By railroad, the remotest station in the county is but two hours ride from the county seat, while Norristown itself is but forty minutes ride from the heart of Philadelphia.

"There is a tradition to the effect that it was urged that the county seat should be located where the Egypt road diverges from the great road from Philadelphia, at Jeffersonville; but it was finally decided to locate it some three miles further down, where a road branched off to Swedes' Ford. Here they built the county buildings; a village sprang up around them, and here is to-day the great town of Norristown.

"Of the five men who were authorized one hundred years ago to buy a piece of land in Norristown township, near Stony run, and contiguous to the Schuylkill River, and erect thereon the county buildings for the new county, not one would have dreamed of prophesying the growth that has followed their selection. The county has grown from twenty thousand to one hundred thousand in population. The town has grown from nothing to nearly fifteen thousand. Our growth has been great in the past; it must be greater still in the future. Situated as we are, in the centre of a network of railroads, near to the great coal beds of Pennsylvania, with easy access to the two largest cities of the country in the midst of fine scenery, with fertile land, and healthful surroundings, we have every element for future development.

"Montgomery County was established September 10, 1784. Franklin County was established September 9, 1784. There is but one day difference between our ages. At Chambersburg, the county seat of Franklin County, they are to-day celebrating their centennial. It is proper that we should send them some greeting. On your behalf I will therefore send them this telegram,—

"COURT-HOUSE, NORRISTOWN, PA., September 9, 1884.

"To the Centennial Association of Franklin Co., Chambersburg, Pa.:

"Montgomery county congratulates her twin-sister on her one hundredth birthday."

"CENTENNIAL ASSOCIATION OF MONTGOMERY CO.

"As we mark this era, we contemplate the past, and part of our centennial celebration is the Antiquarian Exposition. Here are displayed the possessions of our own ancestors for comparison with things of to-day. We have collected from our own people the prized treasures of a century. Here are revived fashions of times so different from ours. Here are the works of once busy hands that have long since crumbled into dust. We see their works, we are reminded of their ways in many respects simpler and more frugal than ours. We honor and respect their memories.

"On behalf of the Centennial Association, I declare this exposition now open."

After music by the band, the people in large numbers sought admission to the Antiquarian Exposition.

DEDICATION OF RITTENHOUSE MERIDIAN STONE.

At eleven o'clock A.M. on Tuesday, September 9th, in the presence of a large concourse of people, the ceremonies of unveiling the monolith took place. Joseph Fornance, Esq., president of the association, standing near the granite stone, said, —

"A Committee was appointed by the Centennial Association to erect a suitable memorial to the memory of David Rittenhouse. Is that committee ready to report?"

Hon. Jones Detwiler, chairman of the committee, spoke as follows, —

"Mr. President: In behalf of the Memorial Committee, appointed by the Montgomery County Centennial Association, and at their request, I present the following report as their action." [Report handed to Mr. Fornance].

Mr. Fornance, in receiving the report, said, —

"The committee appointed present the following report."

The report was then read.

REPORT.

"At a meeting of the Centennial Association of Montgomery County, Pa., held February 22, 1883, Jones Detwiler was appointed chairman of the Memorial Committee of said Association.

"After due consideration and deliberation, on the part of the chairman, the following additional members of the committee were appointed, viz., — Dr. Hiram Corson, of Plymouth; John Hoffman, Esq., Hon. Hiram C. Hoover, ex-County Treasurer Samuel Jarrett and Samuel Rittenhouse, of the township of Norriton.

"At a meeting of the committee, held July 24, 1884, all the members present, it was unanimously

: "Resolved, — That a monolith, to be styled the memorial stone, be erected to the memory of the eminent philosopher, astronomer and mathematician, David Rittenhouse, once a resident of the township of Norriton, Montgomery Co. The stone to be of solid Quincy granite, seven feet in height, twenty-four inches at the base, and eighteen at the top, with four sides polished for inscriptions, and to be planted in the ground to the depth of four feet, imbedded in masonry of stone and cement.

"After consultation on the part of the committee with the different stone-cutters of Norristown, it was agreed to award the contract to George W. Smith.

"Dr. Hiram Corson was appointed a committee to prepare a suitable inscription for the same.

"John Hoffman was appointed a committee to superintend the erection, to have the privilege to call to his aid such assistance as should be required.

"It was agreed to erect the stone at the north end of the present meridian line, and to extend the said line about four feet without disturbing the present stones already planted, and to have the ceremonies connected with the unveiling, and passing it over to the proper authorities, to take place on September 9, 1884, at eleven o'clock A.M.

"This is to certify that the foregoing is a correct copy of our proceedings.

"JONES DETWILER, Chairman.

"HIRAM CORSON, M.D.

"JOHN HOFFMAN.

"HIRAM C. HOOVER.

"SAMUEL F. JARRETT.

"SAMUEL RITTENHOUSE."

Mr. Fornance then said, —

"Colonel Bean, to you, as President of the Historical Society of Montgomery County, I deliver this report of the memorial committee."

Col. Theo. W. Bean said, —

"Mr. Chairman, in the name and in behalf of the Historical Society of Montgomery County, it affords me great pleasure to receive and accept thereport of this Memorial Committee. It shall become part of the records of the society referred to, and shall ever be cherished as an interesting memorial of the event which it reports.

"By courtesy, it is now my pleasure, ladies and gentlemen, in furtherance of this memorial service, to introduce the Hon. B. Markley Boyer, who will make an appropriate address upon this interesting occasion."

Being thus introduced, Judge B. Markley Boyer made the following

ADDRESS.

"Fellow-citizens: It was a happy inspiration to have engraved upon the meridian stone planted upon the Court House terrace, and dedicated this day to its appropriate uses, the name of David Rittenhouse.

"Born in the county of Philadelphia, of which Montgomery was then a part, he resided in youth and manhood, during most of his life-time, within the present limits of our county. In Norriton township, within about five miles of this Court House, stood his patrimonial mansion. There lies the farm upon which, as a farmer boy, he grew to manhood, and there, throughout most of his life, he afterwards resided.

"There, in a little shop by the wayside, without other instruction than the intuitive promptings of an extraordinary genius, he taught himself to make clocks and mathematical instruments. His clocks remarkable for their accuracy and the beauty of their workmanship, are still treasured as heirlooms in many a household. There, in Norriton, he erected his observatory; there, with instruments in a great measure constructed with his own hands, he explored the heavens.

"There, learned scientists went for consultation and to participate with him in his observations. There it was he constructed his wonderful orrery, illustrating mechanically the movements of the solar system, upon a scale more elaborate and exact than had ever before been attempted, and which was a marvel of mechanical skill, exhibiting by the simple turning of a wheel, the relative positions of the planets and their satellites in their respective orbits at any given point of time during thousands of years in the future and in the past. No description can impart any adequate conception of this marvelous achievement in mechanical art.

"In alluding to it, Thomas Jefferson, who was a philosopher as well as a statesman, wrote: 'We have supposed Mr. Rittenhouse second to no astronomer living; that in genius he must be the first, because he was self-taught. As an artist, he has exhibited as great a proof of mechanical genius as the world has ever produced. He has not, indeed, made a world, but he has, by imitation, approached nearer its Maker than any man who has ever lived from creation to this day.'

"In his observatory in Norriton, he observed and calculated the transit of Venus in 1769, which gave him a world-wide reputation for the accuracy with which his observations had been made and mathematical deductions achieved. At that time the whole scientific world had been aroused by the vast astronomical importance of the transit of Venus over the Sun's disc, in determining the parallax of the Sun and other scientific

results depending thereupon, especially as this phenomenon can occur but twice in a century, and in some centuries not at all.

"If, among the contemporaries of Rittenhouse, there were those in Europe who left behind them the record of more original discoveries, it was owing to their ampler means and more favorable surroundings, rather than to any superiority of genius.

"Our self-taught philosopher unfortunately was not allowed to pass his life merely in philosophical contemplation and experiment. He was also a man of affairs, and participated largely in the active transactions of his countrymen. He served his country in various important and useful public capacities. He was a member of the convention which framed the first Constitution of Pennsylvania, and was elected the first Treasurer of the State, and was annually elected to that position by the unanimous vote of the Legislature for thirteen successive years.

"For the acceptance of such offices he was reproved by his friend and correspondent, Jefferson, who wrote to him in 1778 as follows:

RITTENHOUSE MERIDIAN STONE, MONTGOMERY COUNTY.

"Your time, for two years past, has, I believe, been principally employed in the civil government of your country. Though I have been aware of the authority our cause would acquire from its being known that yourself and Dr. Franklin were zealous friends of it, and I am myself duly impressed with a sense of the arduousness of government and the obligations of those who are able to conduct it, yet I am also satisfied that there is an order of geniuses above that obligation, and therefore ought to be exempted from it. Nobody can conceive that nature ever intended to throw away a Newton on the occupations of a crown. * * I do not doubt there are in your country many persons equal to the task of conducting government, but you should consider that the world has but one Rittenhouse."

"Nevertheless, for more than ten years afterwards, he continued to serve in the office of State Treasurer. Recognized as the first among scientific surveyors, he was successfully employed as commissioner in the

settlement of an alarming boundary dispute, between the States of Virginia and Pennsylvania, and also in determining the dividing line between the States of New York, New Jersey and Pennsylvania.

"When the United States Mint was established, David Rittenhouse was appointed by Washington its first director, and it was he who arranged the machinery and successfully organized that institution.

"His was, therefore, a busy life apart from the pursuits of pure science. What he might further have accomplished for astronomy, if his genius had been afforded exclusive and untrammelled scope in the sphere of his favorite science, none can tell. But a man so admirably equipped for practical life, and so ready and conscientious in the discharge of every duty, could hardly escape his share of the extraordinary responsibilities of citizenship in Revolutionary times, and in the organization of a new nation, struggling through its transition state from colonial to independent government.

"At such times the public services of the greatest and the best are in demand. As the result, therefore, of the public confidence in the exalted character of David Rittenhouse as a man, as well as the fame of his attainments, official employments of high civil trust, although unsought, were thrust upon him. And so, for long years, science lost the undivided devotion of his transcendent genius.

"As an astronomer and mathematician, amid all his other multifarious employments, he retained the foremost position in his own country, and as such was recognized in Europe. He succeeded Dr. Franklin as President of the American Philosophical Society, and was a fellow of the Royal Society in London. He died eighty-eight years ago, in the sixty-fifth year of his age.

"Such is a brief sketch of the citizen we honor by the simple memorial inscription which marks this granite monolith. It is not intended as his monument. It is erected, primarily, for another practical and useful purpose, but of a nature kindred with his pursuits in life. As a monument to his memory, merely, it would be too insignificant. But the memorial inscription is especially significant and appropriate when we consider the practical uses of the stone. To this monolith, firmly planted in its immovable foundation, our county surveyors will make their annual visitations, to compare and correct the variations of their instruments by the true meridian; and the dedication, recorded by the inscription it bears, will ever testify to them and to all, our grateful remembrance of David Rittenhouse, once the chief among surveyors; and the honorable pride we feel in counting him, the illustrious astronomer and artisan, among those who have distinguished and adorned the history of our county; and in thus honoring him, we

honor ourselves."

At the conclusion Rev. Isaac Gibson pronounced the following.

BENEDICTION.

The grace of our Lord Jesus Christ, the love of God, and the fellowship of the Holy Ghost be with us all, evermore. Amen.

Music by the Norristown band followed, which concluded the exercises of that day.

The meridian stone thus unveiled contains the following inscriptions:

- On the east face: DAVID RITTENHOUSE,
 EMINENT ASTRONOMER
 AND MATHEMATICIAN.
 BORN APRIL 8, 1732.
 DIED JUNE 26, 1796.
- On the north face: HE CALCULATED AND
 OBSERVED THE TRANSIT
 OF VENUS AT HIS HOME
 IN NORRITON, 1796.

On the west face :

ERECTED BY THE
MONTGOMERY COUNTY
CENTENNIAL ASSOCIATION.

On the south face :

1784 | 1884.

SECOND DAY.

MEMORIAL EXERCISES.

The exercises of Wednesday, September 10, were held in Music Hall.

Before ten o'clock, the time of opening, every available seat in the auditorium and gallery was filled, while great numbers crowded all the aisles and other spaces.

In the rear of the stage, arranged upon elevated seats, were the vocalists, who, with the orchestra, were under the leadership of Prof. J. V. Bean.

The exercises commenced with the rendition of an overture by the Philharmonic Orchestra of Norristown, after which the hymn, "Before Jehovah's Awful Throne," to the tune of "Migdol," was effectively rendered by the Centennial chorus and the orchestra.

Rev. H. S. Rodenbough, pastor of the Providence Presbyterian Church of Lower Providence, the oldest pastor in continuous service in the county, offered the following

PRAYER.

"Holy, holy, holy, Lord God of Hosts, the whole earth is full of Thy glory. Great Creator, we magnify Thine infinite wisdom. All Powerful Supporter and Preserver, we rest in Thy strength. Sovereign Ruler, we own Thine authority. We bow before Thy throne. Omniscient Judge, we stand at Thy righteous bar. Kind, loving Heavenly Father, through Christ, Thine only begotten Son, our elder brother, we, Thy children, seek Thy tender care. According to Thy good pleasure, Thou settest up and Thou puttest down. Thou hast highly exalted this nation, and we would exalt the glory of Thy great name. Thou hast bountifully blessed this Commonwealth, and we would sincerely honor Thee. This county, whose centennial we now celebrate, Thou hast richly blessed in every spiritual, moral, intellectual and material interest. For so great favors we would most devoutly bless Thee, while we would humbly ask for grace, rightly to use, diligently to cultivate, and hand down in undimmed brightness to those who shall follow after. We thank Thee for the excellent men and women raised up and employed by Thee in the great work Thou hast done for us. Help us to honor their memory, by cultivating their spirit, copying their example, and faithfully carrying forward the work they have left in our care. And now, kindly vouchsafe to favor all the exercises of this memorial occasion. Let nothing mar ; make everything contribute to the desired success. May impressions be made, healthful and lasting, a perennial fountain, sending forth an unfailling stream to gladden and refresh this, our heritage, not only throughout another century, but until time itself shall be no more. These favors, with every other needed blessing, grant for Jesus' sake, to whom, with the Father and the Holy Spirit, be all glory, honor, might and dominion, now and evermore. Amen."

At the conclusion of the prayer, Joseph Fornance, Esq., President of the Centennial Association, said :

"The idea of celebrating the Montgomery County centennial started in the Historical Society of Montgomery County. They appointed a committee for that purpose, composed of citizens from the various districts of the county. That committee met, organized, called itself the Centennial Association of Montgomery County, and got to work. I am here as President of that committee, and it is my duty to call this assemblage to order, and to preside over its exercises. In working up the cause, at first

we met with little encouragement ; but as the anniversary day approached, interest was aroused, and the people of the county responded nobly. They needed but a little stirring up to show that they were full of patriotism.

"Yesterday, on behalf of the Centennial Association of Montgomery County, I sent a telegram to Franklin County, congratulating it on reaching its one hundredth birthday. I have received this telegram in answer to it :

"CHAMBERSBURG, PA., Sept. 9, 1884—1.23 P.M.

"To the Centennial Association of Montgomery County :

"Franklin County returns the salutation of her twin sister, Montgomery County. Recalls with pride the triumphs of the past. Rejoices in the present prosperity of all, and enters upon a second century with gratitude and hope.

"BENJ. CHAMBERS, Chairman."

The "Centennial Hymn," written by John G. Whittier, was sung by the chorus, accompanied by the orchestra.

Mr. Wm. J. Buck delivered the following

HISTORICAL ORATION.

"It is well in the flight of time to have occasion to pause and review the events that have transpired around us ; to know whether, on the whole, we have advanced or retrograded as concerns the general welfare ; in what respect, if any, we have really progressed ; and that the changes going on be pointed out, that comparisons may be instituted and deductions drawn as to the results. This is the philosophical aim of history, and, if justly carried out, when made known to a thinking people, cannot fail but exert a beneficial influence. Time will not pause a single moment, and no people can remain stationary. Change, greater or less, is a law in nature to which all that has life must submit. It behooves us then to guard that it be for the better. This gathering is no ordinary one—a centennial, because one hundred years ago this county was formed ; a bi-centennial, because two hundred years have elapsed since its first settlement. In less than half an hour's time allotted, where shall I begin, and what shall be omitted? Hence, forbearance is expected on much that cannot even be alluded to, relating to the long period that has elapsed.

"The first knowledge of our territory by Europeans must have been gained through the prosecution of the beaver trade on the Schuylkill, and along which they had erected several forts. The Upland Court Records mention, in 1677, Beaver island, on this river, which may have been the present Barbadoes island, or one of those in Lower Merion. In the pursuit of this traffic, either by the Indians, Dutch and Swedes, the canoe must have been their chief dependence in travel and conveying freight. But in this project they were only actuated by a love for gain, and but little for the progress or development of the country ; hence their easy conquest by the English. A map was published in London in 1698, which has been faithfully reproduced, and will appear in the forthcoming history of the county, that represents, at that early date, the Schuylkill from its mouth up as far as about the present city of Reading, or fully one-third its entire length, with the Wissahickon, Perkiomen, and the Manatawny, and all their leading tributaries, with accuracy, clearly demonstrating that at that time the present territory of Montgomery must have been pretty well explored.

"The date of settlement by the Welsh, English and Germans was very close in this county ; indeed, so close with the two former, that the matter by further research may be contested. Hence the important question, Who was the first European that permanently settled on our soil, sustained by original records? As the case now stands, that honor belongs to the Welsh. These people, before the arrival of Penn, had purchased from him forty thousand acres of land, which was subsequently located in Merion, Haverford, Goetsen, and several adjoining townships. How

much of it was located in the present Upper and Lower Merion is not known, but no doubt it embraced considerably over half their area. Under this encouragement, the ship 'Lyon,' John Conipton, master, arrived with forty passengers in the Schuylkill river August 13, 1682, almost two months preceding Penn's arrival, on board of which was Edward Jones, with his family, who, on the following 26th, sent a letter to Wales, wherein he states: 'The Indians brought venison to our door for sixpence ye quarter. There are stones to be had enough at the Falls of Skoolkill—that is where we are to settle, and water power enough for mills; but thou must bring mill stones and the irons that belong to it, for smiths are dear.' We have the authority of John Hill's map of the environs of Philadelphia, published in 1809, that the aforesaid made 'the first British settlement, 18th of Sixth-month, 1682,' which is only five days after his arrival in the Schuylkill. The place designated thereon is now the estate of his descendant, the late Col. Owen Jones, near the present Libertyville; and is certainly an early claim, for Philadelphia had not then been founded.

"This will now direct us to the Welsh, a people descended from the ancient Britons, possessing their own language and peculiar characteristics. Dr. Thomas Wynne arrived with his family in the following November on the 'Welcome,' with William Penn. He settled beside his son-in-law, Edward Jones, whence has originated the name Wynnewood. John Roberts came in 1683, and settled near the present Pencoyd, which has received its name from the place of his nativity. In the list of 1734, fifty-two taxables are mentioned in Lower Merion, of which forty-four are Welsh and four English; in Upper Merion, for said date, of thirty-two, twenty-two are Welsh and one English; in Gwynedd, of forty-eight, thirty-nine are Welsh and six English; in Towamencin, eight are Welsh and three English; in Horsham, five are Welsh and four English; in Plymouth, eight are Welsh and six English; in Montgomery, of twenty-nine, twenty-two are Welsh; in Norriton, seven are Welsh and six English. Thomas Evans and William Jones purchased seven thousand eight hundred and twenty acres in Gwynedd, in the beginning of 1698, and were soon joined by Cadwallader, Owen and Robert Evans, Hugh Griffith, Ellis David, Robert Jones, Edward Foulke, John Hugh, and John Humphrey. In 1700 they erected a small log building for worship. Owing to an influx of settlers, a large stone building was erected in 1712. The subscription paper was written in Welsh, to which was affixed sixty-six names. A petition from the residents of Gwynedd for a road to Philadelphia, in June, 1704, states that they then numbered thirty families.

"Before 1720, John Evans, William James, Thomas James, Josiah James, James Lewis, Edward Williams, and James Davis, had settled in Montgomery township, in which year they built there a Baptist church, in which preaching in the Welsh language was maintained down to the Revolution. According to a well-known tradition, the early Welsh settlers sought out in preference, the lands in Gwynedd and Montgomery, because they were not near so heavily timbered as in the townships below, and would, therefore, in its removal, require so much less labor to bring the same under cultivation; not imagining, in consequence, its much greater productiveness. Before 1703, David Meredith, Thomas Owen, Isaac Price, Ellis Pugh, and Hugh Jones, all from Wales, settled in Plymouth. The Welsh Friends built in Lower Merion, in 1695, the first house of worship erected in the county. The Rev. Malachi Jones, from Wales, organized the first Presbyterian congregation at Abington, in 1714. According to the list of 1734, the Welsh at that date exceeded the English decidedly in population. Out of a total of seven hundred and sixty names, the former numbered one hundred and eighty-one and the latter one hundred and sixty-three. Necessity at first compelled the Welsh, the English and the Germans to form settlements by themselves, owing to a general ignorance of each other's languages, which, of course for a long time, must have greatly interfered in their social intercourse.

The Welsh, for the first half century, came in and settled here pretty extensively, for in 1734 they formed nearly one-fourth of the entire population; but with the cessation of religious persecution at home, ceased coming, which is one reason of their having since so diminished.

"The next settlement most probably was made by the English in Cheltenham. There is no doubt but what this township received its name through Toby Leech, one of the earliest settlers and land-holders there. On his tomb-stone, at Oxford Church, is found this extract, that he 'came from Cheltenham, Gloucestershire, England, in 1682,' which is a matter of confirmation. There is reason to believe that there is no district in the county that was named earlier than this, or had earlier surveys made to purchasers. In evidence, we know from the records that Thomas Fairman, on the 1st of Seventh Month, 1683, surveyed, for Patrick Robinson, two hundred acres, adjoining Richard Wall, by Tacony Creek, which states that 'this tract of land is in the parish of Cheltenham.' From the aforesaid we learn that Richard Wall's purchase had been made still earlier, and was located in the vicinity of the present Shoemakerstown. The latter was also from Gloucestershire, and we know John Day, William Brown, Everard Bolton, John Apmear, John Russell, and Joseph Matuer, were also early settlers here from England. John Hallowell, John Barnes and Joseph Phipps had settled in Abington before 1697. Nicholas More, a physician from London, arrived soon after William Penn, in 1682, and had conveyed to him by patent, 7th of Sixth Month, 1684, the manor of Moreland, containing nine thousand eight hundred and fifteen acres. About 1685 he commenced thereon the erection of buildings, where he lived and died, calling the place Green Spring. Jasper Farmar, by patent, January 31, 1683, took up, in two tracts, five thousand acres of land. His widow, Mary Farmar, settled thereon, with the family, in the fall of 1685, and it was the first settlement in Whitemarsh. Edward Farmar, on the death of his mother, about the close of 1686, became the owner of three-fourths of the original purchase. He became a noted man, interpreter of the Indians, and before 1713 built a grist-mill on the Wissahickon. About 1685 Plymouth was originally purchased and settled by James Fox, Richard Grove, Francis Rawle and John Chelson, all from Plymouth, in Devonshire, but who afterwards removed to Philadelphia, John Barnes, who had purchased in 1684, two hundred and fifty acres in Abington, and settled there, by will, in 1697, vested in the trustees of Abington Meeting, one hundred and twenty acres, for the use of the same and for a school house. This was, no doubt, the first donation for educational purposes within the present limits of the county, if not among the first in Pennsylvania. Thomas Palmer and Thomas Fredell were among the earliest settlers in Horsham. Edward Lane and Joseph Richardson settled in Providence in 1701, and the former built a mill in the vicinity of Collegeville in 1708. Henry Pawling came from Buckinghamshire, and was also an early settler in Providence. To the English belongs the honor of having burnt the first lime from lime-stone, in Pennsylvania.

"Nicholas More, in a letter to William Penn, in England, dated September 13, 1686, states that 'Madame Farmar has found as good lime-stone as any in the world, and is building with it. She offers to sell ten thousand bushels at six pence the bushel, upon her plantation.' Thomas Fitzwater carried on the burning of lime before 1705, at the present Fitzwaterstown. Oldmixon mentions lime burning in Upper Merion before 1708.

"We will now take up the most English townships, as settled in 1734, to compare with the Welsh. Abington had twenty-four English and thirteen Welsh; Cheltenham, eleven English and six Welsh; Moreland, forty-seven English and seven Welsh; Whitemarsh, twenty-three English and nine Welsh; Upper Dublin, fifteen English and five Welsh; Springfield, nine English and no Welsh. It will be perceived that even

in the most English settled townships, with one exception, the Welsh possessed some strength. The English built Abington Friends' Meeting-house in 1697; at Horsham, 1721; at Providence, 1730, and at Pottstown, 1763; St. Thomas' Episcopal Church, in Whitmarsh, about 1710, and St. James', in Providence, in 1721.

"According to the list of 1734, out of a total of seven hundred and sixty names, three hundred and ninety-five were already Germans, and can be regarded as the original settlers of over half the territory in the county. In less than a year from the landing of Penn, a colony of Germans, chiefly from Creyfelt, arrived in October, 1683, and shortly afterwards founded the village of Germantown. The Proprietary had been among them in their native land, and encouraged them to come. Here, liberty of conscience had been proclaimed, and an exemption from titles; though neither was tolerated in Great Britain, or, even to a very limited extent, along the valley of the Rhine, where also were the frontier lines of powerful France, and the frequent wars of Germany; the results of which combined, were strong incentives to emigration to those more peacefully and liberally disposed. To facilitate this, a company was organized at Frankfort-on-the-Main, and numerous pamphlets circulated throughout Germany, in the language of its people, setting forth the peculiar advantages of the distant colony. Hence, it need not be a wonder that the weaker of the persecuted sects were disposed to come first, for no matter how strong the attachments of nativity, the fatherland presented, from their experience in the past, no bright or sanguine future. The doctrines of the Reformation had now been established almost a century and a half; yet, through the connection of church and state, progress to toleration was very slow.

"A majority of the earliest Germans were members of the Society of Friends, and they had not been in Pennsylvania five years, before they were shocked at the system of negro slavery that prevailed, and was maintained and continued by the English colonists. The result was a protest on the subject, dated at Germantown, 18th of Second-month, 1688. As this was the first document ever issued in English-America against the iniquitous system, it demands for these people some credit. Concerning themselves as a body, and to whom it was alone directed, the Friends did not approach it until the long period of three-quarters of a century had elapsed, through the excitement brought about at the dawn of the Revolution by the passage of the Stamp Act, as to the rights of mankind. The start, however, made by these Germans, was so powerful in its effects on their countrymen, the Mennonites, Dunkards, and all of their other sects, as to cause them to abstain almost entirely from holding negroes or Indians in bondage; and hence the great exemption, from an early period, of the present territory of Montgomery County from the evils arising from African slavery.

"Mathias Van Bebber purchased a tract of six thousand one hundred and sixty-six acres of land, which, by patent dated February 22, 1702, was located on the Skippack creek, constituting about one-half of the southern portion of what is now Perkiomen township. He began thus early, for so remote a distance from the city, to invite settlement by selling it off in parcels. Among the settlers prior to the close of 1703 were Henry Pennacker, John Kuster, John Umstat, Claus Jansen, and John Frey; John Jacobs in 1704; Edward Beer, Gerhard and Herman Indehoffin, and Dirck and William Renberg before the close of 1707. In 1708 we find here William and Cornelius Dewees, Herman Kuster, Christopher Zimmerman, John Scholl, and Daniel Desmond, followed, in 1709, by Jacob, John and Martin Kolb and John Strayer. The settlement so increased that Van Bebber gave one hundred acres towards a Mennonite meeting-house, which was built prior to 1726. Henry Frey, or Fry, who settled in this vicinity, is stated to have arrived in the colony two years before the landing of Penn. But even prior to the Skippack settlement, it is known that some of the German settlers located themselves in some of the

lower townships, as, for instance, Cheltenham, Springfield, Whitmarsh, Abington, Moreland, Upper Dublin, and Horsham. For the Shoemakers, Tysons, Snyders, Clines, Ottingers, Cleavers, Redwitsers, Rinkers, Bartlettalls, Melchers, Leverings, Reiffs, Conrads, Lukenses, and Yerkesses, were located pretty early there, as substantial land-holders. The Germans were the original settlers of Perkiomen, Towamencin, Upper Salford, Lower Salford, Hatfield, Franconia, Frederick, Marlborough, New Hanover, Upper Hanover, and Douglass, and contend almost with the English in the settlement of Cheltenham, Springfield, and Upper Dublin.

"The Frankfort Land Company purchased twenty-two thousand three hundred and seventy-seven acres, that chiefly lay in New Hanover and adjoining townships. John Henry Sproggell purchased a tract of six hundred and thirty acres, adjoining the present borough of Pottstown, upon which he settled before 1709, and consequently among the first in that section. Isaac Schaeffer was a settler and a considerable landholder in Plymouth in 1702. Jacob Schrack settled in Providence in 1717; John Frederick Hillegas in Upper Hanover in 1727; and Elias Long, John George Gankler, John Henry Beer, George John Weiker, and John Martin Derr, in Salford and vicinity, before 1728. Justus Falkner had a Lutheran congregation organized in New Hanover in 1703. A church was built in Upper Providence in 1743, in Upper Dublin in 1754, at Barren Hill in 1761, St. John's, Whitpain, and St. Paul's, Lower Merion, in 1769. The German Reformed had congregations at Whitmarsh, Skippack, Salford, and New Hanover, at which John Philip Boehm preached before 1727. A church was built at Whitpain in 1740, and in Worcester in 1770. The Mennonites had houses of worship erected in Perkiomen in 1726, in Lower Salford in 1741, and in Towamencin in 1750. The Schwenkfelders arrived here in 1734 and 1740, and the Dunkards still earlier, and had organized congregations. The census of 1870 gives the county one hundred and forty-four houses of worship. Of this number the exclusive German sects had sixty-eight, only four less than half, as follows; Lutheran, twenty-five; German Reformed, ten; Mennonite, ten; Dunkards, nine; Evangelical Association, nine; and Schwenkfelders, five. Of the balance, it is estimated that at least one-fourth may be allowed the German element, which will make two-thirds of the total number, which is about their present proportion of the population.

"Although the Swedes had settled near the mouth of the Schuylkill in 1642, and four years later erected a church there, yet no evidence exists of their having settled early within this county. It has been recently ascertained that Peter Cox had made a purchase of land in Upper Merion before 1702, and that Gunner Rambo, in said year, had endeavored to secure a tract beside him. However, there is no doubt that the latter, with Peter Rambo, Peter Yocum and Mats Holstein, had settled on their purchases here previous to 1714. John Matson, it is probable, did not settle here till considerably later, as his name is not on the list of 1734. At Morlatton, beside the Schuylkill, in the present Berks County, several had settled before 1716. We find in Upper Merion, in 1734, the names of Mounce Rambo, John Rambo, Gabriel Rambo, Elias Rambo, Mats Holstein, and Peter Yocum. The Swedes had a partiality to the Schuylkill, and were skilled in its navigation with the canoe, transporting themselves and their produce by this means to mill, to church, and market. We even ascertain that to their weddings and funerals they were also frequently thus conveyed. It is known that some of their canoes, in 1732, carried from Morlatton as much as one hundred and forty bushels of wheat to Philadelphia. The Swedes were a pious people, who lived along the valley of the Delaware, in peaceable relations with the Indians, for forty years before the arrival of William Penn. One matter concerning the Swedes is remarkable. Although their writers have left us most excellent books on the country, yet there are no accounts of early explorations up or along the Schuylkill. Indeed, they do not appear to have been

an exploring people, leaving that to the English and the Dutch, and among Germans, to such fearless and adventurous spirits as Conrad Weiser, and the devoted missionaries, Zeisberger, Pyrlaen, Schmick, and Heckewelder.

"The Scotch-Irish did not settle here early. To our surprise, in the list of 1734, only some sixteen or seventeen names can be ascertained, chiefly in the townships of Norriton, Whitpain, and vicinity. The Porters, Knoxes, Todds, and Burnsides, must have come in later. The influx of Irish into this county was small previous to 1824, but since has greatly increased, especially along the valley of the Schuylkill, where manufacturing interests prevail. The Scotch-Irish and the Irish materially contributed to the strength of the army during the Revolution. Andrew Porter's company of artillery was largely made up of the former, and Col. Stephen Moylan's cavalry regiment of the latter.

"The Revolution could not pass by without the people in this county contributing thereto, and bearing their share of its trials and sufferings. Concerned from the very beginning, we had such men as Gen. Peter Muhlenberg, Col. Samuel Miles, Col. Robert Loller, Col. John Bull, Col. Andrew Porter, Col. Christopher Stuart, Col. Archibald Thompson, Charles Thompson, David Rittenhouse, Frederick Antes, and the patriotic Hiester family, of Upper Salford, as well as many more, who did much to aid the cause. The events of Whitemarsh, Barron Hill, Valley Forge, and the Crooked Billet, transpired on our soil, and all that precedes and follows the battle of Germantown. Within these limits, during the memorable struggle, Washington and his army remained nine months, lacking five days, very probably a longer time than was spent in any other county during this period. The several houses used as his headquarters are still standing, and the remains of entrenchments, thrown up on our hill sides, can be traced to this day.

"After an arduous struggle, the Revolution at last came to a close, and the country achieved its independence, and on September 3, 1783, a definite treaty was signed with Great Britain. Peace, happy peace, now reigned within our borders, and industry soon brought returning prosperity to the long-neglected fields and work-shops. Above all, confidence was now restored, and the laborer was secure in his reward. Up to this period, all the territory at present in the county was comprised in that of Philadelphia, which, from the increase in population, required many in attending to county affairs, to go a considerable distance, at a great inconvenience; and, in consequence, petitions were gotten up and numerous signed, praying for the erection of a new county. These were considered and acted upon by the Legislature, and a law passed September 10, 1784, 'for erecting part of the County of Philadelphia into a separate county.' Thus did the present County of Montgomery, rich and populous as it now is, spring into origin one hundred years ago.

"In this brief and hasty survey of our progress, it is well to glance at what Montgomery County was a century ago. It then comprised twenty-eight townships, with a population of about twenty thousand inhabitants. The first assessment, for 1785, returned four thousand three hundred and sixty taxables, eighty bound servants, one hundred and eight negro slaves, ninety-four grist mills, forty nine saw mills, five oil mills, nine distilleries, nine paper mills, thirty-one tanneries, ten fulling mills, four hemp mills, fifty-three riding chairs or gigs, and six phaetons. At this time, though a century had elapsed since the first settlement, there was not a turnpike, no post office, no newspaper, no poor house, no canal, and no academy, or even a secondary school, in the county. No bridge had been erected over the Schuylkill, or any of our larger streams; but, instead, they had to be crossed either at fords or ferries. Not a town or a village within its entire area that at this time contained thirty-five houses. One public library alone, at Hatboro', founded in 1755, for which the books had to be imported from London, at this date contained five hundred and fifty volumes. Only two stage

lines had been established; one from Bethlehem to Philadelphia, started in 1763; the other from Reading, through Pottstown, to the city, in 1761, by William Coleman. Each made but one weekly trip. The churches numbered about thirty-five, of which the Friends had seven; the Episcopalians, including Swedes' Church, three; Presbyterians, three; Baptists, one; Methodists, one; and the twenty remaining churches belonged to several German denominations, showing that the latter had now become pretty numerous in population.

"From the above statement, we are led to consider as to what Montgomery county is to-day, though with only four hundred and fifty square miles of territory. In population and resources, without Philadelphia, it is the sixth county in the State, being only exceeded by Allegheny, Luzerne, Lancaster, Schuylkill, and Berks. It now possesses thirty townships, twelve boroughs, sixty-five election districts, one hundred and eighteen post offices, two hundred miles of turnpike, one hundred and sixty-six miles of railroad, with considerably over one hundred stations. Fourteen bridges span the Schuylkill, all built in less than three-fourths of a century. To strangers it should be mentioned, that the noble building in which the antiquarian exposition is held, was built from our own marble, lime and iron, procured within a few miles of its site. Of the numerous manufactories, educational establishments, charitable institutions, and various improvements that abound, only an allusion can be made. We have in this goodly heritage of our forefathers two hundred and four inhabitants to the square mile, while, according to the latest statistics, Scotland, Denmark and Portugal, average but very little over half this number; Austria and Hungary have one hundred and forty-four; Bavaria, one hundred and seventy-four; and France one hundred and eighty-three. The township of Cheltenham, without any large villages, contains three hundred and ninety inhabitants to the square mile, approaching the most thickly settled countries. Such are our wonderful resources, and the general happiness of our people, that we cannot realize that we are densely peopled, which, in other and much older countries, has so long been associated with wretchedness, and, as they would have, arising from an inability to secure a sufficiency of food. What a subject is here for the people of Europe to ponder on. Taken collectively, and considering the progress we have made since our first settlement, how eventually, and at no great distance of time, we must surpass in population and resources, not only the very best portions of Europe, but perhaps every country on the face of the globe.

"Within the small area of Montgomery county have lived and died distinguished persons. A Major General of the Revolutionary army, a Speaker of the first Congress of 1789, and three Governors of Pennsylvania, were born here. Among the distinguished dead may be mentioned Nicholas Scull, John Lukens, Robert Loller, Nathaniel B. Boileau, Isaiah Lukens, Samuel and John Gummere, Benjamin Hallowell, Job Roberts, Henry Funk, Henry Ernst Muhlenberg, Charles Philip Krauth, John and Daniel Hiester, Andrew Porter, John Bull, Frederick Antes, Henry Scheetz, William B. Smith, Jonathan Roberts, William Potts Dewees, William Cullum, David R. Porter, Francis R. Shunk, Joseph Foulke, and Alan W. Corson. They were also born here. Among our distinguished residents we can mention Charles Thomson, H. M. Muhlenberg, Samuel Miles, Sir William Keith, Thomas Grane, Elizabeth Ferguson, Rowland Ellis, Christopher Dock, David Rittenhouse, John J. Audubon, Jacob Taylor, Benjamin Lay, Bird Wilson, Arthur St. Clair, and Lucretia Mott. Having no desire to be invidious, the distinguished living I shall pass by. But it is enough to say that in all the varied pursuits of life in which we find them, whether it is in mechanical skill and invention, in agriculture, in the learned professions, or in any of the pre-tailing arts and sciences, they have talent to do us credit. Montgomery county has furnished gallant officers and men, not only in the Revolution,

but in the war of 1812 and with Mexico. To the late rebellion it furnished its share again, and a monument in the neighboring square contains the names of five hundred and forty-seven, that gave their lives in the terrible struggle that the Union of our forefathers might still be preserved and perpetuated. This goes to show a people eminently self-sacrificing and patriotic.

"In conclusion, a few words more for our honored county. In the long course now of two centuries, not an instance can be found that a white man or an Indian had here shed each other's blood. Mobs have never here prevailed, the most violent reformers have had their way, and no churches or other buildings have been destroyed under such temporary excitement. Though peopled by the English, Welsh, Germans, Swedes and Irish, speaking various languages, and holding different religious and political views, they resolved to live here peacefully with each other, while they diligently labored to improve their possessions, till they have become as we now behold and enjoy them at this day. Let, then, the celebration of this centennial be regarded as a deserving memorial and honor due to those, who have so long preceded us, and whom we should endeavor to follow in every good example."

"Festive Hymn" was rendered by the chorus.

Mr. Geo. N. Corson read the following

POEM.

"Backward through the tide of time we gaze
This morning upon the dawning days
Of our town and county, to thank God
That our transatlantic fathers trod
These bosky shores, to establish homes
In the valley where the Schuylkill roams,
The Perkiomen and the Skippack sweep,
Gulf and Valley creeks their vigils keep
In the deep gulch and the deeper gorgo
Of the sacred shades of Valley Forge!
Where Wisahickon winding invites
True lovers to scenes of rare delights,
Where Mingo, Macoby and the Spack,
Manatawny and the Pennypack,
The Swamp creek and Tacony travel
On sylvan beds of sand and gravel;
Where the Sanatoga springs do sink
In the Schuylkill with the Arrowmink;
And where Stony creek comes rousing down
A life-preserver to Norristown.

"Our fathers surely were wiser men
Than we are, for they were nearer Penn,
And not afraid to make a nation,
Found a State, or excite creation
With a creed engrossed upon a scroll
That gave liberty to man and soul;
To carve a county from an old one,
Build a borough, aye, and a bold one,
From a village straggling up and down—
Make a county-seat of Norristown.
Our people, now, more is the pity.
Afraid to make the town a city,
Would waddle back, for fear of taxes,
To tomahawks and battle-axes.
We are proud of our sires, those great men
Who made the new Republic just when
The King was strongest and his power
Felt in every clime, and every hour

There was somewhere the gleam of the sun
Ne'er setting on realms he ruled upon!
But are prouder far, if that can be,
Of our fathers born this side the sea,
Who fled not from oppression, but here
Their own own sires' memories to revere,
Their fame extend and their will obey,
Just one hundred years ago to-day
Carved a county below and above
Out of the loins of Brotherly Love!
And such a county, from such a race!
By the chance of birth with Heaven's grace
We sons enjoy these vales and rivers
So blessed by gift and by the givers;
A double heritage more precious
Than thrones and crowns to Princes specious.
For here is freedom, and here each man
May contemplate the Creator's plan,
Worship under his own vine and tree,
Write, vote, speak and think and still be free
One hundred thousand people make this
A county, to-day where plenty is!
Where fruitful fields and exhaustless mines,
Factories and schools and fruits and vines,
The purest water and richest ground
And all things we need on earth abound.
If we have no seas, no lakes, no ocean,
Neither have we wrecks or commotion
Of the tornadoes! We need no dykes
Nor levies to bar the tide that strikes
The rock-ribbed and shaded banks and shores
Of each beautiful streamlet that pours
Into the vast sea inviolate
The waters from lands they irrigate!
Content with wheat, corn, rye and grasses,
Good men and women, boys and lasses,
With products for the proudest table
And horses for the richest stable,
With farms far-famed, well-tilled, prolific,
Homes of plenty and more pacific,
We grow and live on these hills and plains
Well satisfied with our modest gains;
With our mines of iron, marble, lime,
With fruitage and food of every clime,
With all birds, fowls, fishes, sheep and kine
And porcine mastodons just as fine;
And bless the parents that gave us birth
On this favored spot of mother earth,
Where schools are free, and the air serene;
Where summer's harvest and winter's sheer
Fill the garners and bless the yeomen
Along the Schuylkill, the Perkiomen,
And through all the bounds of the bounty
Bestowed by Montgomery County.

"The changes wrought the century past
Not all for good, or destined to last,
Have yet been smaller, it is believed,
In what is lost than in that achieved.
Tho' magnified by the common mind,
These changes have left their mark behind.

The stage-coach has given way to cars
 Now pulled by engines on iron bars,
 And in the canals and on the seas
 Boats pushed by steam ply with eel-like ease,
 As moved by the unseen hand that rules.
 And usurp the place of sails and mules.
 It would have made our forefathers laugh
 To have seen the talking telegraph,
 And would have transformed their flesh to stone
 To have heard the laugh by telephone.
 And surely they would have fled the land
 And left to the Indians, contraband,
 Their plows and yokes and scythes and sickles
 Could they have seen how the bicycles,
 Made of spinning-wheels turned upside down,
 Are ridden by men through Norristown!
 Poor spinning-wheels, pig-yokes, grain-cradles,
 Flax-brakes, drag-rakes, and wooden ladles,
 Where are you? Oh! dames and men of yore,
 Down the corridors of time, before,
 Could you have cast prophetic glances,
 You would have leaped at these advances!
 To have seen us spinning and weaving,
 Plowing and harvesting and sheaving,
 Threshing, milling, printing and preaching,
 Aye, it is true, preaching and teaching;
 Do our washing, and churning of cream,
 And e'en hatching our chickens, by steam!
 But our crops, our eggs, our clothes, our fur,
 Are not better than our fathers' were.
 Their houses were just as large and fine,
 And stronger with oak than ours with pine;
 Their coats and jackets of sterner stuff
 Than our shoddy, with half wool enough,
 Made by modern machines for sewing
 Pretty seams, that part with our growing.
 The ancients—says St. John—had a coat
 Without seam and woven to the throat;
 But this priceless suit has gone beneath,
 With the harrows of the wooden teeth.
 So, we lose in clothes, in iron gain,
 Make progress here with the hand and brain,
 And there in more ancient honored parts
 Pine with Phillips over the Lost Arts.
 In the wars of "twelve" and "forty-eight,"
 As in the Rebellion, born of hate,
 In eighteen hundred and sixty-one,
 Our men in valor were ne'er outdone;
 But on all the fields famed in story
 Won laurels for their deeds of glory,
 Were true to man and State and nation,
 True to that cause of toleration,
 Broad based in every institution
 By our laws and the Constitution.
 Pennsylvania! We praise thee, because
 Thou art mother of peace, equal laws,
 Justice, equality among men,
 Freedom of conscience from denizen
 Or dynasty, priest, Pope or preacher;
 Mother of love to every creature
 To which creation has given life

And bidding-place in this world of strife;
 Mother of pure charity, and truth,
 Of wisdom to eldest age and youth;
 And through thee, thou gracious parent State,
 Two hundred years have enhanced the fate
 Of millions of our race and nation;
 A century of growth and station,
 Prosperity, happiness, renown,
 To our county and our county town;
 And on the escutcheon of the world,
 Thou hast to man everywhere unfurled
 Those VAST WORDS OF HOPE, immortal hence,
VIRTUE, LIBERTY, INDEPENDENCE!!"

The poem was followed by the "Hallelujah Chorus," effectively rendered by the vocalists accompanied by the orchestra.

Dr. C. Z. Weiser delivered the following

ORATION.

"*Fellow-Citizens*—The life of man is measured by the flight of years; the history of a province by the revolution of centuries; the course of the world, by the cycle of the ages; and the ages of eternity, by the Creator Himself.

"Montgomery County completes its primal round of one hundred years to-day. Like a century plant, our proud shire opens into bloom with a sound and a savor loud enough to fill the domain with a bracing melody and a pleasant flavor; drawing to its centre the masses from rural and from urban quarters, from thirty townships and twelve boroughs, like a magnet of great power. And beyond its borders, too, the music and the odor float.

"Our twice venerable and bi-centennial neighbors, Philadelphia, Chester, and Bucks (1682), like the three ancient Graces, discern the echo, and are with us to taste of the 'feast of reason and the flow of soul.'

"The senior counties, Lancaster (1729), York (1749), Cumberland (1750), Berks and Northampton (1752), Bedford (1771), Northumberland (1772), Westmoreland (1773), Washington (1781), Fayette (1783)—all are glad to hail Montgomery into the mystic guild of the centenarians.

"Our twin sister, Franklin (1784), crosses the line with the province of Montgomery, arm-in-arm.

"The junior counties are happy as well as their elder sister's majority, and speed her on with cheering words, that their own period of adolescence may grow speedily and beautifully less, when they, too, may wear the manly toga. Peers and compeers, you are welcome.

"So live and so general an *esprit du corps*, pervading the Commonwealth, renders it all the better to be here, and helps to swell Montgomery's jubilee to real grand proportions. Our proud shire is of age; has one hundred thousand inhabitants, five hundred thousand acres, and five hundred square miles of territory—old enough, and large enough, and rich enough, to rejoice alone. But it is 'not good to be alone,' especially on a festive occasion. Mankind is mankinned. Not only misery loves company, but joy as well. It is written on the big heart of humanity: 'Whether one member suffers, all the members suffers with it; if one member be honored, all the members rejoice with it.' That is St. Paul's commentary on the legend inscribed on our national escutcheon—E PLURIBUS UNUM.

"Inasmuch, however, as it is meet and right to inquire into the reason of things, as far as mortals may, let us here now ask, What means this gala day?

"A sweet American singer tells us in flowing rhyme to 'bury the dead past.' But surely this is not Montgomery's funeral! It were a lively corpse, indeed. It is an Eastertide. Some unseen power has touched the dry bones of its hills and dales, breathed upon them, and wrought

the miracles of a resurrection. What an aroma collects around and diffuses from the shades and handiwork of our ancestors! Norristown is filled with shrines, as Athens once stood filled with altars and with gods. Our goodly-disposed citizens are down on their knees, worshiping relics. Who does not pass by the new, the fresh, and the green, to tarry by the ancient, the gray-haired, and confess that 'the old is better'?

"But why is this great post-mortem? Why this grand review of the dead? Why this mania for the vanished century?"

"Is it not a phenomenon, worth our study, that we should be so anxious to place our eyes in the back of our heads, just now? That we should, so simultaneously and unanimously, turn from the rising to the setting sun? That we should, one and all, slight the glorious future and the prolific present, to revere alone the 'dead past'?"

"This is the Sphinx that sits by the roadside, mutely challenging each one: 'Solve me or die!'"

"The answers vary even as the souls of men. 'Many men of many minds.' A conventional holiday will it prove to some. 'Only this and nothing more.' As the falls of Niagara suggest a goodly site to plant a mill, or the leaning tower at Pisa, to build a derrick, so, too, can these men see but an occasion to 'eat and drink and die' in a centennial jubilee. Let us preserve a 'boisterous beauty' in the presence of souls so radically utilitarian or epicurean!"

"But is it not an event celebrated in honor of a departed ancestry? That were a healthy motive, indeed. No son or society is on a wrong road so long as a sentiment so illial animates the bosom. Age is honorable."

"Nevertheless, Montgomery's jubilee must be rested on a firmer base than a mere sentiment affords, be that never so noble. Otherwise, certain perplexing queries might be propounded."

"The thoughtful do not believe that 'a little spark may kindle a great fire' unless a vast heap of combustibles is at hand. The occasion is not the cause of a great conflagration. And he that argues our jubilee on the basis of a sheer sentimentality, would place the stream far above its source. We make bold to declare that the centennial jubilee of Montgomery County does not rest as the 'baseless fabric of an airy vision.' Young America, least of all, will content itself with a ground so narrow. A class so progressive will cry out: 'In honor of a departed ancestry! Why must the fathers and mothers be so loudly lauded? What is it that entitles them to such a glorification? An unsophisticated race!'"

"Our ancestry's record does seem very meagre aside of the prolific catalogue of to-day, and almost justifies such a disparagement. They never built an engine; they never launched a steamboat; they never surveyed a railroad; they never saw a telegraph, they never whispered in a telephone; they never rode a reaper; they never ran a sewing machine; they never walked in electric light."

"They never uttered the term 'protoplasm' or 'evolution.' They never heard of the 'survival of the fittest.' They believed in Adam as the progenitor of the human race. They despised the ape. They ate oysters without discerning the blood of their sires within!"

"Does not that golden-mouthed but bleary-eyed orator boldly declare: 'This world was not worth living in fifty years ago'?"

"Under such a strong indictment, the less we talk of the wisdom of the fathers, the better; unless we may cast a more invulnerable coat of mail and build a more impregnable wall around them. What shall be the argument, then, by which the citizens of Montgomery County may successfully defend and maintain the propriety of their Centennial Jubilee?"

"I will answer. I will tell you:—"

"The jubilee instinct in mankind is the reasonable and satisfactory base on which every memorial act, either of an individual or social nature, finds room enough to stand."

"On this broad and lasting foundation, the countless apotheoses of the world may withstand the assaults of the wise and of the foolish. This is a chief corner-stone on which men have ever built their memorial temples; not of 'hay, straw and stubble,' either, but of gold, silver and precious stones."

"To undertake to account for this disposition in man, is to enter the wide sphere of psychology, and tell why man is what he is. A theme too large and heavy to carry on a holiday!"

"To canonize consummated facts of by-gone ages, is an instinct of the race which ever did and ever will continue to come to the surface of human society among all nations, and at all the stages of the world's march. To deny this proposition is to antagonize history. The memory of man does not know of a time, or a people, that did not grace itself with monumental deeds and memorial seasons. In the wake of the primal Sabbath of God, when the miracle of creation was first commemorated, festival days and jubilee songs bloomed along and flavored the great highway of time. The Orient, the Middle Ages, and Modern Ages, all voice this race instinct. Account for it as we may, we dare not ignore the fact."

"Nor are these commemorative demonstrations to be regarded as frozen mausoleums, erected over dead and buried dust. They, like the singing Memnon, utter psalms, not requiem hymns. They are the incarnation of mankind's creed in an immortality. They are monuments, not mounds. They are both proofs and prophecies of man's sense of an everlasting life. It is history's way of protesting against a final nihilism. Rightly interpreted, that is what all the Bethel stones and Ebenezer altars declare, all along the track the race has broken. That is the language of pyramids, pillars and statues. With two faces, as it were, they look into the Past and Future, and tell us of the 'Golden Age' that was, and of the 'Good time coming.'"

"Tombs and epitaphs weary mortals ever crave at the end of their journey, cold and frigid as they seem. Like faithful sentinels, those white, sepulchral stones mark the graves of men. Even 'merry England' grants an 'initial letter' over the grave of her Newgate felon. And even through the blazing ages of cremation an urn is used."

"And so, too, does the nation and the race erect its countless 'In Memoriams' over deeds and characters illustrious; and all the more so, since, like the grain of wheat, they fell into the earth that they might fructify the more."

"You search in vain through all the cemeteries of the world for the grave of lost hope interred."

"The Egyptian Pharaoh commands his name to be chiseled in a solid rock, orders his body to be embalmed, and, lying down, exclaims—'Death, where is thy victory? Lo, I live forever!'"

"And, as the oldest civilization set the precedent, so have all successive layers continued to build. The horror of annihilation pervades all souls. A conscious rebellion, an irrepressible instinct protests against having one's being measured by the brief space of an ephemeral existence."

"On that text, history ever preaches its 'sermons in stones.' On that key, all those paeans of humanity are ever set. Monuments are not dumb sentinels; nor are the songs of jubilee like campaign glees, which cloy in their sounding. They are rather rounds in the ladder of immortality, which the angels of our better nature have been building ever since the ancient patriarch saw a stairway between heaven and earth."

"If we are silent, the 'stones will cry out,' declared Jesus of Nazareth."

"Montgomery's centennial jubilee needs no words of justification, no defence; not even an apology. It does not confront us as a historical novice, an event, solitary or peculiar. It is but another building-stone that we bring for the walls of the temple of immortality, which is rising heavenward, since the creation of man 'in the image of God.' Nor will it prove a Babel tower, once more. 'The maker and builder is

God.' The primal centenary jubilee of this province will challenge the regard of all thoughtful souls now living, and yet to live, within the province.

"The tower at Rhodes, it is said, stood on two shores. And so does every such memorial festival. It is rooted in the hopes of vanished ancestry and in the memory of a living posterity. Our fathers anticipated just such a memorialization at our hands. They made but a few things, but these they made well. Their homesteads stand like castles aside of the frail structures of to-day, with the moss of a full century under their roof-trees. Their handywork was, and is still, hand-work—the products of patient souls and nimble fingers, and proof against moth and rust; yea, proof against dissolution, the tooth of Time. In every surviving article which the hands of our fathers and mothers have made, we may read their craving after an enduring name and being.

"Nor can their offspring fail to respond heartily to so natural a longing. We need not blush over sires so genuine and noble as ours proved. They were stalwart generations of men and women, of fathers and mothers, of sons and daughters; a hardy race of good blood.

"The century's relics are precious then, not merely because they are a hundred years old, but because 'these are they which testify of them'—of the generation that went before. We admire the mountains, not because of their dizzy height alone, but for that these have been standing through all the ages that have been. We admire the stars, not because of their brilliancy alone, but because they have looked down on all generations of men. And such an unction rests upon the remains of our venerable pioneers.

"They have all vanished, all vanished! But if we na, look upon their handiwork, are the hands themselves no more? If the husk is preserved, has the corn perished? If the temple still stands, has the builder of the temple ceased to be?

"Then why dance around the dried and withered effects of an ancestry that is to-day no more than if it never had been? Why not follow the example of the red man, and bury the warrior's weapons with the warrior, under ground? A funeral pyre were far more becoming than a jubilee, surely. The old requiem that was doubtless sung over the mortal dust of our sires, had better be intoned over all their musty relics and remains: 'Dust to dust! Earth to earth!! Ashes to ashes!!!'

'But all these are shrines and niches in which
Owners and occupants of earlier dates,
From graves forgotten, stretch their dusty hands,
And hold in mortmain still their old estates.'

"The century's relics are not after the order of Melchizedek, 'without father or mother.' They are the title deeds to homes and lands our sires once acquired; and we are but their heirs. Hence, do we embalm in memory's cabinet their clumsy tenements, their rude utensils, their instruments so rough, their coaches lubberly, their homespun linens, and all their hands have made.

"The shades of our ancestry hover over us, unless the ancients were stark mad in peopling homes and scenes familiar with 'spirits of the dead.'

'All houses wherein men have lived and died,
Are haunted houses. Through the open door
The harmless phantoms on their errand glide,
With feet that make no noise upon the floor.'

'There are more guests at table than the hosts
Invited; the illuminated hall
Is thronged with inoffensive ghosts
As silent as the picture on the wall.'

"The historic places orient themselves through the presence of our sires,

who gave them birth and name and fame. They are their original sponsors.

"Valley Forge, laved by the Schuylkill, rises to view, like a fresh-washed mermaid on the sea, rebaptized with revolutionary glory. What seemed a fiction to our young eyes, asserts itself as a frozen fact. General George Washington did indeed live, and did indeed move a bare-footed band of patriots about this historic centre, from the chilly month of December, in 1777, till the June flowers foretold the budding of freedom—six whole months. From this martyr scene, those Knights of Liberty did truly march upon the hard-fought field of Monmouth, during the darkest hour and gloomiest period of the American Revolution.

"Parker's Ford—that, too, swarms with phantom troops before our vision, once more pursuing the enemy, after the battle of Brandywine, seven years and one day less than one hundred years ago (September 11, 1777).

"Skippack, 'the stream of sluggish waters,' liquefies just now, like the blood of St. Januarius, in the presence of the faithful. The legions that moved along its banks, before and after the battle of Germantown, a century back, on the 4th of October, revisit it. 'Tis as

'I've read in some old, marvelous tale,
Some legend, strange and vague,
That midnight hosts of specters pale,
Besieged the city of Prague.'

"Our worthy heroes present a fine galaxy. As is the soil, so is the fruit. In military lore, honorable mention is made of the brave men who lived on our territory. General Peter Muhlenberg, of Independence days, whose statue now graces the rotunda at Washington, was born within our borders. General Andrew Porter, who fought in the Revolutionary army so gallantly, at Trenton, at Princeton, at Brandywine, and wherever courage was needed, was a native of this county.

"Nor dare we forget our grand citizen-soldiers, whose records shine so brilliantly since the late period of contention and strife—Major-Generals John Frederic Hartranft and Winfield Scott Hancock. These are real, genuine Montgomery-countians. And do not the names of Brooke and Zook stand in red letters?

"The civil list embraces among its brighter lights a cluster of very worthy men, all born here. Frederick Augustus Muhlenberg, Speaker of the lower house of Congress, was a son of the soil. And is there another province that has furnished so much good timber of which Governors are usually made? David R. Porter, Francis R. Shunk and John F. Hartranft form a trio not so readily matched.

"And still others might be noted, who would not have disgraced that chair, but who could not be accommodated for want of room! So, too, would time fail me to record all the candidates for those honorable seats, in the century to come. These, those who come after us, may tell.

"Our religious pages glow most brilliantly. Rev. Dr. Henry Melchior Muhlenberg, the patron saint of the American Lutheran church, abode on this fruitful field during forty-five of his most active years. Here he wrought his greatest deeds. Here he died at the ripe age of seventy-eight years. His ashes rest at the old Trappe church, and his name fills all Christendom with its goodly savor.

"Rev. Michael Schlatter, the first Missionary Superintendent of the Reformed church in the United States, made his head centre in Montgomery County. From this point outward he organized the scattered flocks of his faith, and died within its borders, a Christian soldier both for Christ and Cæsar.

"And of all the counties of the Commonwealth, none opened its doors wider to the oppressed for conscience' sake. Here the Friends found an asylum for their peaceful spirit; not only the State received its name, but our county, too. The Welsh Quakers baptized it in honor of their native place beyond the sea.

"Here the persecuted Palatines pitched their early homes. Their log houses, their log school-houses, and their log churches, tell a most interesting tale of patience, endurance and martyrdom.

"Here the colony of Schwenkfeldians, a persecuted flock in Silesia, located and continue with us to this day, the sole place of staying in the wide, wide world.

"And besides these scenes and spirits known, and lauded in history and in song there are yet many more whom God alone knows. I mean the stalwart patriots of the Revolutionary hosts; the braves of 1812; the heroes in the Mexican war; the martyrs in the rebellion. All these toiled faithfully under their leaders, and died unhonored and unsung by pen and tongue.

"And the victors in peace must not be slighted—the home guards, the tillers of the field, the honest traders in times when Indians and wild beasts prowled about, the trusty servants of daily toil; when one hundred cents made a dollar!

"Let us mention, finally, the mothers, wives, sisters and daughters, who wove, and spun, and made the household happy within, when all was dark without.

"These are all with us to-day, if there be such a mystery as the 'communion of saints.' And we may do ourselves the best of service if we allow ourselves to be baptized afresh by their spirits, and draw a new supply of inspiration for the century before us. Shades of our fathers and mothers hail!

"An ancient seer spoke of a child a hundred years ago. That is the portrait of Montgomery county, a century old. Aged one century, and still but an infant in the arms of Father Time. The snow white tresses that crown the head of our goodly province are but as the grains of dust that float in the sunbeam, to the big eye of history, or to Him in whose sight a thousand years are as one day. Only a little way from the beginning, and hardly any nearer to the end!

"As the christening of the babe follows hard on its birth, so is this festive day but the name of the province. Let it be, as every second birth should be, a regeneration period, from which we ascend the higher plane of a yet nobler life. A still grander history awaits the county. Let no Jeremiads be sung. It is no time to say, 'Vanity of vanities, all is vanity.'

'Tell us not in mournful numbers,
Life is but an empty dream;
For the soul is dead that slumbers,
And things are not what they seem.'

"Victor Hugo wisely says: 'There is an evil in our times; I will almost say there is only one evil: a certain tendency to place everything in this life.' This serious and eloquent Frenchman declares: 'There would be no dignity in living if we had to die completely. What lightens labor, sanctifies work, renders man brave, good, wise, patient, benevolent, just, at once humble and great, worthy of knowledge, worthy of liberty, is the fact that he has before him the perpetual vision of a better world shining across the shadows of life.' 'As for myself,' this gospel novelist affirms, 'I believe profoundly in this better world; and after many struggles, much study and many trials it is the supreme assurance of my reason, as it is the supreme consolation of my soul.'

"As there is no dead past, so neither is there a dead future. All time is God's—the past, the present, and the future, since 'He was, and is, and is to come.' Let us not be such outrageous optimists as to look back upon the age of our sires as upon an age of darkness and void. Nor will we turn into morbid pessimists, and say, as men have kept on saying ever since the time of old Nestor: 'The former days were better than these.' No! Manhood is better than infancy or childhood! The best of history's crop is not under ground. Blessed are our eyes, for our

fathers desired to see what their sons see, and did not see it! There never has been an age like ours!

"But the harvest of to-day, is but the seed of yesterday matured. Therefore, 'whatsoever things are true, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, if there be any praise,' within our borders in the year of grace, 1884, all is but the fruiting of the seed embedded by ancestral hands years ago. It has not been lying torpid like the grain of wheat in the Egyptian mummy, but has fructified and grown. There is no new thing under the sun. All things are falling upward. Our chief business is to be consecrated to the work of perpetuating the building which the sires have founded; building on and up, that our posterity may receive it from our hands, even as we have fallen heir to it 'by the fathers' will and testament,' another century's length improved.

'Let us then be up and doing,
With a heart for any fate;
Still achieving, still pursuing
Learn to labor and to wait.'

"After our jubilee anthems have died away in total silence, and the waves of rejoicing are merged again in the steady stream of time, like the practical Roman, the still more practical Yankee, will ask the question, 'Cui Bono?'

What shall the answer be?

'Ye whose hearts are fresh and simple,
Who have faith in God and Nature,
Who believe that in all ages
Every human heart is human,
Listen to this simple story
Of the here and the hereafter.'

"This province has made a confessional act of gratitude to Almighty God for his amiable and adorable Providence, but records its acknowledgement on its historical Ebenezer. 'Hitherto the Lord hath helped us.'

"This province has performed an act of filial piety, in memory of a worthy ancestry, and thereby challenges the fulfillment of the first commandment, with promise: 'Honor thy father and thy mother.'

"This province has achieved an educational act, which teaches those living, and yet to live, that brave men lived before Agamemnon.'

"This province has erected a triple tower of Faith, Hope and Charity, for another century to come, on which we and our children may read 'He who led the sires will lead the sons.'

"And, surely, with such a spirit of reverence within its loins, Montgomery county may be considered good for another century, I trust.

At the conclusion of Dr. Weiser's oration, the whole audience arose, by request, and united in singing the long meter doxology, 'Praise God from whom all blessings flow.'

After which the Rev. Mr. Rodenbough pronounced the following

BENEDICTION.

The grace of our Lord Jesus Christ, the love of God, our Heavenly Father, and the communion of the Holy Ghost, the Comforter, be with us, and with all the people of God, now and evermore. Amen.

THIRD DAY.

THE PARADE.

Thursday, September 11th, was Parade day.

The parade was formed on the streets west of Stony Creek. Every

division had its particular street upon which to form, so that the procession started with very little confusion.

Col. John W. Schall was Chief Marshal, and to his efficient work, the success of the parade in a great measure was due. There was less delay than usual on such occasions. The parade was to have started at ten o'clock A. M. At fifteen minutes past that time, the head of the line moved over the route selected.

THE PARADE.

The parade was formed and marched according to the following order, issued by the Chief Marshal.

NORRISTOWN, September 1, 1884.

GENERAL ORDER, No. 1.

I. The parade in honor of the centennial of Montgomery county, on Thursday, September 11th, 1884, will be composed of four divisions, as follows:

FIRST DIVISION.

Col. D. C. Swank, Marshal.

Indian children, Grand Army of the Republic, National Guard of Pennsylvania.

SECOND DIVISION.

J. P. Hale Jenkins, Esq., Marshal.

Will be composed of fraternal and benevolent organizations.

THIRD DIVISION.

Major D. B. Hartmanft, Marshal.

Will be composed entirely of firemen.

FOURTH DIVISION.

T. J. Baker, Marshal.

Manufacturers, Trades, and Industrial Pursuits.

II. The respective divisions will form at 9.30 A. M., as follows:

First Division—On Astor street, right resting on Marshall, facing west.

Second Division—On Chain street, north and south of Marshall street, right resting on Marshall street.

Third Division—On George street, north and south of Marshall street, right resting on Marshall street.

Fourth Division—On Haws Avenue, right resting on Main street, and on Main street, right resting on Stanbridge street, and facing east. Sewing machine display will form on Kohn street, right resting on Airy street. Dairy display on Stanbridge street, north of Marshall street, right resting on Marshall.

III. The column will move promptly at 10 o'clock A. M., over the following route: Marshall to Stanbridge, to Main, to Walnut, to Airy, to Arch, to Marshall, to Church, to Airy, to De Kalb, to Penn, to Swede, to Chestnut, to DeKalb, to Spruce, to Willow, to Elm, to Swede, to Oak, to Cherry, to Main, and dismiss.

IV. Division Marshals will appoint a sufficient number of Aids, and will issue such orders relative to the formation of their respective divisions as they may deem necessary.

V. All organizations arriving via the Reading Railroad will disembark at Main street station, and those arriving via Pennsylvania Schuylkill Valley will disembark at Franklin avenue station.

By order of

Chief Marshal.

THOMAS J. STEWART, Chief of Staff.

At the court-house the parade was reviewed by the officers of the Association, who left the line when it arrived at that point.

The following constituted the order of the parade:

Chief Marshal—Col. John W. Schall.

Chief of Staff—Thomas J. Stewart.

 Singer Manufacturing Co. Six teams. Drop cabinet in operation.
 Wagon with three machines run by little girls.
 Milk Dealers' Association. Decorated wagons.

Coal Dealers. Carts gaily decorated, filled with workmen.
 Prof. Dill's Balm of Life wagon, with red tent and blue banners.

THE INDIAN CHILDREN.

A feature of great interest in the parade was the delegation of Indian children, from the Indian Department of the Lincoln Institute, of Philadelphia. They occupied open conveyances in the procession. They were in charge of Mrs. J. Bellangee Coxé and their chaplain, Rev. J. L. Miller, and were received and cared for during their stay by David Schall. After the parade they were taken to the tents in the court house yard, where they received their dinner, after which they sang several choruses.

At this point, Col. Theo. W. Bean, on behalf of the Centennial Association, addressed them as follows:

ADDRESS.

Children of Chiefs and Warriors—In the name of the good people of Montgomery County, we cordially welcome you and the Christian philanthropists who have you in charge, to the memorial festivities of our centennial celebration. We recognize in you the descendants of the race who once were the proud possessors of the ground we now occupy, and honorably and peaceably acquired of them by William Penn, the founder of our great Commonwealth. Two hundred years and more have elapsed since Christian civilization confronted your forefathers in the Schuylkill valley. Your hunting grounds have been turned into wide areas of agricultural wealth and commercial splendor, and the rude implements of their simple mode of living are now here on exhibition as antique curiosities. Back to the Alleghenies, across the Father of Waters, over and beyond the Rocky Mountains, your race has receded, and from the plains and forests of the Pacific slope you have been gathered as the children of lost tribes, in the hope of saving the remnant of a people whose origin is still an ethnological mystery, and whose honor is vouched for by Acrelius, Penn, Logan, Heckewelder, Gordon, and Weiser. Children, you are the hopeful wards of humane men and women. We first learned of your presence in our midst through the efforts of Mrs. Coxé, who is in attendance upon you to-day. Our people have been delighted with the thought and reality of having you as our guests, and hope you will improve the advantages of training in store for you. And when you have grown to well-informed man and womanhood, we trust you will carry with you to your far Western homes the potent agencies of a liberal Christian civilization; that you will all become active factors for the redemption of your tribes and race; that you will become good husbandmen, industrious artisans, devoted teachers, peaceful men and women. Then will you have descendants who will some future day memorialize your inscrutable past in picture and story, and worthily lead you in sharing the blessing of peace and prosperity, the heritage of all in our country.

Rev. Joseph L. Miller, chaplain of the institution, responded to the address, on behalf of the visitors, in a short speech.

FOURTH DAY.

The Antiquarian Exposition was the only feature on the concluding day of the county's centennial, and was attended by about fifteen thousand persons, during the celebration. It was held in the Court House rooms, and in a tent, erected as an annex, in the Court House yard. The articles sent for exhibition were appropriate in selection and endless in variety. Their number was far in excess of the space available and prepared for their display: yet under the able management and sound judgment of the committees, such disposition was made of them as gave general satisfaction to the exhibitors and unbounded pleasure to the visitors.

The character of the exhibits was thoroughly representative. Every era in our history, every nationality rooted within our borders, every denomination which has here enjoyed religious freedom, contributed objects select and typical. Most of the prominent families identified with the progress of this region, from the time of the pioneer settlers, down to the present day, sent their Bibles and books, treasured heirlooms, works of art and antiquity—their Lares and Penates—symbols of refinement and taste—evidences of reverential regard for the men and things of the Past.

The Exposition was educational in its influence upon our people. It stimulated a taste for the artistic and the beautiful, for the preservation of antiquities, and for the prosecution of historical research. It afforded the first opportunity to the inhabitants of our county, to realize how general is the love for that which is superior to the merely practical, and how widely diffused is the appreciation of that which appeals to the higher sensibilities. It will leave a permanent impress for good.

The following is a classified list of exhibits, with an alphabetically arranged list of exhibitors. To many of the articles are appended notes, furnished generally by the owners, respecting the history of the exhibits, which will be found of much interest now, and of great value in the future.

LIST OF EXHIBITS.

COMPILED BY HENRY S. DOTTERER.

CLASS I.

INDIAN RELICS AND ANTIQUITIES.

Abraham, Joseph, Abrams. Fifty Arrow-heads, found by exhibitor on the supposed site of a Lenni-Lenape village, near the junction of Elliott's run and the Schuylkill river.

Ambler, Joseph E., Ambler. Indian Riding Whip and Moccasins, presented to exhibitor by Indians on the reservation of the Iowa tribe and the Sacs and Foxs.

Anders, Amos S., Norritown. Indian Arrow-heads.

Anderson, M. F., Trappe. Indian Relics.

Atkinson, F. C., Norritown. Indian Axe, found in Plymouth township.

Bates, Cornelius, Jenkintown. Two Stone Axes, found in Montgomery County. Twenty-eight Stone Hatchets.

Blackfan, Mrs. Joseph, Norritown. Indian Tomahawk, found on a farm in Farmingdale, Monmouth county, New Jersey.

Boorse, Ella R., Kulpsville. Indian Basket.

Boorse, John C., Kulpsville. Indian axe.

Buck, William J., Jenkintown. Iron Tomahawk, from an Indian grave in Moreland, in 1855. Supposed to be of Dutch or Swedish make, some time before Penn's arrival. Twenty-nine Indian Darts, found in Montgomery county between 1842 and 1880.

Childs, S. Powell, Plymouth. Indian Relics.

Conrow, Mrs. George E. B., Norritown. One Mexican Indian Pepper Grinder, and one Mexican Indian Dish. Both made by the natives.

Corson, Miss Georgie, Norritown. Indian Arrow-heads, found on the banks of the Susquehanna.

Cox, Mrs. Charles, Ambler. Splint Basket, made by Indians. 100 years old.

Dalton, John, Abrams. Indian Axe, plowed from the farm in 1883.

Detwiler, Jones, Blue Bell. Arrow Points, Tomahawks, Skinning Stones, Hoes, Slitg Stones, Rubbers, and Whetstones. 164 pieces.

Elkinton, Paul F., Blue Bell. Indian Axe-head and Arrow-heads, found on the farm near Blue Bell.

Fitzgerald, Jesse O., Horsham. Collection of sixty-eight Indian Relics, found on the farm of James W. Iredell, in Horsham township, between the years 1874 and 1884. This farm of seventy-five acres was formerly owned by the Lukens family. It is near the head-waters of the creek bearing the Indian name Pemmapeeka, which passes through it. On the adjoining farm, formerly of Isaac Lukens, now of Harris Webster, is a spring called the Indian spring. Tradition asserts that the Indians in former times encamped in this vicinity.

Grimley, Solomon K., Schwenksville. Large Indian Axe, found by Daniel Pennypacker in 1870. Indian Stone Tomahawk, found by R. Hartzell in 1856. Large Indian Stone Bullet, found by F. S. Schwenk in 1882. Indian Stone Billy, found by F. S. Schwenk in 1881. Small Indian Stone Bullet, found by F. S. Schwenk in 1883. Twenty Indian Arrow-heads, by Ross Clinton, S. K. Grimley, Jr., and F. S. Schwenk, from 1840 to 1884.

Hallman, Wilson, Shippack. Indian Axe, found imbedded in sand on the banks of Skipack creek.

Hamel, William, Shoemakertown. Indian Relic.

Heckler, James Y., Harleysville. Indian Arrows and Fossils.

Heebner, Mrs. C. B., Collegeville. Indian Spears.

Hendricks, John, and William McGowan, Mont Clare. Indian Darts, found August 18, 1884, in a post-hole, on the farm of Mrs. Gertrude Thompson.

Hoot, Simon F., Ironbridge. Indian Axe, found on Fry's estate, Bucks county.

Jacobs, Harry, Frederick. Indian Arrow-head.

Jacobs, John, Frederick. Indian Battle-Axe, in excellent state of preservation.

Jones, Henry, Ambler. Indian Curiosities and Relics, obtained in 1870 on the reservation of the Iowa tribe and Sac and Fox.

Kettarar, Roman, Somerton. Two Indian Jugs. Indian Tomahawk.

Kriebble, Jesse S., Worcester. Arrow-heads, found in the fields.

Kriebble, Septimus A., Kulpsville. Indian Arrow-heads.

Lowe, Mrs. T. S. C., Norritown. War Club and Hatchet of Oneida Indians. Indian Hatchet. Two Indian Smoking Pipes. Indian Wooden Pipe Stem.

McGowan, William, Mont Clare. See Hendricks, John.

Mann, Charles S. and Albert, Horsham. Two hundred and fifty-eight Indian Relics—principally Arrow-heads and a few Knives and Spear-heads—neatly arranged in the shape of stars and darts, and placed in two frames.

Mann, Jesse, Pittville. Indian Stone Shovel and Indian Relics. Indian Canoe, made of birch bark.

Markley, Freundschaft, The Tomahawk. Belongs to Augustus G. Markley, Collegeville.

Metz, Jacob B., Norritown. Indian Axe, $4\frac{1}{2}$ inches long by $2\frac{1}{2}$ inches wide, found in Norritown some years ago.

Nice, Robert, Branchtown. Indian Stone Pestle, for grinding corn.

Nyce, George S., Frederick. Indian Battle Axe.

Peterman, Frederick, Collegeville. Indian Axe of stone, found on the Philadelphia and Reading railroad, above Flat Rock tunnel, in the cleft of a rock. A Stone Arrow-head.

Ralston, Mrs. J. G., Norritown. Five pieces Indian Pottery from Mexico—two Pitchers and three Bowls, part of the large collection of the late Dr. J. G. Ralston. Two of the Bowls are the work of the Pueblo Indians; one Bowl is of dark soapstone. The Pitchers are of a micaceous clay.

Rambo, Frank L., Trappe. Indian Axe.

Reed, Dr. W. H., Jeffersonville. Arrow-heads, collected at Norritown.

Ritchie, E. S., Hatboro. Indian Axe, found on a farm in Upper-Moreland.

Roberts, Septimus, Whitpain. Indian Hammer.

Rossiter, Mrs. Anna, Blue Bell. Indian Tomahawk, stone. Flint and Arrow-point.

Schmidt, Charles, Worcester. Indian Axe and Relics.

Schultz, Amos, Niantic. Five Indian Arrow-heads.

Shambough, Jackson, Collegeville. Indian Hatchet and Arrow-heads.

Shay, Elizabeth Y., Three Tons. Indian Axe, found on exhibitor's farm in 1834.

Shepherd, Isaac, Plymouth Meeting. Axe, made and used by the Indians.

Slifer, Dr. H. F., North Wales. Lot of Indian Spears, Indian Arrows and Quiver, a Pipe, two Axes, and Indian Mill, a Cap, and Ear-ring.

Snyder, John H., Kulpsville. Indian Necklace, worn by a Pawnee squaw.

Stannard, E. J., Broad Axe. Pestle, made and used by the Indians.

Stout, Ann, Edge Hill Village. Indian Relic.

Supplee, Miss Kate, Conshohocken. Two Indian Arrow-heads.

Trumbauer, J. B., Jenkintown. Indian Maize Hammer.

Tyson, Benjamin F., Worcester. Indian Mortar of stone, for grinding corn.

- Tyson, Samuel**, King-of-Prussia. Three Indian Pestles, found at Burlington, N. J. Three Indian Axes; one found at Norristown, the other two at Burlington, N. J.
- Walker, Howard**, Mont Clare. Indian Hatchet.
- Wanger, Geo. F. Price**, Norristown. Four Indian Axes.
- Weber, George M.**, Worcester. Arrow-heads and other Indian Relics, picked up in Worcester township.
- Yeakle, Daniel**, Chestnut Hill. Indian Missiles, found on Daniel Yeakle's farm and thereabouts.
- Zimmerman, Mrs. J. M.**, Yerkess. Collection of Indian Relics.

CLASS II.

ANTIQUITIES OF THE FIRST SETTLERS AND EARLY PURCHASERS.

- Batchelder, Meredith**, Norristown. Looking-Glass, brought from Germany in 1746 by Nicholas Rittenhouse.
- Boorse, John C.**, Kulpsville. Nine grains of Rye, found in the plastering of the chimney of a house built by William Tennis in 1733. Ink Jug of the great-great-grandfather of exhibitor.
- Cope, O. W.**, Hatboro. Old style Window Pane, brought from England 1720, the glass set in leaden frames, from a house still standing in Bucks County.
- Eastburn, Annie**, Bridgeport. Coat-of-Arms; came over in a vessel with William Penn. Property of John Eastburn, Surveyor General to the Proprietary.
- Erb, Mahlon**, Kulpsville. Lock and Key, brought over in 1734 by David Seibt, one of the Schwenkfelders immigrants, who was the great-grandfather of the exhibitor's mother. David Seibt (now written Seipt) died in 1765, in Towamencin township, on the farm now owned by Lewis Hinkel. Small Sheep Shears, brought over by the Heydrick family, who were of the Schwenkfelders who came in 1734.
- Fitzwater, Mrs. Joseph**, Port Providence. Seal, bearing date 1699, supposed to have belonged to William Penn.
- Fryer, Henry S.**, Skippack. Arm-Chair, brought from Germany by Michael Ziegler; traced back two hundred years. Pruning Knife, brought from Germany by Henry Fryer; 165 years old. Bread and Cake Basket, brought from Germany in 1719 by Henry Fryer.
- Grimley, Solomon K.**, Schwenksville. Tiles of Heinrich Pfannebäcker, 1730. Piece of an Antler, taken out of an Indian cave, about 1784, by Solomon Grimley, who settled here in 1751.
- Jones, Mrs. Edward Price**, Norristown. China Bowl (mended), brought from Wales in 1684 by Hugh Roberts; now belongs to his descendant, the exhibitor.
- Kriebel, Abraham K.**, Kulpsville. Flax, raised in Silesia; brought by the Schwenkfelders one hundred and fifty years ago.
- Wanger, Geo. F. Price**, Norristown. Scales and Weights, brought from Germany by Heinrich Wanger, founder of the Wanger family in Montgomery County. Inscription on case: Properly adjusted Scales and Weights, Master-maker, Jacob Freckenberge, Scale-Maker, Underhelm, 1742.
- Wolfe, Dr. Samuel**, Skippack. Button-Hole Hatchet, brought over by the Schwenkfelders in 1734, and since then in possession of the Seipt family.

CLASS III.

RELICS AND RECORDS OF THE COLONIAL PERIOD.

- Boorse, John C.**, Kulpsville. Naturalization Papers, with names, 1743.
- Cope, O. W.**, Hatboro. Square Tile from the Park House, erected and formerly occupied by Sir William Keith, Deputy Governor of Pennsylvania, appointed by William Penn. This Tile, brought from England in 1717, was one of several around the large open fireplace.
- Ralston, Mrs. J. G.**, Norristown. Commission from Hon. James Hamilton to Richard Peters, Esq., 1746.
- Taylor, John**, Lower Merion. Collection of Charters of Pennsylvania, viz: Royal Charter of William Penn, from Charles II. First Frame of Government, granted 1682. Act of settlement made at Chester, 1682. Second Frame of Government, granted 1683. Charter of the City of Philadelphia, October 25, 1701. New Charter to the Providence, October 27, 1701. Draft of Bill, dated Philadelphia, April 14, 1778, declaring the intentions of the Parliament of Great Britain concerning the imposing of taxes within His Majesty's Dominions in North America.
- Wanger, Geo. F. Price**, Norristown. Volume of Pennsylvania Chronicle for the year 1767. Contains an advertisement of sale of

13,600 acres of land in Fauquier County, Virginia, estate of George Carter, deceased, signed Robert Burwell, George Washington and Fielding Lewis, Trustees.

The following notice from John Potts, founder of Pottstown, appears in this volume:

To the FREEHOLDERS and others, Electors for the City and County of Philadelphia:

Gentlemen—I return you my sincere and hearty Thanks for the Mark of your Esteem in choosing me one of your Representatives at the last Election; but as my present Indisposition renders my Attendance at the House impossible, I beg you will choose some other Person at the coming Election, in my stead. I am respectfully yours, JOHN POTTS.

A notice from the ladies also appears, that they "will neither wear Ribbons or Jewelry or drink Tea which has to be purchased from England." The editor, commenting on this, says: "How agreeable will they appear in their native Beauty, stript of their Ornaments, from the prevailing motive of Love to their Country."

Ziegler, Elmer R., Kulpsville. Bullet, found by Rev. Samuel Hamil, one of the participants in the battle of Great Meadows, in Allegheny County, in 1754, and given to his son, Rev. Samuel Hamil, born on Main street, Norristown.

CLASS IV.

RELIC OF THE REVOLUTIONARY WAR.

- Bates, Cornelius**, Jenkintown. Revolutionary Pistol and Small Pistol. Two Cannon Balls, found on Edge and Camp Hills, supposed to be Revolutionary.
- Blackfan, Mrs. Joseph**, Norristown. Coat, worn in the battle of Brandywine, 1777, in the Revolutionary war. Pitcher, used by General Washington while in the battle of Germantown.
- Carr, Mrs. E.**, Fort Washington. Cannon Ball, from near the camp at Fort Washington.
- Cassel, Isaac R.**, North Wales. Knife, belonging to an English officer during the Revolution.
- Cope, O. W.**, Hatboro. Looking-Glass, with a diamond ring on the face, done by a British officer during the Revolution, in honor of the pretty daughters of the hostess at the house at which he was stopping, in Bristol, Bucks County. Cannon Ball, from the battle of Germantown. Gold Watch, which belonged to Lafayette, and was carried by him during the Revolution. General Lafayette gave this watch to General Smith, of Maryland, who in turn sold it to the grandfather of its present owner, John Van Pelt, of Hatboro.
- Crawford, Mrs. V. Virginia**, Bryn Mawr. Certificate to Oath of Allegiance, taken by William Crawford, to the State of Pennsylvania, in 1777.
- Curwen, George F.**, Villa Nova. Congress Chair, 1776.
- Davis, Jesse B.**, Norristown. Sword of the Revolutionary war, used by Captain James Shannon.
- Detwiler, Jones**, Blue Bell. Statement of the accounts of Col. George Smith, a sub-lieutenant of Philadelphia County, in which is exhibited, for the information of the public, the amount of fines received and accounted for him, between March, 1777, and April, 1780. This pamphlet contains the names of the enrolled militia, and the amount that each individual paid for non-performance of militia duty in the townships of Plymouth, Whitpain, Providence, Norristown, Whitemarsh, Gwynedd, and Worcester. Oath of Allegiance, dated May 30, 1778, of Christian Loewer, of Whitpain township, before Seth Owen. Continental Certificate, to William Long, for one cow, sold to the government for \$1,100; dated June 9, 1780. Continental Certificate, to Elias Rosenberry, for one red heifer, two years old, for \$667; dated June 15, 1780. Return of Whiskey, used by the Third Picket Guard, October 17, 1781, amounting to twenty-two gills. Return of Whiskey, used by the First Picket Guard, under the care of James Irvine. Captain, at Newtown, Bucks County, for twenty-two gills; dated October 7, 1781.
- Dismant, Amos**, Royersford. Cannon Ball of 1777.
- Eckard, James Read**, Abington. A Musket and Sword, which crossed the Delaware with Washington's army.
- Emery, Peter**, Norristown. Two Pewter Plates, lettered on the rim "Margreth Beitenmannen, 1773." One of these plates was used in camp at Valley Forge by John Emmerich, a Revolutionary soldier in the company of Captain Richards, of New Hanover. John Emmerich

- and Margret Beitman were married in 1773, and were the grandparents of the exhibitor. Pewter Plate, captured from a Hessian soldier at Germantown.
- Flitzwater, Joseph**, Port Providence. Cannon Ball, found in Montgomery County, opposite Valley Forge. Bayonet, found on Washington's camp ground, Valley Forge.
- Formance, Mrs. Ellen Knox**, Norristown. Commission of Captain Thomas Rice, of the Third Company of Artillery, 1783. Oath of Allegiance of Captain Thomas Rice, dated July 1, 1777. A Door. This door is from the house formerly occupied by Captain Andrew Knox, two miles from Norristown, at which he stood alone, and with a broadsword defended himself against eight armed Tories, sent by the British army to take him. Their determination to accomplish their object, and the desperate manner in which the Captain defended himself, is to be seen from the bullet holes in the door, as well as the impression of the butt end of the musket and marks of the bayonet. In 1777-'78, when General Washington with his army lay at Valley Forge, the General commissioned Captain Knox to cut off the supplies of the British army, which then occupied Philadelphia. So well did the Captain discharge his duty, that the enemy offered fourteen hundred pounds sterling for his person, and thirty armed men were dispatched from the army to take him and two other officers. Eight of the number arrived at his dwelling at midnight, and commanded him to surrender. He refused, and meeting them at this door with his broadsword, used it so freely on their heads as they attempted to enter, as to compel them to retreat, after severely wounding him. All of their number were more or less wounded; two of them so severely cut as to be taken next day, having been tracked by their blood on the snow, and found concealed a short distance from Norristown. Both were hung at Centre Square, four miles northeast of Norristown, General Washington and his officers, with Benjamin Franklin, visited Captain Knox after the contest, complimented him for his bravery, and examined and handled this door. The house to which it belonged was built about 1730, by David Knox, the first of the Knox family in America. It remained in possession of the descendants until a few years ago, when it was sold and torn down. The door was preserved by the late Colonel Thomas P. Knox. An old Bayonet, dug from a ditch near the house described above.
- Gillingham, E.**, Villa Nova. Orderly Book, kept at Valley Forge during Revolutionary war. Powder Horn, used in the Revolution.
- Grimley, Solomon K.**, Schwenksville. Three iron Bullets of the Revolutionary war, six lead Bullets, and one Flint. Found by S. K. Grimley, Jr., and S. Schillich, from 1860 to 1884.
- Holstein, William H.**, Bridgeport. Two Cannon Balls, piece of Shell, and Small Hatchet, from Valley Forge encampment.
- Kettarar, Roman**, Somerton. Six Guns from the Revolution. Sword, Captured at the battle of Paoli. Cartridge Box, 112 years old. A Bomb. A Saddle and Saddle-bag. A Flask. Tin Cartridge Boxes, 82 years old.
- Koplin, Mrs. Mary W.**, Norristown. Bell-metal Kettle, used during the Revolutionary war.
- Kulp, Elias K.**, Lederachville. Cannon Ball of about eighteen pounds, known to have been on the farm of exhibitor's grandfather ninety years, and supposed to have come down from Revolution times.
- Lenhart George**, Three Tuns. Cannon Ball, found on Camp Hill.
- Miller, Jackson W.**, Jeffersonville. Shoeing Hammer, used in shoeing General Washington's horse at Germantown.
- Nyce, George S.**, Frederick. Bayonet, 130 years old. Belonged to Col. Anthony Bitting's regiment, in the Revolutionary war. Receipt of the Revolution: I Do Certify that Coli Robt Robinson bought at public Vendue a Continental Sorral Horse With a bald face thirteen & 1/2 hands high marked Co A on the left thigh and P P on the near fore Shoulder for Which I have Received five hundred & five Dollars for the States Uses. [W McCALLA, A. Q. G., 505 Dollars, Jan'y 10th 1780]
- Peelin, John W.**, King-of-Prussia. Table upon which General Washington wrote and from which he ate, at General Wayne.
- Rex, Jacob L.**, Blue Bell. Silver button, found on the farm, and supposed to be a Revolutionary Relic.
- Rex, Miss M. D.**, Flourtown. Old Sword, used in the Revolution.
- Rorer, Isaac**, Frankford. Powder Horn, found in Cheltenham during the Revolution; handsomely carved, bearing date 1752, owner's name, John Hunt, British coat-of-arms, view of New York harbor, Masonic emblems, and maker's name, Samuel McCatlet.
- Rue, Louisa**, Norristown. Small Breakfast Table, used by Washington and Lafayette at the Unicorn Hotel, in Delaware county, in 1776.
- Schumo, Dr. Eugene**, Abington. Prescription Scales of Dr. Archibald McLean, Surgeon during the Revolutionary war, and practitioner of medicine in Montgomery county. Deposited by his great-grandson.
- Sinkler, Dr. Wharton**, Philadelphia. English Escutcheon, from the battle-field of Eutaw Springs.
- Slingluff, John**, Fairview Village. Spectacles and Case, used by a relative in the Revolutionary war.
- Snyder, John H.**, Kulpsville. Small Book, left on a table by British soldiers, while in Tovamencin, during the Revolution. The soldiers had ordered eggs boiled. After their departure the lady of the house found the book among the eggshells.
- Stannard, E. J.**, Broad Axe. Gun, taken from an English officer, in the Revolutionary war. Sword, taken from a French prisoner by exhibitor's grandfather, Samuel Stannard, who was a Captain in the Revolutionary war. Cannon Ball, found in Whitpain township. Piece of Fort Ticonderoga, taken when the British surrendered.
- Truckess, David, Sr.**, Providence Square. Cannon Ball, used during the Revolution.
- Tyson, Mrs. Sarah H.**, King-of-Prussia. Washington's Candlestick and Lantern, used by him at Valley Forge. They were brought from Valley Forge by John Mowerer, General Washington's wagon master, and were bought at Mowerer's sale by Joseph T. Pearce, who cried the sale, and in whose possession they now are.
- Weber, George M.**, Worcester. Box, containing Musket, Rifle Balls, and Grape Shot, gathered on the ground on which Washington's army was encamped before going to Valley Forge. Also, a Rifleman's Axe or Tomahawk, plowed up at a spot where at that time was a spring at which the soldiers drank, but which entirely disappeared forty years ago. Large Chest, bearing the name, Barbara Briderin, dated 1769. This was the property of the exhibitor's grandparents, Abraham and Elizabeth Weber. Abraham Weber served for a time in the Continental army, and died in 1844. This Chest, tradition says, was brought to this country from Germany before the Revolutionary war. During the war certain valuable goods were placed in it for safe keeping, and it, with these contents, was put in a hay stack. Certain parties, searching for the chest, discovered it by thrusting pointed sticks of hard wood into the stack, producing marks which it still bears. The chest was broken open and the contents confiscated.
- Wentz, Daniel**, Fort Washington. Camp Axe, found on the camp ground, near St. Thomas' Church, at Fort Washington.
- Yeakle, Daniel**, Chestnut Hill. Powder Horn, used during the Revolution by an ancestor of exhibitor.

CLASS V.

RELICS OF THE WAR OF 1812.

- Beck, Mrs. John P.**, Centre Square. Flute, and Manuscript Music, used by Henry Beck (near Easton), who was a fifer in the war of 1812.
- Cassel, Isaac R.**, North Wales. Sword of the War of 1812.
- Cope, O. W.**, Hathers. Sword of Commodore Isaac Hull, commander of the Constitution in the action with the Guerriere. The property of William Wase, Hornham.
- Cox, Mrs. Charles**, Ambler. Two Flints, formerly the property of Charles Cox, a veteran of the war of 1812.
- Davis, Jesse B.**, Norristown. Sword, used in the War of 1812 by John Llewellyn, the exhibitor's grandfather.
- Dorworth, Joseph H.**, Norritonville. Pistol, belonging to the First Troop of Montgomery county, in the War of 1812.
- Keech, Jacob**, Lower Merion. Pistol and Knife, used in the War of 1812 by John Llewellyn, the exhibitor's grandfather.

Fox, Mrs. Jacob, East Greenville. Tea Kettle, nearly 200 years old.

Fryer, Mrs. Barney, Skippack. Part of Pewter Dinner Set, supposed to be 106 years old, and is the property of the exhibitor: Two soup dishes, two meat plates, four dinner plates, sugar bowl, and salt cup.

Garrigues, Mrs., Norristown. Pewter Plates.

Garsed, Mrs. Robert P., Norristown. Kettle and Pan.

Geyer, Mrs. Charles, Worcester. Pewter Tray, dated 1748.

Gotwals, Abraham, Belfry. Pewter Dish, Colander, and Tea Canister, each 100 years old.

Gritfen, Mrs. Samuel, Oaks. Tea Kettle, 100 years old.

Grimley, Miss Olivia K., Schwenksville. Pewter Tea Pot, large Plate, three small Plates, and two Dishes. Belonged to Frederick and Elizabeth Reimer, from 1730 to 1761; to Solomon and Elizabeth Grimley from 1761 to 1806; to Elizabeth Grimley, widow, from 1806 to 1821; to Frederick Grimley, from 1821 to 1843; to Amos Grimley, from 1843 to 1866; to Solomon K. Grimley, since 1866. Six small Pewter and two large Funeral Bread and Wine Plates. Belonged to Peter Umstead in 1734, and remained in the Umstead family until 1856, when they came into the hands of Lydia Gottshall, who sold them in 1883 to Solomon K. Grimley. Mr. Grimley furnishes the following information: "The Funeral Plates measure 14 $\frac{1}{2}$ inches in diameter. In olden times people sometimes had to drive five and ten miles to the church and burying place with their dead. It was customary to provide bread, cake and wine on such occasions for the refreshment of those in attendance. The daughter of a principal farmer was selected, who took a large pewter plate, laden with bread and cakes, and stationed herself on the side of the path by which the procession was to pass from the church to the grave. A young man, son of one of the farmers of the first class, held a large plate, upon which was a bottle of wine or whiskey and a wine cup, and took a position opposite the young woman. Each person in passing took a piece of bread or cake from the maiden, and then turned to the other side and took a sip of wine from the cup, which the youth replenished from time to time. My grandmother, Mary Keely, who died in 1848, aged 85 years 10 months and 25 days, told me that she was on one occasion chosen to hold the bread plate, and that it was deemed a great honor to be a Leichenwärter, or funeral waiter." Pewter Coffee Pot and Cream Jug. Belonged to Henry Pawling, to 1734; to Henry Pawling, Jr., to 1757; to Joseph Pawling, to 1787; to Rachel Pawling, the great-grandmother of the present owner, to 1828; to Isaac Grimley, to 1872; to Solomon K. Grimley, since 1872. Pewter Drinking Cup. Belonged to Henry Pawling, to 1734; then in the hands of C. Pawling, until 1757; to Andrew Ziegler, to 1825; to Dillman Kolb and his children, to 1880, when it came into possession of Josiah B. Markley, from whom Solomon K. Grimley purchased it in 1883. Two Pewter Dishes. Belonged to H. Deetz

- in 1725; to the Nace family until 1883, when Solomon K. Grimley purchased it. Pewter Dish. In Deetz family from 1725 to 1883, when Israel Hildebrand became owner, and sold it to Solomon K. Grimley. Pewter Plate. Belonged to Wilhelm Gerges and his descendants from 1725 to 1883, when, upon the death of Sabina Gerges, the great-great-granddaughter of the original owner, Francis S. Schwenk purchased it, and disposed of it to Solomon K. Grimley. This was highly valued as an heirloom in the Gerges family, and was never used to any extent. Pewter Sugar Bowl. Belonged in 1725 to George Heilig, from whom it descended to his daughter, Margaret, and to his granddaughter. The latter gave it to Hannah Boyer when ten years old, seventy years ago. In 1884 Solomon K. Grimley purchased it. Pewter Tea Pot. In the Kolb family from 1725 to 1882. F. Frederick then became its owner, and sold it to Solomon K. Grimley in 1883. Earthen Sugar Bowl. Belonged to Andrew Young in 1725, and remained in the Young family until 1884, when, upon the death of Susanna Young, Solomon K. Grimley purchased it. Small Ladle. Owned successively by — Umstead, 1725 to 1780; Sophia Umstead, daughter, 1780 to 1840; Daniel Miller, 1840 to 1883; and Daniel Lewis Miller, son of the foregoing, who purchased it from his father's estate in 1883. Large Ladle. Belonged to Jacob Cassel until 1790; then to his daughter, Mrs. Daniel Pannepacker, until 1883, when Solomon K. Grimley purchased it. Copper Tea Kettle. Belonged to Hieronimus Haase from 1725 to 1775; to Peter Pool, until 1810; to Jacob Kolb, to 1870; to Catharine T. Miller, to 1883; to Solomon K. Grimley, since. Two Pewter Tea Pots, three large Plates, two small Plates and a Wine Cup. Belonged to Hieronimus Haase, 1728 to 1775; to Peter Pool, 1775 to 1783; to Thomas Poole, 1783 to 1810; to Catharine Pool, 1810 to 1867; to Catharine T. Miller, now widow, 1867 to 1883; since 1883 to Solomon K. Grimley. Six Plates. Belonged to the Grubb family in 1734; since to J. Kline and F. Walt, and now to Solomon K. Grimley. A large and small Dish. Have been owned by Martin Kolb (1730), Dillman Kolb, Isaac Kolb and Josiah B. Markley; present owner, Solomon K. Grimley. Two large Funeral Bread and Wine Plates. Belonged to Samuel Kepler, and to Maria Schwenk (1815); now owned by Solomon K. Grimley. Six Plates. Owned by Jacob Cassel (1775) his daughter, and Daniel Pannepacker, to 1884; at present by Solomon K. Grimley. Five Table Spoons and a Small Plate. Owned by Heinrich Kolb in 1770, by the Krupp family to 1883, and now by Solomon K. Grimley. Eight Pewter Tea Spoons. Belonged to B. Halteman in 1714, and to his descendants to 1883, when Solomon K. Grimley came in possession. Three Pewter Dishes. In the Rhoads family from 1780 to 1883, when Solomon K. Grimley became owner.

CLASS XVII.

SCHOOL BOOKS, OLD AND NEW.

Blackfan, Miss, Norristown. Copy Book, written in 1814.

Boorse, John C., Kulpsville. Four Copy Books of Baltzer and George Heydricks, 1783 to 1794.

Buck, William J., Jenkintown. Two MS. Instruction Books for the Piano. Prepared by Charles Fortman for his pupil, Jacob E. Buck, in 1814-16. MS. Instruction Book in Vocal Music. By Joseph Hess, for his pupil, Miss Catharine Afterback, wife of J. E. Buck, 1815-16. Columbian Orator, 1817. A school book, once popular, becoming rare. Toy Geography, with numerous copperplate engravings, Philadelphia, 1800.

Cassel, Abraham H., Harleysville. The Child's Guide to Spelling and Reading. Philadelphia, 1810. Fourth edition. The Parlor Primer, for Children. Philadelphia, 1814. The Symbolical Primer, with 492 cuts. Philadelphia, 1830. The First Book in Phonetic Reading. London, 1853. Spelling Book: A New Guide to the English Tongue. By Thomas Dilworth. Thirty-sixth edition. 1773. This book was extensively used in England and America ever since 1740, and for many years the only one in America, and was used yet in some parts of this county in the recollection of Mr. Cassel. The last edition was printed in New Haven in 1827. The old editions had a full-page likeness of the author, a very comprehensive preface, a dedication to the schools of Great Britain and Ireland, a full-page poetic compliment to its Reverend author, besides numerous recommendations, all over the date of 1740. The new American Spelling Book, improved. By John Pierce. Sixth revised edition. Philadelphia, 1808. The Sunday School Spelling Book. Compiled at the request of the Sunday and Adult School Union of Philadelphia. Third edition. Philadelphia, 1819. The Critical Pronouncing Spelling Book. By Hezekiah Burhans. Philadelphia, first edition, 1821. A New Spelling Book. By John Comly. Philadelphia, 1834. Reading Books. The Child's Instructor, consisting of Easy Lessons for Children on subjects which are familiar to them. By a Teacher of Little Children in Philadelphia. 1809. The Reader's Cabinet. In prose and verse. Baltimore, 1809. Lessons in Elocution, &c., for the Improvement of Youth in Reading and Speaking. By William Scott, 1815. The Rhetorical Reader. By Ebenezer Porter. 1848. Introduction to the English Reader. By Lindley Murray. 1818. The English Reader. By Lindley Murray. Philadelphia, 1819. Sequel to the English Reader. By Lindley Murray. 1817. A Pleasing Companion for Little Boys and Girls. By Jesse Torrey, Jr. Twenty-fifth edition. Philadelphia, 1835. The Moral Instructor and Guide to Virtue. By Jesse Torrey. Tenth edition. Philadelphia, 1825. The Moral Instructor and Guide to Virtue. By Jesse Torrey. Tenth Edition. Philadelphia, 1826. A Mental Museum for the Rising Generation, with appendix. By Caleb Bingham. Sixty-fourth edition (fourth improved edition). Boston, 1821. The Philadelphia Vocabulary, English and Latin, put into New Method. By James Greenwood. Philadelphia, 1806. Amitticulum Puerile; or, An Help for School Boys in Obtaining a Knowledge of the Latin. Fourth edition. Philadelphia, 1785. The American Practical Lunarian and Seaman's Guide, Illustrated with Plates, &c. By Thomas Arnold. Philadelphia, 1822. The Columbian Orator. By Caleb Bingham. Boston, first edition, 1811. The American Orator. By Joshua P. Slack. 1817. A Short Introduction to English Grammar, with Critical Notes. By Robert Lowth. Printed by R. Aitken, Philadelphia, in 1775. English Grammar, adapted to the different classes of learners, with an appendix of rules and observations. By Lindley Murray. (First) American edition. Philadelphia, 1800. Key to the Exercise, adapted to Murray's English Grammar. 1825. Conversations on English Grammar, explaining the principles and rules of the language. By Charles M. Ingersoll. 1835. The Schoolmaster's Assistant: Being a Compendium of Arithmetic, both Practical and Theoretic, in Five Parts, to which is prefixed a Preface Dedicatory

- and an Essay on the Education of Youth, humbly offered to the consideration of parents and guardians. It has also his full-page likeness, two full pages of poetic compliments to the author, besides numerous recommendations, etc., all over the date of 1743. It passed through more than one hundred editions in this country and Europe, and was also for many years the only one used in this country by our fathers, grandfathers, and great-grandfathers. Several editions of it were printed here by R. Aitken, in Philadelphia, before the Revolution, and the twenty-second American edition was printed by Hugh Gaine in New York already in 1734. The American Tutor's Assistant. Philadelphia, 1813. The American Tutor's Assistant, improved. By Zachariah Jess. 1811. Intellectual Arithmetic, upon the inductive method of instruction. By Warren Colburn. Boston, 1826. Arithmetic upon the Inductive Method of Instruction. Being a sequel to Intellectual Arithmetic. By Warren Colburn. 1828. The Teacher's Assistant. By Stephen Pike. Philadelphia, 1852. Rudiments of Arithmetic. By John F. Stoddard. 1867. Practical Arithmetic. By John F. Stoddard. 1868. The American Philosophical Arithmetic. 1856. The Critic's Commercial Arithmetic and Business Manual. By John Groesbeck. Philadelphia, 1874. Introduction to the National Arithmetic. By B. Greenleaf. 1869. The National Arithmetic on the Inductive System; combining the Analytic and Synthetic Methods. By Benj. Greenleaf. 1869. The Normal Written Arithmetic. By Edward Brooks. 1863. The Normal Higher Arithmetic. By Edward Brooks. 1878. An Introduction Algebra, with Notes and Observations. By John Bonnycastle. Second revised edition. Philadelphia, 1811. A Treatise on the Elements of Algebra. By B. Bridge. 1835. Intellectual Algebra; or, Oral Exercises in Algebra for Common Schools. By David B. Tower. Seventh edition. 1850. Algebra zum gebrauch Hoherer Niederer Schulen. Leipzig. 1761.
- Cassel, Isaac R.**, North Wales. Primer and Table Book, used by exhibitor when a boy. Greek Grammar, 1636. Note Book, bought by Joseph Skeen in 1788.
- Cresson, Walter**, Conshohocken. Cocker's Arithmetic, 1677. The title-page is as follows: Cocker's Arithmetick: Bring a plain and familiar Method, suitable to the meanest Capacity, for the full Understanding of that incomparable Art, as it is now taught by the Ablest School-Masters in City and Country. Composed by Edward Cocker, late Practitioner in the Arts of Writing, Arithmetick, and Engraving: Being that so long since promised to the World. Perused and Published, By John Hawkins, Writing-Master near St. George's Church in Southwark, by the Author's correct Copy, and commended to the World by many eminent Mathematicians and Writing-Masters in and near London. The Forty-Sixth Edition, carefully Corrected and Amended. By George Fisher, Account. Licensed September 3, 1677, Roger L'Estrange. London: Printed for A. Bettsworth and C. Hitch at the Red-Lyon, and F. Osborn at the Golden-Ball in Pater-Noeter Row; S. Birt, at the Bible and Ball in Avenary Lane; and F. Hodges, at the Looking-Glass on London Bridge. Perrin's Instructive Exercises, with Rules of French Syntax. 1793; and Perrin's French Conversation, 1794. Used by the exhibitor's father, John H. Cresson, of Philadelphia (born 1780), when a pupil under the eminent Quaker preacher, Stephen Grellet, in 1796. Lancaster System of Education.
- Cutler, C. D.**, Three Tuna. Ancient United States History.
- Detwiler, Jones**, Blue Bell. New England Primer, 1807. Columbian Orator. by Wythe, 1817. Murray's English Reader, 1821. American Speaker. Comly's Spelling Book. By Hunt. Lot of old Copy Plates, for writing. Two Ciphering Books. Belonged to Amos Roberts, of Whitpain township. Isaac McGlathery, the teacher, signs his name on the last page, March 6, 1792. How to Learn German and English. By Christopher Saur. Germantown, 1751. Description of the Globes and the Orrery. By Harris.
- Detwiler, Mrs. Milton V.**, Oaks. Physiology, 1779. Ainsworth's Dictionary. London, 1773.
- Dotterer, Henry S.**, Philadelphia. Columbian Orator. By Caleb Bingham, A. M. Boston: J. H. A. Frost. 1828. Pennsylvania German Manual. By Rev. A. B. Horne, A. M. Kutztown, 1875. This work contains Pronouncing Exercises, Pennsylvania German Grammar, Pennsylvania German Literature, and a Pennsylvania German Dictionary.
- Fornace, Mrs. Ellen Knox**, Norristown. School Book, dated June 15, 1790. Contains solution of mathematical problems (Navigation).

- Wolfe, Dr. Samuel**, Skippack. Murray's English Reader. Philadelphia, 1817. Murray's English Grammar. Albany, N. Y., 1819. Ready Calculator of Interest. Reading, 1816.

CLASS XVIII.

BOOKS, PAPERS, AND MANUSCRIPTS.

"The fullness and variety of this department shows the resources of our

county in books, and the taste of our people for venerable volumes and documents. In Bibles, hymn books, catechisms, and other theological works, the exhibition was especially noteworthy. The descendants of the early Swedish, English, Dutch, German, and Welsh settlers, contributed religious books written in these several languages. The Schwenckfelders sent numerous manuscript sermon and other devotional books, as also the printed writings of the founder of their denomination, and works treating of his life and of the doctrines he promulgated.

The display was further enriched by rare and valuable selections from the extensive library of Abraham H. Cassel, the well known antiquary, whose fame as an industrious collector of books extends far beyond the limits of our own county.

A number of specimens of Fraktur-Schrift were exhibited. This is pen and ink work done in bright colors, usually of German text, with ornamental designs. It was employed to decorate books and manuscripts in imitation of the illuminations of the period before the invention of printing. The German teachers in our schools during the colonial times excelled in this art. They inscribed upon the family registers in the Bibles, and the fly-leaves of books, records in German text, adorning them with ornamental flourishes, scrolls, and figures, in designs of circles, hearts, harps, etc., and with pictures of birds, plants, leaves, and flowers. The Geburts und Tauf-schein (certificate of birth and baptism) afforded a field for the display of their proficiency in this direction. The Vorschrift was executed entirely in this species of penmanship. It was a keepsake, given by the teacher to his pupil. On paper, varying in size according to the circumstances of the case, was written a verse from the Scriptures or from a hymn, conveying a pious precept, the first letter of which was large and highly ornamental, and the same as the initial of the recipient's Christian name. This quotation was followed by the capital and small letters of the alphabet, in German and Latin characters; then the ten numerals, the months of the year, the name and residence of the pupil, the date, and last the name of the donor. This gift served at once as a copy for writing, as a token of regard or reward of merit, and as an injunction to a godly life. It was highly esteemed by the receiver, placed between the leaves of a book, and carefully preserved. Many of these objects of art in the primitive times of our country have been transmitted to the present generation, and are justly regarded by their possessors as valued mementoes.

Albright, Joseph, Shoemakertown. Villa Architecture, 1828.

Ambler, Aaron, Norristown. Old Books.

Amies, Mrs. Mary H., Spring House. Bible. Philadelphia: Jane Aitkin, 1808.

Bericht von Caspar Schwenckfelds Lehre. 1547. 250 pages; not numbered. Kurtze Lebens Beschreibung des Caspar Schwenckfelds. 1556. First half of book is in poetry; the other part in prose. About 200 pages; not numbered. The place where printed is not given in this and the two foregoing books. Almanac for the year 1759. Title-page missing. Contains moral and Christian instruction; tells Christians to keep away from the courts; teaches how to write German. Poor Rate Tax of Whitpain township for 1803. Inventory of Abraham Wiegner's estate, 1781. Written in German. Certificate of Satisfaction on a mortgage, on a piece of unruled paper, issued by Geo. M. Potts, Recorder, March 31, 1804. Two Receipts, given by Edmund Physick, for the Proprietaries, to Jacob Reedt, for payments for land in Hatfield township, viz.: For £50 in part for 24 acres, paid at Philadelphia on 26th January, 1770; and for £178 in full for 215 acres and 15 perches, paid at Philadelphia on 17th of February, 1770.

Beck, Mrs. John P., Centre Square. German Bible. Once owned by the Beideman family. Religious Book.

Bell, Mrs. William A., Centre Square. Manuscript Prayer Book. Buried during the Revolutionary war.

Bennett, Daniel R., Jenkintown. Compendium of Modern Travels. Three volumes. 1757. Adventures of Signor Gaudenzio di Lucca, 1799. Naval History of Great Britain, 1758. American Revolution, 1794. Homer's Odyssey, 1771. Notes on the State of Virginia, 1803. The Vicar of Wakefield, 1796. Philosophical Rudiments of Government and Civil Society, 1650.

Bergey, G. R., Skippack. Two German Letters. One from George Steignard to Caspar Seibt, an early settler of Towamencin, dated March 17, 1766. The other dated March 5, 1774. The first letter, which was written from Arneris, im Niederschlesischen, Germany, was received May 31, 1767, being over one year on its way. Two German Letters, from Jeremiah Heydrick to Caspar Seibt, dated February 8, 1770, and March 7, 1774. Book of Sermons, 1670. Norristown Herald and Free Press, 1840.

Bevan, Mrs. Emily, Hartranft. Deed over 200 years old.

Beyer, Jacob, Sr., Norristown. Bible, 1774. Four old Books.

Bickel, Mrs. E. B., Norristown. A Book, 150 years old.

Bisson, Jane, Three Tuns. Receipt Book, 100 years old. Norristown Herald, November 10, 1824.

Blackfan, Mrs. Joseph, Norristown. Treatment of Horses, about 120 years old. Treatise on the Diseases of the Army, 100 years old. Baptismal Certificate, 1810.

Blair, David T., Harbor. The Running Horse, 1670. Belonged to James Thomas.

Blake, Mrs. John, Jenkintown. Life of David Ferri. Bailey's Dictionary.

Boettcher, C. A., Norristown. Boston Gazette and New York Post, 1770. Colloquies of Erasmus Roterodamus, 1725.

Boorse, John C., Kulpsville. Biblical Namen und Chronik-Buch, 1584. Manuscript Hymn Book, 1727. Act of Poor Laws, &c., 1749. Papers of Overseers of the Poor, 1751 and upwards. Almanacs, from 1752, with few exceptions to date; twelve of them, from 1752 up, printed by Christopher Saur; some with calculations made by David Rittenhouse. Hymn Book. Christoph Saur, 1762. Low Dutch Hymn Book, 1779. Philadelphia Correspondence. (newspaper), 1798 to 1800. Postill. Kurtze Auslegung über die Evangelium. So Man pflegt zulassen an den Sontagen und der Heyligen Fest sampt den Summarien duresch ganze Jahr: Christlich und einfaltig gepredigt un beschriben durch Johan Wörner. Gedruckt im Jar nach der Geburt unser Erlösers, 1538. Newspaper, by Christoph Saur, Germantown, dated August 6, 1757, containing

the numbers and amounts drawn in the Rading-tauner (Reading) Lottery. Schul-Ordnung. By Christopher Dock. The full title of this rare volume is: "Eine Einfältige und gründlich abgefasste Schul-Ordnung darinnen deutlich vorgestellt wird, auf welche Weise die Kinder nicht nur in denen in schulen gewöhnlichen Lehren bestens angebracht sondern auch in der Lehre der Gottseligkeit wohl unterrichtet werden mögen aus Liebe zu dem menschlichen Geschlecht aufgesetzt durch den wohlverfahrenden und lang geübten Schulmeister, Christoph Dock. Und durch einige Freunde des gemeinen Besten dem Druck übergeben. Germantown: Gedruckt und zu finden by Christoph Saur, 1770." Brief of Title, from January 26, 1714, to date, for part of 810 acres of land, upon which the present village of Franconiaville is located. One of the deeds says that this tract is situate "near the head waters of Mishameny river," in Philadelphia County. Deed from James Shattick, of Philadelphia, to Lawrence Hendrickson, for one hundred and twenty-three acres of land in Towamensing townships, dated the "one and thirtieth day of the twelfth month called February, in the twelfth year of the reign of our Sovereign Lady Anne, Queen of Great Britain," A. D. 1713. This tract was a part of four thousand acres in Towamencin township, granted by deed of lease and release dated the 23d and 24th days of August, 1704, to James Shattick and Edward Lane, of Philadelphia county, by John Phelps, of Bristol, England, and Samuel Taverner and Thomas Pearce, both apothecaries, of Limerick, Ireland. Etliche merkwürdig Punkten betreffend die Verwechselung des Government, gerichtet an die deutsche Einwohner der Provinz Pennsylvania. Gedruckt bey Anton Aramburster, 1764. Pamphlet, Getreue Warnung gegen die Lockvögel, sammt einer Antwort auf die andere Anrede an die deutsche Freyhalter der Stadt und County von Philadelphia. Durch Germanicus. Behalte was du hast. Gedruckt im Jahr 1764. Pamphlet. Der Lockvögel Warnungsgesang von den Stossvögeln; oder nöthige Beantwortung der sogenannten getreuen Warnung gegen die Lockvögel, etc. Gedruckt am 29ten September, 1764. Eine neue Anrede an die Deutschen in Philadelphia County. Salbe deine Auge mit Augen-Salbe. Gedruckt zur Zeit und im Jahr da einer wider'n andern war. Laws of Pennsylvania, from 1700 to 1812. Five volumes. Leather binding; in excellent condition.

Bosch, Enos, Norristown. Doctor's Dictionary, supposed to be at least 200 years old.

Brunner, Dr. J. D., Jarretstown. German Book, 1779.

Buck, William J., Jenkintown. First Newspaper printed in Bucks county, the Farmer's Gazette, at Doylestown, November 11, 1800. Book, containing 258 original drawings, by the exhibitor, of best specimens of Indian Stone Relics, exhibited at the Centennial Exhibition, 1876, belonging to the Government and other collections. A plate containing eighteen lithographic drawings of Indian Relics found on the Pennypack, in Moreland township, made by William J. Buck, and published in the "Collections" of the Historical Society of Pennsylvania in 1853. Autograph Letters to the exhibitor; written by Washington Irving, 1855; Samuel Hazard, 1855; Benson J. Lossing, 1855; John F. Watson, 1857; S. Austin Allibone, 1862; John Greenleaf Whittier, 1873. Almanac. Calculations by William Collum, of Montgomery Square. Doylestown, 1817. Original Letter, from Mrs. Stedman to Mrs. Ferguson, Grene Park, September 11, 1777, giving an account of the defeat at Brandywine and the excitement in Philadelphia on hearing the news. Family Bible. In German. Nuremberg, 1745. Belonged to Joseph Afflerbach, grandfather of the exhibitor. Illustrated with numerous woodcuts and copperplate engravings. The Local Historian; a series of sketches relating chiefly to the southeastern section of Montgomery county. Written by exhibitor. Published in the Hattboro Public Spirit, from December 11, 1880, to June 24, 1882; seventy-five numbers. History of Montgomery County, within the Schuylkill Valley. By William J. Buck. Norristown, 1859. History of Bucks County; from its earliest settlement to the close of eighteenth century. By William J. Buck. Printed by John S. Brown, Doylestown, 1855. 118 pages, large 8vo. Rare. The Philadelphia Library paid \$8 several years ago to secure a copy. History of Montgomery County, Pa., from the earliest period of its settlement to the present time, including sketches of all its townships and boroughs. By William J. Buck. Occupies 84 columns, 15 inches in length. Published in Scotts Atlas of Montgomery County, which contains a printed list of 1100 subscribers, chiefly in the county. Price \$12. Early Accounts of Petroleum in the United States. By William J. Buck. Titus-

ville, Pa., 1876. Patent Deed for 125 acres in Upper Salford, dated April 6, 1747, from Governor George Thomas to Jacob Eck. This tract upon which they settled and made the first improvements, was retained in the Eck family for about ninety years. Said Jacob Eck, who lived and died there, was the exhibitor's great-great grandfather. His granddaughter, Mary Eck (daughter of John) was married to Captain Nicholas Buck, of Bucksville, Bucks county, who was exhibitor's grandfather. Three numbers of The Literary Chronicle, dated December, 1840, July 13, and September 7, 1841, published by Oliver I. Search, Hatboro. The first newspaper printed in the lower half of Montgomery county. Very rare. History of Moreland Township, by William J. Buck, published by the Historical Society of Pennsylvania in 1853. Economy of Agriculture, by David Lloyd, of Horsham. Germantown, 1832. Modern Miscellany, by David Lloyd. 1848.

Buckman, Thomas, Jenkintown. Deed, 1754.

Bult, George T., Whitpain. Public Ledger, Vol. I. No. 1. 1836.

Caley, Cyrus, Abrams. Mackenzie's Cook Book, 1829. Books. 1791 to 1824.

Cann, Abraham Fort Washington. Oath of Allegiance. German Writing, excuted in 1750.

Cassel, Abraham H., Harleysville. Very rare and curious old books in peculiar bindings.

Aristotle's Politiques, or Discourses of Government, &c. Translated out of the Greek. With Notes by Plato. In one volume. Folio. London, 1598.

A New System of Modern Geography; or, a Historical and Commercial Grammar. By William Cuthrie and David Rittenhouse. The Montgomery County Philosopher and Astronomer. Two volumes, large quarto. 1734.

A Tutor to Astronomy and Geography, or an easy and speedy way to know the use of both the Globes, Celestial and Terrestrial. By Joseph Moxon. 3d edition, &c., finely illustrated with steel plates. London, 1674. With autograph of Dr. George de Benneville.

Names which the Lenni Lenape or Delaware Indians gave to Rivers, Streams and Localities within the State of Pennsylvania, &c., with their significations. By John Heckewelder.

The One Line Psalmist, embracing Day and Bow's New Musical Notation and Sight-singing Method, by which classes, schools, and choirs, in a few lessons, become better readers of music than common singers do in the old way during life, etc. By H. W. Day, of the Boston Phonographic Musical Institution.

The Art of Singing. In three parts, to wit: 1. The Musical Primer; 2. The Christian Harmony; 3. The Musical Magazine. By Andrew Law. Fourth edition. Boston, 1803. It contains the Rules of Psalmody, newly revised and improved, with a number of practical lessons and tunes, on a new plan of printing music without a staff.

Memoirs of David Rittenhouse. By William Barton. 1813.

Logic; or, the Right Use of Reason in the Enquiry after Truth. With a variety of rules to guard against error in the affairs of religion and human life, as well as in the sciences. By Isaac Watts. Seventh edition, corrected. 1740.

Letters from a Farmer in Pennsylvania to the Inhabitants of the British Colonies. (By John Dickinson.) 3d edition. Philadelphia: Printed by William Bradford, at the London Coffee-house. 1769.

Stammbaum der Familie des Dr. Martin Luthers zur dritten secularfeier seines Todesstages, den 18th February, 1746. With a large engraved family tree. A very large folio, with the translator's dedication to King James, and a lengthy dissertation to the reader, besides other matter never seen in a Bible.

King James English Bible. Printed at London, by Robert Barker, 1611. The original first edition. It was padlocked by a brass chain to the altar of the Parish Church of South Cowdon, England.

Pre-Lutheran German Bible, the oldest known to exist, printed line by line, it is said, from wooden blocks, in 1470-1473.

Proceedings of the Pennsylvania Society of the Cincinnati. (George Washington being its President.) Philadelphia. 1785.

A Collection of rare Tracts, dating from 1652 to 1690. Quarto. Bound in Human Skin.

Contemplations Moral and Divine. By the great Sir Matthew Hale, late Chief Justice of the King's Bench. 1685.

Unheard of Curiosities, concerning the Talismanical Sculpture of the Persians; The Horoscope of the Patriarchs, and the Reading of the Stars. By James Gaffarel. 1650.

Alchymie, or an Exposition upon Sir George Ripley's Hermetico-Poetical Works. Containing the plainest and most excellent discoveries of the most hidden Secrets of the Ancient Philosophers that were ever yet published. 1678.

A very curious collection of eleven separately printed Tracts or Treatises on Chymistry, and on the Mechanical Origin or Production of Electricity, and also of Magnetism. By Hon. Robert Boyle, of the Royal Society, London and Oxford. 1675. The above are now all bound together in one volume. They are very curious, and among the earliest known treatises on these subjects.

An Astrological Judgment of Diseases, &c. By Nicholas Culpeper. London, 1671. (Was the property of C. DeWitt.)

Der Frommenn Lotterte, oder Geistliches Schatz-Kästlein; printed by Christopher Saur, Germantown, in 1714. Mr. Cassel furnished the following account of this peculiar and now rare publication:

"It consisted of 381 tickets, printed on stiff, white pasteboard, $2\frac{1}{4} \times 4$ inches in size, and numbered like lottery tickets, each containing a poetic gem composed by the celebrated Gerhard Terstegen, and accompanied by a verse or passage from the Scriptures. These tickets were enclosed in neat cases, some made of leather and others of fancy wood nicely dove-tailed. Mine is leather bound. The good people in olden times enjoyed themselves, generally on Sunday afternoons, by drawing prizes out of this sacred or spiritual treasury, and often when they felt gloomy or despondent they would resort to it in hope of drawing some promise or consolation to cheer their drooping spirits."

Kurtze Lebens-Beschreibung des hoch von Gott begnadeten und gelehrten Mannes Caspar Schwenckfelds. Nebst dessen Abschied, etc. Gedruckt im Jahr, 1697. With a beautiful steel engraved likeness of Schwenckfeld. Exceedingly rare; the exhibitor knows of but one copy besides his.

A Choice Selection of Hymns for the Glory of Christ. Mathetehy, (Norriton Square). Published by Abraham Krupp, 1814. 18mo. It has no imprint, but is known to have been printed by David Sower, Sr., Norristown.

The Norritown New and much Improved Musical Teacher, or Repository of Sacred Harmony: Psalms, Hymns and Spiritual Songs, containing many New Tunes, never before published. For the use of Schools and Christian Devotion. On a New System. By a Professor of Music. (Abraham Krupp.) Printed by David Sower, Jr., Norristown, Pa., 1832. Very scarce.

Das Kleine Davidische Psalterpiel. Chestnut Hill. S. Saur, 1791. Called *kleine* in contradistinction to a very large Davidische Psalterpiel, which the Brethren used in England and for a while in America, of which the *kleine* is an abridgment. It passed through at least fifteen editions, in the course of which new hymns, mostly composed by the Brethren, have been added. The first edition was printed by Christopher Saur, Germantown, in 1744, and the last by G. Mentz, Philadelphia, in 1830. It is not scarce. It is exhibited to prove that there was a printing office at Chestnut Hill, many persons living there now being hardly willing to credit the statement. The exhibitor also shows an almanac and a newspaper printed there, in further proof. He has, besides, many other Chestnut Hill imprints in his collection. Samuel Saur, the son of Christopher Saur, commenced printing at Chestnut Hill about 1790; from there he moved to Philadelphia, and from there to Baltimore, where he died. What may be more surprising, is the fact that there was a printing establishment at Chestnut Hill long before Samuel Saur's. This was conducted by N. Hasselbach, who afterwards moved to Philadelphia, and there followed printing many years. An almanac published by Hasselbach in 1763 is shown by the exhibitor.

Das Kleine Davidische Psalterpiel. Germantown. C. Saur, 1777. Exhibited on account of its extraordinary binding, being covered, almost all over, with brass mountings. So well is it protected, that now, after being used more than a century, it is still in quite good condition.

Das Neue Testament. (Psalter und Sprach.) 1740. Profusely protected with brass mountings, but of a construction different from the preceding volume.

The Psalms of David in French Meter and Music. 1707. Curiously bound.

Beicht und Communion Buch. By J. P. Fresenl. Printed 1748. Exhibited for its odd form.

Zionitischer Weyrauchs Hügel. Germantown. Christoph Saur, 1739.

This book contains a preface written at Ephrata, Pa., 14th of

Fourth-month, 1733, which, with the title-page, covers fourteen pages; seven hundred and ninety-two pages of hymns, and fourteen pages of index. It is dedicated "To all solitary Turtle Doves, cooing in the wilderness as a spiritual harp—playing in the many times of divine visitation." There are a number of facts in the Lithographical history of the Weyrauchs Hügel, any one of which would be enough to make it a remarkable publication. It was the first book printed in German type in America. It was the first book from the justly celebrated and prolific Colonial press of Christopher Saur, of Germantown. . . . The Weyrauchs Hügel is the largest and most important collection of hymns of the Ephrata cloister. . . . As the edition was small, and the book was in common use for devotional purposes it has become exceedingly scarce, nearly all of the few known copies being imperfect.—SAMUEL W. PENNYPACKER'S *Historical and Biographical Sketches*, Philadelphia, 1883.

ALMANACS.

[Mr. Cassel's display, it should be understood, is merely representative of the exceedingly large collection in his library. He selected for exhibition specimens of special periods, of noteworthy issues, and of local importance. This remark applies to his contribution of books, periodicals, broadsides, and almanacs, as well as of manuscripts, vorschriften, rare old letters, and documents. Of almanacs, at one time, he had at least one thousand copies, and at present he retains about four hundred; and of periodicals and newspapers he had over seven thousand specimens from nearly all parts of the world.]

Haushaltungs und Haus-Artzney Kalender für das Jahr. 1714. Three Christopher Saur's Calendars. 1740, 1746 and 1752. Samples from an extensive collection in possession of the exhibitor of this noted publication.

Calendar. Printed by N. Hasselbach, Tachensut (i. e., Chestnut Hill). 1764.

Calendar for 1772. Ephrata.

Calendar for 1774. Philadelphia: Henrich Miller.

Calendar for the year 1779. Lancaster: Francis Bailey.

Calendar for the year 1781. Philadelphia: Johann Dunlap.

Kalender für 1782. Lancaster: Theophilus Coesart.

Calendar for 1783. Philadelphia: Joseph Crukschank.

Calendar for 1784. Philadelphia: Carl Cist.

Calendar for 1785. By Leibert & Billmeyer.

Calendar for 1786. Philadelphia: Malchior Steiner.

Calendar for 1788. Lancaster: Stierner, Albrecht & Jahn.

Calendar for 1791. Chestnut Hill: Samuel Saur.

Calendar for 1798. By H. Kammerer und Com.

Calendar for 1798. Reading: Gottlob Jungman & Com.

Calendar for 1799. York, Pa.: Solomon Mayer.

Calendar for 1800. Philadelphia: Henrich Schweitzer.

Shanghai Almanac for 1852, and Commercial Guide. Printed at the "Herald" office, Shanghai, China. Large; bound; interesting.

A Chinese Almanac in the Chinese characters, for 1852-53. Printed at Singpo, on the native bamboo paper, with folding map, &c. A curiosity.

Times Telescope for 1818; or a Complete Guide to the Almanack. Very large and complete, 328 pp.; bound; emblematic frontispiece. Published annually.

Aitken's American Register and Complete Annual Account Book and Calendar for the Pocket or Desk, for the year 1773. Philadelphia: Joseph Crukschank.

PERIODICALS.

The Gentleman's Magazine for June, 1749. London.

The Columbian Magazine, or Monthly Miscellany, September, 1786. Philadelphia.

The Universal Asylum and Columbian Magazine, March, 1790. Philadelphia.

The American Museum, or Repository of Ancient and Modern Fugitive Pieces, &c., April, 1787, and June, 1788. Philadelphia.

The Congressional Register, or the History and Proceedings, &c., of the House of Representatives. Philadelphia, 1790.

The Philadelphia Monthly Magazine, or Universal Repository of Knowledge and Entertainment, for January, 1798. Philadelphia: Thomas Condie.

Porcupine's Political Censor for December, 1796, by Wm. Cobbett Philadelphia.

The Rush-Light, by Peter Porcupine (William Cobbett), for March, 1800. Philadelphia.

The Philadelphia Monthly Magazine for September, 1798. Philadelphia.

The Weekly Magazine, &c., for June 1st, 1799. Philadelphia.

The New York Missionary Magazine and Repository of Religious Intelligence, September, 1802.

The Panoplist and Missionary Magazine United, October, 1809. Boston and New York.

Something. Edited by Nemo Nobody, Esq., February 24, 1810. Boston.

The Port Folio. A Monthly Magazine conducted by Oliver Oldschool. October, 1810. Philadelphia.

The Friend of Peace, by Philo Pacificus (Elias Boudinot), for 1816. Philadelphia.

Sunday School Repository for April, 1818. First number of second volume. Philadelphia.

The Casket, or Flowers of Literature, Wit and Sentiment. No. 1, for January, 1826, by Atkinson. Philadelphia.

The Quaker, being a series of sermons by members of the Society. August, 1827. Philadelphia.

Watchman of the Night and Millennial Morning, &c., &c. No. 1, Vol. I. 1833.

The Lady's Magazine and Repository of Entertaining Knowledge. Vol. 1, for 1792. Philadelphia. (The numbers for one year, bound.) This establishes the fact that ninety-four years ago a magazine for ladies was issued in this State.

NEWSPAPERS.

The New England Courant for February 11, 1723. Reproduced from first paper printed by Franklin.

Pennsylvania Gazette. Supplement, July 7, 1755. (Important war news.) Philadelphia.

Dunkap's Pennsylvania Packet, or the General Advertiser, July 8, 1773. Philadelphia.

Pennsylvania Gazette, December 24, 1799. (Washington's death announced.) Philadelphia.

Pennsylvania Intelligencer, June 17, 1825. Harrisburg, Pa.

The Norristown Gazette. "Printed by David Sower, nearly opposite the court-house. Volume I, No. 21. Friday, November 1, 1799."

The first newspaper published in Norristown, or in the county. As it did not meet with sufficient patronage, on account of being neutral, it was suspended after the first year. After a while it was started again, as an avowed Whig paper, under the title of the Norristown Herald, when it met with sufficient support to make it quite lucrative.

Norristown Herald and Weekly Advertiser, by David Sower, September 16, 1808.

Norristown Herald and Weekly Advertiser, enlarged, January 21, 1829.

Weekly Register. Printed by James Winnard. Norristown. 1811.

Public Ledger. Philadelphia, March 25, 1836. (Original first number.)

Public Ledger. Philadelphia, March 25, 1836. Fac-simile reproduction.

The Daily Citizen, Vicksburg, Miss., July 2, 1863. Edited by its Confederate publishers, and issued by the Union troops. A historical curiosity. Mr. Cassel furnishes the following note:

"It is well known that during the war paper became so exceedingly scarce in the South that most of the newspapers had to suspend for want of it, and that the few journals that were continued were reduced to one-fourth or even one-eighth their former size. Wrapping paper, and even wall-paper, was used until the supply was exhausted. But as it was an absolute necessity to keep up at least

one paper to buoy up their sinking cause by false and fabricated reports of their 'brilliant successes,' they resorted as a last extremity to soaking the paper loose from the walls of their houses, to keep up a limited edition of one page of the above-named paper, which before had had eight large pages. When General Grant took Vicksburg he found one page set up, and a small parcel of loosened wall-paper, ready to go to press. Removing several lines, he inserted the note given below, and ordered a few copies to be struck off, thinking they would be valuable as a curiosity. My copy was sent me through the kindness of Dr. J. N. Jacobs, who was then a surgeon under Gen. Grant, in the hospital at Vicksburg."

NOTE.

July 4th, 1863.

"Two days bring about great changes. The banner of the Union floats over Vicksburg. Gen. Grant has 'caught the rabbit'; he has dined in Vicksburg, and he did bring his dinner with him. The 'Citizen' lives to see it. For the last time it appears on wall-paper. No more will it eulogize the luxury of mule meat and fricasseed kitten—urge Southern warriors to such diet nevermore. This is the last wall-paper edition, and is, excepting this note, from the types as we found them. It will be valuable hereafter as a curiosity."

Cherokee Phoenix and Indians' Advocate. New Echota, June 17, 1829. Edited by the eminent patriot and philanthropist, Elias Boudinot, who was born in Philadelphia in 1740. This was the first paper printed in the interest of the Indians, and is partly in their own language.

Herald of Gospel Liberty. By Elias Smith, September 1, 1808. Claimed to be the first religious newspaper published in the world. (Reproduced.) It is still continued, and is claimed by its present publishers to be the first religious newspaper in the world. Mr. Smith, the original proprietor, in his preface or introduction to the first number, says: "A religious newspaper is almost a new thing under the sun. I know not but this is the first ever published to the world." To this the reproducer adds as a note: "This was the first religious newspaper in the world." A bound volume of it was exhibited at the Centennial in Philadelphia in 1876, in the Olden Time Cabin or New England Kitchen, and was there claimed to be the first in the world, and supposed to be the only copy of the first volume. Mr. Cassel, however, has Volumes I, II, III, and IV, bound complete, but contends that it is not the first religious newspaper, as he has in his collection some much older.

The Anglo-Saxon, &c. New York, November 6, 1847.

Komstock's Fonetik Teligraf, &c. Philadelphia, January, 1849.

GERMAN NEWSPAPERS.

Christoph Saur's Pennsylvanische Geschichte Schreiber, April 16, 1744. First German paper in America.

Christoph Saur's Pennsylvanische Berichte, March 1, 1754. Title changed and enlarged.

Christoph Saur's Die Germantowner Zeitung, &c., December 5, 1763. Title again changed and enlarged.

Die Germantowner Zeitung, by Michael Billmeyer, February 5, 1788; semi-monthly.

Die Germantowner Zeitung, by Michael Billmeyer, September 11, 1792; weekly.

Die Chesnutthiller Wochenschrift, by Samuel Saur, January 7, 1794 weekly.

Das Philadelphiaer Wochenblatt, by Samuel Saur, August 26, 1794; weekly.

Der Wöchentliche Philadelphia'scher Staatsbote, by Henry Miller, June 23, 1766.

Der Wöchentliche Pennsylvanische Staatsbote, by Henry Miller, August 23, 1768.

Heinrich Miller's Pennsylvanische Staatsbote, July 9, 1776; semi-weekly.

Philadelphia'sches Staatsregister, October 25, 1780, by Steiner & Cist; weekly.

Gemeintziger Philadelphia'sche Correspondenz, July 16, 1782, by Melchior Steiner.

Der Americanische Staatsbote, &c., Lancaster, by Johan Albrecht, May 23, 1804.

Der Freidens Bothe, &c., Allentown, May 27, 1813, by Joseph Ehrenfried.

Readinger Adler, by Johann Ritter, February 3, 1818. Volume 22d.

Der Redliche Registrator, &c., Chambersburg, May 31, 1825.

Montgomery Adler, Pottstaun, Montgomery county, August 15, 1827.

Der Bauern Freund, Sumnytaun, Montgomery county, October 22, 1828, by E. Benner.

Der Evangelische Botschafter, &c., by Heinrich Bertolet, July 1, 1836, Skippackville. Heinrich Bertolet was a preacher among the Mennonites, and that this was the first attempt ever made by them to publish a religious paper. It met with so little favor and so much opposition that it was soon abandoned. It was a three-column, sixteen-page large quarto, intended to be monthly, at one dollar per year.

Fréyheits Wächter, by Arnold Puwelle, Skippackville, March 28, 1838.

Wahrheits Freund, &c., Zieglersville, Montgomery county, September 1, 1858.

MISCELLANEOUS LITERARY CURIOSITIES—PRINTED.

Goshenhoppen Church Document. Reproduced from the original of 1737.

Reise Pass, furnished by the Großherzogthum Baden. A German emigrant's passport and protection.

Japanese Newspaper. Title in English, "Daily Budget of Reliable News." Printed at Yeddo, Japan, August 6, 1872. Mr. Cassel has a very extensive collection of Chinese and Japanese newspapers in their native and English languages, as well as of nearly all other parts of the world, besides specimens of nearly all the languages and dialects of the Indians.

Sheet Music of Continental Times. Titles, "Citizen Soldiers," "Rosy Hannah," and "Variety."

Single and Double-Hand Alphabet for the Deaf and Dumb, with its history and instructions.

A Poetic Medley. Inscribed to Esquiro Lilliput, Professor of Scurillity. A broadside, with a large engraving about 18x24 inches, having reference to an election held in the "Old Court," or "Great Towne House," in Philadelphia, about 1765. The main parts of the poetry are to the tune of "Yankee Doodle." It is extremely rare; but two copies are known to exist. (See Watson's Annals of the Olden Time, pages 350 and 351.)

The Old Time News. A large illustrated broadside, or chart, of statistics and dates of important events since 1800—accidents, fires, lives lost by disasters on sea and land, inventions, fastest trotters in the world, sporting events, army commanders from the time of Washington to Sherman, etc. Published and copyrighted by John Wilcox, Chicago, Ill., 1879.

Broadside. Containing fac-simile reproduction of the Boston News Letter, for the week from Monday, April 17, to Monday, April 24, 1704, the first newspaper printed in America; also engravings of the first steam railroad passenger train in America, first steamboat in America, first steam locomotive in the world, portrait of Robert Toombs (a benefactor and eccentric character), etc., etc.

A collection of Raised Letter Lesson Papers for the Blind.

The hand Nomascope of the Precise Letter Namers.

Captain's Commission, from Governor McKean to David C. Kulp, 1806. With the Governor's autograph.

Tavern Keeper's License, from Governor McKean to Samuel Harley, 1808. With the Governor's autograph.

Justice of the Peace Commission, from Governor Snyder to Abraham Gerhardt, 1813. With autograph.

Summons to the General Assembly, from Governor Shulze to Benjamin Reiff, 1829. With autograph.

Justice of the Peace Commission, from Governor Wolf to Benjamin Reiff, 1831. With Governor's autograph.

Warrant of James Hamilton, of the Land Office, issued by authority of the Proprietors, to Nicholas Scull, Surveyor General, to survey to Jacob Beseker one hundred acres "adjoining John Christopher Keiser in Marlbro' Township," dated April 15, 1752; with autograph of Nich. Scull, appended to his request to David Shultz, surveyor, to make a resurvey of the tract, the original return having been accidentally lost.

Sheriff's Summons of Certain Persons to Attend Court, 1820.

Broadside of Important News. Size, 13x8 inches. Dated Philadelphia, February 8, 1781, containing news received by express that morning from South Carolina, dated "Camp on the Pee Dee, Jan. 24, 1781," from General Nathaniel Greene to the President of Congress, of the defeat of Colonel Tarleton by General Morgan.

Die Sieben Regeln der Weisheit. A large Fraktur Schrift. 1802. Measures 19x23½ inches.

Certificate of Oath of Allegiance of Jacob Frey, on a printed blank on thick paper, 6½x4½ inches, in the following words:

Philada County

I DO hereby certify, That

Jacob Frey, of townensing township
farmer

Hath voluntarily taken and subscribed the OATH of Allegiance and Fidelity, as directed by an ACT of General Assembly of Pennsylvania, passed the 5th day of December, A. D. 1778. Witness my hand and seal, the 26th day of March, A. D. 1779.

AND^m KNOX, Com^r

No 73

Printed by J. Dunlap

Large Fraktur-Schrift, made by Hupert Cassel for Henry Cassel, 1764.

Das Güldene A, B, C. A remarkable Fraktur-Schrift, containing a hymn composed by Christopher Dock, and ornamental pen-and-ink work of different colors executed by him, July 18, 1768. The hymn is an eight-line alphabetical acrostic, the first letter of each stanza being a letter of the alphabet. The first two stanzas are:

An Gottes Gnad und milden Segen
Ist Alles ganz und gar gelegen,
Und ohne Hümmels-Hölf und Gunst
Ist aller menschen Thun unsunst;
Drum sey der Gottesfurcht ergeben
Und halt an ihr dein ganzes Leben.
Weil sie Verstand und Weisheit bringt
Und macht dass Alles wohl gelingt.

Bedenke wohl in allen Sachen
Die du hast auf der Welt zu machen
Das Gott der Alles hört und sieht;
Auch siehet was an dir geschieht
Und dass du must vom Thun und Leben
Am jüngsten Tage Rechnung geben;
Deswegen nimm bey Tag und Nacht
Doch dein Gewissen wohl in Acht.

Fraktur-Schrift. By Christopher Dock. Contains a hymn, composed by him, which is included in the Mennonite hymn book, published in Lancaster in 1804. The first and last stanzas of the hymn, which is an alphabetical acrostic, are:

Allein an' Gott setz dein Vertrauen,
Auf Menschen Hülf sollet du nicht bau'n.
Gott ist allein: der Glauben hält
Sonst find'et du Wenig in der Welt.

Zuletzt, sey redlich, fromm und treu,
Das dich dein Thun niemals gerue;
Denn vor gethan und nach bedacht
Hat manchen in gross Leid gebracht.

MISCELLANEOUS MANUSCRIPTS.

Indenture between Henry Frey and John Jannett, October 2, 1692, about a sale of one hundred acres of land, made during the reign of William and Mary. Remarkable handwriting; in good preservation, yet of venerable appearance.

Contract for sale of land between Henry Frey and Gerhard Levering, dated April 30, 1700; with the autographs of Johannes Kelpius and Claus Rittinghuis (Nicholas Rittenhouse) as witnesses.

Marriage Certificate of Henry Frey and Catharine Levering, drawn in English and German by Francis Daniel Pastorius, as follows:

Whereas, Henry Frey, of Altheim, in the province of Alsace in high Germany, now Inhabitant of Germantown, in the County of Philadelphia, Bachelor; and Anna Catharina Levering, of Mülheim, in the County of Bruck, likewise in high Germany, young woman, now of the said Township; after the consultation with the respective Parents have produced a sufficient Testification of their Clearness of all other engagements under the hand of several credible persons unto one of the Justices of the peace in the Bailiwick of Germantown as also published & affixed their Intention of marriage on the meeting house of the said Town the 24 day the first month past.

This present Certificate witnesseth that the said Henry Frey & Anna Catharina Levering have this day solemnized such their marriage by taking an other as husband and wife according to the Law of this Country, before and in the presence of us, whose names are hereunder written at Germantown the 26 day of the 2^d month Anno Domini 1692.

Articles of Agreement between Henry Frey and his family, October 12, 1732. Henry Frey came to America as an adventurer before

Demnach Heinrich Frey gebürtig von Altheim aus dem Elsaas in Hoch Teutschland, anjetzo Einwohner zu Germantown in der graffschafft Philadelphia: Jung gesell; und Anna Catharina Levering von Mülheim aus der graffschafft Bruck, ebenfalls in Hoch Teutschland, jungfrau, anjetzo von ged^e Germantownschip; auff geschעהner Berathschlagung u. Consent dero respectiven Eltern, eine genungsame Attestation ihrer Klarigkeit von allem underseitigen Versprechen unter der hand verschiedener glaubwürdiger Personen vor einem Justice of the peace im Germantownischem Gebelts vorgelegt als auch ihr Vorhaben Einander zu Eheleichen an dem Versamlungs Haus dieses Ort^s d 24 tag jüngst verwichenen ersten Monats publicirten und angeschlagen haben.

Dess bezeugt gegenwärtiger Heurats Brief, das ged^e Heinrich Frey u Anna Catharina Levering heut dato solch ihre Ehe Vollzoge und Einander vor Mann u. Weib genommen haben vermög diesländischen Gesetzes, in der Gegenwärtigkeit von uns, deren Nahmen eigenhändig unterzeichnet sind. Actum in Germantown d. 26 tag des 2^{en} monats (:Aprilis:) Anno Domini 1692.

William Penn, probably as early as 1675. He was a bachelor until Wigart Levering's family arrived. Then he applied for their daughter Cathrina, as she was probably the only young woman then in the bailiwick of Germantown; and although she was of a marriageable age, the odds of their ages were so exceeding great that it was feared objections might be filed against it. Therefore, their intention was publicly made known; it was also published in their meeting, and affixed on the meeting-house of the said town on the 24th of the first month past. And then, as no objections were filed against it, it was consummated, as the certificate says, on the 26th day of the 2d month March 1692. Then as Frey was so old already before he married, they had several minors yet when he was so old and infirm that he was obliged to retire from all the active cares of life. Consequently this agreement was made to one of his older sons (Jacob), consigning all his real estate and personal property to him on very peculiar conditions concerning the support of themselves and his minor children; providing also for their outsets, etc.

Warrant of the Surveyor General to Thomas Fairman, for 200 acres in the present Towamencin township. 1712.

Return of Survey, by David Powell, dated Philadelphia, the 26th of the first month, March, 1713, of 200 acres of land under warrant of 20th of Eighth-month, 1712, in the county of Philadelphia. This land was located on Towamencin creek, in Towamencin township, then called Bristol township, and became the homestead of the Fry family.

Warrant of Richard Hill, James Logan and Robert Assheton, Commissioners of Property, dated at Philadelphia the 30th day of the first month, A. D. 1721, directed to Jacob Taylor, Surveyor General, to survey unto Samuel Powel 546 acres of land "that has not been heretofore survey'd nor appropriated nor is seated by the Indians." This land was located within the limits of the present county of Montgomery. This instrument came into the possession of the exhibitor through the Frey family, who owned part of the land.

Articles of Agreement, dated July 4, 1725, between Derrick Ransbery and Hupert Cassel, relative to a purchase of 150 acres of land in Van Bebber's township. This land was located about one mile southeast of the present Skippackville. Hupert Cassel was great-grandfather of the exhibitor.

Specification of the length of time in days that each taxable of Lower Salford township—their names being given—was required to maintain a pauper, about 1760. The number of days apportioned was governed by the means of the taxable.

Curious Bond of Indemnity to the Overseers of the Poor of Lower Salford for the keeping of a pauper of Bucks county. 1766.

Certificate of the appointment of John Beiff and Henry Cassel as Overseers of the Poor. 1770.

Certificate of the appointment of Dielman Ziegler and William Yerkes as Overseers of the Poor. 1772.

Certificate of the appointment and confirmation of Christian Stauffer and Godshall Godshalls as Overseers of the Poor. 1775.

Auditors' Certificate to the accounts of the Overseers of the Poor of Lower Salford, March 25, 1774, as follows:

March 25th, 1774.

It appears by settling the Accounts, in presents of three Reputable Freeholders, of Lower Salford Township, who subscribed their Names, in the Book, that the Disbursement made for the year past was Two Shillings. So remain the Sum in Bank, £30. 7. 9. Which We Certify.

FREDERICK DIECKENSCHIEDT.
MICHEL ZIGLER.

Fence Viewer's Report. The office of Fence Viewer is unknown to the present generation. In former times officers were elected, or appointed by the court, to investigate disputes concerning line fences and to make award, their judgment being final. The report exhibited reads:

We the Subscribers appointed by Fence Viewers in and for the County of Montgomery, having this day Viewed the Partition Fence in dispute Between Jacob Shellenberger and Martin Hocker, junr, do adjudge and order that the said Martin Hocker junr shall make a good and Lawful Fence on the Line in Ten days from this Date, and to begin the same at the Lane, thence on the Line all the way to a stake drove in the ground for a Division, and pay Three Dollars to the Viewers. And we Likewise order that Jacob Shellenberger pay to Martin Hocker one Dollar & Fifty cents for three panels of Fence

heretofore made by said Hocker & his Predecessors. Given from under Hands, this first day of October Anno Domini 1814.

MELCHIOR SCHULTZ,

TRANSLATION.

The undersigned unite in establishing a fund for the maintenance of a school-master in the following manner: The under-written contributors lend to the to be appointed Trustees of a school-house, a sum, of which the annual interest at five per cent. is to be applied to the use of a school for the term of sixteen years, in the anticipation that at the expiration of this time others who may in the meantime be blessed in temporal affairs, and who shall discern the importance of this matter, will take the place of the present contributors. Should this, however, not prove to be the case, then the creditors shall not withdraw their loans until like sums are willingly offered; for the fund shall under no circumstances be discontinued, unless to our knowledge an injustice should ensue therefrom. Moreover, judicial fairness shall as much as possible be observed between

us in this matter; and should any such supporters of the fund, or their heirs, become impoverished, they shall be considerably dealt with and released, if not otherwise, then by the subscribers, to wit.

Fac-simile of a curious letter of Benjamin Franklin, which reads thus:

Philad^a July 5, 1775

Mr. Strahan,

You are a member of Parliament, and one of that Majority which has doomed my Country to Destruction.—You have begun to burn our Towns, and murder our People.—Look upon your Hands!—They are stained with the Blood of your Relations!—You and I were long Friends:—You are now my Enemy,—and

I am, Yours,

B. FRANKLIN.

Fac simile of title-page and an entire calendar page of the first edition of Poor Richard's Almanac for 1733. Printed and sold by B. Franklin, at the new printing office, near the market.

Fac-simile of a letter of George Washington, December 10, 1796. Written to Richard Peters, Philadelphia.

DEEDS AND PARCHMENT DOCUMENTS.

Deed, dated May 16, 1682, for 500 acres of land, subsequently located in Montgomery county, given by William Penn, and bearing his autograph. It contains a recital of King Charles' grant of the entire province to the Proprietary. It is notable for its extraordinary fine penmanship, and for bearing date prior to Penn's coming in Pennsylvania.

Deed of the Penns for a tract in Old Cowissioptin (Goshenhoppen) under the Lesser Seal. 1734. Exhibited on account of its neat and very peculiar penmanship.

Deed of William Penn to David Powell, for 800 acres, with the Great Seal. 1713.

Deed or Quit Rent Lease, for 102 acres, the consideration per annum being "one Pepper Corn only upon the last day of the term if the same be lawfully demanded." 1734.

Naturalization paper of Peter Keyser, Derrick Keyser, Francis Daniel Pastorius, and sixty-one other persons, issued under authority of William Penn, Proprietary, by Thomas Lloyd, Deputy Governor, at Philadelphia, on the 8th day of Third-month (May), Anno Domini 1694, and in the third year of the reign of King William and Queen Mary. This important document is in the handwriting of Francis Daniel Pastorius, and bears several endorsements. One is, "Ex Libris Christiani Lehman, to be laid by for my Children. Philada. August 23d, 1771." Obtained by the exhibitor from the widow of Benjamin Lehman, a grandson of Christian Lehman.

An Apprentice's Certificate and Recommendation, September 29, 1686. A curious large, heavy parchment, $23 \times 16\frac{1}{2}$ inches, in ornamented German penmanship.

Naturalization Paper of George Andrews (Anders), of Towamensing, dated April 11, 1755.

Germantown Friends' Protest against Slavery, 1688. Fac-simile of the original, accidentally discovered not so very long ago.

On the 18th day of April, 1688, Gerhard Hendricks, Dirck Op den Graeff, Francis Daniel Pastorius, and Abraham Op den Graeff, sent to the Friends' meeting the first public protest ever made on this continent against the holding of slaves; a little rill there started, which further on became an immense torrent; and whenever hereafter men trace analytically the causes which led to Shiloh, Gettysburg, and Appomattox, they will begin with the tender consciences of the linen weavers and husbandmen of Germantown.—The settlement of Germantown, Pa. By SAMUEL W. PENNYPACKER, Esq., Philadelphia.

Printed copy of Germantown Friends' Protest Against Slavery, 1688.

Memorial sermon on the death of Dr. Muhlenberg, preached October 21, 1787, by Rev. J. H. C. Helmuth, pastor of St. Michael's and Zion congregations, Philadelphia. With copper-plate portrait and biographical sketch of Dr. Muhlenberg.
- Memoirs of the late Rev. John Antes. A fragment of the Port Folio of Oliver Oldschool, Esq. Philadelphia: April, 1813. John Antes was born March 24, 1740, on one of his father's estates in Frederick township, Montgomery (then Philadelphia) county. He was baptized in the society of the Moravian Brethren when six years of age. In January, 1764, he visited Europe, and went to Herrnhut; from there he went so Newwied to learn watchmaking. January 16, 1766, he received a call to serve the Moravian mission then forming at Grand Cairo, in Egypt, which place he reached on the 10th of February following. In 1773 he made the acquaintance of Mr. Bruce, the celebrated traveler, at Cairo, and rendered him valuable assistance in making fine instruments. The same year he visited the Copts at Behnesse. In August, 1781, he left Cairo, after a twelve years' residence in Egypt, and the next year he attended the General Synod of the Brethren's church at Berthelsdorf, in Saxony. In 1785, he accepted the position of warden of the Brethren's congregation at Fulnee, in Yorkshire, England. In June, 1786, he married, and in 1801 he traveled with his wife by way of Hull and Hamburg to Herrnhut. Having obtained dismission from his office in 1808, he chose Bristol for his abode, where, December 17, 1811, he died.

- Hightley, Miss M. P.**, Norristown. German Bible. 1643. Prayer Book. 1767.
- Hobson, F. G.**, Collegeville. Two Autograph Letters from General Peter Muhlenberg, a member of the Assembly, to Israel Bringham, great-grandfather of the exhibitor, as follows:
- March 11, 1798.
- Dear Sir; I have received your note and am sorry to hear that you are unwell, but not so much on my own account as yours. If you had called upon me to day, you would have dined on rock fish &c etc., in company with good democrats, thus you see what you have lost by pretending to be sick. The election District passed the House, unanimously on Friday last. It will be discussed in the Senate on Tuesday next. Your letter had the desired effect. * *
- * These confounded Democrats push the bowl so briskly that I can hardly see to write, and can therefore only say God bless you if possible
- Yours
P. MUHLENBERG.
- PHILADELPHIA, March 26, 1798.
- Dear Sir: Yours of the 14th did not reach my hands until this morning. The fate of our election districts, you are by this time undoubtedly acquainted with. The bill passed our house without opposition, but in the Senate, through the intrigues of Messrs. Potts and Evans, it was amended in such a manner that its original features were totally lost. They fixed districts at — and one at Pottsgrove the other at Snyder's was to be abolished. In this way it stood. But finding the amendment stood no chance in our house, they postponed the bill generally, so that it now sleeps, and is at rest: hoping for a joyful resurrection. * * *
- Fate and destiny combined with the aristocrats are hurrying us precipitately into a ruinous and bloody war, and the chance of escape is a slender one indeed. You will see by the papers, that an attempt was made in our house to instruct our Senators in Congress to maintain the peace if possible, but strange to tell, all the Quakers, Old Tories &c voted against it, so that they are for war and the fighting men for Peace.
- A Report is in circulation that our Ministers in Great Britain have concluded an alliance offensive and defensive with that nation, how true I know not. You can see by this scrawl that I am not very well calculated for writing this day. With respect and esteem I am dear Sir Your most obedient servant.
- P. MUHLENBERG.
- Perkiomen Bridge Lottery Ticket. The present bridge structure over the Perkiomen creek at Collegeville was built by the county of Montgomery. In order to raise the necessary funds, the Legislature of Pennsylvania, February 21, 1797, passed an act "for raising by way of lottery the sum of twenty thousand dollars to build this bridge." Twenty thousand tickets were sold. One of them is in possession of the exhibitor, and reads as follows:
- No. 246. PERKIOMEN BRIDGE LOTTERY.
Class the First.
- This ticket entitles the bearer to such prize as may be drawn against its number, if demanded within twelve months after the publication of the fortunate number, subject to a deduction of 20 per cent.
- P. MUHLENBERG.

Autograph Letter. Wright Armat to Israel Bringham, giving the origin of the name of Wright A. Bringham, as follows:

PHILAD July 2, 1799.

Sir: Yours for Mr. Baird is at hand—with One Hundred and four Dollars—for which he has a receipt and you have credit. If I must name your son—let it be *Wright Armat Bringham*. The molasses you will receive with a bill. Yours, WRIGHT ARMAT.

Autograph Letter from Francis R. Shunk to Wright A. Bringham, concerning the origin of the name of "Trappe,"

Shemaker, Hannah Y., Plymouth Meeting. Bible, dated 1759.

Shoemaker, Robert, Shoemakertown. General Advertiser, October 11, 1803. Almanac. 1760. This is the date of the birth of Martha Leach, the grandmother of the exhibitor. London Magazine. 1758. Life and Travels of Samuel Bownas. Philadelphia, 1756. Journal of Thomas Chalkley. 1749. Letters of Junius. 1771. In 1776 Robert Shoemaker, a Friend, grandfather of the exhibitor, when on his way to market in the city with provisions, was captured, it is said, and taken to the American camp at Germantown, and while there this volume was given to him. Sewell's History of the Quakers. 1774. Day Book or Journal of Richard Martin. 1773. Martin was a tanner and miller at Shoemakertown. The book is interesting, as it contains the names of many of the residents of the township of that date. Illustrated Bible. Zurich, 1571. This is a copy of, and the same date as, the Shoemaker Family Bible brought to this country by George Shoemaker, ancestor of the exhibitor, who landed at Chester in 1684, and settled in Cheltenham township. The old Shoemaker Bible is in possession of the widow of Samuel M. Shoemaker, of Baltimore. Three deeds for land in Cheltenham, dated 1720 and 1728.

Simmons, Joseph H., Three Tuns. Newspaper, dated 1800. In mourning for Washington.

Simpson, Thomas C., Norristown. Original Letter, written and signed by George Washington, as follows:

HEADQUARTERS, VALLEY FORGE, 15 March, 1778.

Sir—I yesterday rec'd a letter from Governor Wharton enclosing copy of one from you to the Council on the subject of keeping five or six Gallies manned for the protection of the upper part of the river. The Governor has very politely left the matter to my determination, but I would not wish to interfere in a Business which is out of my line any further than by giving my advice. I cannot help thinking now, as I did before, that should the Enemy come to the River, they will do it with a superior force, and certainly carry them. But Captain Huston thinks, with the assistance of a small work on shore, under cover of which they can run in case of necessity, that they may be protected. I would wish you to consult Governor Livingston and the gentlemen in the naval line upon this matter, and do what to you seems best. But you will not fail to secure the Guns and Stores of those Gallies that you stop, in the safest manner, until means can be fallen upon to carry them away.

I am, sir, your most obed't serv't,

Go: WASHINGTON.

Favor Capt. Huston, Review, March ye 17, 1778.

Sisler, Mrs. Edmund, Pottstown. Bible, over 100 years old.

Slifer, Dr. H. F., North Wales. General History. 1619. Bible. Edinburgh, 1756. Bloomfield's View of the World. Two volumes. 1808. Ticket to Peale's Museum. No. 1972.

Way to the Sabbath of Rest. 1759. Observations on the Enslaving of Negroes. 1760. One of the earliest anti-slavery books published. Marburger Hymn Book. German. 1762. Reformed Hymnal, with music. German. 1763. An early example of music printed from movable type, in America. Holy Bible. Quarto. German. Second edition. 1763. Arndt's Paradise-Gärtlein. 1765. Die wandernde Seele. 1768. Geistliches Blumen-Gärtlein. 1769. Schul-Ordnung. 1770. By Christopher Dock. This is a remarkable work on methods of teaching, proving that many so called modern methods were in practice at that early day. Hymn Book. German. 1772. English and German Book. Third edition. 1772. Ready Reckoner. Seventh edition. German. 1774. Ready Reckoner. English. 1774. Testament. Seventh edition. German. 1775. Holy Bible. Quarto. Third edition. 1776. Psalms of David. German. 1777. This was probably the last work printed by Christopher Sower. Luther's Catechism. German. 1777. Christopher and Peter Sower. Kunzle's

Gedichte und Lieder. 1778. Psalms of David. 1779. Samuel Sower. Ready Reckoner. 1793. Samuel Sower. Prophecies of the French Revolution. 1794. Samuel Sower. Poems of David. 1796. Samuel Sower. Norristown Gazette. 1799. This volume of the paper contains accounts of the death of Washington and of the funeral ceremonies held in various parts of the county. Funeral Oration, delivered before and published by Congress. 1800. Washingtoniana. 1800. This rare work contains a fine portrait of Washington. Ready Reckoner. 1801. Samuel Sower. Norristown Herald. 1811. Charles Sower. Lady Guion. 1812. B. W. Sower. Newspaper, "Engine of Liberty." 1813, 1814. Norristown Herald. 1816 to 1834. Carvier's Farrier. 1818. Digest of Laws of Pennsylvania. By B. F. Hancock. 1831. Norristown Musical Teacher. Several characters to represent the seven notes of the scale are used in this work. The original type was modeled and cast for the purpose. Sermons, in Latin. By F. Roberti. Printed in Venice four hundred and eleven years ago, about twenty-five years after books were first printed from types. Luther's Notes on the Galatians. Printed in Basel. 1525. Latin Bible. Printed before the Bible was divided into verses, at Cologne. 1527. Livy. Melancthon's copy, with notes in his own writing. Printed at Basel. Holy Bible. Luther's translation. 1564. This splendid work, in folio, contains about two hundred large engravings, all elaborately hand-painted three hundred and twenty years ago. It is believed to be unique in this country. Essays on Faith and Doctrine. By Luther. 1570. Printed at Frankfort. Commentary of John Calvin on the Holy Gospel of Jesus Christ according to St. John. This is believed to be the first English edition of Calvin's works. 1584. Bible Concordance, in Hebrew, Greek, and German. 1718. Der Blutige Schan Platz, or Book of Martyrs. From the time of Christ to 1660. Printed in 1748. Christian Doctrine and Belief. 1769. Christian Prayers and Belief. 1770. Chronica Ephraensis. 1786. This rare work contains the chronicles of the Dunker Brethren in Pennsylvania. The book is much sought after. Justice of the Peace. 1750. One of the many books printed by Benjamin Franklin. A Work in Manuscript. Written in Pennsylvania. 1750. Funeral sermon in memory of Rev. Dr. Heinrich Melchoir Muhlenberg. 1788. Contains a handsome portrait of this eminent and learned clergyman. Thomas' History of Printing. 1810. Manuscript Proceedings of the Franklinian Polemic Society of Norristown. Of much local interest.

Sower, F. D., Norristown. German Bible. Germantown: Christoph Saur. 1743. The full title of this remarkable edition of the Bible is: *Biblia, Das ist; Die Heilige Schrift Altes und Neues Testaments, Nach der Deutschen Uebersetzung D. Martin Luthers, Mit Jedes Capitels kurzen Summarien, auch beygefügten vielen und richtigen Parallelen; Nebst einem Anhang Des dritten und vierten Buchs Esra und des dritten Buchs der Maccabäer.* Germantown: Gedruckt bey Christoph Saur. 1743. This is the first Bible printed in this country in a European language. The 1st, 4th, 6th, 8th, 11th and 14th lines of the 1st or general title, are printed in red, the others in black; the title to the New Testament is in black ink; an ornamental headpiece $1\frac{1}{2}$ inches wide extends across the page at the beginning of Genesis, and there is another ornamental headpiece at the commencement of Matthew; the other pages have each two black lines at the top, between which are printed the name of the Book, the number of the Chapters on the page and brief summary of the contents. The text is reprinted from the 34th Italian edition of Luther's Bible, more than one hundred errors in which are corrected. * * * The covers of the Volume are wood boards, each three-eighths of an inch thick, covered with calf, each board being further protected by fine brass rivets and two clasps. The edition consisted of about one thousand copies.—F. B. O'CALLAGHAN'S *American Editions of the Holy Scriptures*, Albany, 1861.

Psalms and Hymns. Germantown: Christoph Saur. 1762. Gesang Buch. Germantown: Christoph Saur. 1762. German Bible. Germantown: Christoph Saur. 1776. Robert Barclay's Apologie. Germantown: Christoph Saur. 1776. Certain Physiological Essays. Robert Boyle, London. 1661. English Bible. London. 1771. Contains a written Register of the Rutter Family, of Puttstown. Know your own Mind. A Comedy. London. 1788. Christian's Duty. Germantown: Peter Leibert. 1791. German Psalter Spiel. Germantown: Samuel Saur. 1792. The Miscellaneous Works of Dr. Arbuthnot. Glasgow. 1751. The Laws of the Province of Penna. Philadelphia: Andrew Bradford, Printer to the Province. 1728. Illustrations of the Burmese War. 1824. New Testament. Germantown: Michael Billmeyer. 1810. Laws of Penna. Compiled by B. F. Hancock. Norristown: D. Sower. 1831. German Book. 1570. Constitution and Bye-

Laws of the Washington Association of Montgomery County. Norristown: Printed for the Association by David Sower, Jr., 1818. A small-sized pamphlet of fifteen pages. The purposes of this Association are indicated in Article 2, Section 1, relative to the qualifications necessary to become a member: "No person shall be admitted to the right of membership unless he be a native born citizen of the United States, of the age of eighteen years or upwards, and publicly declare himself determined to support the same political principles our immortal Washington inculcated, and evidence a full and determined purpose to maintain and defend at every hazard, the rights and privileges so dearly purchased for us by our glorious ancestors."

The following members' names are printed in the pamphlet: David Acuff, Jacob Acuff, William E. Davis, Abraham Duffield, Isaac Ellis, Jonathan Ellis, John P. Farmer, Dr. Antrim Foulke, Charles Hammer, John Henderson, Nathan Holt, George W. Holstein, Joseph Hough, jun., Charles S. Iredell, Jacob E. Jarrett, Isaac Jenkins, Joseph Jarrett, Levi Jarrett, Tompkins Jarrett, Robert Kendrick, Evan Lukens, John McCalla, Aaron Meredith, Levi Pawling, Daniel S. Reiff, Jesse W. Scheets, Daniel St. Clair, Jesse Shoemaker, Peter Snyder, Jonathan Snyder, Charles Styer, David Styer, Henry Styer, John Styer, John Slingluff, Andrew Shenline, Jona'n Shoemaker, David Thomas, Joseph Thomas, Samuel Thomas, Absalom Wilson, Andrew Willa, Dr. H. J. White, Thomas White, George Wirtzner.

Two Samples of Early Type Setting. 1. An advertising circular, fourteen by seventeen inches, set in ordinary type, and printed in five colors—black, blue, red, green and yellow; ornamented with skillfully arranged columns, scrolls and ovals, made with combination border type. In the centre is printed a Puzzle in verse, and at the bottom is given in four languages—Latin, English, French and German—the card of the printer, Samuel Sower, No. 190 Market Street, Baltimore, January, 1801. 2. Artistic specimen of ornamental typography, also executed by Samuel Sower, entitled: "A Curious Piece of Antiquity on the Crucifixion of Our Saviour and the Two Thieves; printed in black, on a sheet about the same size as the foregoing; no date.

Spencer, Mrs. Ella, Jenkintown. English Bible, dated latter part of last century.

Stauffer, John M., Norristown. German Bible. Nuremberg, 1764. In the possession of the Ritter family since 1763.

Stevens, Henry A., Norristown. The Columbiad. An original copy of Joel Barlow's much-valued poetical National History up to the year 1807, the date of its publication. A similar copy was placed on exhibition under a glass case, at the State House, Philadelphia, during the Centennial, 1876.

- Lenzi, Anne C.**, Norristown. Four Pallets, decorated with flowers and landscapes.
- Markley Freundschaft, The.** Engraving of first railroad train run in Pennsylvania, drawn by locomotive "Ironsidea." John Markley, of Germantown, was engineer of this locomotive in 1842.
- Mather, Mrs. C.**, Jenkintown. Engraving of Philadelphia in early times. There are but four other copies, which are owned by the Historical Society of Philadelphia.
- Mears, Mrs. Anne DeB.**, Milestown. Picture of home of exhibitor, built in 1736. The DeBenneville homestead is located at the corner of York road and Oak lane, Milestown, Philadelphia County. It was built by Bernard Reasor in 1736, who occupied it for some years, when he was succeeded by his son, John Reasor. In April, 1755, it was rented to the great-grandfather of the present occupant, Dr. George DeBenneville, who came to America in 1741, and married in 1745 Esther Bertolet (Bertholet), daughter of a French refugee, who settled in Oley, Berks county, as early as 1726. DeBenneville lived in Oley fourteen years, practicing his profession, preaching and teaching. After his removal to Philadelphia county he devoted himself exclusively to his practice, as his reputation was well known. He resided here two years, when he purchased a farm of twenty acres at the corner of Green lane and York road, to which he removed. Here his youngest son, George, the grandfather of Mrs. Mears, was born November 10, 1760, and where he died December 20, 1850, in his 91st year, retaining every faculty to the last hour of his useful life. His widow survived him five months, dying on the 16th of May, 1861, being the sixty-ninth anniversary of their wedding day. In 1768 the Reasor house was offered for sale, when it was purchased by Dr. George DeBenneville for the sum of £400. The same year he planted one of the aycamore trees which now stand in front of the door. In 1781 he removed to this house, where he remained until his death, March 19, 1793; his widow remained in the house till her death, March 7, 1795. After the death of his parents, George, Jr., who had purchased previously of his father the (Reasor) home, removed here, and remained until 1828, when he retired into private life, relinquishing his practice to Dr. K. C. Shelmerdine, of Baltimore, who resided here fourteen years. In the spring of 1843, the house being vacant, Mrs. Mears requested of her grandfather the privilege of occupying the old home, to which he gave his consent; and now, for over forty years, it has been her home. This was the birth-place of her father and two of her children. They have passed the veil, and are at rest.
- The following obituary notice is from the Pennsylvania Gazette of March, 1793: "Departed this life, on Tuesday night last, at his farm, near this city, after a few moments of indisposition, Dr. George DeBenneville, Sr., in his 96th year. A man of high and universal esteem through life, and equally lamented in death."
- Daniel and George, sons of Dr. George DeBenneville, were both educated at the Thomas Roberts school, on Second street (now Feltonville), whose teachers were educated men, and whose reputation at that early day was appreciated by those who had sons to educate. They settled the profession of their father, and early commenced
- the study of that science under his care. Daniel was one of the early graduates at the University of Pennsylvania, and George completed his studies abroad. Daniel DeBenneville, the eldest son, was a surgeon in the Revolutionary war. He entered as Junior Surgeon of the Thirtieth Virginia Regiment on July 3, 1781, and was connected with the flying hospitals of the army of the United States. He died in August, 1829, in his 75th year. George DeBenneville was one of the most interesting men in conversation. His descriptive powers were perfect. He related frequently the incidents of his boyhood. The occurrences around his home, which he remembered of the Revolutionary period, would fill an interesting volume. The admiration and respect he held for Washington were unbounded. Whenever they met the most cordial feelings were exchanged. He was present when Washington delivered his farewell address to Congress. Of this he never spoke without deep emotion. When Washington died, he mourned as a friend, and he often gave his thoughts in writing, some of which are preserved.
- Miller, Mrs. Matilda**, West Point. Old Picture.
- Morgan, Mrs. David**, Merion Station. Picture of Market street bridge, Philadelphia. Colored engraving. Penn's Treaty Tree.
- Nyce, George S.**, Frederick. Wood cut of the residence of the late Adam Slemmer, while a teacher in New Hanover about sixty years ago. Drawn by the exhibitor from memory after a lapse of thirty years.
- O'Bryan, Mrs. J. Duross**, Ardmore. Picture, from France. Ecce Homo.
- Perry, Miss Bella**, Norristown. Painting.
- Pomeroy, Mrs. H. S.**, Norristown. Declaration of Independence. It is encircled by pictures of Washington, Jefferson and Adams, and the coats-of-arms of the thirteen original States. Printed by Mear & Peters, Carlisle, Pa., in 1826.
- Ramsey, Miss Sallie W.**, Swedeland. Picture of burning of the Richmond theatre, in 1811. Formerly owned by Nancy Brooke, wife of James Brooke.
- Rice, A. J.**, Jenkintown. Engraving of Rice's new mill, 1883. Rice's mill, near Jenkintown, was built by ——— Knight in 1716, 24x24 feet; enlarged in 1812 to 24x36; enlarged in 1840 to 24x64; improved to roller mill in 1883. Came in possession of Daniel Rice in 1859. A. J. Rice, the present owner, succeeded his father in 1880.
- Richter, Frank C.**, Ashbourne. Water Color of Roland's mill dam, after being torn down by a freshet, showing pre-historic dam under the other stone work. Oil Painting of Cooke's old mill; believed to be pre-Revolutionary. Oil Painting of stone bridge over Tacony creek, at Shoemakerstown. The first photograph taken in Philadelphia. View of Exchange Building. Taken by Langenheim, then situated on Dock Street, who had patent right from England.
- Roberts, Charles**, Philadelphia. Sketch of residence of Joseph Roberts.
- Roberts, Septimus**, Whitpain. Picture of Joseph Roberts' barn. Dated 1781.
- Rorer, Isaac**, Frankford. Oil Painting of the Rorer homestead, Cheltenham. By X. Smith, 1859.
- Sharpless, Mrs. H. H. G.**, Shoemakerstown. Declaration of Independence, in bronze.
- Slifer, Dr. H. F.**, North Wales. Iron Relief Picture of St. John the Evangelist. Oil Painting of the human brain.
- Slingluff, Mrs. William H.**, Norristown. Colored Print of the canal in St. James' Park, London.
- Smith, Mary** (deceased). Exhibited by Russell Smith, her father, Weldon. Oil Painting. Charles F. Wilson's Rooster. Miss Smith, the daughter of Russell Smith, of Abington township, was born in 1842, and died at the age of upwards of 30. She was a resident of Montgomery County during all her art-life, in which she painted and sold three hundred pictures. Concerning the celebrated portrait of Charles F. Wilson's Rooster, we make the following extract from her biography: "On one occasion, when the sitter was shown his portrait, he at once, with bill and spur, made a most determined assault upon it; and the study still shows the gashes about the head while the paint was soft." Oil Painting. The Unwelcome Visitor. An opossum intruding upon the rabbit's feast. Oil Painting. Chickens and Cherries. Oil Painting. Ground Squirrel and Turtle.
- Smith, Russell**, Weldon. Oil Painting. Stone Bridge over Pennypack, at Hallowsell's mill. Oil Painting. Juliann's Cave, near Jenkintown. Juliann's cave was a favorite resort of Juliann Kirkbride, a literary lady of the early part of the present century. She resided with Charles Shoemaker, in the present residence of Joseph Boeler, near Shoemakerstown.

Smith, X., Weldon. Oil Painting of Rice's mill, 1860. Photograph of Rice's mill, 1880. Oil Painting of dam at Jenkintown; a very old water right. Photograph of Walton's mill. Photograph of rocks near Juliann's cave, Cheltenham; side view. Photograph of rocks near Juliann's cave; front view. Photograph of Juliann's cave, 1880.

Sower, Miss Carrie, Norristown. Six Water Colors. By the exhibitor, a great-great-granddaughter of Christoph Saur, of Germantown.

Sower, F. D., Norristown. Copper-plate Engraving. 1719.

Spencer, Mrs. Ella, Jenkintown. Old Schuylkill Bridge. Old Mission House, Santa Barbara, Cal. Oil painting on stone. Section of Bamboo. Japanese wood carving.

Stauffer, John M., Norristown. Two pictures: Capture of Major Andre, 1780; Reception of Washington at Trenton, 1789.

Stewart, Mrs. R. T., Norristown. Sketch in India ink. Political hits in the Polk campaign, done by Mrs. M. G. Huddleson. Head of Queen Esther, 75 years old.

Stinson, Miss Agnes, Norristown. Four Oil Paintings, 64 years old.

Tripler, Mrs. Jacob L., Norristown. Proof copy of Franklin at the Court of France. Two Oil Paintings. By Lulu Tripler, a girl of 13. 1884.

Tyson, Sarah H., King-of-Prussia. Series of original Paintings, in water colors, by a child named — Murray, aged 8 years.

Weinberger, Mrs. E. K., Collegeville. Pen and Ink Drawings, from 17—to 1835.

Wentworth, Mrs. George B., North Wales. Oil Painting. 1795.

Williams, Mrs., Trappe. Picture.

Yeake, William A., Flourtown. Photograph of log cabin, built in 1743; still standing.

Zearfoss, Mrs. Horace, Fairview Village. Oil Painting. Gordon Girls.

CLASS XXI.

PORTRAITS.

Beitenman, J. A., Bridgeport. Portrait of Dr. George Frederick Beitenman, grandfather of the exhibitor. Dr. Beitenman was born August 23, 1754, in Falkner Swamp, and married Maria, daughter of Matthias and Margaret Reichert, June 1, 1779. He was a physician of large practice and a citizen of great influence. He resided in Douglass township, and died September 16, 1826. He was a soldier in the Revolutionary war for a short period.

Bergey, G. R., Skippeack. Picture of General Washington, representing him standing in his tent, with a copy of the Declaration of Independence unrolled in his hand. Supposed to have been the work of a German travelling artist, of several generations back, who is known only by his Christian name of Thomas.

Buck, William J., Jenkintown. Steel engravings of Governor Keith, Mrs. Graeme, Miss Stedman, and Mrs. Ferguson. Privately printed.

Cassel, Abraham H., Harleysville. Picture and Sketch of George B. Kulp, Esq. Engraved portrait, accompanied by a historical and biographical sketch. 1880. George Brubaker Kulp is a descendant of the Kulp, of Kulpsville. He was born in Lancaster County, whither his father, Eli Kulp, removed. He is now a resident of Wilkesbarre, an eminent member of the bar of Luzerne county, was for a short time editor of the Luzerne Union, and is at present editor of the Luzerne Legal Register. He is the author of several books on law, has held important public offices, and has been instrumental in establishing institutes of learning. Portrait of Horace Greeley. Large picture, of fine workmanship, representing the famous editor in the attitude of reading the Tribune. Portrait of Rev. Michael Schlatter. Steel engraving. 1847. Schlatter was one of the first missionaries and founders of the German Reformed Church in the United States. He landed at Philadelphia in 1746, was an ardent patriot during the Revolution, and died at Chestnut Hill in 1790. Portrait of Prof. Samuel F. B. Morse, inventor of the telegraph; a large, beautifully executed steel engraving.

Cassin, William, Philadelphia. Picture of William Penn. Taken for the American Universal Magazine.

Coltman, Robert, Jenkintown. Portrait.

Corson, Elwood M., Norristown. Miniature of Washington, painted on ivory.

Corson, Dr. Hiram, Plymouth Meeting. Portrait of himself, painted by his friend and school-mate, Samuel Moon, of New Hope, in 1830, when Dr. Corson was 26 years of age. This was one of the

earliest efforts of Mr. Moon, who subsequently became very celebrated as a portrait painter. The celebrated artist, Thomas Hovenden, who painted the famous picture "Last Moments of John Brown," pronounced this portrait a specially well executed one.

Davis, Miss Bertha, Norristown. Portraits of Dr. Mears and Mrs. Dr. Mears. 1793.

Davis, Edward M., Oak Lane. Portrait of Robert Collyer.

Davis, Edward M., and wife, Oak Lane. Photograph of Lucretia Mott.

Davis, John J., Jenkintown. Silhouette of Hon. Thomas Roes, father of the late Judge Henry P. Roes. Silhouettes of James and Mary Langdale. Silhouettes of a young lady and girl.

Day, Mrs. Richard H., Philadelphia. Portrait in chalk of John Nancarrow, Jr.

Earle, Mrs. Sallie, Norristown. Dr. Duncan's Portrait. 1827.

Evans, Mrs. Rachel, Bridgeport. Portrait of the late Elieha Evans.

Fornance, Mrs. Anne B., Norristown. Daguerreotype of Hon. Joseph Fornance. Taken in 1843, at Washington, D. C., while a member of Congress from Montgomery County. Miniature Portrait on ivory. Painted by exhibitor. 1836.

Fornance, Mrs. Ellen Knox, Norristown. Portrait of "John Sober, Gent.," of Philadelphia, born in 1740, and died in 1781. Portrait of Sarah Twining Leedom, great-grandmother of the exhibitor.

Fretz, Jonas, North Wales. Profile of Christian Clemens and wife, executed eighty years ago by John Stelciner.

Groff, Samuel, Shoemakertown. Silhouettes of Henry and Barbara Nicholas. 1809.

Hallman, A. S., Norristown. Engraving. Group of authors.

Hallowell, Elizabeth, Jenkintown. Portrait of Isaiah Lukens (born August 24, 1779; died November 12, 1840), who made the Loller Academy clock.

Hallowell, Lizzie, Huntingdon Valley. Portrait of Benjamin Lay.

Harvey, Mrs. J. J. C., Jenkintown. Photograph of Robert Steel. D. D. Born near Londonderry, Ireland, January 9, 1794; came to America, 1811; graduated at Princeton College; pastor of Abington Presbyterian church from 1819 until his death, which occurred September 2, 1862.

Heiler, Miss Clara, Norristown. Three Portraits, over 100 years old.

Heller, George K., Cheltenham. Picture of Benjamin Lay.

Henry, Mrs. Rachel, Germantown. Two Daguerreotypes.

Heysham Robert, Norristown. Portrait of Ann Stuart, over 75 years old. Profile Picture of Major William Heysham, 100 years old.

Hilles, Lizzie, Port Kennedy. Portrait of Annie Moore. Painted by Elizabeth Richards.

Hovenden, Mrs. Helen C., Plymouth. Portrait of Dr. William Corson, Norristown. Oil painting by the exhibitor, niece of Dr. Corson; painted in December, 1880.

Jones, Mrs. Rachel, Broad Axe. Silhouette Picture.

Kettarar, Roman, Somerton. Portrait of William Penn.

Kirk, Edwin, Nesheaminy. Picture of George Fox.

Kohl, George M., Jenkintown. Photograph of Nicholas Kohl. Born at Curly Hill, Plumstead township, Bucks County, 1790; died August 27, 1866. Profile of Sarah Pickering, who married Israel Michener in 1786.

Landes, Mrs. J. G., Norristown. Engraving of President Buchanan. By Sartain.

Lane, Miss Rebecca, Bridgeport. Engraving of George Washington. Engraved by James Heath, Historical Engraver to His Majesty and to His Royal Highness the Prince of Wales, from the original picture in the collection of the Marquis of Lansdowne, painted by Gabriel Stewart in 1791. Purchased new in 1805, by the exhibitor's grandfather, Jesse Roberts, of Norristown, who was a soldier in the Revolutionary army, serving under General Washington, and who considered it a most striking likeness.

Leech, Mrs. Esther, Shoemakertown. Picture of the Rt. Hon. Robert Clayton, Kt., Lord Mayor of London. 1680.

Lee, Mrs. William, Port Kennedy. Portrait of Rachel Dewees, wife of Captain Bartholomew, and granddaughter of Thomas Potts; born at Valley Forge. Portrait of Captain B. Bartholomew, an officer of the Revolutionary war, and great-grandson of George Bartholomew, of the Blue Anchor.

Leister, J. Harry, Phoenixville. Lead Pencil Drawing of James A. Garfield.

Linson, Charles M., Ashbourne. Likeness of Gilbert Linson. 1814.

- Lukens, Mrs. Jawood**, Conshohocken. Miniature, on ivory, of Thomas Rutter, born in 1790. Water Color Portrait. Mrs. Owen Jones, second, Wynnewood. Water Color Portrait. Mrs. Sarah Rutter, framed in old leather. Portrait in Oil. Owen Jones, of Wynnewood, Colonial Treasurer of Philadelphia. Loaned by his great-granddaughter.
- Markley Freundschaft, The**. Oil Portrait of John Markley, of Norristown. Collector of distillery taxes, Register of Wills, Recorder of Deeds, and Sheriff in 1794. By Eicholz, 1824. Oil portrait of Philip Schwenk Markley. District Attorney, 1820; State Senator, 1819 to 1824; member of Congress, 1824 to 1828; Attorney General of Pennsylvania, 1829. By Eicholz, 1824. Water Color Portrait of Jacob Renninger, 1820. A noted school teacher of Montgomery county. Water Color Portrait of Veronica Renninger, 1820. The wife of Jacob Renninger. Oil Portrait of John Boyer, formerly President of Bank of Montgomery County, and Mary Markley, his wife.
- Mather, Mrs. Annie M.**, Jenkintown. Portrait of George Bates. 1877.
- Mather, C.**, Jenkintown. Portrait of John Mather (born 1776). By Bass Otis. Portrait of Martha P. Mather (born 1786). By Bass Otis. She was a daughter of Zebulon Potts, a Captain in the Revolution, and first Sheriff of Montgomery County. John and Martin P. Mather were the exhibitor's parents.
- Mauch, Mrs. Helen**, Conshohocken. Miniature, on ivory, of Miss Jane Kenney. Loaned by her granddaughter.
- Mears, Miss Annie DeB.**, Milestown. Picture of Benjamin Lay.
- Miles, Mrs. William**, Arumore. Portrait of Elizabeth Diehl, painted by hand in 1805. Portrait of Judge Richard B. Jones, painted when 21 years of age, at that time midshipman in the navy. He was taken prisoner to Algiers; afterwards Consul to Algiers, and Minister to Tripoli. While Judge of Montgomery county he owned and resided at Brookfield farm, in Lower Merion, now the property of Hon. Wayne MacVeagh.
- Miller, Samuel**, Jeffersonville. Profile of Mary E. Gable, cut in Philadelphia in 1827.
- Mogee, Miss**, Norristown. Portrait of Hon. John Freedly.
- Naill, Miss Annie M.**, Royersford. Very ancient Portrait.
- O'Neill, Mrs. James**, Norristown. Two Portraits, in oil, over 50 years old.
- Painter, Mrs. William**, Norristown. Picture of Capt. John Douglas.
- Pechin, John W.**, King-of-Prussia. Portrait of Mrs. Ann Pechin. King George III. Painted March 5, 1773. Queen Charlotte.
- Pomeroy, Mrs. H. S.**, Norristown. Oil Portrait of Hon. Adam Slemmer, father of the exhibitor. Painted in 1830 by J. Jay Gebhard, at Harrisburg, while Mr. Slemmer was a member of the State Legislature from Montgomery county; and when he was in the 39th year of his age. Silhouettes of Mr. and Mrs. Adam Slemmer.
- Rambo, J. R.**, Norristown. Crayon Portrait of R. Roberts Rambo.
- Ramey, Miss S.**, Norristown. Silhouette of Jacob Ranney.
- Roberts, Charles**, Philadelphia. Portrait of Charles Roberts, grandfather of the exhibitor, born in Gwynedd in 1774; member of Assembly in 1822. Photograph of Septimus Roberts, born near Gwynedd September 30, 1786; died at Mauch Chunk January 6, 1826. From a sketch by one of his pupils. Photograph of Solomon W. Roberts, Chief Engineer of the Pennsylvania railroad. Born Eighth-month 3, 1811; died Second-month 22, 1822. Also large sketch of same. Sketch of Joseph Roberts, Jr. Born March 22, 1793; died August 25, 1835.
- Roberts, Septimus**, Whitpain. Picture of Joseph Roberts, late Actuary of the Pennsylvania Company for Insurance on Lives and granting Annuities. Born March 22, 1793; died August 25, 1835.
- Roberts, Willis R.**, Norristown. Oil painting. Portrait of William M. Jamison, painted when 9 years old, formerly owner of cotton mills in Norristown; died in 1862.
- Royer, Mrs. Elizabeth**, Trappe. Photograph of Mrs. C. De-wees.
- Shainline, Jonathan**, Abrams. Old Portrait.
- Shannon, Mrs.**, Norristown. Portrait of General Andrew Porter. Born in Worcester, September 24, 1743; died November 16, 1813.
- Slingluff, Mrs. W. H.**, Norristown. Portrait of the late William H. Slingluff when 18 years old.
- Smith, Joseph**, Jenkintown. Four Photographs.
- Smith, Messrs.**, Norristown. Two Portraits, painted on wood; over 100 years old.
- Spencer, Mrs. Ella**, Jenkintown. Portrait of Elias Hicks.
- Springer, Daniel**, Royersford. Pictures of the late Wright A. Bringhurst.
- Stevens, Henry A.**, Norristown. Oil portrait of Washington. Copy of Stuart's original, done at Philadelphia in 1794, in the studio and under the care of the celebrated master, by one of his students.
- Stewart, Mrs. Eliza**, Abington. Picture of Dr. William Tennent. Very rare.
- Taney, H. D.**, Norristown. Portrait of James Winnard, first editor of the Norristown Register.
- Traut, Lewis**, Jenkintown. Silhouette of Caroline Bane. 1784.
- Tripler, Mrs. Jacob L.**, Norristown. Likeness of General Andrew Jackson. Executed at the Hermitage, by Justice E. Moore, December 28, 1841.
- Tyson, Sarah H.**, King-of-Prussia. Portrait, in oil, of Matthew Roberts; over 50 years old. Portrait, in crayon, of Hon. Jonathan Roberts. Portrait of Eliza R. Roberts, wife of the preceding. Portrait of Mordecai E. Moore.
- Weinberger, Mrs. E. K.**, Collegeville. Silhouette Portraits of Philip Kratz, Jr., and Jacob S. Kratz, grandfather and father of the exhibitor. 1812. Philip Kratz, Jr., married Elizabeth, eldest daughter of Jacob Hover, in June, 1802, and settled on what is now known as the Valley Park farm, near Plumsteadville, Bucks county, being part of a tract owned by his father, Philip Kratz, Sr., whose father, a native of Switzerland, settled below Summeytown. Jacob S. Kratz, the eldest son of Philip Kratz, Jr., married Elizabeth, the youngest daughter of William Fretz, of Bedminster, Bucks county, and owned part of his grandfather's tract of land until about 1861. He now lives with his son-in-law, Prof. J. Shelly Weinberger, on Glen farm, near Collegeville.
- Williams, Elizabeth S.**, Pittville. Photograph of Benjamin Hallowell.
- Wilson, Mrs. Dr. F. S.**, Jarrettown. Portrait of Levi Fry, grandfather of the exhibitor. Painted by Alfred B. Street, in 1804.
- Wolf, Mrs. Anstina**, Plymouth. Profile of Mary, wife of Jacob Dewese, living near Barren Hill at the time Lafayette had his soldiers in the church there, more than one hundred years ago. Exhibited by a grand-daughter.
- Yeakle, S. Y.**, Norristown. Portrait of Caspar Schwenkfeld. 1862.
- Yeakle, William A.**, Flourtown. Photograph of Caspar Schwenkfeld, made from a steel engraving.
- Young, Miss Margaret**, Trappe. Photograph of Mrs. Moer.

CLASS XXII.

VIEWS OF CHURCHES AND SCHOOL HOUSES.

- Baker, Andrew H.**, Jenkintown. Photograph of Jenkintown school. Photograph of Grace Presbyterian church.
- Buck, William J.**, Jenkintown. St. Thomas' Episcopal Church Whitmarsh; a southeast view. Drawn by the exhibitor in 1857. A Drawing of the old Goshenhoppen church, made by William J. Buck, March 25, 1858. This building was torn down that spring.

This institution of learning was conducted from 1855 to 1869 successively by C. F. Guldin, A. M., Rev. A. S. Vaughn, Rev. Charles Radford, Rev. Prof. M. A. Richards, Rev. L. C. Sheip, Rev. T. F. Hoffmeier, Prof. A. P. Suplee, and Rev. F. T. Hoover. Among its pupils during this period, who have since filled professional and public positions, were: J. Wright Apple, Esq., ex-District Attorney of Montgomery county; Rev. George B. Dechant, Catawissa, Pa.; Dr. Jonathan Faust, Ziegler'sville; Dr. A. N. Fegley, Spangsville, Pa.; Rev. Henry N. Fegley, Mechanicsburg, Pa.; Dr. Philip Fisher,

Bellefonte, Pa.; Rev. Josiah B. Fox, Emlenton, Pa.; Rev. William B. Fox, Summerville, Pa.; Rev. N. B. Grubb, Philadelphia; Rev. S. M. K. Huber, Skippack, Pa.; Prof. H. G. Hunter, Birdsboro, Pa.; Rev. Charles Keeler, Missouri; Amos K. Kepner, Adjutant of the One Hundred and Twenty-fifth Regiment United States Infantry, C. T., Quartermaster and Commissary at Fort Bayard, N. M. (built Fort Bayard while stationed there, since December 31, 1867, a merchant in Philadelphia); Rev. Daniel K. Kepner, Pottstown, Pa.; Dr. Septimus A. Knips, New Hanover, Pa.; the late Prof. Levi M. Koons, Boyertown, Pa.; Rev. William Landis, Beaver Springs, Pa.; Dr. Thomas H. Leidy, Boyertown, Pa.; Prof. Henry F. Leister, Phoenixville, Pa.; Rev. J. G. Neiffer, Lima, O.; George S. Nyce, D. D. S., Frederick, Pa.; Hon. Samuel E. Nyce, ex-member of the Legislature from Montgomery county; Rev. Josiah S. Benninger, Slatington, Pa.; the late Rev. Ephraim A. Shelp, Rebersburg, Pa.; Rev. L. C. Shelp, Doylestown, Pa.; J. M. Shellenberger, ex-District Attorney of Bucks county; Rev. B. S. Smoll, Klinesville, Pa.; Rev. D. M. Statler, Beavertown, Pa.; Rev. Zwingli A. Yearick, Aaronburg, Pa.; Prof. J. E. Yoder, Supervising Principal of the Freedman's Schools at Lynchburg, Va.

Eckard, L. W., Abington. Picture of Presbyterian church, Abington; old building. The church was founded in 1714. Picture of Presbyterian church, Abington; new building.

Fleck, Mrs. George, Jenkintown. Photograph of Episcopal church, Jenkintown.

Holstein, Dr. George M., Bridgeport. Two Photographs of Swedes' church.

Mears, Mrs. Annie DeB., Milestown. Picture of the old building of Armitage school house. 1791. Photograph of new building of Armitage school house. Mrs. Mears furnishes the following account of this educational institution, which is now known as Ellwood public school, and is located at Milestown, in the Twenty-second ward, Philadelphia:

This property, containing about three quarters of an acre, with a small stone house, was a gift from Benjamin Armitage, Sr., to five trustees from Bristol township and one from Cheltenham, September 6, 1761. The first named trustees were Joseph Spencer, Derick Lukens, Joseph North, Nathan Thomas, Caleb Armitage, and Isaac Leech, of Cheltenham. There are no accounts of the first thirty years. In 1790 Dr. George DeBenneville, Jr., was appointed to fill a vacancy and made Secretary, which he held until his death, December 20, 1850. There are many interesting incidents connected with the school from this time, which have been regularly recorded in a book used for that purpose, in my possession, but too lengthy to be recited here.

The first religious services held in this neighborhood were begun in the old school house in the beginning of 1800. Rev. Samuel Henry, of Germantown; Rev. George Sheets, of (Trinity) Oxford; and other ministers of various denominations, preached on Sunday afternoons, according to appointment. In 1809 Rev. John Bachman was a teacher at the school, having succeeded Alexander Wilson, the ornithologist, and preached his first discourse here. He afterwards became rector of St. John's Lutheran Church, at Charleston, S. C., where he remained fifty-five years. He died at an advanced age.

The price of schooling was \$1.50 per quarter. In 1819, after the Octagon school house was finished, it was advanced to the sum of \$2, after much opposition in the neighborhood.

In 1867 the property was transferred to the Board of Education, to be continued for the purposes named in the deed by the donor. The present new house was erected by the Board of Education in 1875.

Copy of a school bill I have in my collection of the old accounts:

Received this 21st day of the 1st mo. 1789 of George DeBenneville Eight shillings and Four pence in full for a Quarters Schooling which expired the 8th of 3d month.

Yr m

ISAAC SAMMS.

£ s. d.

0 8 4

Nancy DeBenneville's schooling.

NOTE.—My aunt, Nancy DeBenneville, was 6 years old at the time this bill was rendered. Isaac Samms died of yellow fever in 1793, while a teacher at the school.

Moss, Franklin, Jenkintown. Oil Painting of Audenried school house.

Pomeroy, Mrs. H. S., Norristown. Engraving of St. James' Episcopal church, Evansburg; founded in 1721.

Roberts, Charles, Philadelphia. Sketch of Gwynedd meeting house Sketch of Plymouth meeting house.

Shoemaker, Robert, Shoemakertown. Public school, Camptown. **Smith, X.**, Weldon. Oil Painting of octagonal school house, near McDowell's old paper mill. Hon. Samuel D. Ingham went to school here in the last century. He was the Secretary of the Treasury under Jackson; also member of Congress from Bucks county.

Thompson, Mary L., Jenkintown. Photograph of Audenried school house.

Wentz, Daniel, Fort Washington. Photograph of St. Thomas' church, built in 1710.

Wilson Family, The, Jenkintown. Photograph of Presbyterian church. Photograph of Abington Friends meeting.

Yost, Miss Julia, Collegeville. Crayon Drawing of old Lutheran church, Trappe.

Young, Miss Anne, Lower Merion. Portrait of Llewellyn Young, grandfather of exhibitor; over 100 years old.

CLASS XXIII.

RITTENHOUSE CLOCKS AND SCIENTIFIC INSTRUMENTS.

Corson, Walter H., Plymouth. Surveyor's Level, made by David Rittenhouse.

Egolf, Gus, Norristown. Clock, made by David Rittenhouse about the year 1765.

Homer, Samuel, Norristown. Surveyor's Compass, made by David Rittenhouse; in complete working order, and in as good condition as when new.

Schutt, Jacob, Prospectville. Rittenhouse Clock, made by Benjamin Rittenhouse; date unknown. Bought soon after the Revolutionary war by exhibitor's grandfather, Henry Wismer, who lived on the banks of the Schuylkill, in Lower Providence.

United States Mint, Philadelphia. Scales, in mahogany case, made by David Rittenhouse when he was Director of the Mint, or previous to that time. At his death they passed into the possession of James Margrave, silver-smith, who subsequently became a coin broker, and had his office at the corner of Chestnut and Third streets. At his death they passed into the possession of C. A. Paulson. At his death they were sold at public auction, December 19, 1866, and purchased by Dr. George Hamilton, who presented them to the United States Mint in 1871. On the case is the inscription: "Balance and Case, made by Dr. Rittenhouse, as Director of the United States Mint, and in use during his official term, 1792 to 1795. Presented by Dr. George Hamilton, November, 1871."

University of Pennsylvania, Philadelphia. Great Orrery, made by David Rittenhouse.

Walker, Sarah S., Abrams. Rittenhouse Clock, 24-hour, winds with chain, and shows the day of the month; made by Benjamin Rittenhouse. It was purchased at a sale of personal property of Isaac Eastburn, a resident of Upper Merion, who died in 1861, at the age of 82 years. It belonged to his father, John Eastburn.

Weber, George M., Worcester. Rittenhouse Surveyor's Compass, 1789. Still in complete working order, and used in practice; also, the original wooden box, of unique design and workmanship, for holding the compass when not in use. Both were for a long time the property of Rev. George Wack, a prominent citizen of Montgomery county.

Zimmerman, Mrs. Elizabeth, Providence Square. Clock, made by Benjamin Rittenhouse for his own use. At his death it was purchased by Harmon Custer, grandfather of the exhibitor, who used it until his death in 1800, when Henry Custer became its owner. It was retained by him until his death on August 8, 1837, when his daughter and sole heir, the exhibitor, inherited it. It has stood in its present place, in Worcester, about one mile from Providence Square, since Harmon Custer brought it there; and it has always been in good running order, and has kept time correctly. It has a brass face, and month, hour, minute and second hands. The month hand moves once a day. It has a revolving moon, which moves one a day, completing its round with the moon in the heavens. On the left side of the face it has a slide, which, when moved down,

prevents its striking without interfering with any of the running parts. In the centre of the face are the words, "Benjamin Rittenhouse, Worcester, Fecit." It also bears the Latin phrase, "Nemo omnibus horis sept tempus fugit." It has no date.

CLASS XXIV.

ARMS AND EQUIPMENTS.

- Abraham, Thomas D.,** Abrams. Sword, used by Joseph Abraham in the Montgomery county militia.
- Bates, Cornelius,** Jenkintown. Two Horse Pistols, flint locks. Pocket Pistol, flint lock.

- Weikel, John**, Collegeville. Confederate Money.
- Weinberger, Mrs. E. K.**, Collegeville. Continental Currency, in bills of one-third dollar, \$2, \$4, \$6, \$7, \$8, and \$30.
- Weingartner, William**, North Wales. Dollar pieces, 1799, 1800. Half Dollar pieces, 1812 to 1838.
- Wilgus, Samuel B.**, Horsham. Half Dollar and Ten-cent Notes.
- Williams, Mrs. M. J.**, Jarrettown. Piece of Paper Money, 1776.
- Williams, Thomas**, Pittville. Continental Paper Money.
- Wolf, George**, Plymouth. Two Foreign Coins. American Cent, 1797.
- Wurfflein, Mrs. John**, Edge Hill. German Silver Coin, made in time of the Emperor Francis Joseph of Austria. Case of Silver Coins, 1847 to 1865.

CLASS XXVII.

HERBARIUM OF THE FERNS AND FLORA OF THE COUNTY.

- Cottman, Mrs. J. F.**, Jenkintown. Book of Natural Flowers, prepared in 1859; remarkable for preserving colors.
- Harvey, Mrs. Margaret B.**, Ardmore. Collection of twenty-eight varieties of Ferns found growing in Montgomery county, dried and nicely mounted on paper in groups, including the following:

Polypodium, *Polypodium vulgare*; Maiden hair, *Adiantum pedatum*; Brake, or Bracken, *Pteris aquilina*; Cliff Brake, *Pellaea atropurpurea*; Ebony Fern, *Asplenium ebenoides*; Wall Rue Fern, *Asplenium Ruta muraria*; Spleen-wort, *Asplenium angustifolium*; Larger Spleen-wort, *Asplenium thelypteroides*; Lady Fern, *Asplenium Filix-foemina*; Walking Fern, *Campocorus rhipophyllus*; Beech fern, *Phegopteris hexagonoptera*; Swamp Shield fern, *Aspidium Thelypteris*; New York fern, *Aspidium Novboracense*; Spring Shield fern, *Aspidium Spinulosum*; Crested fern, *Aspidium cristatum*; Shield fern, *Aspidium Goldianum*; Wood fern, *Aspidium marginale*; Christmas fern, *Aspidium acrostichoides*; Bladder fern, *Cystopteris fragilis*; Sensitive fern, *Onoclea sensibilis*; Woodsia, *Woodsia Ilvensis*; Dicksonia, *Dicksonia punctilobula*; Royal fern, *Osmunda regalis*; Clayton's fern, *Osmunda Claytoniana*; Cinnamon fern, *Osmunda cinnamomea*; Grape fern, *Botrychium Virginicum*; Moonwort, *Botrychium lunarioides* (variety, obliquem); Moonwort, *Botrychium lunarioides* (variety, dissectum).

Sixty-nine pencil drawings of Wild Flowers of Montgomery County, viz.:

SPRING FLOWERS.

GROUP I.

Trailing arbutus, *Epigaea repens*; Liverleaf, *Hepatica triloba*; Wild hyacinth, or blue bottle, *Muscari racemosum*; Blood root, *Sanguinaria Canadensis*; Spring beauty, *Claytonia Virginica*; Rue anemone, *Thalictrum anemonoides*; Wood anemone, *Anemone nemorosa*; Golden coryualis, *Corydalis flavula*; Dutchman's breeches, *Dieentra cucullaria*.

GROUP II.

Quaker ladies, *Houstonia cœrulea*; Dog tooth, *Erythronium Americanum*; Violet sorrel, *Oxalis violacea*; Columbine, *Aquilegia Canadensis*; Tooth root, *Dentaria laciniata*; Wild geranium, *Geranium maculatum*; Cinquefoil, *Potentilla Canadensis*; Solomon's seal, *Polygonatum giganteum*; Jack-in-the-Pulpit, *Arisæma triphyllum*.

GROUP III.

Violets.

Common purple violet, *Viola cucullata*; Sweet-scented white violet *Viola blanda*; Heart-leaved violet, *Viola cordata*; Arrow-headed violet, *Viola sagittata*; Hand-leaved violet, *Viola palmata*; Yellow violet, *Viola pubescens*; Striped violet, *Viola striata*; Bird-foot violet, *Viola pedata*; Dog violet, *Viola canina*.

SUMMER FLOWERS.

GROUP I.

Buttercups, *Ranunculus acris*; Daisies, *Leucanthemum vulgare*; Azalea, *Azalea nudiflora*; Laurel, *Kalmia latifolia*; Blue flag, *Iris versicolor*; Cockle, *Lychnis githago*; Indian physic, *Gillenia trifoliata*; Partridge berry, *Mitchella repens*; Wild rose, *Rosa blanda*.

GROUP II.

Spider wort, *Tradescantia Virginica*; Venus' looking-glass, *Specularia perfoliata*; Wild lily, *Lilium superbum*; Wild pink, *Dianthus armeria*; Starry campion, *Silene stellata*; Bouncing Bet, *Saponaria officinalis*; Indian pipe, *Monotropa uniflora*; Shin leaf, *Pyrola elliptica*; Pipe-weep, *Chimaphila maculata*.

GROUP III.

Orchids.—Showy orchis, *Orchis spectabilis*; Twayblade, *Liparis lilifolia*; Adam and Eve, *aplactrum hyemale*; Fringed orchis, *Habenaria laevis*; Rattlesnake plantain, *Goodyera pubescens*; Ladies' tresses, *Spiranthes gracilis*.

AUTUMN FLOWERS.

GROUP I.

Butterfly plant, *Asclepias tuberosa*; Cone flower, *Rudbeckia hirta*; Wild sunflower, *Helianthus strumosus*; Cardinal flower, *Lobelia cardinalis*; Golden rod, *Solidago*; Blue and white asters, *Aster*; Closed gentian, *Gentiana Andreweii*; Touch-me-not, *Impatiens fulva*; Evening primrose, *Oenothera biennis*.

GROUP II.

Snap-dragon, *Linaria vulgaris*; Arrow-head, *Sagittaria variabilis*; Blue lobelia, *Lobelia syphilitica*; Virgin's bower, *Clematis Virginica*; Gerardia, *Gerardia tennifolia*; Man-of-the-earth, *Ipomœa pandurata*; Monkey flower, *Mimulus alatus*; Tick trefoil, *Desmodium nudiflorum*; Shell flower, *Chelone glabra*.

CLASS XXVIII.

MINERALS AND FOSSILS.

- Boorse, John C.**, Kulpville. Petrified Wood, from the Rocky Mountains and Towamencin.

- Brunner, S. U.**, North Wales. See Slifer, Dr. H. F.
- Eberle, The Misses**, Oak Lane. Copper Ore, found on the farm of Capt. George Eberle, father of the exhibitors, while quarrying stone about the year 1850.
- Elkinton, George**, Blue Bell. Petrified Snakes.
- Hallman, Mrs. Henry**, Trappe. Petrification.
- Kohl, George J.**, Jenkintown. Specimens of Mica, found near Jenkintown, on the line of the North Pennsylvania railroad. About two hundred Minerals and Geological Specimens, native and foreign.
- Lowe, Mrs. T. S. C.**, Norristown. Quartz Crystal, found near Perkiomen.
- Moyer, Amos**, Trappe. Petrification.
- Peterman, Frederick**, Collegeville. Petrified Clam, from Chesapeake Bay.
- Slifer, Dr. H. F.** (from his museum in Prof. S. U. Brunner's academy), North Wales. Fluorspar, from Cumberland, England. Sapphire, from Ceylon. Coral, from China and Australia. Gold, from California. Lead, from Galena. Amethyst. Silver Ore, from Colorado. Copper Ore, from Lake Ontario. Alabaster, Garnet. Moss Agate, Pyrite, Crystal Quartz, Smoked Quartz, Arsenic, Antimony, Blood Aspis, Blue Lapis, Jasper, Agate, Onyx, Carnelian, Labradorite. Fish Lias. Three pieces of Petrified Wood. Fossil Fish.
- Tyson, Samuel**, King-of-Prussia. Large Quartz Crystal, weighing nine pounds, from Upper Merion township. Calamine, from Sussex county, N. J. Group of Quartz Crystals, from Dauphiny, France. Group of Quartz Crystals, Chalcho pyrite, from Ellenville, Ulster county, N. Y. Dolomite, from Phoenixville, Pa. Garnets, from Musse Alps, Piedmont. Fluorite, from Cumberland, England.

CLASS XXIX.

MISCELLANEOUS ARTICLES.

- Abraham, Thomas D.**, Abrams. Product from exhibitor's paper mill, 1884.
- Albertson, J. M. & Sons**, Norristown. Glass, the product of exhibitors' works.
- Anders, George H.**, Norritonville. Section of the first Atlantic cable. Piece of the great wall of China. Piece of Sponge, used by George Washington.
- Arnold, Edwin C.**, Norristown. Piece of Wood from the floor of the Washington headquarters, where the corner-stone was laid June 18, 1878. Magnetic Time-Keeper and Compass.
- Atkinson, Robert**, Bryn Mawr. Tape Measure, 200 years old.
- Auge, Miss E. M.**, Norristown. Tin Case, a holder for documents. Relic of the Haytien insurrection, 1798.
- Bates, William**, Bridgeport. Dog Collar, 101 years old.
- Bean, Edward**, Jeffersonville. Shaft Coubling; a Norriton invention.
- Beard, John**, Norristown. Side Saddle, 77 years old.
- Bisson, Jane**, Three Tuns. Paper Cutter, 75 years old. Letter Stamp and Sealing Wax, each 75 years old.
- Blackfan, Mrs. Joseph**, Norristown. Telescope and Eye-glass.
- Boorse, Henry R.**, Kulpeville. Brace and Bits.
- Boorse, John C.**, Kulpeville. Door Lock and Key. The lock is $7\frac{1}{4}$ inches wide and 12 inches long; the key weighs one pound, and the ring is silver-plated. It is said that it is one of the locks of the old court house at Norristown, and that it was obtained there by David C. Kulp, ex-Commissioner of Montgomery county.
- Bosch, Enos**, Norristown. Box, made in the year 1504. Yard Stick inslaid; made in France thirty years ago.
- Besler, Joseph**, Shcemakertown. Acorn, found in an old wall; about 100 years old.
- Brant, Ann**, Jenkintown. Two Shoe Lasts, over 100 years old.
- Brunner, S. U.**, North Wales. See Slifer, Dr. H. F.
- Buckman, Mrs. Thomas**, Jenkintown. Watchman's Rattle.
- Cassel, Abraham H.**, Harleysville. Wooden Jar, from the drug store of Christopher Sauer, Germantown. In 1782 Christopher Sauer built a fine house in Germantown, the finest then there, and established a laboratory and drug store (for he had studied medicine in Germany). He needed jars, but had none, and could not procure any, none being then made in this country, and there were no facilities to import them at that time. Under these circumstances he applied to Heinrich Frey, a very ingenious turner, who made a supply, turning them out of wood in the form of jars, of three sizes, in capacity about one, two and four quarts. This one, being of the one-quart size, came into the hands of the exhibitor. Block of Wood,

- from the Id elm tree under which William Penn made his first treaty with the Indians in 1682. This tree stood until 1811, when it was blown down by a great storm; it was hollow, and so much decayed that but little solid or sound wood could be obtained from it. Some of the best, it is said, was sold at the time for a dollar a pound. Sample of Egyptian Mummy Cloth, supposed to be 3000 years old. Assorted colored French Letter Paper, from Napoleon Bonaparte.
- Cassel, Isaac R.**, North Wales. United States Flag. Lincoln's campaign, 1860. Badge, worn by German soldiers in the Franco-German war. Doll Baby, used by the exhibitor in childhood.
- Conard, A. & I.**, Fort Washington. Card of Augers and Auger Bits, manufactured in Montgomery county; modern.
- Cook, Walter H.**, Norristown. Lock of Washington's Hair.
- Cope, O. W.**, Hatboro. Bronze figure of Sacred Bull, surmounted by a musical instrument; a Chinese family god, 1000 years old. Japanese Pillow, made of bamboo. Vase, made of hammered brass; from Paris. Inner Bark of a tree, from the South Sea Islands; used as cloth by the natives. This and the foregoing three articles are the property of S. R. Bowman, Philadelphia. Dinner Bell, dated 1622; brought from England by the grandfather of the present owner. The property of John Thompson, Horsham.
- Corson, S. Cameron**, Norristown. Five designs for the new City Hall, Philadelphia.
- Craft, Mrs. Jacob**, Norristown. Pen Holder, over 100 years old.
- Cresson, Mary J.**, Norristown. Inslaid Table, made in 1883.
- Davis, Benjamin**, Jenkintown. Bone, from nose of saw-fish: from Florida.
- Davis, B. P.**, Norristown. Seven nickel-plated Horse Shoes.
- Davis, Edward M., Sr.**, Oak Lane. Sun Dial, made by Alexander Wilson in 1800.
- Davis, John J.**, Jenkintown. Pattens, for walking in mud; brought from Wales. Stone Hone, found in Horsham, with the date of 1765 cut in it.
- Davis, Master Wille**, Jenkintown. Belt. At one time the property of Edwin Forrest, the tragedian.
- Dettra, Norris**, Oaks. Knife, found in a quarry at Oaks; supposed to be old.
- Detwiler, Jones**, Blue bell. Newspaper Wrapper, 1807. Wrapping Paper, used in 1807. Old Pen Knife and Quilla. Old heavy iron Lead Pencil Case. Sun Dial and Compass, made in Mexico; very old. Sun Glass. Pen Knife, made in 1834. Folding Watch Key, with needle. Two iron Tomahawks, carried by the old volunteer rifle companies. One of the first patterns Steel Pens with case and holder. One of the first patterns Gold Pens, with diamond point.
- Devair, John**, Port Providence. Seal, found three feet under ground, in the cellar of an old fort, one and one fourth miles from Valley Forge.
- Drumbower, Mrs. Elias**, Frederick. Burnt clay Tile, made in 1869 by "F. B."
- Egolf, Gus**, Norristown. Two Globes, made in 1800 and 1802.
- Emery, John**, Cheltenham. Watchman's Rattle.
- Evans, Gertrude**, Hatboro. Memorial Button. Seed Bag, made of mimosa seed by the native girls of Honolulu. Presented to the exhibitor by Consul Rozevelt, of New Zealand, six years ago.
- Evans, Mrs. Rachel**, Bridgeport. Mason's Square, dated 1654.
- Felton, Mrs. Joseph**, Jenkintown. Door Pull, dated 1707. From an old meeting house near Frankford.
- Fitzwater, Mrs. Joseph**, Port Providence. Saddle Bags, 100 years old.
- Fornance, Mrs. Ellen Knox**, Norristown. Plan of Currant Hill plantation, or Knox farm, Norristown, dated 1823. Fire Board, from Col. Knox's house.
- Fornance, Joseph**, Norristown. Two Rejected Plans, offered for the court house, Norristown, 1849.
- Frederick, John**, Douglass. Cannon Ball, found in a field; supposed to have been used before the Revolution.
- Gallagher, Patrick**, Plymouth. Old Wheel, found in Plymouth creek.
- Garsed, Mrs. Robert P.**, Norristown. Camel's Beard, cut from the animal at Senphophor. Owned by Mrs. L. W. Read.
- Geller, J. S.**, Lansdale. Show case of Notions, &c. modern.
- Gibbs, Mr.**, North Wales. Case, made from a joist of the room where the Declaration of Independence was signed.
- Griffin, Mrs. Samuel**, Oaks. Doll, in a dress fifty years old.
- Gross, S. S. Jr.**, Norristown. Three cases of Insects.
- Haines, J. B.**, Cheltenham. Reeled Silk, from two hundred and ninety-seven cocoons.

- Hallman, William F.,** Skippack. Electric Apparatus. Stock and Disc, made sixty years ago by John Ziegler, of Perkiomen.
- Harper, Mrs. Smith,** Fox Chase. Knife and Fork to Cut Friendship. Romance of 1788.
- Heckler, James K.,** Harleysville. Serpents in Liquor.
- Hewitt, Charles,** Jenkintown. Old Staple Padlocks, from England.
- Hobensack, Mrs. J. C.,** Willow Grove. Case of stuffed Birds, Snakes, Animals, &c.—41 birds, 3 snakes, 4 squirrels, 1 weasel, etc.—all killed in Montgomery county, and stuffed and prepared by the exhibitor.
- Homer, Morris,** Willow Grove. Three Nets, to catch wild pigeons: Made by William Homer, the exhibitor's grandfather, about 1790, with which he caught many thousands of pigeons on his farm previous to the year 1824. Said William Homer died January 31, 1860, aged nearly 93 years.
- Homer, William,** Norristown. Model of old-time Saw Mill.
- Iredell, Phoebe,** Norristown. Silk Banner, made by the ladies of Norristown in 1840.
- Ironbridge Hatter's Association, The,** Ironbridge. Forty four Hat Bodies, of different colors, put up in a circle. Forty-two Stiff Hats, black, blue, brown, nutria, pearl, maple, and doe-colored. Cassimere Hats, in four colors. Police Helmets and Soft Hats, in different styles and colors. Three kinds of Furs—French hare, cony and beaver.
- Johnson, Benjamin,** Norristown. Saw, very old.
- Jones, Henry,** Ambler. Scales for weighing Continental money.
- Keller, Mrs. Henry,** North Wales. Two Whale's Teeth, from the Southern seas. In owner's possession forty years. Walrus Tooth.
- Kenderdine, Mrs. Lavina,** North Wales. Side Saddle, 1775.
- Kepler, Miss Eliza,** North Wales. Pound Cake, made Christmas, 1776.
- Kettarar, Roman,** Somerton. Carriage Lock, 70 years old. Set of Dumb Bells, 60 years old. Wagon seat from Pale Outter. Horse Shoe Pattern. Wagon Box, hand-made. Two old-fashioned Groove Planes. Yak Shoe, from Hong Kong. Two pairs of Handcuffs, Buckle, from England. Four different Bits. Chinese Mouse Trap. Thirteen different Stirrups. Potato Bug Destroyer. Two Lanterns. 120 years old. Nineteen different Padlocks. Five different Cow Bells. Thirty-seven sets of Sleigh Bells. Large Horse Shoe, from England. Key, which unlocks seven locks. Two Gigs, 176 and 142 years old. Two Dogs and Dog Wagon. Old Flag.
- Kibblehouse, Mrs. Kate,** Blue Bell. Brass Mortar.
- Kile, Mrs. Francis,** North Wales. Bottle of Canned Cherries, put up in 1862.
- Knlpe, Irvin P.,** Norristown. Panel of Sounding Board, under which Patrick Henry delivered his speech, ending "Give me liberty or give me death."
- Kohl, George M.,** Jenkintown. Fungus Bracket, made by the owner. Razor, 130 years old. Presented to owner by John Walker.
- Kulp, Elias K.,** Lederachville. Apothecary Balances and Weighs—made by the late Isaac Kulp, of Perkiomen. The single cords of the balances were spun by him of silk of his own culture.
- Kulp, Henry D.,** Lucon. Work Bench, Letter Cases, and Bottle Stand, made by the late Isaac Kulp, uncle of the exhibitor.
- Landes, Mrs. J. G.,** Norristown. Books, dated 1792 and 1822.
- Leckard, Miss Ann,** Jenkintown. Yard Stick, made from the cradle in which the great-great-grandparents of the present owner were rocked.
- Lowe, Mrs. T. S. C.,** Norristown. Old Chinese Devotion Bell. Antique Chessmen, from India; 400 years old. Italian Violin, 1516. The scroll is said to have been carved by Benvenuto Cellini, in his 16th year. Emu Egg, from Tasmania. Case of models of the most celebrated Diamonds. Case of Florentine Mosaics. Two Mosaic Table-tops, Italian marble.
- McCool, Charles P.,** Jenkintown. Golden Eagle, shot near Jenkintown, in November, 1881, in John S. Newbold's woods.
- Mann, Jesse,** Pittville. Horse Shoe. Old-fashioned Brake for runaway horse.
- Markley Freundshaft, The.** Hammer and Nail Mould of John Markley, 1780. Surveyor's Compass of Benjamin Markley, 1776. This instrument was used in many important surveys in Montgomery county from 1776 to 1819. Now owned by Hon. B. Markley Boyer. Exhibit of Family Relics, belonging to the descendants of Jacob and Barbara Markley, of Skippack, 1722; in two glass cases and a walnut and gilt frame, draped with maroon curtains; the commandments: "Honor thy father and thy mother, that thy days may be long upon the land which the Lord thy God giveth thee," in large letters, stretched across the frame. A pamphlet genealogy of the Markley family was distributed gratuitously. The several articles exhibited are included in the general classification.
- Mather, Miss Jane,** Philadelphia. Cup, from the treaty made at Machinery Hall, 1876, from wood furnished by exhibitors.
- Mears, Anne DeB.,** Milestown. Ostrich Egg, brought from India by the exhibitor's uncle, John DeBonneville, in 1820. He visited Calcutta that year, and while watching some ostriches which were near, he saw the hen cover something in the sand. He examined the hole, and found this egg, which he brought home, and which now belongs to the exhibitor.
- Moore, Annie L.,** Cheltenham. Paint Box, containing paints, etc.
- Moore, Edwin,** Port Kennedy. Fire Boards, with paintings of Valley Forge and exhibitor's residence. By Elizabeth Richards, artist.
- Moore & Ervien,** Shoemakertown. Two Carriages, T Cart, and light cut-under Rockaway; modern.
- Moyer, Mrs. Charles,** Broad Axe. Leather Case, for a dagger, made in 1736.
- Nash, Thomas,** Jenkintown. Hickory Home, made in Scotland over two hundred years ago.
- Nice, Mrs. Thomas,** Jenkintown. Doll, "Black Hannah," aged 99; never had a new dress.
- Noble, Franklin,** Jenkintown. Brick, out of the house in which Jefferson wrote the Declaration of Independence. Razor, used by Charles Carroll, of Carrollton.
- Overholtzer, Mrs. John,** Bridgeport. Emu Egg, brought from Tasmania. Stuffed Pea Fowl.
- Pechin, John W.,** King-of-Prussia. Carriage, 100 years old; owned by Peter Pechin.
- Pomeroy, Mrs. H. S.,** Norristown. Model Pump, carried in a temperance procession forty-five years ago, and a Banner, carried by General Adam J. Slemmer in same parade.
- Prince, Lewis, Sr.,** Norritonville. Pitchfork.
- Reed, Dr. W. H.,** Jeffersonville. Soapstone Image, dug up at Centre Square; supposed to have been worshipped by the aborigines.
- Reiff, Jacob D.,** Skippack. Bash Fastener, patented and invented by the owner.
- Rex, Jacob L.,** Blue Bell. Stone Call, found on the farm two weeks since.
- Rex, Mary S.,** Blue Bell. Curling Tongue, owned one hundred and twenty-five years ago by Levi Rex, of Chestnut Hill, and used by him, as was the custom of that day, for curling his side whiskers.
- Riding, William,** Norristown. Three Model Looms; exhibitor's own work. Heddle, patented in the United States, England and France.
- Rieg, John,** Jenkintown. Case of Butterflies and Moths, 115 specimens; and a case of Butterflies, Moths and Beetles, 72 specimens. All captured or reared at Jenkintown.
- Rittenhouse, Benjamin,** Norristown. Scroll Work, by a boy 15 years old.
- Roberts, Septimus,** Whitpain. Horns of Texas steer, sent by Scott Wentz; modern. Pump Box, 75 years old. Set of Carpenter's Tools—saw, square and bevel, nearly 100 years old. Hammer and Trowel, 100 years old. Horse Bopple and Horse Sock. These were used before horse companies were known. Old iron spur. Tailor's Shears. Belonged to William Lawrence, Whitpain. Horseshoer's Hammer. Ruler. Property of Alexa der Scott, exhibitor's grandfather. Tobacco Box, over 100 years old; from Wales. Barber Chair.
- Rue, Louisa,** Norristown. Sea Fern, pulled from a rock by a sailor off the coast of China, one hundred years ago.
- Satterthwait, Edwin,** Jenkintown. Saddle Bags, used by Abel Satterthwait many years ago.
- Sharpless, Mrs. H. H. G.,** Shoemakertown. Knife, from South Carolina.
- Shearer, Mrs. E. Norris,** Jeffersonville. Coat-of-Arms of the Norris family, over 100 years old; executed by Mrs. Charles Norris, who died before finishing it.
- Slifer, Dr. H. F.** (from his museum in Prof. S. U. Brunner's academy), North Wales. Piece of brick from old Swede's church. Piece of the hand-rail of the Mayfl. war. Pieces of Plymouth Rock. Piece of Olive Wood from the Garden of Gethsemane. Piece of Olive Wood from Mount Olivet. Piece of Wood from the portico of Mount Vernon. Wheat, of the third growth, from an Egyptian mummy. English Horse Shoe; large, and has been used. Spanish

- Spur. One hundred and seventeen different kinds of Wood. Star Fishes, of different kinds and sizes. Two Sea Horses. Stones from Potsdam in Germany, Holland, France, the Coliseum at Rome, Pompeii, the Danube river, Berlin, the Catacombs of Rome, and Venice. Black Bread, from Germany. Box, from Palestine. Portion of lead which lined the coffin of President Abraham Lincoln. Vegetable Ivory. Crystals, from the Palace of Frederick the Great.
- Slingluff, Mrs. William H.**, Norristown. Head of Napoleon; used as a stopper for a cologne bottle. Dr. Franklin's Card. Pistol of Captain Jack, who shot Custer.
- Slingluff, Mrs. W. F.**, Norristown. Three Fire Buckets.
- Smith, William G.**, Norriton. Sun Dial, made in 1723.
- Solomon, Mrs. William**, Norristown. Knife, over 100 years old.
- Sower, F. D.**, Norristown. Two Norristown Fire Buckets, 1830.
- Spencer, Mrs. Ella**, Jenkintown. Japanese Back Scratcher. handle of fish bone; hand of Ivory. Rings.
- Stiteler, Mrs. Edwin**, Gulf Mills. Uniques and Ornaments, made from wood which was taken from the headquarters of Lafayette at Gulf Mills. Beads, brought from Japan by Stephen Mitchell, on the ship Niagara, in 1861.
- Stong, George**, Worcester. Broad Axe, 100 years old.
- Stong, Mrs. Phillip**, Worcester. Steelyard, dated 1730.
- Stout, Mrs. S. K.**, Norristown. Dog Cane, cut by a fugitive slave. Cane, made from a log from the cabin used by General Washington at Valley Forge, in 1797 and 1778.
- Strassburger, Mrs. J. A.**, Norristown. Plate 100 years old.
- Summers, Aaron H.**, East Greenville. Wooden Candelstick, made from a piece of wood taken from the first six-cornered church (Lutheran), built in 1760, in Upper Hanover township; again used, in rebuilding in 1803, and part of it now in the new church, built in 1877.
- Supplee, Samuel**, Bridgeport. Cannon Ball, weighing twenty pounds; plowed from the farm in 1864.
- Thomas, Mrs. Abel**, Royersford. Sissors Chalm.
- Thompson, Mary L.**, Jenkintown. Small Flag, for teaching form and color in primary schools.
- Tyson, Mrs. Canby S.**, Weldon. Wooden Doll, 108 years old.
- Tyson, Samuel**, King-of-Prussia. Broad Axe, supposed to be 150 years old.
- Wack, Mrs. N.**, Jenkintown. Parchesi Board.
- Walker, E. H.**, Jarretstown. Collection of Shells from China.
- Walton, Harry C.**, Blue Bell. Rule, formerly owned by Hon. John B. Sterigers.
- Walton, Miss Jane**, Philadelphia. Cup, from the treaty elm made at Machinery Hall, Centennial exhibition, 1876, from wood furnished by exhibitor.
- Walton, John**, Horsham. Iron Door Knocker, from a house in Horsham; 100 years old.
- Wampole, Dr. William H.**, North Wales. Display of Dentistry.
- Watt David**, Norristown. Bottle of Vinegar.
- Wear, Mrs. Joseph**, Upper Merion. Tidy. Sampler.
- Webster, Mrs. Sarah**, Jenkintown. Small brass Weights and Scales, believed to be 200 years old.
- Wentz, Thomas**, Fort Washington. Three Tiles, taken from a house, near Fort Washington, occupied by the exhibitor.
- White, George**, Broad Axe. Swordfish's Tail, very old and odd; Sword of a swordfish, very old.
- Williams, Thomas**, Pitville. Horse Shoe, made in 1884.
- Wilson, D. A.**, Norristown. Specimen of Printing by the exhibitor, to show the progress made by his race. Printed without instructions, having learned the art by self practice.
- Wolf, William**, Norristown. Apparatus for dyeing yarn, recently invented modeled in brass.
- Wolfe, Dr. Samuel**, Shippack. Lead Pencil, found among the effects of the late George Seipt, of Worcester, father of A. H. Seipt, of Shippack. It is a conical piece of metallic lead, half an inch long, attached to a wooden handle four inches long. Exhibited to show the great contrast between it and the convenient pencil of our day.
- Yost, Henry**, Collegeville. Small Head, carved in stone from Mexico.
- Young, Samuel, Sr.**, Norristown. Saw and Steel yards 125 years old. Ship Carpenter's Adze, 150 years old. Drawing Knife, 150 years old.
- Zimmerman, Esther**, Norristown. Snuff Box, made from the elm tree under which William Penn made his treaty with the Indians.
- Zimmerman, Frank**, Norristown. Graduating Rule.
- Zimmerman, Maria**, Norristown. Box of Money Scales and Weights.
- Zinnel, Josephine**, Case of Stuffed Birds, over 100 years old.

The total number of exhibitors at this Antiquarian Exposition was 1,240. This is a very flattering testimonial as to the success of the enterprise, that so many persons took an interest therein. At the great Centennial Exposition and World's Fair, in Philadelphia, in 1876, the total number of exhibitors reached 30,864, and were distributed among fifty countries of the world. The United States headed the list with 8,175 exhibitors. Thus it will be seen that our exhibitors exceeded one-twenty-fifth of the total number at the Philadelphia exposition and one-seventh of those from the United States.

PROCEEDINGS OF COURT.

At the June term, 1884, of the Court of Quarter Sessions of the Peace of Montgomery County, his Honor B. Markley Boyer presiding, the Report of the Grand Jury was read, which concludes as follows:

This Grand Jury is the last that will hold its sessions under the rules of this Court, during the first century of the county of Montgomery. The members composing the present inquest therefore deem it a subject of congratulation, that for the period of one hundred years, the public peace within the jurisdiction of this Court has been uninterrupted by violence, and that the laws of the land have been faithfully executed by the several Courts and executive officers of the county.

WALTER H. CORBON, Clerk.

NORMAN EGBERT, Foreman.

After the report had been read by Edward Schall, Esq., Clerk of Courts, John W. Bickel, Esq., District Attorney, presented the following

MEMORIAL MOTION.

To the Honorable B. Markley Boyer, President Judge of said Court:

The regular June term of the several courts now in session, is the last one that will occur during the first century of the history of Montgomery County. The peaceful observance of the laws of this Commonwealth has been uninterrupted, within its limits, for the period of one hundred years. Therefore, counsel for the Commonwealth moves this Honorable Court, upon hearing, to direct a proper entry to be made of the following minutes in commemoration of the close of the Judicial century, as a suitable memorial of the event, to wit:

That in the administration of public justice, and the due execution of the laws this Commonwealth by an impartial judiciary and a bar learned in the law, aided by the service of incorruptible jurors, the true object and end of civil government have been attained, as witnessed in the security of life, the enjoyment of liberty, the protection of property, the repression of crime, and in the peace and permanency of society.

JOHN W. BICKEL, District Attorney.

Addresses suitable to the occasion were made by John W. Bickel, Esq., General John H. Hobart, the senior member of the bar, Irving P. Wanger, Esq., and Colonel Theodore W. Bean. At the conclusion of which, his Honor B. Markley Boyer responded in appropriate remarks, and directed the motion to be spread in full upon the records of the Court as a lasting memorial of the event.

By the Court.

Edw. SCHALL, Clerk.

FINANCIAL EXHIBIT.

TREASURER'S REPORT.

To the Centennial Association of Montgomery County.

It is not necessary for the Secretary and Treasurer of your Finance Committee to explain the plan adopted by that committee to raise the money for the expenses of the centennial anniversary, or the manner in which it was celebrated. You are familiar with both. The favorable condition of the finances proves the wisdom of the plan, and attests the care with which it was managed.

Total receipts, \$6216.93; total expenditures, \$4825.43; balance on hand, \$1391.50.

The following is a statement of the moneys collected:

ADVANCE SALE OF TICKETS AND CERTIFICATES.

Boroughs and Townships.—Norristown, \$660.70; Pottstown, \$50.60; Bridgeport, \$61; Conshohocken, \$98.50; East Greenville, \$8.10; Green

Lane, 90 cts.; Hatboro', \$1; Jenkintown, \$25; Lansdale, \$26.10; North Wales, \$68; Royersford, \$15.30; West Conshohocken, \$41.40; Abington, \$50; Cheltenham, \$216; Douglass, \$13.50; Franconi; Frederick, \$24; Gwynedd, \$104.10; Hatfield, \$5.40; Horsham, \$53.10; Lower Merion, \$174.20; Lower Providence, \$52.20; Lower Salford, \$12.60; Limerick, \$7; Marlborough, \$4; Moreland, \$19.80; Montgomery, \$27; New Hanover, \$31.50; Norriton, \$92; Perkiomen, \$185.40; Plymouth, \$58.50; Pottsgrove, \$2.80; Springfield, \$94.50; Towamencin, \$15.30; Upper Dublin, \$64.80; Upper Hanover (included in East Greenville); Upper Merion, \$102.60; Upper Providence, \$153; Upper Salford, \$7.20; White-marsh, \$152.50; Whitpain, \$78.30; Worcester, \$75.60. Collected personally by Joseph Fornance, F. G. Hobson and J. A. Strassburger, \$685.

OTHER SOURCES.

Collected from railroad tickets and rebates, \$442.27; gross receipts at entrance door, etc., \$1509.39; gross receipts from public sale, \$527.88; gross receipts from refreshment stand, \$101.79; total, \$6216.93.

The following is a statement of the expenditures:

By cash paid for stationery and postage, \$178.11; by cash paid for expressage, \$35.09; by cash paid for teams, \$128.75; by cash paid for traveling expenses, \$7.77; by cash paid for newspaper items, \$6.75; by cash paid for music, \$348.50; by cash paid for insurance, \$93; by cash paid for entertainment of Indians and dinner for employees, \$54.50; by cash paid for printing, \$328.43; by cash paid for wages and hauling, \$1280.61; by cash paid for incidentals, \$103.56; by cash paid for contribution to Official Record, \$100; by cash paid for certificates, merchandise, lumber, carpenter-work, rent of tent, etc., \$1924.36; by cash paid for Rittenhouse monolith, 227; by cash paid for auditing expenses, \$9. Total expenditures, \$4825.43. Balance in hand, \$1391.50. All of which is respectfully submitted.

J. A. STRASSBURGER, Secretary and Treasurer of Finance Committee, Centennial Association of Montgomery County, Pa.

AUDITORS' REPORT.

To the Centennial Association of Montgomery County:

We, the undersigned Auditors, appointed by the President of the Centennial Association of Montgomery County, which appointment was ratified by the Executive Committee of said Association, to audit and adjust the accounts of Jacob A. Strassburger, Esq., Secretary and Treasurer of the Finance Committee, make the following report:

Jacob A. Strassburger to the Centennial Association.

DE.

To total amount received from all sources, as itemized in full in the Treasurer's report, \$6216.93.

OR.

By cash paid for various bills, as itemized in the Treasurer's report, \$4825.43. Balance in Treasurer's hands, \$1391.50. And have found the accounts of the Secretary and Treasurer, Jacob A. Strassburger, Esq., correct in charge as well as discharge.

PHILIP SUPER,	} Auditors.
H. W. KEATZ,	
THOMAS WILLIAMS,	

Norristown, December 23, 1884.

DISPOSAL OF FUND.

At the final meeting of the Centennial Association, held January 8, 1885, the balance remaining in the hands of the Financial Secretary was disposed of as follows: Indebtedness of Historical Society, \$157.00; eight copies of Official Record presented, \$20.00; sundry bills paid, \$11.01; to the Historical Society of Montgomery County, in trust, to be invested in good real estate security, the principal sum to remain intact, and the interest only to be used for the purposes of the society, \$1,203.49. Total, \$1,391.50.

ALL RIGHTS RESERVED

DEDICATION

This work is dedicated to three individuals who have given untiringly of their time and energy to the historical pursuits of Montgomery County:

Hon. Alfred L. Taxis, Jr.
William B. Daub
Donald A. Gallagher, Esq. (Deceased)

ACKNOWLEDGEMENTS

The senior compiler of this Everyname Index began the project in 1977, in his "spare time." Along the way, several individuals have contributed to the activities. Apart from the other two co-compilers (my wife and father-in-law), my children (William, Julia, Michael, and Elizabeth) have given me much help in copying and assembling the volumes for distribution to selected libraries.

I am indebted to Dr. Dennis U. Harken, Executive Director of the Montgomery County Intermediate Unit 23 (formerly the Montgomery County Superintendent of Schools Office), who allowed certain resources to be used as part of this historical/educational effort. For example, an older generation microcomputer was lent for use by my father-in-law for entering the index entries into an alphabetized format and eventually into a computer printout. Copying was also made available. In this regard, the Everyname Index is an extension of another major, historical educational project with which the Intermediate Unit played a major part: coordinating the writing of all the educational sections for the update to the 1884 Bean work (Montgomery County; The Second Hundred Years; 1984; Toll & Schwager, Editors). The senior compiler's involvement in the latter effort substantially delayed his intensive work on the Everyname Index. Since all of these activities had to be carried out after work hours and on weekends, the progress was not as swift as he would have desired.

I am also deeply grateful to Mr. Richard R. Brickley, Director of one of the Intermediate Unit's projects (RISE--Research and Information Services for Education). Mr. Brickley assisted me by making available the computer software for the computer indexing (Stoneware's "DB Master"). He gave generously of his personal time and expertise in helping this computer indexing to proceed smoothly.

INTRODUCTION:

The senior compiler conceived this work in the mid-1970s. He had gone through the reprint of the 1884 Bean History of Montgomery County innumerable times in reviewing various general topics, as well as biographies of certain persons. It became increasingly clear that there was a treasure trove of genealogical data in the 1884 Bean work. Unfortunately, virtually all of this data was inaccessible in that no index was available. A particular case in point is the fine-print military lists of the Civil War. Also many little nuggets of valuable genealogical data are buried in almost every corner of the Bean work--some, in unexpected places.

For many years, the senior compiler has been interested in Montgomery County genealogy, primarily because of his wife's family roots in this County, and the Greater Philadelphia Area in general. Because of the fact that many Montgomery County families originally had roots in the City of Philadelphia, the Bean work also reveals much genealogical data of interest on Philadelphia-linked families.

For these reasons, the senior compiler approached the Society formally in 1977 to ask whether they would be interested in his undertaking of this indexing project, with the intention of donating the index (including its copyright) to the Society upon completion.

The senior compiler began work on this index in 1977. He was also joined in the actual indexing by his wife, the former Helen Marie McMahon.

It is the hope of the compilers that this Everyname Index will be of help to genealogical researchers in gaining new information on the individuals for whom data is being sought. Good luck!
